TABLE OF CONTENTS

Technical Session I - Coal Ops

Fine Coal Cleaning at Massey Energy .............................................................. 1
Peter J. Bethell, Massey Coal Services

Optimization of the Fine Coal Flotation Circuit at
Bullmoose Operating Corporation ................................................................. 15
J. Butcher, Bullmoose Operating Corporation; P. Lind, Laurentian University

The Challenges of Coal Preparation at Centralia, Washington .......................... 31
D. Bingham, NorWest Mine Services Inc.; E. Strom, Centralia Mining Company

The Life and Times of Clinchfield Coal Company’s Middle Fork
Slurry Impoundment, Carbo, Virginia: A Case Study ..................................... 47
Matthew R. Cartier, Pittston Coal Management Company; Roger W. Cecil,
Geo/Environmental Associates Inc.

Technical Session II - Emerging Technologies

The Use of Ultrasound for Cleaning Coal ....................................................... 61
C.D. Harrison and C.E. Raleigh, Jr., CQ Inc.; B.J. Vujnovic, ESI

Using Spreadsheet Software for Optimized Blending and Distribution ............... 69

The Benefits of 3D Models for Coal Processing Plant Design .......................... 83
J.D. (Dave) Thomson P. Eng., SNC Lavalin Inc.

Fuel and Limestone Feedstock Preparation for Circulating
Fluidized Bed Boilers ..................................................................................... 97
Joseph W. Davidson, TraDet Inc.

Technical Session III - Unit Ops

Operating Guidelines for Heavy Media Cyclone Circuits ............................... 115
G.H. Luttrel, Virginia Tech; T.S. Bomar, Virginia Tech; C.J. Wood,
Partition Enterprises Pty Ltd.; P.J. Bethell, Massey Coal Services

Heavy Medium Vessel Operation and Maintenance ........................................... 125
R.W. Ramsey, Peters Equipment Company, LLC
Practical Vacuum Filtration ................................................. 135
J.G. Peterson, Peterson Filters Corporation

A Comparison of Commonly Used Coal Refuse Disposal Methods:
Technical Issues, Environmental Concerns and Costs ...................... 149
Roger W. Cecil, Geo/Environmental Associates Inc.;
Matthew R. Cartier, Pittston Coal Management Company

Coal Washing Opportunities In India ...................................... 165
R.B. Mathur, Delhi Vidyut Board

Technical Session IV – Dry Coal Beneficiation

Performance and Cost of Air Jigging in the 21st Century .................... 175
M. Kelley, Bowie Resources; R. Snoby, allmineral LLC

Dry Coal Cleaning in a MagMill™ ........................................ 187

Dry Separation of Alberta Coal Using an Air
Heavy Dense Medium Fluidized Bed ...................................... 201
Jimmy Yu, M&F Technologies

Lignite Fuel Enhancement: Incremental Moisture Reduction .............. 215
Richard Weinstein, Falkirk Mining Company; Mark Ness, Great River Energy

Index of 1985 – 2001 Proceedings ........................................ 235

Subject .............................................................................. 237

Author .............................................................................. 255
