47th International SAMPE Symposium and Exhibition

VOLUME 47
Book 1 of 2 Books

AFFORDABLE MATERIALS TECHNOLOGY—
PLATFORM TO GLOBAL VALUE AND PERFORMANCE

Edited by
Benjamin M. Rasmussen
Dr. Louis A. Pilato
Dr. Howard S. Kliger

Long Beach Convention Center
Long Beach, California

May 12–16, 2002
Contents

Book 1
Preface xxv

ADHESIVE BONDING—I
Chairman: Manette Gebhardt, Loctite Aerospace

Sealing Pinhole Leaks with Organic Coatings ....................... 1
J.M. KOLYER, A.A. PASSCHIER, and T.S. HSU

Joining Steel and Composites ........................................... 14
JOACHIM L. GRENESTEDT and JOSEPH D. MELOGRANA

New 121°C (250°F) Curing Epoxy Film Designed for Composite and
Metallic Aerospace Bonding ............................................. 23
MICHAEL J. CICHON and JOHN M. MARSICANO

A New Approach to Fabricating Square Edge Close-Outs on Honeycomb
Panels ................................................................. 31
PETER W. NAYE and CARLA D. MURRAY

Nanoparticle Modification of Epoxy Based Film Adhesives .......... 41
ERIC N. GILBERT, BRIAN S. HAYES and JAMES C. SEFERIS
Application of Time-Resolved Pulse Radiolysis Technique in the Investigation of the Mechanism of Epoxy Resins Cationic Polymerization

REZA DABESTANI, ILIA N. IVANOV and JAMES M. SANDS

Results of Electron Beam Prepreg Debulking Study

B.J. FRAME, G.E. WRENN and C.J. JANKE

Process Development of E-Beam Curing for Large Structures

MARK S. WILENSKI and CATHERINE A. BAKER

Real Time In-Situ Spectroscopic Characterization of Radiation Induced Cationic Polymerization of Glycidyl Ethers

MATTEO MASCIIONI, JAMES SANDS and GIUSEPPE R. PALMESE

Evaluation of an E-Beam Cured Material for Cryogenic Structure Usage

MARK S. WILENSKI, ROBERT AIKEN and ROGER GERZESKI

Composites Containing Embedded Simple Machines

GARY F. HAWKINS, MICHAEL O’BRIEN, RAFAEL ZALDIVAR, JULIET SCHURR and HUBERTUS VON BREMEN

Simulation of Energy Release Rates and Correlation with NDE Test Data

HUI ZHANG, LEVON MINNETYAN and CHRISTOS C. CHAMIS

The Absorption of Water and Its Effect on the Transverse Strengths of Laminates

M.R. PIGGOTT and C. QIAN

Experimental and Theoretical Evaluations of the Iosipescu Shear Test for Hybrid Fiber Composites

JIANMEI HE, MARTIN Y.M. CHIANG, WALTER MCDONOUGH and DONALD L. HUNSTON
A Proper Ultrasonic Testing on Structure Weld ...................... 165
FRANK Y. LIN

Failure Strength of Machined Composite Edges ...................... 180
BYUNG S. HWANG, SEUNG B. PARK, JAE K. KIM, JIN B. KIM, IN. S. PARK and HEUNG S. SONG

Nondestructive Sensing Evaluation of Single Carbon Fiber/Polymer Composites Using Electro-Micromechanical Technique ...................... 190
JOUNG-MAN PARK, SANG-IL LEE and JAE-ROCK LEE

Vibroacoustic Properties of Composite Damping Elements .............. 204
M.V. KIREITSEU, M. ISTOMIN, S.G. YERAKHAVETS and V.L. BASENUK

ADVANCED MANUFACTURING CONCEPTS
Chairman: Leonard Poveromo, Northrop Grumman Corporation

Liquid Crystalline Polymer (LCP) Hybrid Coating Process Development .................................. 214
DON DI MARZIO, STEVE CHU, JOHN KLEIN, LEONARD POVEROMO and JEFFREY BROGAN

Micro-Cracking Evaluation of High Modulus-Graphite/Epoxy (HM-Gr/Ep) Under Combined Thermal and Load Cycling ...................... 222
JOSEPH W. BRUNO

Friction Performance of Phenolic Binders .............................. 236
YAFEI LU

Experimental and Genetic Algorithm Simulation of the Wear of Two Phase Model Friction Materials .................................. 245
YAFEI LU and YONGLI ZHAO

A Permeameter Measuring Normal and Lateral Permeability and an Investigation on Wet Friction Materials .............................. 253
BULENT CHAVDAR

Cost Aspects of Structural Co-Processing .............................. 267
LEE MCKAGUE
ADHESIVE BONDING—II
Chairman: Manette Gebhardt, Loctite Aerospace

Factors Influencing Durability of Sol-Gel Surface Treatments in Metal Bonded Structures ........................................ 279
KAY Y. BLOHOWIAK, LINDA CADWELL-STANCIN, ROBERT A. ANDERSON, CAROLYN MAZZITELLI, KRISTINA PREEDY, JACOB W. GROB and MIKE GLIDDEN

Adhesive Disbonding via Chemical Foaming Agents ....................... 292
SOUJANYA S. TALLAPRAGADA, JAMES M. SANDS and ERIC D. WETZEL

Ultrasonic Abrasion: A Study of an Alternate Surface Abrasion Technique ................................................................. 301
NATHAN J. SCHWENDEMAN

THERMOSET RESINS—I
Chairman: Dr. Michael Meador, NASA Glenn Research Center

High Temperature Transfer Molding Resins Based On 2,3,3′,4′-Biphenyltetracarboxylic Dianhydride .................................. 316
J.G. SMITH, JR., J.W. CONNELL, P.M. HERGENROTHER, R. YOKOTA and J.M. CRISS

Adhesive and Composite Properties of a New Phenylethynyl Terminated Imide ............................................................... 328
C.M. THOMPSON, J.W. CONNELL, P.M. HERGENROTHER and R. YOKOTA

Design and Fabrication Issues of High Temperature PMCs for Aerospace Propulsion Applications ....................................... 341
E. EUGENE SHIN, JAMES K. SUTTER, HOWARD EAKIN, LINDA INGHRAM, LINDA MCCORKLE, DAN SCHEIMAN, DEMETRIOS PAPADOPOULOS, FRANK KERZE, JEFF FINK and BRIAN RICE

Mechanical Testing of PMCs Under Simulated Rapid Heat-Up Propulsion Environments (I. Temperature Measurement) ............... 356
ERIC H. STOKES, E. EUGENE SHIN and JAMES K. SUTTER

Composite Processing and Properties of a New Amorphous, Asymmetric, Addition Type Polyimide (Triple A-PI) ....................... 371
TOSHIO OGAŠAWARA, TAKASHI ISHIKAWA, RIKIO YOKOTA, HIDEKI OZAWA, MITSUSHI TAGUCHI, YU SHIGENARI and KIYOSHI MIYAGAWA

Mechanical Testing of a Photocured Chopped Fiber Reinforced Dental Composite ............................................................... 380
RICHARD C. PETERSEN and EDWARD G. WENSKI
Two-Step Synthesis of BAX for Environmentally Safe PMR-BAX Composites .................................................. 395
DAVID KINSMAN, LAWINO KAGUMBA, ARTHUR GAVRIN, NORMAN RICE, MICHAEL A. MEADOR
and DANIEL A. SCHEIMAN

RTM/VARTM—I
Chairman: Dr. Alfred Loos, Virginia Tech

New Experimental Findings on Resin-Impregnation Process for Woven, Stitched or Braided Fiber Mats in Liquid Composite Molding ...... 404
BAIJU Z. BABU and KRISHNA M. PILLAI

Interlayer Toughening of VARTM Composites: Effects of Tackifier Loading .................................................... 417
EDOARDO DEPASE, BRIAN S. HAYES and JAMES C. SEFERIS

Interlaminar Fracture Properties of Split Angle-Ply Composites ...... 428
ROBERT L. SADLER, KUNIGAL N. SHIVAKUMAR and MATHEW M. SHARPE

Effects of Amine and Anhydride Curing Agents on the VARTM Matrix Processing Properties .............................................. 439
BRIAN W. GRIMSMLEY, PASCAL HUBERT, XIAOLAN SONG, ROBERTO J. CANO, ALFRED C. LOOS
and R. BYRON PIPES

Streamlined Intelligent RTM Processing: From Design to Automation ................................................................. 454
KUANG-TING HSIAO, MATHIEU DEVILLARD and SURESH G. ADVANI

SANDWICH STRUCTURES
Chairman: Russell Elkin, Baltek

Reproducibility of Ring Compression Test for Evaluation of New Honeycomb Materials ........................................... 466
EBONEE P.M. WILLIAMS, BRIAN S. HAYES and JAMES C. SEFERIS

Procedure for Accelerated Corrosion Testing of Aluminum Honeycomb ................................................................. 473
G. DOUGLASS DIXON, YEN WANG, RIMI O. RIVERA, BRETT C. BONNET and GARY G. BOND

Precise Zero CTE Sandwich Structures for Optical Applications ...... 482
STEVEN E. HAHN and TSUYOSHI OZAKI
Novel Processing of High-Performance Structural Syntactic Foams . . . 492
GREG KARST

Advanced Products Designed to Simplify Co-Cure Over Honeycomb Core ............................................................. 502
BILLY HARMON, JACK BOYD and BRYAN THAI

FIRE SAFETY OF MATERIALS—I
Chairmen: Usman Sorathia, Naval Surface Warfare Center and Pieter J. Van Dine, Electric Boat Corporation

Burn-Through and Moisture Properties of Aircraft Fuselage Insulation Blankets ....................................................... 512
KHANG D. TRAN

Continued Developments in Fire Proof Composites ................. 520
PIET VAN DINE and USMAN SORATHIA

Flexural Behavior of Balsa Wood Cores Reinforced with Inorganic Carbon Composite .............................................. 530
JAMES GIANCASPRO, P. BALAGURU and RICHARD LYON

Fire Resistant Composite Materials for Energy Absorption Applications ................................................................. 542
B.J. FRAME and J.G.R. HANSEN

Fire Growth Evaluation and Mechanical Properties of Seven Thermoset Composites ............................................. 556
NICHOLAS A. DEMBSEY, CHARLIE H. DORE, CHRISTOPHER M. LEE and SHAHID P. QURESHI

E-BEAM—II
Chairmen: Christopher Janke, Oak Ridge National Laboratory and James M. Sands, U.S. Army Research Laboratory

Development of Electron Beam Curable Composite Motor Cases . . 570
RICHARD FOEDINGER, THOMAS SCHNEIDER, ROBERT GRANDE, SUHAS MALGHAN, THOMAS WALTON, ROBERT NORRIS, BARBARA FRAME, CHRISTOPHER JANKE and ROBERT EVANS
Composite Solutions for High Pressure Drilling Risers .......................... 703
BRIAN E. SPENCER

FIRE SAFETY OF MATERIALS—II
Chairmen: Usman Sorathia, Naval Surface Warfare Center and
Richard E. Lyon, FAA/Fire Safety Section

Fire-Safe Polymer Composites .......................................................... 716
RICHARD N. WALTERS

Fire Assessment of Wood Plastic Composites ................................. 728
U. SORATHIA, J. NESS, M. BLUM, T. GRACIK, D. PENDLETON, J. MALVAR, J. SIMONE and
R. TICHY

High-Throughput Methods for Flammability Screening of Multicomponent
Polymer Blends and Nanocomposites ............................................. 738
MARC R. NYDEN, JEFFREY W. GILMAN, RICK D. DAVIS and JOHN R. SHIELDS

The Correlation of Heat Release Calorimetry Measurements .............. 749
ROBERT FILIPCZAK and RICHARD E. LYON

Marine Composite Material Fire Properties: Implications of
Uncertainty ......................................................................................... 764
JARROD J. ALSTON and NICHOLAS A. DEMBSEY

WIND ENERGY
Chairman: Richard P. Caruso, Fiber Glass Industries

Wind Power for Global Electricity Generating Present and Future
Opportunities .................................................................................... 779
ANNE-MARIE SINDAL HOWE

TOOLING FOR COMPOSITES
Chairman: Christopher Ridgard, Advanced Composites Group

Characterization of Low Cost Reformable Multiuse Tooling System for
Composite Repair Applications ......................................................... 794
THEODORE JACOBSON, JOHN CROWLEY, ROBERT STRATTON and LINDA CLEMENTS
Autoclave Quality Composites Tooling for Composite from Vacuum Bag Only Processing .................................................. 800
KEVIN JACKSON and MICHAEL CRABTREE

SPACE—I
Chairmen: Dr. Bruce Banks, NASA Glenn Research Center and Dr. Jacob Kleiman, University of Toronto/Integrity Testing Laboratory

Combined Cryogenic and Elevated Temperature Cycling of Carbon/Polymer Composites ........................................ 808
VERNON T. BECHEL, MARK B. FREDIN, STEVEN L. DONALDSON, RAN Y. KIM and JOHN D. CAMPING

Atomic Oxygen Protection of Materials in Low Earth Orbit .......... 820
BRUCE A. BANKS and RIKAKO DEMKO

Microcracking in Composite Laminates Under Thermal Environments: 150 to -196°C ....................................................... 833
RAN Y. KIM, BRIAN P. RICE and STEVE L. DONALDSON

E-BEAM—III
Chairmen: Christopher J. Janke, Oak Ridge National Laboratory, and James M. Sands, U.S. Army Research Laboratory

Comparison Between E-Beam and Thermally Cured Similar Epoxybased Composites ....................................................... 843
BRUNO N. SERVAIS, ALEXANDRE A. BAIDAK, MARC A. LINNE and JEAN-MARIE CH. LIEGEOIS

Effect of Substituted Benzene Group on Thermal and Mechanical Properties of Epoxy Resins Initiated by Cationic Latent Catalysts .... 853
SOO-JIN PARK, MIN-KANG SEO, JAE-ROCK LEE, DOUK-RAE LEE and JOUNG-MAN PARK

Effect of E-Beam Curing on Composites ................................. 862
ANNA YEN, RICHARD MOULTON and JAMES SANDS

A Basic Process Model for EB Curing of Composite Materials ........ 874
ANDREW JOHNSTON, KENNETH C. COLE, MEHDI HOJJATI, MAITTEO MASCIONI, GIUSEPPE R. PALMESE and VINCE J. LOPATA
INFRASTRUCTURES—II

Chairman: Dr. Andrew J. Foden, Parsons Brinkerhoff

Strengthening of Masonry Walls with High Strength Fibers and Inorganic Matrix ........................................... 919
MOHAMED NAZIER, JAMES GIANCASPRO and P. BALAGURU

In-Plane Shear Performance of Masonry Walls Strengthened with FRP .......................................................... 929
ORANGE S. MARSHALL and STEVEN C. SWEENEY

Post Strengthening of Steel Members with CFRP .................... 941
M. VATOVEC, P.L. KELLEY, M.L. BRAINERD and J.B. KIVELA

Evaluation of Transverse Strain in Corroding Square Prestressed Concrete Elements ........................................ 955
GRAY MULLINS, RAJAN SEN, KWANG-SUK SUH, ANDREW GOULISH and ANDRES TORRES-ACOSTA

Sprayed Fiber Reinforced Polymers for Repair and Strengthening .... 964
N. BANTHIA, N. NANDAKUMAR and A.J. BOYD
