Codes and Designs

Proceedings of a conference honoring
Professor Dijen K. Ray-Chaudhuri
on the occasion of his 65th birthday

The Ohio State University
May 18—21, 2000

Editors

K. T. Arasu
Á. Seress

Walter de Gruyter · Berlin · New York 2002
# Table of contents

Preface ................................................................. v

Ákos Seress  
Highlights of Dijen Ray-Chaudhuri’s research ......................... 1

K. T. Arasu, Henk D. L. Hollmann, Kevin Player, and Qing Xiang  
On the $p$-ranks of GMW difference sets ................................ 9

Sejeong Bang and Sung-Yell Song  
Characterization of maximal rational circulant association schemes ........ 37

Michel Deza  
Face-regular polyhedra and tilings with two combinatorial types of faces .... 49

J. F. Dillon  
Geometry, codes and difference sets: exceptional connections ............... 73

Jeffrey H. Dinitz and Douglas R. Stinson  
A singular direct product for bicolorable Steiner triple systems .............. 87

Dominic Elvira and Yutaka Hiramine  
On semi-regular relative difference sets in non-abelian $p$-groups ............ 99

Nick C. Fiala  
Every $\lambda$-design on $6p + 1$ points is type-1 .......................... 109

Christian Fremuth-Paeger and Dieter Jungnickel  
An introduction to balanced network flows ............................. 125

Derek W. Hein and Yury J. Ionin  
On the $\lambda$-design conjecture for $v = 5p + 1$ points ..................... 145
Hadi Kharaghani and Vladimir D. Tonchev  
On a class of twin balanced incomplete block designs .......................... 157

Jon-Lark Kim and Vera Pless  
Decoding some doubly-even self-dual [32, 16, 8] codes by hand .............. 165

Donald L. Kreher and Rolf S. Rees  
On the maximum size of a hole in an incomplete $t$-wise balanced design with specified minimum block size ................................. 179

Warwick de Launey  
On a family of cocyclic Hadamard matrices ........................................ 187

Akihiro Munemasa  
A mass formula for Type II codes over finite fields of characteristic two ..... 207

Erin J. Schram  
A posteriori probability decoding through the discrete Fourier transform and the dual code ................................................................. 215

Mohan S. Shrikhande  
Subdesigns of symmetric designs ....................................................... 237

Irfan Siap  
Linear codes over $F_2 + uF_2$ and their complete weight enumerators ........ 259

N. J. A. Sloane  
On single-deletion-correcting codes ................................................. 273

Zhe-Xian Wan  
Critical problems in finite vector spaces .......................................... 293

Richard M. Wilson  
Existence of Steiner systems that admit automorphisms with large cycles .... 305

Andrew J. Woldar  
Rainbow graphs .................................................................................. 313
