A member of Elsevier Science
Table of contents

 Preface .......................................................... VII
 Acknowledgement of Support ............................... VIII

 **KEYNOTE ARTICLES**

 Process Intensification in Oil-Water Emulsion Separation:
 Development of a Demulsifier and its Performance in Emulsions
 Produced in Nuclear Reprocessing Plants and Crude Oil Recovery
 G. Akay, M. Dogru, T. Pekdemir and J. Vickers .......... 3

 The Constructal Law: Mechanical Structures and Flow Systems
 A. Bejan .......................................................... 11

 Chemical Kinetic Modeling of Gas Phase Reactive Systems
 G.A. Karim .......................................................... 21

 Natural Convection in a Square Enclosure with a Partially
 Heated Wall Section Covered by a Blink-Like Attachment
 with Non-Uniform Heat Generation in the Attachment
 P.H. Oosthuisen .................................................. 29

 **FLUID FLOW**

 Numerical Analysis of Steady-State Laminar Free Convection
 over a Horizontal Cylinder with Elliptic Cross-Section
 A. Abbassi, H.B. Tabrizi, and S.A. Nazemdeh .......... 37

 Three-Dimensional Numerical Simulation of a Laminar
 Impinging Square Jet through a Cross-Flow
 L.B.Y. Aldabbagh and I. Sezai .............................. 43

 Scalar Mixing in an Annular Air Jet
 A. Benaïssa ...................................................... 49

 Break-Up of Liquid Jets in Cross Airflows
 M. Birouk, T. Stäbler and B.J. Azzopardi ................. 53

</table>
Numerical Simulation of Unsteady Flow Interaction with Virtual Swaying Bluff-Body
L.Z. Ma and H. Hangan .................................................. 139

Convection of a Binary Mixture in a Shallow Cavity Subject to Various Hydrodynamic Boundary Conditions
A. Mahidjiba, R. Bennacer, H. Beji and P. Vasseur ...................... 145

Numerical Visualization of Moist Air Flow through the Ludwieg Tube

Shock Tube Flows with Non-Equilibrium Condensation in Rarefaction Wave

Active Management of a Strong Wall Jet by a Streamwise Vortex
S. Mochizuki, S. Yamada and H. Osaka .................................. 163

The Effect of Flow Distribution on Mixing Characteristics in the Thermally Layered Storage Tank
T. Nakahara, T. Kato, K. Kudo and H. Taniguchi ......................... 169

A.A. Ozalp ........................................................................ 175

Transitional and Turbulent Transport Measurements on a Concave Wall in the Presence of Adverse and Favourable Pressure Gradients
A.A. Ozalp and H. Umur ...................................................... 181

Thick Fluid Interface Modeling
R. Prud'homme and R. Gatignol ............................................ 187

Communications on the Theory Underpinning Control Volume Capacitance Methods
N.J. Rodriguez .................................................................... 193

Flow Visualization in Air Spaces between Protective Fabrics and Sensors in Protective Clothing Tests
C.M.J. Sawcyn and D.A. Torvi .............................................. 197

Experimental Study on Particle Motions Functionally Graded Materials by Centrifugal Method
S. Tanaka, S. Torii, T. Yano and Y. Watanabe .............................. 203
Unstable Turbulent Flow Field in a Mechanically Agitated Tank with Double Fan Turbines
   S. Winardi, Widiyastuti and A. Airway .................................. 207

Jet Impingement onto a Hole with Constant Wall Temperature
   B.S. Yilbas, S.Z. Shuja and M.O. Budair .................................. 213

Intensification of Transport Processes Near a Wall to Control Flow Separation
   N.F. Yurchenko, G.A. Voropaev and V.I. Korobov .......................... 219

Three-Dimensional Numerical Simulation of Laminar Air Flows in Wavy Plate-Fin Channels
   J. Zhang, R.M. Manglik, A. Muley and J. B. Borghese .................... 224

HEAT TRANSFER

Thermodynamic Analysis of Thermally Activated Building Elements for Cooling
   A. Can, E. Buyruk and M. Kucuk ............................................. 233

Steady and Transient Critical Heat Fluxes on a Horizontal Cylinder in a Pool of Freon-113
   K. Fukuda and Q. Liu ............................................................ 239

Experimental Study of Thermophoresis Particle Deposition on Heat Transfer Surface
   I.I. Hakim, H. Kanda, A. Shimizu, T. Yokomine and S. Ebara ............. 245

Heat Transfer and Material Removal during Excimer Laser Interaction with Polymeric Materials
   C.S. Hou, C.C. Hu and C.Y. Wu ............................................... 249

Qualitative Analysis of a Burning Slick of Fuel on a Waterbed-Similarity Analysis of the Relevant Models Published and the Pre-Boilover Time Data
   J. Hristov, E. Planas, J. Arnaldos and J. Casa .............................. 255

Effect of Flow Reversal on Wall Heat Transfer in Three-Dimensional Mixed Convection
   K. Ichimiya and K. Toriyama ................................................... 261

Heat Transfer Characteristics of 3-D Backward-Facing Step Flow in a Rectangular Duct
   K. Inaoka, T. Kojima, K. Nakamura and M. Senda ............................ 267

Heat and Mass Transfer of Ammonia Gas Absorption in Ammonia/Water Absorption Refrigerating System
   N. Inoue, M. Goto and H. Yabuuchi .......................................... 273

</table>
A Novel Convective-Diffusion Capacitance Method for Heat Transfer and Solidification Modelling
   N.J. Rodríguez, K. Davey and G.U. Calderon .................. 351

Determination of the Initial Stages of Mixed Convection from an Accelerating Elliptic Cylinder
   M. Saunders and S. D'Alessio ............................... 357

Effect of Surface Properties on Boiling Heat Transfer Characteristics in Micro-Channel Vapor Generator
   Y. Tasaki, Y. Utaka and T. Gotoh ...................... 363

Propagation Phenomena of Thermal Shock Wave in Thin Film
   S. Torii and W.J. Yang .................................. 369

Direct Simulation Monte-Carlo Modeling of Low-Speed Gas Flow and Heat Transfer in Micro-Channel
   P.Y. Tzeng, C.Y. Lo and P.H. Chen ..................... 375

The Effect of Three-Dimensional Recirculation Flow Structures on Flow Mixing of Micro-Scaled Confined Jets
   P.L. Woodfield, K. Nakabe and K. Suzuki ............... 381

Transient Liquid Crystal Technique for Impingement Heat Transfer Measurement

THERMODYNAMICS

A Self-Consistent Non-Equilibrium Model for Compressible Plasma Flows
   Y. Bartosiewicz, Y. Mercadier and P. Proulx ............. 395

Transport and Tunneling of Scalar Wave Fields in Nonhomogeneous Amorphous Media
   P. Ben-Abdallah, B. Ni and V. Le Dez .................. 401

Electrokinetic Effect on Flow of an Aqueous Solution through a Microchannel
   Y. Gu .................................................. 407

Exergy Optimization in a Paper Machine
   A. Hazi ................................................. 413

Probability Density Function and its Higher-Order Approach for Deterministic Systems
   H. Ishida and H. Kimoto ................................ 417
A Non-Equilibrium Thermodynamic Formulation of Suspensions of Rigid Particles in Moving Fluids
G. Lebon, N. Depireux and P. Colinet ........................................ 423

How Much Work Is Lost in an Irreversible Turbine?
H. Struchtrup and M.A. Rosen ........................................... 429

New Light Powered Transport in Dynamics of Multiphase Flows
A.T. Sukhorodolsky ......................................................... 435

Thermodynamic Analysis of Cryogenic Air Separation Process
D. Tripathi and S.K. Agrawal ........................................... 441

Exergy and Dissipation for Shock Wave Propagation in a Perfect Gas
S. Wright and J.B. Haddow ............................................... 447

MASS TRANSFER
Performance Study of Heat and Mass Transfer in a Structured Packing Liquid Desiccant Regenerator
A.A. Al-Farayedhi, P. Gandhidasan and M.A. Antar ...................... 453

Utilization of Shale Oil by Extraction and Retorting of Oil Shale
M.Z.A. Anabtawi and N. Hilal ........................................... 459

Investigation of the Kinetics of Isothermal Dehydroxylation of Dickite and its Flash Calcines
H. Atakül, R.C.T Slade and M.F. Yardim .................................. 463

Absorption of Ammonia Vapor Into Falling Film of Aqua-Ammonia Solution
A.R. El-Ghalban ................................................................... 469

Effect of Particle Size Distribution on Rheology and Stability of High Concentration Coal-Water Mixture (CWM) with Indonesian Low Rank Coal
E. Harmadi, Suwarmin, S. Machmudah and S. Winardi .................. 475

Methanol-Acetone Separation by Solvent-Extraction Distillation
N. Hilal, G. Yousef and M.Z. Anabtawi .................................... 481

Modelling of Two-Dimensional Heat and Moisture Transfer during Drying of a Slab Product
M.M. Hussain, I. Dincer and B.S. Yilbas .................................. 485

Effect of Nonlinear Coupling between Transport and Reaction Dynamics in Polymerization Processes
K. Kataoka, N. Ohmura, T. Yano and S. Matsuzaki ....................... 491
Moisture Transfer in Capillary-Porous Materials: Driving Forces and Transport Coefficients  
A.F. Miguel and A.M. Silva ........................................... 497

Modeling and Experimental Study of Heat and Mass Transfer in a Direct Evaporative Air Cooler with Two-Row Facing Spray  
B. Ni and D. Blay ......................................................... 503

Current-Induced Mass Transport in Metallic Films in the Near-Threshold Regime  
J. Proost, K. Maex and J.P. Celis ...................................... 509

Pertinence of Micro-Gravity Studies for Solid/Liquid Phase Change  
R. Prud'homme ............................................................. 515

Modelling Combined Transport and Phase Change with a Control Volume Capacitance Method  
N.J. Rodríguez, K. Davey and V.C.P. Mauricio ........................... 521

Determination of Diffusion Coefficient of the Turkish Trona in Alkaline Solution  
K. Sahin and G. Nasün-Saygili .......................................... 527

An Investigation of Effects of Surface and Diffusion Processes on Interaction between Atomic Hydrogen and Zirconium  

A New Correlation for the Limiting Quality of CHF at Low Mass Flow Rates and at Low Pressure  
S. Yildiz and G. Bartsch .................................................. 535

The Mechanism of Charge Redistribution in Metals and Alloys. The Charge Ordering  
S.Yu. Zaginaichenko, Z.A. Matysina, D.V. Schur and V.A. Chumak ........ 541

A Comprehensive Resistance Network-Based Hydraulic Model for Coolant Flow in Disk-Type Electrical Transformer Windings  
J. Zhang and X. Li ......................................................... 545

SOLIDIFICATION AND CRYSTALLIZATION  
Numerical Analysis for the Growth of GaN Layer in MOCVD Reactor  
B.J. Baek, B. Pak, C. Shin, J.M. Yoon, C.R. Lee and K.S. Park .......... 553

Computational Analysis of Marangoni Effects during Floating Zone Growth under Micro-Gravity Conditions  
R. Bennacer, M. El Ganaoui, A.A. Mohamad and P. Fauchais ............ 559
Advanced Macroscopic Modeling of Binary Alloy Solidification
   P. Bousquet-Mélou, F. Fichot, B. Goyeau, M. Quintard, D. Gobin . . . 565

Numerical Simulation of the Growth and Transport of Ice
Particles in a Turbulent Round Jet
   P. Bousquet-Mélou, F. Garnier, F. Uthéza ............................. 571

A Three-Dimensional Simulation Model for Liquid Phase
Electroepitaxy under Magnetic Field
   S. Dost, Y.C. Liu, H. Sheibani, S. Sakai, Y. Okano and B. Lent .... 577

Modeling Polyethylene Crystallization in Rotational Molding
Process
   M. Golmohammadi, S. Mazinani, F. Sharif and N. Mohammadi . . . 583

Numerical Simulation of Crystal Growth of CdZnTe by Vertical
Gradient Freezing Method
   Y. Kawaguchi, H. Kondo, Y. Okano and S. Dost ..................... 587

Effect of Applied Magnetic Field in Growth of CdTe Single
Crystals by the Traveling Heater Method
   Y.C. Liu, S. Dost, B. Lent and R.F. Redden ......................... 593

LPEE Growth of Binary and Ternary Crystals under Applied
Magnetic Field- Experimental
   H. Sheibani, S. Sakai, S. Dost and B. Lent .......................... 599

Deposition of Particles in Turbulent Boundary Layer on a Flat
Plate Using Two-Fluid Model
   H.B. Tabrizi and Sh. Shahriari ...................................... 605

The Influence of the Soret Effect on the Morphological Instability
during Directional Solidification of a Binary Alloys
   V. Timchenko, R. Bennacer, E. Leonardi and G. De Vahl Davis . . 611

Effect of Water Density Extremum on the Melting Process in
a Rectangular Enclosure
   G.R. Vieira, S.L. Braga and D. Gobin ............................... 617

COMBUSTION

Flame Holding Mechanism of Hydrogen Jet Diffusion Flames
   S. Matsuda, S. Torii and T. Yano .................................... 625

Predictions of Turbulent Jet Non-Premixed Flames Using a
Single Scalar Probability Density Function Approach
   S. Noda and M. Nishioka ............................................. 630
Self-Heating Propensity of Carboneous Materials as Predicted Using a Simple Method
Y.S. Nugroho, Harinaldi, Lusyadi, G. Sunyoto and T. Rahayuning 637

Combustion Phenomena of Diffusion Flame Using Turbulent Annular Jet Mixing Technique
S. Torii, J. Matsukawa and T. Yano 643

Combustion Phenomena of Turbulent Jet Diffusion Flames Using Annular Counterflow Technique
S. Torii, S.M.S. Chan and T. Yano 649

HEAT EXCHANGERS

Non-Dimensional Parameter to Indicate the Fouling Factor in Heat Exchanger
R.A. Koestoer 657

Design of Air-To-Air Thermosyphon Heat Exchangers for Energy Conservation in Industries
S.H. Noie, M. Lotfi and N. Saghatoleslami 661

Thermofluid Characteristics of Frosted Finned-Tube Heat Exchangers
W.M. Yan, H.Y. Li, J.H. Wu and Y.L. Tsay 667

Effect of Inlet Flow Maldistribution on the Thermal Performance of a Three-Fluid Crossflow Heat Exchanger
Ping Yuan 673

THERMAL PROCESSES

Process Intensification in Particle Technology: Intensive Agglomeration and Microencapsulation of Powders by Thermomechanically Induced Melt Fracture
G. Akay and L. Tong 681

Condensation of Refrigerant on Three-Dimensional Pin-Fin Tubes
A. Briggs 689

Modeling and Simulation of Gas Turbine Cycles with Water Injection in Compressor Inlet
E. Hajidavalloo and M.R. Saffarian 695

Process Intensification in Wastewater Treatment: Oxygen Transfer Characteristics of an Aerobic Jet Loop Reactor
B. Keskinler, G. Akay, T. Pekdemir, E. Yildiz and A. Nuhoglu 701
Enhancement of the Latent Heat Storage Rate of Phase Change Material in a Spherical Capsule
    H. Koizumi ................................................. 707

Power Consumption of Non-Newtonian Fluid in Stirred Tank
    S. Machmudah and S. Winardi ............................... 713

Numerical Simulations of a Single Wafer Thermal Processing with a Feedback Control
    Y. Mo, E. Morisaki, M. Kitamura, T. Ohta and J. Hata ......... 719

Prediction of Optimum Performance of Rotary Desiccant Dehumidifiers
    H. Pahlavanzade and S.H. Mozaffari .......................... 725

Performance Evaluation and Energy Efficiency in Steam Power Plants
    M. Saffar-Avval, L.S. Mayboudi, F. Rahman and R. Eshghi ........ 731

Gas Turbine Cogeneration System with Steam Injection. A Modern Cogeneration Plant
    M.G. Soufi, T. Fujii and K. Sugimoto .......................... 737

The Combined Simulation of Radiant Box and Pyrolysis Reaction in Industrial Cracking Furnaces
    J. Towfighi, A. Niaei, M. Sadrameli and R. Karimzadeh ........ 743

Provisional Comparison of Correlations for Pressure Drop during Condensation of Refrigerants in Horizontal Microfin Tubes
    H.S. Wang, J.W. Rose and H. Honda ............................ 749

**ENERGY AND THE ENVIRONMENT**

The Effects of the Socioeconomic Factors on the Household Appliance, Lighting, and Space Cooling Electricity Consumption
    M. Aydinalp, V.I. Ugursal and A.S. Fung ....................... 757

Thermodynamic Optimization of the Life Cycle of Plastics by Exergy Analysis
    J. Dewulf and H. Van Langenhove .............................. 763

Olive Pips – A Potential Valuable Biomass Source of Clean Combustible Gas Using an Intensive Gasifier
    M. Dogru, G. Akay, C.R. Howarth, B. Keskinler, M.J. Ling
    and A.A. Mali .............................................. 767

Generation Performance of Gas-Feed Direct Methanol Fuel Cell
    K. Furukawa, F. Kaga, K. Okajima and M. Sudoh ................ 773
Satellite Monitoring of Advection of Volcanic Clouds
   N. Iino, K. Kinoshita, S. Torii and T. Yano .................................... 779

Investigation on Compressed Air Power System Driven by Wind Energy
   G.Z. Jia and X.Y. Wang .............................................................. 785

Effects of Hub-To-Tip Ratio and Tip Clearance on Hysteretic Characteristics of Wells Turbine for Wave Power Conversion
   T.H. Kim, Y. Kinoue, T. Setoguchi, I. Seike and K. Kaneko .............. 791

Design Analysis of once-through Bottoming System for Combined Cycle Power Plants
   T.S. Kim, J.S. Yang and S.T. Ro .................................................. 797

Analysis of Advection and Dispersion of Asian Dusts Using Meteorological Satellite Data
   T. Masumizu, K. Kinoshita, T. Yano, S. Torii, N. Iino and I. Uno ... 803

Exergy Efficiency Calculation of Power Plant Based on Exergy Flow Graph
   V. Nikulshin, C. Wu and V. Nikulshina ........................................ 809

The Effects of Reynolds Number and Hub-To-Tip Ratio on the Performance of Impulse Turbine for Wave Energy Conversion
   T. Setoguchi, T.H. Kim, I. Seike, K. Kaneko and M. Takao .............. 815

Modification Effect of Proton-Exchange Membrane on Methanol Permeation and Proton Conductivity for Direct Methanol Fuel Cell
   M. Sudoh, T. Hakamata, K. Furukawa and K. Okajima ...................... 821

Energy and Exergy Efficiencies of Fluidized Bed Drying of Moist Particles
   S. Syahrul, F. Hamdullahpur and I. Dincer .................................. 827

Drag Reduction of Guar Gum in Crude Oil
   Yanuar and K. Watanabe ........................................................... 833

Analysis of Fluid Flow and Heat Transfer in Proton Exchange Membrane Fuel Cell Ducts by an Extended Darcy Model
   J. Yuan, M. Rokni and B. Sundén .............................................. 837

Author Index ................................................................. 843
