Dual Current-vector Diagrams For Quantitative Analysis Of Electrical Current Propagating In The Heart Using Dual Measurement Planes .......................... 603

fetal MCG

Oral presentation

The influence of biomagnetometer area-of-coverage in the determination of fetal cardiac time intervals ......................................................... 606
van Leeuwen P, Klein A, Geue D, Lange S, Grönermeyer D

The fetal magnetocardiogram explained by a magnetic dipole .................. 609
Stinstra JG, Peters MJ

Analysis of Heart Rate Variability in Fetuses and Pre-term Neonates ........ 609
Rassi D, Zhuravlev YE, Mishin A, Matthes J, Emery SJ

Relation between fetal weight and QRS duration .................................... 610
Kähler C, Hopf A, Schlußner E, Grimm B, Schneider U, Haueisen J, Seewald HJ

Tachyarrhythmias in the Fetus: Diagnosis and Treatment ....................... 611
Strasburger JF, Wakai RT

Prenatal diagnoses of fetal arrhythmia using averaged magnetocardiogram and current-arrow maps ....................................................... 614
Hosono T, Kandori A, Chiba Y, Tsukada K

Assessment of Fetal Heart Rhythm and Rate in Complete Congenital Heart Block by Fetal Magnetocardiography ...................................... 617
Zhao H, Wakai RT, Strasburger J, Gotteiner N, Cuneo B

Influence of gestational age, fetal heart frequency and estimated fetal weight on cardiac time intervals in normotrophic and growth retarded fetuses .... 620
Grimm B, Kähler C, Schlußner E, Schneider U, Schneider A, Haueisen J, Seewald HJ

Fetal heart rate patterns in normal and ritodrine-treated pregnancies, detected by magnetocardiography ................................................... 621

Measurement of fetal tachycardia using a fetal magnetocardiogram .......... 624
Kandori A, Hosono T, Kanagawa T, Miyashita S, Shinto M, Chiba Y, Murakami M, Miyashita T, Tsukada K

Poster presentation

Flux transformer for fetal magnetocardiography in an unshielded environment. . 627
Bachir W, Dunajski Z
Foetal Magnetocardiography in perinatal diagnostics ........................................ 630
Comani S, Liberati M, Lagatta A, Stefanachi M, Di Luzio S, Gerboni S, Romani GL

Heart rate variability in growth retarded fetuses as determined by fetal magneto
cardiography ......................................................... 633
Lange S, van Leeuwen P, Leven A, Klein A, Hatzmann W, Grönenmeyer D

Amplitude of the P and QRS Components of the Fetal MCG in Normal and Fetal
Arrhythmia Subjects ................................................. 636
Li Z, Wakai RT

Beat Morphology Variations in Fetal Arrhythmia Detected by Multichannel Fetal
Magnetocardiography ............................................... 639
Sturm R, Müller HP, Pasquarelli A, Demelis M, Lang D, Erné SN

Fetal Magnetocardiography (FMCG) in the investigation of congenital heart
defects (CHD) ........................................................... 642
Kähler C, Schleußner E, Grimm B, Schneider U, Haueisen J, Vogt L, Seewald HJ

Fetal Magnetocardiography (FMCG) in the investigation of the development
of linear and nonlinear parameters of heart rate variability of the fetus in the
normal course of pregnancy ........................................... 642
Ronneburger A, Kähler C, Hoyer D, Schleußner E, Schneider U, Grimm B, Haueisen J,
Seewald HJ

Fetal magnetocardiography (FMCG) in twin pregnancies as a model to analyse
the maturation of the cardiac conductive system .................................. 643
Schleußner E, Kähler C, Grimm B, Haueisen J, Schneider U, Seewald HJ

fetal MEG

Oral presentation

Influence of the state of activity and the presented hemisphere on detection
and latencies of Auditory Evoked cortical Fields (AEF) in fetal Magnetoencephalo-
graphy (FMEG) .......................................................... 646
Schneider U, Schleußner E, Kähler C, Haueisen J, Seewald HJ

Magnetic brain responses to speech sounds in fetuses and newborns .............. 649

First report on the magnetoencephalographic recordings of visual evoked brain
activity from the human fetus .......................................... 650
Eswaran H, Wilson JD, Preißl H, Robinson SE, Vrba J, Murphy P, Rose D, Lowery CL

Extraction of Spontaneous Fetal MEG via Spatial Filtering ............................ 653
Chen ML, Wakai RT

Coregistration of anatomical and physiological recordings for fMEG investigations
in the SARA system ................................................... 655
Preißl H, Robinson SE, Vrba J, Eswaran H, Wilson JD, Murphy P, Lowery CL
Poster presentation

Short-term serial magnetoencephalography recordings of fetal auditory evoked responses ............................................... 656
Eswaran H, Preißl H, Robinson SE, Wilson JD, Vrba J, Murphy P, Rose D, Lowery CL

Neonatal magnetoencephalography and spectral analysis ................................................................. 659
Kotini A, Anninos P, Koultaki N, Adamopoulos A, Galazios G, Anastasiadis P

Observation of the Unaveraged Fetal MEG using the SARA Instrument .............................................. 662
Lowery CL, Robinson SE, Vrba J, Rose D, Preißl H, Eswaran H, Wilson JD, Murphy P

Separating Fetal MEG Signals from the Noise ................................................................. 665
Robinson SE, Vrba J, McCubbin J

Influence of Intrauterine Growth Retardation on Auditory Evoked cortical Fields (AEF) in fetal Magnetoencephalography (fMEG) ................................................................. 667
Schleußner E, Kentner A, Haueisen J, Kähler C, Schneider U, Seewald HJ

Determinants of fetal neurological maturation assessed in fetal magnetoencephalography (fMEG) .......... 668
Schneider U, Schleußner E, Kähler C, Haueisen J, Seewald HJ

Modeling: forward problem

Oral presentation

Fast anisotropic high resolution finite element head modeling in EEG/MEG-source localization ......................... 670
Wolters C, Anwander A, Kuhn M, Reitzinger S

A unified theoretical account of the evoked magnetic fields and extra- and intracellular potentials of the hippocampus ................................................................. 673
Murakami S, Zhang T, Hirose A, Okada YC

MEG forward problem solution avoiding the electric potential ................................................................. 676
von Ellenrieder N, Muravchik C, Nehorai A

Poster presentation

Influence of realistic skull and white matter anisotropy on the inverse problem in EEG/MEG-source localization ......................................................................................... 679
Anwander A, Wolters C, Dümpelmann M, Knösche TR

Estimating tissue resistivity distribution by using in vivo EEG and MEG data ......................................... 682
Baysal U, Haueisen J

MEG Spherical Forward Model for Accurate Source Localization ................................................................. 685
Chen LF, Chen YS, Wu YT, Lee PL, Yeh TC, Ho LT, Hsieh JC

St. Pierre TG, Clark PR, Chua-Anusorn W, Jeffrey G, Olynyk J, Pootrakul P

Poster presentation

Liver iron assessment in rats by using NMR: a simple statistical analysis on T2-maps ........................................ 1057
Bortolazzi M, Fenzi A

Preliminary Liver Iron Evaluation Using an AC Superconducting Magnetic Susceptometer ........................................ 1060
Carneiro AAO, Baffa O, Angulo IL, Covas DT

The influence of thorax tissue in Biomagnetic Liver Susceptometry (BLS) .... 1063
Fischer R, Engelhardt R, Nielsen P

A Room-Temperature Susceptometer to Measure Liver Iron: Susceptometer Design and Performance ........................................ 1066
Kumar S, Avrin WF, Hecht D, Trammel HS, Perry AR, Freeman WN, McManus T
Three phase magnetization method: An improved way of magnetopneumographic measurement
Nakadate T, Yagami T, Zheng Y, Kotani M

An AC Magnetising Field Susceptometer for Liver Iron Concentration
Assessment
Penna DS, Del Gratta C, Cianflone F, Ernè SN, Granata C, Pentiricci A, Pizzella V, Russo M, Romani GL

Relationship Between Magnetic Susceptibility and Proton Transverse Relaxation Rates in Packed Human Red Blood Cells
Pontre B, Chua-Anusorn W, Robins E, StPierre T

Biomagnetic liver susceptometry in children with transfusional iron overload, younger than 4 years

Applications of biomagnetic liver susceptometry in hematological disorders

Transcranial magnetic stimulation

Induction of excitability after-effects by repetitive transcranial magnetic stimulation compared to transcranial direct current stimulation
Paulus W

Effects of transcranial magnetic stimulation on spontaneous and evoked EEG activities
Iramina K, Maeno T, Ueno S

Reactivity of the prefrontal cortex as a function of TMS stimulus intensity. An EEG study
Kähkönen S, Komssi S, Wilenius J, Ilmoniemi RJ

Low-frequency rTMS of the Cerebellum Suppresses the Motor Cortex
Satow T, Mima T, Oga T, Hara H, Chen WH, Hashimoto N, Siebner HR, Shibasaki H

Effects of topiramate on human motor cortex excitability as measured by transcranial magnetic stimulation
Reis J, Tergau F, Hamer HM, Müller HH, Knake S, Fritsch B, Oertel WH, Rosenow F

The biological effects of magnetic stimulation in epileptic patients
Anninos P, Kotini A, Adamopoulos A, Tsagas N
Cerebellar transcranial magnetic stimulation evoked long latency potential in the soleus muscle ................................................. 1091

Effects of Repetitive Transcranial Magnetic Stimulation on Rat Brain Cells ........ 1094
Funamizu H, Ogiue-Ikeda M, Kawato S, Ueno S

The effect of tissue heterogeneity and anisotropy on the spatial distribution of the electric field induced by transcranial magnetic stimulation ......................... 1094
Miranda PC, Hallett M, Basser PJ

Magnetic methods for understanding of oral drug delivery
Oral presentation

Detection of the Gastrocolic Reflex Using a Three Axis Fluxgate ................. 1096
Ferreira A, Carneiro AAO, Moraes ER, Baffa O, Oliveira RO

Poster presentation

Magnetic marker monitoring (MMM) allows to characterize effects of exogenous factors on esophageal transit of solid drug forms ............................. 1099

Magnetic relaxation measurements: A novel approach for in vivo diagnostics ... 1102

Evaluation of the Magnetically Marked Tablets in the Human Stomach by AC Susceptometry ........................................ 1105
Américo MF, Corá LA, Romeiro FG, Moraes R, Baffa O, Miranda JRA

Intragastric Distribution of Food Evaluated by Scintigraphy and AC Susceptometry ................................................. 1105
Américo MF, Oliveira RB, Corá LA, Moraes ER, Miranda JRA, Baffa O

AC Susceptometry to Study the Human Intestinal Motility and the Colonic Response to Feeding .............................................. 1106
Américo MF, Romeiro FG, Corá LA, Baffa O, Chubaci FANF, Miranda JRA

Magnetic Marker Monitoring of the in Vivo Dissolution Behavior of Extended Release Tablets ........................................ 1106
Hartmann V, Kosch O, Trahms L, Mönnikes H, Osmanoglou E, Weitschies W
Other biomagnetic applications

Oral presentation

Electrophysiologic Research of Plant Cells by SQUID Systems ........................................ 1108

Poster presentation

Effects of acute exposure to magnetic field on electrical properties of frog sciatic nerve: biosuperconductivity ......................................................... 1109
Abdelmelek H, Amara S, M'Chirgui A, Salem MB, Sakly M

SQUID biomagnetometry of the uterine arteries in normal and pre-eclamptic pregnancies .......................................................... 1115
Kotini A, Anninos P, Koutlaki N, Avgidou K, Adamopoulos A, Anastasiadis P

Continuous Measurement of the Energy Responsible for Rotational Random Movements of Phagosomes by Cytomagnetometry ........................................ 1118
Nemoto I, Kawamura K, Takahashi T

Cytotoxic Evaluation of Mixed Solution of Gallium Trichloride and Arsenic Trichloride to Alveolar Macrophages of Hamsters ............................ 1121
Okada M, Lyons YI, Watanabe M, Kudo Y, Shinji H, Aizawa Y, Kotani M

Biological effects of magnetic field on permeability of light in the body tissue during choking ................................................................. 1127
Okai O, Watada M

Localization test for normalized coordinate system ........................................ 1130
Zimmermann R, Igelmann H, Kopp S, Bromm B

Localization of Curved Steel Needles In Humans Using a SQUID Magnetometer .......................................................... 1132
Hall Barbosa C, Costa Monteiro E, Cavalcanti FM

Magneto-oculogram from magnetic cosmetics .................................................. 1132
Lopez N, Akhtari M, Mamelak A, Merrifield W, Sutherling WS

Differential interaction of magnetic nanoparticles with tumor cells and peripheral blood cells ......................................................... 1133

Measurements of magnetic field distribution associated with end plate potentials induced from neuromuscular junctions ........................................ 1133
Tachikawa A, Iramina K, Ueno S

Establishment of the Accurate Measurements of the Magnetic Field Produced by Accumulated Particles in the Lungs ......................................................... 1134
Zheng Y, Guiyao C, Kotani M, Uchikawa Y, Nakadate T, Yagami T
