DFI2000NYC

A Global Perspective on Urban Deep Foundations

TWENTY-FIFTH ANNUAL MEETING AND EIGHTH INTERNATIONAL CONFERENCE AND EXHIBITION

5 – 7 October 2000

The Roosevelt Hotel
New York City
USA

Deep Foundations Institute
120 Charlotte Place, Third Floor
Englewood Cliffs, New Jersey USA
Tel: +1 201 567 4232
Fax: +1 201 567 4436
dfihq@dfi.org
www.dfi.org

DFI wishes to thank the European Federation of Foundation Contractors. EFFC has been instrumental in fortifying DFI's international perspective, and has partnered with DFI to help provide the global scope that we had hoped for this Conference Program.
## INDEX OF PAPERS

1. **SESSION I – How Geology Has Driven Foundation Practice Worldwide**

1.1 **Design and Construction Constraints Imposed by Unique Geologic Conditions in New York City** .................................................. 3
   George J. Tamaro, James L. Kaufman & Abu Arif Azmi, Mueser Rutledge Consulting Engineers, New York, USA

1.2 **Design and Construction Imposed by Unique Geological Conditions in Paris, Milan, and London** ........................................ 23
   Chris Harnan, Ceecom Ltd., UK; Daniel Gouvenot, Soletanche Bachy SA, Nanterre, France; Xavier Laloum & Olivier Vacher, Ecole des Mines de Paris, France; Marco Bertero, Trevi SpA, Italy

1.3 **New York City - A Review of Various Foundation Problems and Solutions** .................................................................................. 33
   Mel Febesh, Urban Foundation/Engineering LLC., New York, USA

1.4 **Deep Foundations in Hong Kong** ........................................ 69
   Martin Pratt, Nick M. Walsh & Siva Arunachalam, Bachy Soletanche Group Ltd., Hong Kong; Stephen Young, Ove Arup & Partners (HK) Ltd., Hong Kong; Peter Sunderland, Atkins China Ltd., Hong Kong

1.5 **Use of the Observational Method (Best Way Out) to Allow Driven Pile Installation in Chalk** ............................................. 87
   Paul Morrison, Arup Geotechnics, UK; Mike Tutt, Roger Bullivant Ltd., UK; Mike Ryan, Laing Project Management

2. **SESSION II – Industry Trends and Up and Coming Innovations**

2.1 **Reflections on our Industry** .................................................. 99
   Arturo Ressi di Cervia, Trevilcos Corp., New Jersey, USA

2.2 **Trends in Deep Foundations in Europe** ............................... 109
   R. Stenne, Intrafor, France
2.3 Innovation in South East Asia ........................................... 115
Brian Littlechild, Glen Plumbridge & Stephen Hill, Ove Arup & Partners,
Hong Kong; Martin Pratt, Bachy Soletanche Group, Hong Kong

2.4 History of Foundation Pile Driving Hammers in New York
City, 1900 to 2000 ................................................................. 127
James S. Graham, Larry F. Johnsen & Jon J. Jagello, Heller and Johnsen,
Connecticut, USA

2.5 Innovations in Scandanavia ................................................. 145
Carl-John Gravare, Pile Dynamics Europe AB, Sweden

2.6 New Concepts for CFA (Auger Cast) Pile Controle ............... 151
Shachar Magali, Tomer Sensing Systems Ltd., Israel

2.7 Skilled Operative Training for the Foundation Industry .......... 165
Geoffrey Birch & Colin Williams, Bachy Soloetanche Training Unit, England

2.8 JFKIA - Post Grouted Drilled Shafts and Driven
Piles – Update ................................................................. 169
Walter G. Brusey, Port Authority of New York and New Jersey, USA

2.9 Foundations for Light Buildings on Lime/Cement
(L/C) Columns ................................................................. 181
Per Eriksson, NCC AB, Gothenburg, Sweden; Hakan Eriksson, Hercules
Grundlagning AB, Sweden

2.10 A Decade of Concrete Embedded Walls in UK .................. 187
Robert Fernie & Michael C. Putnam, Kvaerner Cementation Foundations
Ltd., UK

2.11 Axial Load Capacity of Steel Pipe Piles in Sand: A Review of
the API Method ............................................................... 205
Sanjeev Malhotra, Parsons Brinckerhoff Quade & Douglas Inc.,
New York, USA

2.12 Tension Tests on Driven Pipe Piles in Sand ................. 219
Alan J. Lutenegger & Shawn P. Kelley, University of Massachusetts, USA
2.13 Biodegradable Hydraulic Fluid in the Deep Foundation Industry ................................................................. 227
S.H. Miller, C.R. Scharf & M. E. Miller, Terresolve Technologies, Ltd.,
Ohio, USA

2.14 Vibwall Installation - Cardiff Bay Barrage ........................................ 235
Graeme McWhirter, Kvaerner Cementation Foundations Limited, UK

2.15 Static and High Strain Dynamic Test Co-Relation Studies on Cast-in-Situ Concrete Bored Piles ................................. 245
N.V. Nayak, Gammon India Limited, India; D.K. Kanhere, Maharashtra State Road Development Corp. Ltd., India; Ravikiran Vaidya, Geo Dynamics

2.16 Installation of Bored Pile Casings through an Asbestos Tip by Rotary Displacement ........................................ 253
Lewis Stansfield, Bachy Soletanche Limited, UK

2.17 Capacity of Piles and Settlement of Pile Foundations .............. 259
Mait Mets & H. Torn, GIB Ltd., Estonia

2.18 Dynamic and Static Loading Tests of Piles for Bridges in Surinam ........................................................................ 265
W.J. van Niekerk, Ballast Nedam Grond en Wegen, Netherlands; J.P.G. Ramler, Ballast Nedam Engineering, Netherlands; P. de Kort, Ballast Nedam Funderingstechnieken, Netherlands

2.19 A Cut and Cover in Stiff Clay in Eurre-France .............................. 273
R. Stenne, Intrafor, France

2.20 Case Histories of Geo-Column™ Foundations ............................ 279
Osamu Taki, SCC Technology, Inc., California, USA

2.21 The Soilex Pile System ................................................................. 291
Erik Westerberg, Soilex AB, Stockholm, Sweden

2.23 Press-in Piling: The Influence of Plugging on Driveability ....... 299
David White, Haramrita K. Sidhu, Tim C.R. Finlay & Malcolm D. Bolton, Cambridge University, Cambridge, UK; Teruo Nagayama, Giken Seisakusho Ltd., Kochi, Japan

2.24 A Study of Three Test Sites Comparing Theoretical Ultimate Pile Capacities, Static Pile Load Tests, and Pseudo Static Pile Load Test Results ......................................................... 311
Richard D. Short & Yogesh Prashar, Kleinfelder, Inc., California, USA
3. **SESSION III – Foundation Techniques in the Urban Environment**

3.1 **Structural Movement and Ground Settlement Control for a Deep Excavation within an Historic Building** ........................................... 321
   Martin J. Kenwright, Robert A. Dickson & Rab Fernie, Kvaerner Cementation Foundations Ltd., UK

3.2 **An Innovative Foundation Technology for the Construction of Retaining Walls in Urban Areas** ................................................................. 337
   F. Pagliacci, TREVI Group, Cesena, Italy; Marco Bertero, TREVI SpA, Italy

3.3 **Connecting Railway Lines in Vienna with Underground Structures** ........................................... 345
   Rudiger Wunsch, Bilfinger + Berger Bauaktiengesellschaft, Mannheim, Germany

3.4 **When Real Estate Values Beckon – The Means and Methods Employed in the Underpinning of 1501 Broadway** ......................... 353
   Edward J. McNamara & Andrew J. Burns, Underpinning & Foundation Constructors, Inc., New York, USA

3.5 **Design and Construction of Bored Piles and Diaphragm Wall for MHA Headquarters Complex, Singapore** .......................... 365
   N.S. Yet, L&M Foundation Specialist Pte. Ltd., Singapore; P.H. Lim, PWD Consultants Pte. Ltd., Singapore

3.6 **Design and Construction of the Deep Stations for the Copenhagen Metro** ........................................ 375
   David R. Beadman, Bachy Soletanche Ltd., Godalming, UK; Richard P. Bailey, Maunsell Ltd., UK

3.7 **Pin Piles for Structural Underpinning** ........................................... 389
   Seth L. Pearlman, Nicholson Construction Co., Pennsylvania, USA

3.8 **Deep Soil Stabilization using Lime Cement Columns** ......................... 401
   Melvin I. Esrig, Consulting Engineer, New Jersey, USA; Edward P. Forte, Stabilator USA, New York, USA; Peter E. MacKenna, Underpinning & Foundation Constructors, New York, USA

3.9 **Practical Aspects of Compensation Grouting** ........................................... 411
   Philip J.H. Ball, Kvaerner Cementation Foundations, UK
3.10 Operator Independent Installation of Lime Cement (L/C) Columns
Tobias Hansson & Hakan Eriksson, Hercules Grundlaggning AB, Sweden

3.11 Minimising the Environmental Impact of Construction Dewatering
Peter Jackson, Bachy Soletanche, Denmark; Anne Gordon, COMET Copenhagen, Denmark; John Frederiksen & Nina Vendelboe, Ramboll, Copenhagen, Denmark

3.12 Underpinning with Steel Pipe Piles
Pasi Korkeakoski, Tampere University of Technology, Finland; Jouko Lehtonen, Rautaruukki Oyj, Finland; Reino Heikinheimo, Turun Viatek Oy

3.13 The Use of Micropiles in Estonia
Tia Ruben, Restor Ltd., Estonia; Mait Mets & Urjo Eskel, GIB Ltd. Estonia

3.14 A Proposed Model for Soil/Auger Interaction during Installation of Screw Piling Augers
Jim W. Slatter & Julian P. Seidel, Monash University, Australia; William Kingwell, Vibropile (Aust.) Pty. Ltd., Australia

3.15 Full-Scale field-test studies on driveability and induced ground vibrations of Vibratory Driven Sheet Piles
Kenneth Viking & Anders Bodare, Royal Institute of Technology (KTH), Sweden

3.16 Vibration Environmental Effect of Construction Operations
Mark R. Svinkin, VibraConsult, Cleveland, USA; A. Gordon Shaw & David Williams, The OZA Group, Canada

4. SESSION IV – Notable International Projects

4.1 Special Foundation Technique for the Intersection of Two Canals near Magdeburg, Germany
Wolfgang G. Brunner, Bauer Equipment, Germany

4.2 Newfoundland Transshipment Project: Design-Build Construction of Oil Tanker Wharf using Permanent Steel Jackets
Alun J. Davies, Peter Kiewit Sons’ Co. Ltd., Toronto, Canada

4.3 Charles Grimes Bridge Foundations, Melbourne, Australia
Charles Pol Vuiller & Slav Tchapak, Vibro-pile (Aust) Pty Ltd., Australia
4.4 Examples of the use of Temporary Works Soil Nailing in the UK and Ireland .......................................................... 529
Martin J. Pedley, Kvaerner Cementation Foundations Ltd., UK

4.5 Site Solutions for the Pisa Tower Remediation .................. 539
Paolo Heiniger, TREVI SpA, Cesena, Italy

4.6 Compensation Grouting under Real-Time Monitoring, Rio Piedras Project, San Juan, Puerto Rico .................. 547
Jean-Pierre Hamelin & Laurent Lavene, Soletanche-Bachy, Nanterre, France; Jean-Ghislain LaFonta, SolData, Nanterre, France

4.7 Pile Load Testing at JFK International Airport .................. 559
Joel Moskowitz, Mueser Rutledge Consulting Engineers, New York, USA; Ray Sandiford, The Port Authority of New York and New Jersey, USA; Stanley Merjan, Underpinning and Foundation Constructors, Inc., New York, USA

4.8 Case History: Deep Soil-Cement Mixing at the I-90/I-93NB Interchange on the Central Artery/Tunnel Project, Contract C09A7 at Fort Point Channel Site, Boston, MA .................. 569
Robert Jakiel, SMW Seiko, Inc., Massachusetts, USA

4.9 Deep, Large Diameter Bored Piles in Hong Kong, Two selected cases ............................................................ 597
Yvone Franco Crosato, VIBRO (H.K.) Limited, Hong Kong

4.10 Cast Insitu Piling for the Kings Wharf Project, Sydney, Australia ................................................................. 625
Slav Tchepak & Yahya Nazhat, Vibro-pile, Australia
