Inter-model Control

Grey Modeling and Control of a Thermal Barrel in Plastic Molding Processes
Kuen-Yih Shy, Yin-Tien Wang (2557)

Design of Controller for the Dual-Stage Actuator in Hard Disk Drive using Internal Model Approach
Abdullah Al-Mamun, Tong Heng Lee, Pan Ling, Thambirajah Suthasun (2561)

Research of Fuzzy Neural Networks IMC for Greenhouse Environment
Dingcheng Wang, Tingjian Fang, Yongjun Ma, Wei Chen (2566)

Robust Two-Degree-of-Freedom Internal Model Control
Jinggang Zhang, Zhiyuan Liu, Zhimei Chen, Zhicheng Zhao (2571)

Advanced Manufacture Technology

Research on Enterprise Modeling Architecture and Supporting Tool for Agile Manufacturing
Yiru Dai, Juawe Yan, Guangqiang Tang (2575)

Research of the Service Chain Management in the Manufacture Enterprises
Lu Jianfeng, Zhang Hao, Zhao Wei (2580)

Research of Task Re-allocation Mechanism in Agile Supply Chain based on Combinatorial Auction
Changrui Ren, Yueting Chai, Yi Liu (2585)

A kind of ordering method with the permission of backorder in MRP
YU Yugang, LIANG Liang, Wu Jianlin, YANG Bo (2590)

Study on Web-Based CAPP System with Three-Tier Architecture
Hejun Zhu, Liping Zhao (2595)

Database and its Management

Dynamic Production Scheduling System Based on Data Warehouse
Wei LIANG, Haibin YU (2599)

Application of PDM based on Concurrent Engineering
Ge Zhengyu, Fan Wenhui, Xiong Guangle, Zhou Laisheng, Li Yunpeng, Su xiaohua (2604)

Research on Engineering Change Management in Virtual Enterprise
Shijun Liu, Xiangxu Meng, Shengwei Zhong, Baoxiang Cao (2608)

Computer Intelligent Resource Management System For CIMS
Xueming Wang, Zuren Feng (2613)

A FUZZY-BASED SUPPLY CHAIN MANAGEMENT DECISION SUPPORT SYSTEM
Hao Liang, Zhou Wu, Qidi Wu (2617)

A Business Intelligence-Based Supply Chain Management Decision Support System
Liang Hao, Gu Lei, Wu Qidi (2622)

CIMS

Design and implementation of Yi Chang production-sale computer system based on CIMS structure
WANG Xiao-dong, ZHENG Ying-gen, LIU Quan-li, WANG Wei (2627)
CIMS Applied in Water Treatment
Zhanghang, Da-yong Luo, Xiang-jun Li ........................................... (2631)

RESEARCH ON THE KEY TECHNOLOGY OF INTEGRATING E-COMMERCE WITH CIMS
Han Qinglan ................................................................. (2636)

Process Monitoring and Optimal Control in Alcohol Production Enterprises Under A CIMS
Information Integration Environment
Sheng Qiang, Xianyi Zhuang, Shuyi Wang, Xiaorong Mei, Guozhong Liu, X.Z. Gao ........... (2640)

An Ultrasonic Navigation Automatic Guided Vehicle System used in CIMS
Tong Feng, Xu Tianzeng .................................................. (2645)

A Cost Estimation Model of Product Based On CAD/CAPP Integration
Pan Shuangxia, Jiang Shaofei, Xu Youzhong ................................ (2650)

Agent
A MES Design Based Multi-Agent System
ZHOU Wei, JIN Yi-hui ......................................................... (2655)

Research on Conflict Resolution Based on Multi-agent System in Concurrent Engineering
Yang Xin-bin, Sun Jing-gao, Shi Hong-bo, Huang Dao .................................... (2660)

Building Agent-mediated Teleservice System On J2EE platform
Qi Li, Jian Wang, Hao Zhang, Xiaoxuan Xie ........................................ (2665)

Multi-Agent Knowledge Acquisition and Application in Distributed Enterprise Database
Mao Xuemin, Chen Wei, Xiong Fanlun, Wang Rujing ........................................ (2669)

Implementation of Distributed Intelligence Control System Based on Multi-Agent
Fujiang Jin, Hui Wang, Ping Li ..................................................... (2673)

Objective Tracking
Adaptive Maneuvering Targets Tracking for Multiple Airborne Mobile Platforms and Sensors
Fei Chen, Zhongliang Jing, Jianxun Li ........................................ (2677)

Analysis and Simulation of Passive Target Tracking Algorithm under Polar Coordinates
Fei Chen, Zhongliang Jing, Feng Li .................................................. (2682)

“Soft Assignment Algorithm” in Maneuvering Targets Tracking
Yu Guanghui, Dai Yaping, Hou Chaozheng, Chen Jie ........................................ (2687)

Research on recognition algorithm of moving-target on the battlefield
Zhu Feng, Dou Lihua, Yang Guosheng, Chen Wenjie ........................................ (2693)

Fault Diagnosis
Application of Support Vector Machine Nonlinear Classifier to Fault Diagnoses
Weiwu Yan, Huihe Shao ......................................................... (2697)

The Model and Algorithm of Automatic Data-Mining of Network Intrusion Characteristics
Huiyong Huang, Xingyu Wang ..................................................... (2701)

An LMI approach to Design Robust Fault Detection Observers
Maiying Zhong, Steven X. Ding, Tang Bingyong, Torstern Jeinsch, Mario Sader ................. (2705)

A New Type of Reconfigurable Control against Actuator Faults
ZHOU Yu-guo, ZHANG Ying-wei, WANG Fu-li ........................................ (2710)

A Sliding Mode Observer Approach For Fault Detection And Diagnosis In Uncertain Nonlinear Systems

32
Liling Ma, Yinghua Yang, Fuli Wang, Ningyun Lu ............................................. (2714)
PCB Infrared Thermal Imaging Diagnosis using Support Vector Classifier
Wan Jiuqing, Li Xingshan ................................................................. (2718)
Rolling Bearings Fault Diagnosis Based on Energy Operator Demodulation Approach
Ruizhong Lin, Shanan Zhu, Helei Wu, Jianfeng Zheng ................................... (2723)
Fault Detection for Uncertain Sampled-data Systems
AN APPROACH TO NONLINEAR FAULT DIAGNOSIS BASED ON NEURAL NETWORK
ADAPTIVE OBSERVER
Zhou Chuan, Hu Weili, Chen Qingwei, Wu Xiaobei, Hu Shousong ...................... (2733)
An Intelligent System for Real-time Monitoring and Fault Predicting
Ming Rao, Jilu Feng, Jinming Zhou, Yunsheng Xu, Qianjin Liu, Jun Wen ................ (2737)
Application of Rough Sets to Fault Diagnoses
Zonghai Sun, Youxian Sun ............................................................................... (2742)
Robust Fault-tolerant Control for Linear Systems with Nonlinear Uncertain Parameters
Jitao Sun, Feiqi Deng, Yongqing Liu ................................................................ (2746)
An Approach to Sensor Fault Diagnosis Based on Fully-decoupled Parity Equation and Parameter estimation
SONG Hua, ZHANG Hongyue ....................................................................... (2750)
An Input-training Neural Network-Based Nonlinear Principal Component Analysis Approach for Fault Diagnosis
Li Erguo, Yu Jinshou .................................................................................... (2755)
Hamilton-Jacobi Inequality Based Reliable H∞ Control for Nonlinear Systems
Yudong Chen, Zhengxin Weng, Songjiao Shi ................................................ (2760)

Distributed Systems

A Multi-robot System Based on Dictributed Coordination
Xiaogang Wang, M. Moallem, Yun Chen ..................................................... (2765)
PCSCW: P2P-based Computer Supported Cooperative Work Research
Hua Xia, Qidi Wu, Hao Zhang, Jianfeng Lu, Dongshan Xing ......................... (2770)
Design an Analysis of Networked Control system of Flight Simulation Platform
Xiao Yunshi, Su Yongqing, Yue Jiguang ...................................................... (2775)
Research on Improving Performance of Networked Control System Based on IA Method
LI Bingyu, XIAO Yunshi .............................................................................. (2778)
Design of a Mixed Distributed Computer Control System
Yang Qingyu, Shi Ren .................................................................................. (2782)
The Design of SCADA Based on Industrial Ethernet
Zhihao Ling, Jinshou Yu ............................................................................... (2786)
Fieldbus Network Implementation Based on RS-485
Qian Dong, Jianying Xie .............................................................................. (2790)
Study on Bandwidth Allocation Optimization of FF Acyclic Communication
Lei Chen, Jian Chu ........................................................................................ (2794)
The Study of MA Active Optics Control System Used for LAMOST
Bin Li, Yuechao Wang, Zhenwei Wu, Chenguang Bu .................................. (2799)
Time Division Multiple Access based on CAN
Liming He, Zuohua Tian .............................................................................. (2803)
Motion Control

Extended State Observer Based Technique for Control of Robot Systems
Yi Huang, Z. W. Luo, M. Svinin, T. Odashima, S. Hosoe ........................................... (2807)

A Neural-Network-Base Adaptive Estimator for Speed-Sensorless Control of Induction Motor
Wang Dazhi, Gu Shusheng, Wang Kenan ................................................................. (2812)

Smart Collision Free Motion Control for Robot Arms
Guangyu Lian, Zengqi Sun, Kim Kab II .............................................................. (2817)

CONTROL BY NON-STATIONARY DRIVING OF THE HOPPING APPARATUS
Vladimir B. Larin ..................................................................................................... (2822)

A DSP-Based Vector Control of Multiphase Induction Machine
Lijun Hou, Yanmin Su, Lin Chen ........................................................................... (2831)

Lyapunov Stability Based Three-Dimensional Guidance for Missiles against Maneuvering Targets
Zhang Youan, Hu Yunan, Gu Wenjin ........................................................................ (2836)

Model and Analysis of Three-phase PDM Converter With High-frequency Link
Xianmin Ma, Qian Yang ......................................................................................... (2841)

Efficient Control of an Induction Motor Based on the Decoupling Variable Structure Strategy
Wei Li, Zongyuan Mao ............................................................................................. (2845)

Speed Sensorless Direct Torque Control System of Induction Motor
Liu Xing-qiao, Zhao De-an, Sun Yu-kun, Liu Guo-hai ............................................ (2849)

Human-machine Systems

Haptic Display of Contact States
Song You, Jing Xiao ................................................................................................. (2854)

A Force Feedback System based on Robot Control
Yang Zehong, Jia Peifa, Zhao Yannan, Yang Yuandong ........................................ (2860)

The Design and Realization of Fuzzy Velocity Controller for Navigation and Interactions in Virtual Environment
WANG Tao, FEI Min-rui .......................................................................................... (2865)

A New Controller for Unit Production System
Lou Ip Keong, Chen Wei Ji ....................................................................................... (2869)

Applications

Adaptive method for low velocity moving target detection
Wen Xiang, Shi Lin, Yang Wanhai ............................................................................ (2873)

An H∞ Approach to Decoupling Control Design
Bin Huang, Qing-Guo Wang, Yong-Sheng Yang .................................................... (2878)

A decoupling controller of genetic Neural algorithm with improving function of Adaptable degree
Hou Yuanbin, Zhu Haijiang ...................................................................................... (2883)

Rough Set Based Knowledge Acquiring Method in Intelligent Detecting System for Lack of Weld
Bing Wang, Tao Lin, Shanben Chen ......................................................................... (2887)

Protocol Analysis Based on EPr/TN Net
Xiaoqin Fan, Ying Tan, Jianchao Zeng .................................................................... (2892)

RBFNN Based Direct Adaptive Control of MIMO Nonlinear System and Its Application to a Distillation Column
LI Shurong, SHI Haitao, LI Feng ............................................................................ (2896)
Automatic Separation of Overlapping Objects
Liu Binghan, Fang Xiu-dan, Wang Wei-zi, Zheng Zhi-yong (2901)

Quantum Motion Control in Quantum Computer
Guang-gui Bao (2906)

An Algorithm of Optimal Control Based on Bilinear Model for Nonlinear Continuous-time Dynamic Systems
Jun-min Li, Jia-qing MA, Bai-wu WAN (2909)

Post Papers

The Research of Synergetic Algorithm in Intelligent Control of Crystal Growth
Wang Wei-zi, Liu Bing-han, Fang Xiu-dan (2913)

Input Estimation for Uncertain Linear Singular Systems and Robust Stabilization
Zhu Shu-qian, Sun Li-ying, Cheng Zhaolin (2917)

Study of Calibration and Dynamic Characteristic of SAFMS-T
Tang Yi, Ge Yun-jian, Tang Jun-biao, Gao Li-ju (2922)

Bottleneck Analysis of the Generalized Networks
Jiang Yong-heng, Jin Yi-hui (2926)

Research of Control System In Fusion Architectures
Yun-xiang Xu, Xiu-qing Wu (2931)

An Optimal Neural Network Speed Estimator Using Genetic Algorithms
Cheng-chi Cao, Xiao-bo Yang, Haiping Li (2936)

Study on Condition Monitoring and Diagnosis System of Hydroelectric Generating Set
Chen Qijuan, Jian Jing, Liu Guanlin (2940)

The Application of Wavelet Theory and Fuzzy Recognition Technology in Signal Processing
Yuan Li, Jian Wang, Guo-qing Quan, Jian Zhang, Chun-bao Huo (2944)

A Road Boundary Detection Method for Autonomous Land Vehicle
Guo-wei Tang, Xian-de Liu, Xian-mei Liu, Hui Yang (2949)

Artificial Neural Networks Method for Oil Systems Identification and Its Applications
Dong Defa, Liu Tienan, Yuan Jiuzheng, Xie Aihua (2952)

New Recursive Algorithm on Model Orders and Its Application
Fu Guang-jie, Mu Hai-wei, Liu Shi-qing, Tao Guo-bin, Wang Jin-yu (2956)

Research on Dynamic Team Formation for Multirobot based on Reinforcement Learning
Wang Xing-ce, Zhang Ru-bo, Gu Guo-chang (2959)

Application of Neural Network Approach for MAP-MRF Model-based MEG Source Imaging
HU Jing, HU Jie (2964)

The El Algebra Representations of Fuzzy Concepts
Liu Xiaodong, Zhang Qingling (2968)

Robust Nonlinear Control for Bank to Turn Missile
Zhang You-an, Yang Huadong, Hu Yunan (2973)

Hybrid Intelligent Control Algorithm to Ship Steering Based on Soft Computing
Guoxun Yang, Chen Guo, Xinle Jia, Yiding Zhang (2978)

A Online-Trained Neural Network Controller for Electro-hydraulic Servo System
Zhao Hong, Dang Kaifang, Lin Tingqi (2983)

Weighting Adaptive Control of Wiener Model Based On Multi-layer Feed-forward Neural Networks
Xuejie Wang, Lijuan Wu, Xiaohua Li, Xuebo Chen (2987)

Induction Motor Drives with Direct Torque Control Based on Adaptive Fuzzy Control
Xia Yang, Zhang Tianping, Tang Hongru

A Design of A Low Cost High Precision Data Acquisition System
Li Dongsheng

(2991)

An Improved Partheno-genetic Algorithm for Travelling Salesman Problem
Maojun Li, Tiaosheng Tong

(3000)

Wavelt Packets Analysis of Rolling Bearing Vibration Signal and Fault Testing
Xia Limin

(3005)

The technique for measurement path be controlled based on surface reverse and ultrasonic measurement
Wang Yanying, Zhou Xiaojun, Cheng Yaodong, Liutao

(3009)

Analysis and Detection of Ceramic-Glass Surface Defects Based on Computer Vision
Jiaoyan Ai, Xuefeng Zhu

(3014)

A Study on the Optimal Population Size of Genetic Algorithm
Dawei Li, Li Wang

(3019)

Adaptive backstepping control for a class of strict feedback nonlinear systems using radial basis neural network
Yunan Hu, Youan Zhang, Pingyuan Cui

(3022)

Design of Fuzzy Weight Controller in Single-Axis Magnetic Suspension System
Peng Yang, Qiang Zhang, Lianbing Li

(3027)

Application of Fuzzy Mathematics in the Problem of Setting Up an Organization Meeting the Urgent Needs
Zeying Tang, Hanqing Lu

(3031)

The Research and Realization of Full Redundancy Technology in LON Monitoring and Control Network
Zhihao Ling, Jinshou Yu

(3035)

H2 Performance Analysis and Control for Discrete-time Descriptor Systems
D. M. Yang, Q. L. Zhang, B. Yao, C. M. Sha

(3039)

3D feature recognition base on CNN
Tao Pin, Zhang Bo, Ye Zhen

(3044)

Manufacture & Management Information System of Mine Enterprise
Hao Zhang, Fusheng Lan

(3048)

The Development of an Intelligent Small Paperless Recorder
Feng Xie, Ganfeng Liu, Mingguang Wu

(3053)

A Controller with Impulse Force Moment Design for Two-Links Flexible Manipulator
Li Xiaoguang, Liu Junyi

(3058)

Study on An Adaptive Tabu Search Genetic Algorithm
Dunwei Gong, Yong Zhou, Xijin Guo, Xiaoping Ma, Ming Li

(3063)

The Predictive Control of the Liquid Level of The Pre-fractionating Tower of a Catalyzing Reforming Plant
Chao He, Liankui Dai

(3066)

A Multi-agent and Holonic Approach for Intelligent Scheduling in Agile Manufacturing Environments
Wang Yanhong, Huang Fang, Yin Caowan, Tian Yantao

(3071)

Study of Fuzzy Controller Based on Analysis Method with PLC
Jingzhao Li, Chongwei Zhang

(3076)

Robust Decentralized Control of a Class of Uncertain Interconnected Systems
Li Xiaoyi, XU Zhaoqi

(3080)

On the robustness of linear delayed systems with nonlinear uncertain Parameters
Jitao Sun, Yinping Zhang

(3085)
Visual Technologies In Shared Control Mode Of Robot Teleoperation System
Cui Jinshi, Sun Zengqi, Li Ping ........................................... (3088)

Design of a New Controller Based on D_S Evidential Theory
Da-yong Luo, Zhanghang, Xiang-jun Li ................................. (3093)

Mining Frequent Sub-Trends in Time-Series Databases
Siyu Guo, Tiejun Wu .......................................................... (3096)

The Rotational Inverted-pendulum Based on DSP Controller
Du Gaixin, Huang Nanchen, Wu Gang, Zhang Peiren, Qing Zhiyuan, Sun Demin .................................................. (3101)

A Scheduling Algorithm for Flexible Flow Shop Problem
Li Wang, Dawei Li ............................................................... (3106)

The Application of CAN Field Bus Technology in The Beer Fermentation Process
Shuchuan Gan, Chenghua Fu .................................................. (3109)

Distributed Control System in Water Plant Based on ControlNet
Yubin Xu, Yinzhang Guo, Honggang Wang, Jianchao Zeng .................. (3113)

The Auto-Tuning Controller with Low Redundancy Information
Mingqi Huang, Zetao Li, Fang Wen ....................................... (3118)

The Principle and Application of Synergetic Pattern Recognition
Fang Xiuduan, Liu Binhan, Wang Wezhi ................................. (3122)

The Evolutionary-programming Learning of Linguistic fuzzy model for nonlinear system and Designing of configuration for neural network
Wang Xiaolan, Wang Huizhong, Chen debao ............................. (3127)

PID Self-tuning Control Based on Evolutionary Programming
Wang Xiaolan, Dong Jianghui, Chen Debao ............................. (3132)

Application of Single Neuron PID controller in Asymmetric Cylinder Electrohydraulic Servo System
Zilong Liu, Xianyi Zhuang, Sheng Qiang, Shuyi Wang, Yahui Li .................. (3136)

Neural Network Control With Fuzzy Predictor For Ship Autopilots
Chuande Zang, Guoliang Zhao, Honglin Wei ............................ (3141)

Method of Parameters Identification of Imaging Model Used to Correct Computer Vision Error
Zhao Shuying, Hu Ying, Si Bingyu, Xu Xinhe ............................ (3145)

Fault Diagnosis OF Airplane Hydraulic Pump
Zhou Ruixiang, Lin Tingqi, Han Jianding, Yan Dongchao .................. (3150)

Feedback Penalty Function Based on Genetic Algorithm
He Dakuo, Wang Fuli ............................................................ (3153)

A new fault detection and diagnosis method based on principal component analysis in multivariate continuous processes
YANG Yinghua, LU Ningyun, WANG Fuli, MA Liling .................. (3156)

Research of Rotary Inverted Pendulum Using Fuzzy Strategy Based on Dynamic Query Table
Sheng Liu, Lihui Cui, Jie Chen, Ming Bai ................................. (3161)

TWS Tracking Techniques Based on Adaptive Gaussian Mixture Model in Phased Array Radar
Xue Jianru, Geng Xinli, Zheng Nanning .................................... (3166)

Rule Induction Based on A Novel Evolutionary Strategy
Wang Ruojun, Cui Duwu, Zhang Ye ....................................... (3171)

Computer Controlled Synthesizing of Superhard Materials
Feng'e Bai ............................................................................. (3175)

Development of a New Online Monitoring System about Anti-fouling Efficiency of Cooling Water Treatment Technology
Sun Lingfang, Yang Shanrang, Li Jing, Wang Jianguo, Xu Zhiming .................. (3179)
