B20 WLAN
Tuesday 30 April 2002—3:30 pm

B20-1 A Posteriori Control of Complex Reed Solomon Decoding with Application to Impulse Noise Cancellation in HIPERLAN2.......................................................... 659
Fatma Abdelkefi, Pierre Duhamel, Florence Alberge, Laboratoire des Signaux et Systèmes, France

B20-2 Simplified Soft-Output Demapper for Binary Interleaved COFDM with Application to HIPERLAN/2 ............................. 664
Filippo Tosato, University of Padova, Italy; Paola Bisaglia, Hewlett-Packard Laboratories, UK

B20-3 Battery-Efficient Architecture for an 802.11 MAC Processor .......................................................... 669
Kanishka Lahiri, Sujit Dey, University of California at San Diego, USA; Anand Raghunathan, NEC USA, USA

B20-4 Optimal MAC-Layer Fairness in 802.11 Networks .......................................................... 675
Timucin Ozugur, Alcatel Research and Innovation Center, USA

B21 Spread Spectrum-3
Tuesday 30 April 2002—3:30 pm

B21-1 Block-Adaptive Kernel-based CDMA Multiuser Detection .......................................................... 682
S. Chen, L. Hanzo, University of Southampton, UK

B21-2 Stability and Control of Mobile Communication Systems with Time-Varying Channels .......................................................... 687
Robert Buche, Harold J. Kushner, Brown University, USA

B21-3 On the Performance of MC-CDMA with Interleaved Concatenated Coding and Interference Cancellation for High-Rate Data Transmission .......................................................... 694
Padam L. Kafie, Abu B. Sesay, University of Calgary, Canada

B21-4 An Enhanced Correlation Matrix Estimation Scheme for Blind Adaptive MMSE Receiver .......................................................... 699
Wanshi Chen, Ericsson Wireless Communications, USA; Urbashi Mitra, University of Southern California, USA

B22 Fading Channels
Tuesday 30 April 2002—3:30 pm

B22-1 Correlated Nakagami Channels with Different Fading Parameters: A Generic Characterization with Applications .......... 704
Q. T. Zhang, City University of Hong Kong, Hong Kong

B22-2 Design of Wide-Sense Stationary Sum-of-Sinusoids Fading Channel Simulators .......................................................... 709
Marius F. Pop, MD Robotics, Canada; Norman C. Beaulieu, University of Alberta, Canada

B22-3 Optimal Estimation of Training Interval for Channel Equalizations .......................................................... 717
Dongyan Chen, Yiguang Hong, Kishor S. Trivedi, Duke University, USA

B22-4 Linear Models and Capacity Bounds for Continuous Phase Modulation .......................................................... 722
Kevin C. Yu, Andrea J. Goldsmith, Stanford University, USA

B23 Transmit Diversity
Wednesday 01 May 2002—8:50 am

B23-1 Blind Channel Identification for Multicarrier CDMA Systems with Transmit Diversity .......................................................... 727
Wei Sun, Lucent Technologies, USA; Hongbin Li, Stevens Institute of Technology, USA

B23-2 Efficient Weight Vector Representation for Closed-Loop Transmit Diversity .......................................................... 732
Keun Chul Hwang, Kwang Bok Lee, Seoul National University, Korea
B23-3  On the Markovian Approximation for Block-Errors in DS-CDMA Transmissions over Slow Fading Channels with Multicarrier Transmit Diversity ................................................................. 737
Mario R. Hueda, National University of Cordoba, Argentina

B23-4  Merging DS-CDMA (with CI Chip Shapes) and Oscillating-Beam Smart Antenna Arrays: Exploiting Transmit Diversity, Frequency Diversity, and Directionality.............................................. 742
Seyed Alireza Zekavat, Carl R. Nassar, Colorado State University, USA
Steve Shattil, Idris Communications, USA

B24 Ultra Wide Band Systems-1
Wednesday 01 May 2002—8:50 am

B24-1  Multistage Frequency-Hopping Assisted Ultra-Wideband Multiple-Access Communications ........................................................................................................... 748
Lie-Liang Yang, Lajos Hanzo, University of Southampton, UK

B24-2  The Importance of Fractional Bandwidth in Ultra-Wideband Pulse Design ...................................................................................................................... 753
Matthew Welborn, John McCorkie, Xtremespectrum, Inc., USA

B24-3  Performances of Impulse Train Modulated Ultra-Wideband Systems .............................................................................................................................. 758
Xiaojing Huang, Yunxin Li, Motorola Australian Research Center, Australia

B24-4  Performance of Low-Complexity Rake Reception in a Realistic UWB Channel ............................................................................................................. 763
Dajana Cassioli, Francesco Vatalaro, University of Rome “Tor Vergata”, Italy
Moe Z. Win, Andreas F. Molisch, AT&T Laboratories Research, USA

B25 Coding-1
Wednesday 01 May 2002—8:50 am

B25-1  Source and Joint Source-Channel Decoding of Variable Length Codes .................................................................................................................. 768
M. Jeanne, J. C. Carlach, France Télécom R&D, France
P. Siohan, IRISA-INRIA, France; L. Guivarch, Agreen Tech SA, France

B25-2  Performance of a Turbo Coded System with DPSK Modulation Using Enhanced Decoding Metrics and Matched Channel Side Information ........................................................................................................................................... 773
Charles C. Wang, Dean J. Sklar, The Aerospace Corporation, USA

B25-3  Optimal Design of Trellis Coded Quantization Based on Reliability Information of Turbo Trellis Coded Modulation ........................................................................... 778
Yao-Jun Wu, Haruo Ogiwara, Nagasaki University of Technology, Japan

B25-4  Huffman Tree Based Metric Derivation for a Low-Complexity Sequential Soft VLC Decoding .................................................................................. 783
Lisa Perros-Meilhac, Catherine I.amy, Philips Recherche France, France

B26 Space-Time Processing
Wednesday 01 May 2002—10:40 am

B26-1  Linear Prediction Receiver for Differential Space-Time Modulation over Time-Correlated Rayleigh Fading Channels ............................................................................... 788
Cong Ling, Nanyang Technological University, Singapore; Xiaofu Wu, Peking University, China

B26-2  Blind Space-Time Constrained Minimum Variance Detection of DS/CDMA Signals ................................................................................................. 792
A. K. S. Al-Bayati, Shankar Prakriya, Surendra Prasad, Indian Institute of Technology, India

B26-3  Noncoherent Space—Time Equalization .......................................................................................................................... 797
Robert Schober, Pas S. Pasupathy, University of Toronto, Canada

B26-4  Multislot Estimation of Space-Time Channels .................................................................................................................. 802
O. Simeone, U. Spagnolini, Politecnico di Milano, Italy
B27 Ultra Wide Band Systems-2

Wednesday 01 May 2002—10:40 am

B27-1 Block-Spreading Codes for Impulse Radio Multiple Access through ISI Channels ......................................................... 807
Li Qing Yang, Georgios B. Giannakis, University of Minnesota, USA

Young C. Yoon, University of Waterloo, Canada; Ryuji Kohno, Yokohama National University, Japan

B27-3 Multiple Access Design for Impulse Radio Communication Systems ................................................................. 817
Maria Stella Iacobucci, Maria-Gabriella Di Benedetto, Università degli Studi di Roma “La Sapienza”, Italy

B27-4 Wavelet-based Sequential Monte Carlo Blind Receivers in Fading Channels with Unknown Channel Statistics ........... 821
Dong Guo, Xiaodong Wang, Columbia University, USA; Rong Chen, University of Illinois at Chicago, USA

B28 Coding-2

Wednesday 01 May 2002—10:40 am

B28-1 Effect of Spatio-Temporal Channel Correlation on the Performance of Space-Time Codes ................................. 826
C. Fragouli, N. Al-Dhahir, W. Turin, AT&T Shannon Laboratories, USA

B28-2 Optimal Power Control and Source-Channel Coding for Delay Constrained Traffic over Wireless Channels .......... 831
Timothy Holliday, Andrea Goldsmith, Stanford University, USA

B28-3 Unequal Error Protection Design Using Convolutional Codes ................................................................. 836
Vip Desai, Brian Classon, Yufei Wu Bkankenship, Motorola PCSRL, USA; John Johnson, Motorola Labs, USA

B29 Multiple Antenna Systems-2

Wednesday 01 May 2002—1:40 pm

B29-1 SIR Balancing for Multiuser Downlink Beamforming—A Convergence Analysis .......................................................... 841
Holger Boche, Martin Schubert, Heinrich-Hertz-Institut für Nachrichtentechnik Berlin GmbH, Germany

B29-2 Non-coherent MLSE Detection for CDMA Multiple-Antenna Systems ................................................................. 846
Andrea Abrardo, University of Siena, Italy

B29-3 Performance of Downlink Beam Switching for UMTS FDD in the Presence of Angular Spread .................................. 851
Thomas Baumgartner, Thomas Neubauer, Ernst Bonek, Technische Universität Wien, Austria

B29-4 Accurate Evaluation for M-Phase Signaling over Arbitrary Correlated Fading Channels ........................................... 856
Yao Ma, S. Pasupathy, University of Toronto, Canada; Q. T. Zhang, City University of Hong Kong, Hong Kong

B30 Multicarrier Systems-1

Wednesday 01 May 2002—1:40 pm

B30-1 Multiuser Subcarrier and Bit Allocation along with Adaptive Cell Selection for OFDM Transmission .................. 861
Yingjun Zhang, K. B. Letaief, The Hong Kong University of Science and Technology, Hong Kong

B30-2 New Results on the Peak Power of OFDM Signals Based on Oversampling .......................................................... 866
Masoud Sharif, California Institute of Technology, USA; Mohammad Gharavi-Alkhansari, Tarbiat Modarres University, Iran
Babak H. Khalaj, Sharif University of Technology, Iran

B30-3 Novel Multicarrier Implementation of FSK for Bandwidth Efficient, High Performance Wireless Systems .............. 872
Balasubramaniam Natraj, Carl R. Nassar, Colorado State University, USA; Steve Shattil, Idri Communications, USA

B30-4 A Multicarrier Basestation Receiver Using a Delta-Sigma Oversampling A/D Converter ........................................... 877
K. B. Weber, W. Skones, R. Hamden, C. Talbott, M. Keller, K. Johnson, D. R. Martin, M. Kintis, I. Robinson, TRW Space and Electronics, USA
B31 Wireless Networks-1
Wednesday 01 May 2002—1:40 pm

B31-1 Power Control with Partially Known Link Gain Matrix
Riku Jäntti, University of Vaasa, Finland;
Seong-Lyun Kim, Information and Communications University, Korea

B31-2 Performance of a Wireless Data Network with Mixed Interactive User Workloads
N. K. Shankaranarayanan, Zhimei Jiang, AT&T Laboratories Research, USA
Anupam Rastogi, University of Texas at Austin, USA

B31-3 Improving Load Balancing Mechanisms in Wireless Packet Networks
Giuseppe Bianchi, Ilenia Tinnirello, University of Palermo, Italy

B31-4 An Adaptive Modulation Method for Multicast Communications of Hierarchical Data in Wireless Networks
Chan-Soo Hwang, Yungsso Kim, Samsung Advanced Institute of Technology, Korea

B32 Channel Modeling
Wednesday 01 May 2002—3:30 pm

B32-1 Clustering of Scatterers in Mobile Radio Channels—
Evaluation and Modeling in the COST259 Directional Channel Model
Henrik Asplund, Ericsson Radio Research, Sweden
Andreas F. Molisch, Neelsh B. Mehta, AT&T Labs Research, USA
Martin Steinbauer, Technische Universität Wien, Austria

B32-2 Joint Detection-Estimation of Directional Channel Parameters Using the 2-D Frequency Domain
SAGE Algorithm with Serial Interference Cancellation
C. C. Chong, D. I. Laurenson, S. McLaughlin, University of Edinburgh, UK
C. M. Tan, M. A. Beach, A. R. Nix, University of Bristol, UK

B32-3 Channel Characterization for CDMARake Receiver Design for Urban Environment
Hassan M. El-Sallabi, Pertti Vainikainen, Helsinki University of Technology, Finland
Henry L. Bertoni, Polytechnic University, USA

B32-4 Indoor Channel Characteristics Comparisons for the Same Building with Different Dielectric Parameters
J. T. Zhang, Yi Huang, University of Liverpool, UK

B33 Multicarrier Systems-2
Wednesday 01 May 2002—3:30 pm

B33-1 Time-Domain Multiuser Detection for MC-CDMA Systems without Cyclic Prefix
Xiaojun Wu, Qinye Yin, J. Zhang, Ke Deng, Xi'an Jiaotong University, China

B33-2 An Improved Power Control Scheme with Adaptive Interference Suppression
for DS-CDMA Wireless Communications
Chin-Liang Wang, Kuo-Ming Wu, Kwei-Liang Hwang, National Tsing Hua University, Taiwan

B33-3 Power Allocation Algorithm in MC-CDMA
Jianming Zhu, Yeheskel Bar-Ness, New Jersey Institute of Technology, USA

B33-4 Theoretical Estimates of HVAC Duct Channel Capacity for High-Speed Internet Access
Ariton E. Xhafa, Ozan K. Tonguz, Ahmet G. Cepni, Daniel D. Stancil, Pavel V. Nikitin, Carnegie Mellon University, USA
Dagfin Brodtkorb, ABB Corporate Research, Norway
B34 Wireless Networks-2
Wednesday 01 May 2002—3:30 pm

B34-1 Cell Search Performance Analysis for W-CDMA
André Zoch, Gerhard P. Fettweis, Dresden University of Technology, Germany

B34-2 Energy Efficient System Design with Optimum Transmission Range for Wireless Ad Hoc Networks
Priscilla Chen, Bob J. O'Dea, Ed Callaway, Motorola Labs, USA

B34-3 A Collision Resolution Paradigm for Random Access Channel Control in Multiaccess Wireless Networks
M. C. Yuan, B. C. Lo, National Chiao Tung University, Taiwan; J. Y. Chen, Industrial Technology Research Institute, Taiwan

B34-4 Adaptive Balanced Hybrid Data Delivery for Multichannel Data Broadcast
Chih-Lin Hu, Ming-Syan Chen, National Taiwan University, Taiwan

C. Communications QoS and Reliability

C01 Diffserv
Monday 29 April 2002—8:50 am

C01-1 Optimization Flow Control for Aggregate Traffic Handling in the Differentiated Services Internet
Suntorn Witosurapot, Jim Lambert, Iradj Ouveysi, Swinburne University of Technology, Australia

C01-2 Random Early Marking: Improving TCP Performance in Diffserv Assured Forwarding
Sandra Tartarelli, Albert Banchs, NEC Europe Ltd., Germany

C01-3 Performance Analysis for an IP Differentiated Services Network
C. Chassot, F. Garcia, G. Auriol, A. Lozes, CNRS, France
E. Lochin Emmanuel, P. Anelli Pascal, Laboratoire Informatique de Paris 6, France

C01-4 A Round Trip Time and Time-out Aware Traffic Conditioner for Differentiated Services Networks
Ahsan Habib, B. Bhargava, Sonia Fahmy, Purdue University, USA

C01-5 A Novel, Practical Pricing Strategy for Congestion Control and Differentiated Services
Adam J. O'Donnell, Harish Sethu, Drexel University, USA

C02 Fairness Scheduling and QoS Guarantee
Monday 29 April 2002—10:40 am

C02-1 Proportional Fairness Scheduling on Tandem Network
Yong Jiang, Jianping Wu, Ke Xu, Tsinghua University, China

C02-2 On the Evaluation of Fairness for Input Queue Switches
Dirceu Cavendish, Marcello Lajolo, Hongbo Liu, NEC USA Inc., USA

C02-3 A New Bandwidth Guaranteed Routing Algorithm for MPLS Traffic Engineering
Bin Weng, Xu Su, C. L. Philip Chen; Wright State University, USA

C02-4 Performance Analysis of a Generic GMPLS Switching Architecture with Flush Capability
Ling-Chih Kao, Zehong Tsai, National Taiwan University, Taiwan

C03 QoS of Ad-Hoc Networks
Monday 29 April 2002—1:40 pm

C03-1 A Novel Framework for QoS-Aware Resource Discovery in Mobile Ad Hoc Networks
Jiangchuan Liu, Bo Li, The Hong Kong University of Science and Technology, Hong Kong
Qian Zhang, Wenwu Zhu, Microsoft Research, China; Jun Zhang, University of Wisconsin at Milwaukee, USA

C03-2 Group Mobility and Partition Prediction in Wireless Ad-Hoc Networks
Karen H. Wang, Baochun Li, University of Toronto, Canada
C03-3 Predictive Location-based QoS Routing in Mobile Ad Hoc Networks
Samarth H. Shah, Klara Nahrstedt, University of Illinois at Urbana-Champaign, USA
1022

C03-4 A Set Partitioning Approach for Cellular Planning of Mobile Radio Network
Syed Zahid Ali, Imperial College of Science, Technology, and Medicine, UK
1028

C04 Mobile IP
Monday 29 April 2002—3:30 pm

C04-1 Dynamic Service Negotiation Protocol (DSNP) and Wireless Diffserv
Jyh-Cheng Chen, National Tsing Hua University, Taiwan; Anthony McAuley, Telcordia Technologies, USA
Venkatesh Sarangan, Penn State University, USA; Shinichi Baba, Yoshihiro Ohba, Toshiba America Research, Inc., USA
1033

C04-2 A Linux-based EGPRS Real-time Test Bed Software for Wireless QoS and Differentiated Service Studies
Meng-Ju Lin, Hui Luo, Li Fung Chang, AT&T Labs, USA
1039

C04-3 Integration of IP Mobility and Security for Secure Wireless Communications
Melbourne Barton, John Lee, Sanjai Narain, K. Daniel Wong, Telcordia Technologies, USA
Venkatesh Sarangan, Penn State University, USA; Shinichi Baba, Yoshihiro Ohba, Toshiba America Research, Inc., USA
1045

C04-4 Optimizing Public-Key Encryption for Wireless Clients
Nachiketh R. Potlapally, Srivaths Ravi, Anand Raghunathan, NEC USA, Inc., USA
Ganesh Lakshminarayana, Alphion Corporation, USA
1050

C05 Provisioning and Dimensioning
Tuesday 30 April 2002—10:40 am

C05-1 Network Services Definition and Deployment in a Differentiated Services Architecture
E. Nikolouzou, S. Maniatis, P. Sampatakos, S. Tsetsekis, I. S. Venieris, National Technical University of Athens, Greece
1057

C05-2 Path Provisioning for Service Level Agreements in Differentiated Services Networks
S. K. Biswas, Tellium, Inc., USA; S. Ganguly, R. Izmailov, NEC USA, Inc., USA
1063

C05-3 Game Theoretic Analysis of Network Dimensioning Strategies in Differentiated Services Networks
Péter Füzesi, Attila Vidacs, Budapest University of Technology and Economics, Hungary
1069

C05-4 Efficient Heuristic Algorithms for Finding Multiconstrained Paths
Jingchao Chen, DongHua University, China
1074

C06 QoS Guarantee Mechanisms I
Tuesday 30 April 2002—1:40 pm

C06-1 Delay Optimized Worst Case Fair WFQ (WF2Q) Packet Scheduling
X. Fei, A. Marshall, The Queen’s University of Belfast, UK
1080

C06-2 An Edge Router Based Protocol for Fault Tolerant Handling of Advance Reservations
Sudeep Bhatnagar, Badri Nath, Rutgers University, USA
1086

C06-3 A QoS Packet/Burst Scheduler for Broadband Networks
Marla C. Yang, Julin Shih, Po-Lung Tien, National Chiao Tung University, Taiwan
1094

C06-4 Dynamic Adaptive Guaranteed QoS Provisioning over GPRS Wireless Mobile Links
Oliver Yu, Shashank Khanvilkar, University of Illinois at Chicago, USA
1100

C07 QoS Guarantee Mechanisms II
Tuesday 30 April 2002—3:30 pm

C07-1 Mutually Compensatory Property of Multimedia QoS
Shuji Tasaka, Yutaka Ishibashi, Nagoya Institute of Technology, Japan
1105

C07-2 Optimal per-Node Rate Allocation to Provide per-Flow End-to-End Delay Guarantees in a Network of Routers Supporting Guaranteed Service Class
Aniruddha Diwan, Joy Kurial, Anurag Kumar, Indian Institute of Science, India
1112
C07-3 An Adaptive Scheduler to Provide QoS Guarantees in an Input-Buffered Switch
Chun-Xiang Chen, Hiroshima Prefectural University, Japan
Masaharu Komatsu, Okayama University of Science, Japan

C07-4 Partial Optimization Method of Topology Aggregation for Hierarchical QoS Routing
Wooguil Pak, Samsung Secui.com, Korea
Saewoong Bahk, Seoul National University, Korea

C08 Service and System Designs and QoS
Tuesday 30 April 2002—3:30 pm

C08-1 Edge-based QoS Provisioning for Point-to-Set Assured Services
Satish Raghunath, Kartikeya Chandrayana, Shivkumar Kalyanaraman, Rensselaer Polytechnic Institute, USA

C08-2 The Service Curve Service Discipline with the Service Curve Discipline for the Rate-Controlled EDF Service Discipline in Variable-Sized Packet Networks
Kihyun Pyun, Junehwa Song, Heung-Kyu Lee, Korea Advanced Institute of Science and Technology, Korea

C08-3 Experimental Testbed Results for Broadband Residential Video Service QoS Management
R. J. Green, QinettIQ, UK; S. I. Woolley, The University of Birmingham, UK
N. W. Garnham, K. P. Jones, Fujitsu Telecommunications Europe Limited, UK

C08-4 Delay Bounds for a Network of Guaranteed Rate Servers with FIFO Aggregation
Yuming Jiang, National University of Singapore, Singapore

C09 Network Security
Wednesday 01 May 2002—8:50 am

C09-1 Tracing Watermarking for Multimedia Communication Quality Assessment
Patrizio Campisi, Marco Carli, Gaetano Giunta, Alessandro Neri, "Università degli Studi di Roma Tre", Italy

C09-2 A Time-Efficient Contributory Key Agreement Scheme for Secure Group Communications
Bin Sun, Beijing University of Posts and Telecommunications, China
Wade Trappe, Yan Sun, K. J. Ray Liu, University of Maryland at College Park, USA

C09-3 Performance Analysis of IPSec Protocol: Encryption and Authentication
O. Elkeelany, G. Chaudhry, D. Medhi, University of Missouri at Kansas City, USA
M. M. Matalgah, K. P. Sheikh, M. Thaker, J. Qaddour, Sprint, USA

C09-4 Investigation of Intrusion Tolerance for COTS Middleware
Manish Rathi, Leapstone Systems, USA
Farooq M Anjum, Rabih Zbib, Abhrajit Ghosh, Amjad Umar, Telcordia Technologies, USA

C10 MPLS
Wednesday 01 May 2002—8:50 am

C10-1 RD-QoS—The Integrated Provisioning of Resilience and QoS in MPLS-based Networks
A. Autenrieth, Munich University of Technology, Germany
A. Kirstädtler, Siemens AG, Germany

C10-2 MPLS Performance Evaluation in Backbone Network
Guangyi Liu, Xiaokang Lin, Tsinghua University, China

C10-3 Delay-based Adaptive Load Balancing in MPLS Networks
Deyun Gao, Yantai Shu, Shuo Liu, Tianjin University, China
Oliver W. W. Yang, University of Ottawa, Canada

C10-4 A Distributed LSP Mechanism to Reduce Spare Bandwidth in MPLS Networks
Kyu Seek Sohn, Dan Keun Sung, Korea Advanced Institute of Science and Technology, Korea
C11 VoIP and QoS Management
Wednesday 01 May 2002—10:40 am

C11-1 End-to-End Measurement Based Admission Control for VoIP Networks ......................................................... 1194
Kenichi Mase, Yuichiro Toyama, Niigata University, Japan

C11-2 Characterizing Packet Audio Streams from Internet Multimedia Applications .......................................................... 1199
Chen-Nee Chuah, University of California, Davis, USA; Randy H. Katz, University of California at Berkeley, USA

C11-3 TCP-Friendly Transmission of Voice over IP ................................................................. 1204
F. Bertelli, G. Ruggeri, G. Schembra, University of Catania, Italy

C11-4 Architecture and Design of an Enhanced H.323 VoIP Gateway ................................................................. 1209
T. Daglioklas, P. Galiotos, INTRACOM S.A., Greece

C12 End-to-End Aspects of QoS
Wednesday 01 May 2002—10:40 am

C12-1 A Critical Review of “End-to-End Arguments in System Design ................................................................. 1214
Tim Moors, University of New South Wales, Australia

C12-2 Efficient Resource Management for End-to-End QoS Guarantees in DiffServ Networks ................................................................. 1220
Spiridon Bakiras, Victor O. K. Li, The University of Hong Kong, Hong Kong

C12-3 A Framework of Integrating Network QoS and End System QoS ................................................................. 1225
Chunyan Wang, Chen Khong Tham, National University of Singapore, Singapore
Yuming Jiang, Center for Wireless Communications, Singapore

C12-4 A Performance Model of a PC Based IP Software Router ................................................................. 1230
Oscar-Iván Lepe-Aldama, Jorge Garcia-Vidal, Universitat Politècnica de Catalunya, Spain

C13 Multicast Services I
Wednesday 01 May 2002—1:40 pm

C13-1 An Efficient Key Management Scheme for Secure Wireless Multicast ................................................................. 1236
Yan Sun, Wade Trappe, K. J. Ray Liu, University of Maryland at College Park, USA

C13-2 A Reliability Window for Flexible and Scalable Multicast Services ................................................................. 1241
Dah Ming Chiu, Sun Microsystems Laboratories, USA; Jaiwant Mulik, Temple University, USA

C13-3 Multipoint-to-Multipoint Routing for Multimedia Communication Service ................................................................. 1248
Hideaki Tanioka, Kazuhiko Kinoshita, Kosuke Murakami, Osaka University, Japan

C13-4 Multicast Feedback Control Using Loss-Pattern Matching ................................................................. 1253
Shuju Wu, University of Pittsburgh, USA
Sujata Banerjee, Hewlett-Packard Laboratories and University of Pittsburgh, USA

C13-5 QoS-Aware Multicast Protocol Using Bounded Flooding (QMBF) Technique ................................................................. 1259
Zhi Li, Prasant Mohapatra, University of California at Davis, USA

C14 Bandwidth Management I
Wednesday 01 May 2002—1:40 pm

C14-1 Performance Analysis of Stochastic Fair Sharing (SFS) Scheme for Link Sharing ................................................................. 1264
R. Manivasakan, Mounir Hamdi, Danny H. K. Tsang, Hong Kong University of Science and Technology, Hong Kong

C14-2 Active Queue Control Scheme for Achieving Approximately Fair Bandwidth Allocation ................................................................. 1269
Takashi Miyamura, Takashi Kurimoto, NTT Network Service Systems Laboratories, Japan
Kenji Nakagawa, Prasad Dhananjaya, Nagoya University of Technology, Japan
Michihiko Aoki, Naokatsu Yamanaka, NTT Network Innovation Laboratories, Japan
C14-3 Fair Bandwidth Share Using Flow Number Estimation ................................................................. 1274
Jung-Shian Li, Ming-Shiann Leu, National Cheng Kung University, Taiwan

C14-4 Adaptive Allocation of Resources with Multiple QoS Heterogeneous Sources in ATM Networks—
A Fuzzy Approach .............................................................................................................................. 1279
S. Chandramathi, S. Shanmugavel, Anna University, India

C15 Multicast Services II
Wednesday 01 May 2002—3:30 pm

C15-1 Exploiting the Temporal Dimension in QoS-Aware Multicast Routing ............................................. 1284
Chih-Jen Tseng, Kuang Wu Institute of Technology, Taiwan
Chyou-Hwa Chen, National Taiwan University of Science and Technology, Taiwan

C15-2 RP Reselection Scheme for Real-Time Applications in Delay-Constrained Multicast Networks ........ 1290
Dong-Lim Lee, Hanaro Telecom, Korea
Chan-Hyun Youn, Sang-Jin X. Jeong, Information and Communications University, Korea

S. Swaminathan, G. Manimaran, Iowa State University, USA

C15-4 Multicasting of Adapitively-encoded MPEG4 over QoS-Aware IP Networks .................................. 1300
Ashraf Matrawy, Ioannis Lambadaris, Changcheng Huang, Carleton University, Canada

C16 Bandwidth Management II
Wednesday 01 May 2002—3:30 pm

C16-1 Bandwidth Allocation and Preemption for Supporting Differentiated-Service-Aware Traffic Engineering
in Multiservice Networks .................................................................................................................. 1305
Tong Shan, Hoang Dam, Nortel Networks, Canada
Oliver Yang, University of Ottawa, Canada

C16-2 Resource Marking and Fair Rate Allocation ..................................................................................... 1310
S. Zimmermann, U. Killat, Technical University of Hamburg-Harburg, Germany

C16-3 On the Support of Minimum Service Rates for Input Queue Switches ............................................ 1315
Dirceu Cavendish, Marcello Lajolo, Hongbo Liu, NEC USA Inc., USA

C16-4 Asymmetric TCP Splicing for Content-based Switches .................................................................... 1321
Masayoshi Kobayashi, Tutomo Murase, NEC Corporation, Japan
