# TABLE OF CONTENTS

## VOLUME I

### XXX IAHS – World Congress on Housing – Housing Construction

**An Interdisciplinary Task**

Housing: A Catalyst for Global Development  
*Oktay Ural* ................................................................. 3

### Keynote Lectures

**Historical Perspective of Housing Needs - Recent Past to Present**  
*LeRoy E. Thompson* ....................................................... 9

**A Stochastic Tool for Soil Liquefaction**  
*Derin N. Ural* ............................................................... 17

**The Qualification of the Engineers**  
*F. Sousa Soares* ............................................................. 27

### New Educational and Design Tools

**Simplification or a New Approach to the Construction of the Three Vanishing Points Perspective without Using the Projective Principles**  
*M. Palamutoglu* ........................................................... 37

**Visual Simulation of Construction Housing Process**  
*P. Henriques, A. Sampaio* ............................................... 45

**Economic Design of Water Distribution Systems in Buildings**  
*Armando Silva-Afonso, Joaquim J. Júdice, M. Fátima Jegundo*  ............... 51

**Improving the Students Interest in a Course by Using a Web Page**  
*Paulo B. Cachim* .......................................................... 59
Health and Safety in Portuguese Civil Engineering Curricula
*R. Rodrigues, José M. Cardoso Teixeira* ........................................... 67

Teaching Architecture for the First Year's Students. Which Program for Which Teaching?
_Bekkouche Ammara_ .............................................................................................................. 163

Interactions Between Superstructure and Substructure of Buildings for Achieving Economical Building Design
_Adel Hanna_ .............................................................................................................................. 171

“Urban geography” and “Urbanism” in the Teaching Architecture in Constantine
_Belkacem Labii_ ......................................................................................................................... 179

Architectural Developments

Immaterial Structures in Real Structures
_A. Catarig, L. Kopenetz, Titu Hodisan_ ..................................................................................... 187

Building a House: A Pragmatic Approach to Housing Construction
_Vladimir Brezar_ .......................................................................................................................... 193

Matrix: a Research and Design for Housing Typologies
_Han Vandevyvere, Herman Neuckermans_ ............................................................................... 199

Differences within the Same, Individuality in Togetherness Housing for Modern Man
_A. Delić_ ........................................................................................................................................... 207

Development of Architectural Environment (Architectural Whole)
_B. Kincl, A. Delić_ ......................................................................................................................... 215

Passages in 19th Century Beyoglu: A Research to Update 19th Century Design Approach
_U. O. Demirkol_ ............................................................................................................................ 223

The Architect and the Single Family House. A North American Case Study in Interdisciplinary Intervention
_John Brown_ ............................................................................................................................... 229

Glass Houses in Architecture
_T. Didem Akyol_ ......................................................................................................................... 237

Optimum Number of Units to Minimize the Construction Cost of Multi-Story Buildings
_G. Alver, Ü. Biçer_ ....................................................................................................................... 245

Integrating Light Steel Frame: Impact on Process and Product
_Tom Hughes, John Chilton, Jonathan Hale_ ............................................................................... 251
Optimum Efficiency Through Robotics Technology and Satellite Positioning System for Spatial Planning of Countries and Towns, While Maintaining Human Criteria and Worldwide Environmental Challenge

*Riazi Jamshid, Khorrami Morteza* .......................................................... 261

The Use of Computer-Based Technology for Architectural Concurrent Design

*P. J. Bártolo, H. G. Bártolo* ................................................................. 269

Human-Based Computer Vision System for Architectural Design

*N. M. Alves, P. J. Bártolo* ................................................................. 277

A New Tool to Enhance Design Quality

*H. G. Bártolo* .................................................................................. 287

Once Working Places, Today Places of Dwelling

*Ljiljana Šepić, Ljerka Biondić* ........................................................ 295

Arid Desert Colonization. Toshka Region, Egypt, as a Case Study

*U. El Fiky* ...................................................................................... 303

Development of Intelligent Self-Sufficient Housing as Sustainable Alternative to Urban Growth

*Debashis Sanyal* ............................................................................. 313

**Housing Policies - Financial Systems**

An Analysis of Housing Construction in Nigeria

*S. Iyiola Oni* .................................................................................. 323

Linking Housing Reforms and Poverty Reduction Programmes

*A. K. Jain* ...................................................................................... 333

Housing Policies and Strategies: An Overview of the Experience of Saudi Arabia

*Abdullah Al-Ali Al-Nuaim* ............................................................... 339

The Funding of the Mortgage Loans in Spain by The Issue of Mortgage Securities. Their Legal Structure

*Sergio Nasarre Aznar* ..................................................................... 347

An Evaluation of the Cost Effectiveness of Direct Labour System on Housing Project Execution in Lagos State, Nigeria

*Aderemi Y. Adeyemi, Stephen O. Ojo, Henry A. Odeyinka, Olabosipo I. Fagbenle* ................................................. 355
Development Begins at Home: Policy Implications for Homelessness in Cities in Bangladesh
Shayer Ghafur .................................................................................................................. 363

Building the Disciplines: The Case of the US Partnership for Advancing Technology in Housing
Carlos E. Martín .................................................................................................................. 373

Housing Microfinance, a New Tool in Social Housing
Jacob Rubinstein .................................................................................................................. 381

Determinants of Housing Prices in Turkey
B. Keskin, V. Dokmeci, G. Kiroglu .................................................................................... 387

The Role of Asset Management in Social Housing
Keith P. Chapman, Jim A. Kempton .................................................................................. 393

Favela-Bairro – Case Study in Rio de Janeiro
F. Magalhães, C. M. Campos Neto .................................................................................. 403

Recent Developments in Assuring Quality in Timber Roof Structures in South Africa
A. C. Malherbe, B. Eksteen ............................................................................................... 409

Mainstream Public Housing and Innovative Urban Housing Projects in Flanders: Concepts and Design Strategies
M. Ryckewaert ...................................................................................................................... 417

Twelve Low Cost Houses. A Case Study
J. M. Cardoso Teixeira, M. Pego e Pinto ........................................................................... 427

Risk and National Mortgage Markets
Nick Horsewood, John Doling .......................................................................................... 435

How Social Housing Can Benefit from the Competitive Market
E. Rebelo .............................................................................................................................. 443

Public Housing In New Zealand – New Developments & Methodologies
J. Tocker .............................................................................................................................. 451

Productive Chain Modelling in Housing Construction in Brazil, Aiming at a Prospective Study
Luiz Reinaldo de Azevedo Cardoso, Alex Kenya Abiko, Orestes Marraccini Gonçalves, Ana Lúcia Sanzovo Fiorelli Barbosa, Kelly Paiva Inouye, Heitor Cesar Rioghi Haga ........................................................................................................ 461
Territorial Control of Common / Private in Unit-Owned Building Legal
Comparative Study among Japan, France and England
Y. Morita, S. Matsumura ................................................................. 469

Housing in Oman: an Investigation into Social Housing
Mohammed Mahbubur Rahman, Ali Salem Al-Harthy, Salih A. El-Arifi .... 475

The Public Participation Process in Self-Construction Programs.
Case Study: Unifamiliar Houses in Santa Maria da Feira, Portugal
B. Armando Marques, F. Brandão Alves ............................................. 485

Preventing Housing Disasters in Megacities: Case of Lagos, Nigeria
Samuel Iyiola Oni ............................................................................. 489

Cultural, Historical and Social Values

A Research on the Concept of the Ottoman Rowhouses: The Place & the Importancy of Akaretler Rowhouses in the Ottoman Civil Architecture
Z. Sagdic ............................................................................................. 501

The House of Ottoman Sultan – The Architectural Space Organization of Ottoman Palaces
Z. Sagdic ............................................................................................. 509

The Special Peculiarities and Construction Systems of Ottoman Turkish House Examples Especially in Antalya, Isparta and Burdur
Nur Urfalioglu ..................................................................................... 519

Cultural Composition of Neighbourhoods and Private Outside Space Satisfaction
I. Choudhury ....................................................................................... 525

Housing Indigenous Melanesian People in Appropriate Social & Cultural Responsive Housing in Urban Societies
C. K Gonduan ..................................................................................... 533

Sociocultural Aspects of Housing
V. Trifon Donchev ............................................................................... 543

Socialist Mass Housing in Emerging Capitalist Economies: A Narrative Inquiry
Attila Lawrence ................................................................................ 549

Design of Urban Passages and Social Relationships
Z. Talebi ............................................................................................. 559
The Workmen's House between XIX and the Early XX Century  
*Tiziana Campisi, Calogero Vinci* .................................................. 675

Should We Protect and Save the Old Industrial Workers' Estates Districts?  
*N. Juzwa* ................................................................................. 685

The World of Tibetan Refugees in India  
*Subir Saha, Sakshi Khullar* .................................................. 691

Social Study Follow Up in Favelas' Urbanization Work  
*J. Geraldo Simões Júnior, G. Collet Bruna* .................................. 699

Vernacular Architecture in Poland-Continuation and Modernisation Problems  
*Trocka-Leszczyńska E., Masztalski R.* .................................. 707

Author Index ........................................................................... 717

**VOLUME II**

**Cultural, Historical and Social Values**

British Housing Traditions  
*Dörte Stollberg - Barkley* .................................................. 729

The Foundations of High-rise Housing in Seoul from 1953 to 1979  
*L.-Jong Jang* .......................................................................... 737

A Mediterranean Housing Model in Catania: Spontaneous Installation  
on Urban Volcanic Ground  
*Simona Calvagna, André Balla* .................................................. 745

Contemporary Architecture in Oman: In Search of an Identity  
*M. Mahbubur Rahman* ................................................................ 753

The Impact of “Marginal Housing” upon Socio-Cultural Aspects  
at Developing Mega Cities. Cairo City Case Study  
*M. Salah El-din Khairy* .................................................. 763

Women and their Homes: Native Housing in Northern Quebec  
*Vikram Bhatt, Maiti Chagny* .................................................. 773

The Matrix of Space: Chinese House  
*Li Xiaodong* ............................................................................ 779

Referents of Traditional Domestic Space in Algeria From a Codification  
Mode to an Interpretation Mode  
*Siham Bestandji* .................................................. 787
Ageing of Low Cost Housing
*R. Montagna, E. Pandolfi, S. Vitaletti* ............................................................... 793

The Marginalised Urban Spaces in Annaba
*B. Née Boufenara Khedidja* ............................................................... 801

**Environment and Sustainable Construction**

Low Cost Building Materials
*Santosh K. Ghosh* .................................................................................. 811

Two Faces of Globalization: Impact on Housing in Asian Cities
*Santosh K. Ghosh* .................................................................................. 815

The Feasibility and Applications of Building Integrated Photovoltaics in Residential Buildings in Malaysia
*S. P. Rao, Lim Chin Haw* ........................................................................ 819

Affordable Housing Production: The Influence of Traditional Construction Materials
*Aderemi Y. Adeyemi, Stephen O. Ojo, Henry A. Odeyinka, Olabosipo I. Fagbenle* .................................................................................. 827

Ecomaterials in Construction: Confection of Recycled Concrete with Rubbles
*C. M. B. Montoya* .................................................................................. 833

Sunspace as an Element in the Reconstruction of the Existing Residential buildings in the City of Osijek
*Zeljko Koski, Sanja Loncar-Vickovic* .......................................................... 841

Building Pathology. The Science of Energyfield Balancing within a Built Structure Meant for Human Activities and Interactions
*Rohit Ganatra* .................................................................................. 849

The Earth Architecture as a “Possible” Sustainable Factor
*Haroldo Gallo, Ruy Arini, Luciana Brasil* .................................................. 857

Factors Influencing the Utility Bills of the Kuwaiti Residences
*A. Al-Mumin, O. Khattab* ........................................................................ 865

Rapid and Illegal Settlements in a Mega City and its Impact on Drinking Water Reservoirs
*Bilsen Beler Baykal, Aysegul Tanik, Ahmet Samsunlu* .................................. 873

Concrete and Crime
*Z. Zagar, M. Simunić Bursić* ........................................................................ 881

XX
Sustainability Challenges Regarding Maintenance of Buildings at the University of Coimbra

J. A. R. Mendes da Silva ................................................................. 999

Urban Planning

The Illegal Housing in the Transitional Countries - Many-sided Approach - Case study: Belgrade, Serbia
Natasa M. Danilovic, Branko R. Hristic ....................................................... 1009

Towards a Decision System Support for the Management of Building Licence in the Quarters of Spontaneous Houses (QHS) of the Town of Yaoundé (SIAGEPCOVY)
C. Pettang, G. Edouard Kouamou, A. Myke Konlack ........................................ 1017

Relationship between the Housing Building Type and the Change in Residential Areas
Ali Uthman Al-Najim .................................................................................. 1027

Revitalization of the Residential Areas in Istanbul after a Major Earthquake
Tülay Kılınçaslan ....................................................................................... 1037

Lorenza Fiumi .......................................................................................... 1045

Changing Identities: New Roads, New City Images
Pelin Dursun, Meltem Aksoy .......................................................................... 1051

Spontaneous Settlement in Vientiane Municipality
Bouleuam Sisoulath, Sengthong Vangkeomany ........................................... 1059

A Critical Approach to the Housing Areas In Case Of Urban Design and Landscape Quality: Konya Case
Elmas Erdoğan, Ü.Gülşüm Ter ..................................................................... 1067

Universalism of Public Space
R. Masztalski, E. Trocka-Leszczyńska .......................................................... 1075

Promoting Full Citizenship as a Mechanism to Overcome Poverty
Marina González de Kauffman, Jenny Ferrer, Heydi Pino ............................... 1081

The New Housing Estates on the Liquidated Industrial Plants as a Development Chance for Post-Industrial Towns
Krystian Stangel .......................................................................................... 1091
Integrated Territorial Information System for Ofanto Valley
N. Maiellaro ........................................................................................................ 1099

Urban-i-graph: an Instrument to Make Efficient the Low-Income Housing
Urban Design
Marina González de Kauffman ........................................................................ 1107

M. Hisham Seoudy ................................................................................................ 1117

Unplanned Urban Sprawl and the Strategy of Informal Housing
Development in Egypt: The Case Study of Assiut City
Mohamed-Ayman Daef ..................................................................................... 1127

An Information System for the Housing Construction Sector in TMAD
A. Paiva, L. Ramos, H. Afonso, E. Rodrigues .................................................. 1137

The Land Readjustment Its Use in Turkey
S. Sence Turk .................................................................................................... 1145

Architecture as Water Instrument
J. Lim, K. Virendra ............................................................................................ 1155

Housing Location, Mobility Patterns and Urban Planning: A Perspective
from Metropolitan Area of Porto, Portugal
I. Breda-Vásquez, P. Ribeiro-Ramos ................................................................. 1163

The Practice of Self-Help Housing Concepts in Indonesia
Sudaryono Sastrosasmito ................................................................................ 1171

Lessons of an Urban Space in Keko Magurumbasi. Resident’s Home
Essence of Urban Space in the Informal Settlements of Dar es Salaam
Camilus Thomas Lekule ................................................................................... 1181

Construction Management

Process and Information Mapping in the Construction Industry:
A Residential Construction Case Study
Richard J. Gebken II, Ron R. Wakefield, Michael J. O’Brien ....................... 1193

Factor Prices, Quality and Efficiency: An Analysis of the Development of
Housing Construction Costs in Sweden
Rune Wigren .................................................................................................... 1203

Life Cycle Costing for Sustainable Development in Buildings
António P. Silva, Manuela Ricardo, José S. Costa, A.A. Fernandes,
A. Ferreira, Phil Bamforth ................................................................................ 1215
Planning Methods for Repetitive Construction
J. M. Cardoso Teixeira, J. P. Couto ......................................................... 1223

Logistics Strategy in Construction Management
Nuno Biga, Vitor Abrantes ................................................................. 1231

Quality Issues

The Development of New Complex Projects. A Tool to Define the Optimal Mix
D. Tagliente, N. Costantino, A. Palmisano ........................................... 1241

Could Visual Quality Be Assessed Objectively: Square in Famagusta
C. Kumbaracibasi .............................................................................. 1251

Analysis of the Relationship Between the High-Quality Dwelling and Standards
Ljerka Biondic, Ljiljana Šepić ............................................................ 1259

Establishing the Role of Service Quality as a Pre-purchase Expectation for Residential Construction Customers
P. Forsythe ....................................................................................... 1267

A System for Evaluating the Quality of Housing Construction in Chile
Alfredo Serpell, Mario Labra ............................................................ 1275

Neural Networks as a Method of Evaluating Residential Houses in Tvrdja, Eastern Croatia
Sanja Loncar-Vickovic, Zeljko Koski, Damir Varevac .......................... 1283

Residents’ Satisfaction through Menu-Driven Housing
S. Chattopadhyay .............................................................................. 1291

Transition Period Housing Design Practices in Slovenia
R. Sendi ............................................................................................ 1299

Control Model of the Relation Cost/Quality in Dwellings
Armando M. M. Araújo, Artur Bezélga .............................................. 1307

Qualifying Construction Contractors by Private Owners in Saudi Arabia
Ali A. Shash ..................................................................................... 1319

A Decision Support System for Housing Evaluation
Eduardo Natividade-Jesus, João Coutinho-Rodrigues ........................... 1329

Qualifying and Certifying Construction Companies
Sandra Ricardo, Telmo Pereira ......................................................... 1337

XXIII
Construction Technology

Creating Diversity in Public Housing Designs through Prefabrication
Lau JM, Louis Tay HH, Johnny Wong LH ................................................................. 1345

The Use of Logs in Modern Low-rise Housing
J. Heikkilä .................................................................................................................. 1353

S. Alves, H. de Sousa ............................................................................................... 1361

Checking of Flexibility and Feasibility of Links in the Building Assembly
A. De Vecchi, R. Corrao ............................................................................................ 1369

Efficient Constructive Solutions for the Construction of Timber Buildings
Horia-A. Andreica, Claudiu-W Timis, Alexandru Bârladeanu ..................................... 1377

Consequences of the Structural Design Due to Application of the Eurocodes in Hungary
C. Kegyes ................................................................................................................ 1385

Author Index .......................................................................................................... 1393

VOLUME III

Construction Technology

Improvement of the Performance of Earth Walls Using Lime and Low-Cost Activators
Nuno Cristelo, Anabela Paiva, Said Jalali ................................................................. 1405

Buildings of Composed Masonry with Cored or Solid Bricks?
R. A. Sofronie, D. Stoica, M. Toanchina, G. Bergamo ............................................ 1413

Experimental Tests on Single Adhesive Anchors under Tensile Load
Fernando G. Branco, António Tadeu, Maria de Lurdes B. Reis .............................. 1421

The Use of Robots in the Construction Industry
Telmo Pereira, Cristina Santos, Norberto Pires ....................................................... 1429

Building Physics

Use of Numerical Simulations to Determine Reference Coefficients of Heat Transmission for Buildings in Algeria
S. M. K. El Hassar, M. Souici, M. Amirat, K. Silhadi ............................................. 1439

XXIV
Diagnosis and Management of the Environmental Parameters in Museums:
Safety and Comfort
I. Meroni, A. De Salvia, R. Lollini ................................................................. 1447

Assessment of Performances of Envelope and Plant Components Able to
Improve Energy Efficiency of the Building-Plant System
R. Lollini, I. Meroni, A. De Salvia ................................................................. 1455

Mathematical Modelling of Fire Rescue in Buildings
António Leça Coelho ................................................................. 1463

Vernacular Architecture Related to the Climate in the Mediterranean
Basin. A Lesson We Should Learn.
Marina Rasulo ................................................................. 1471

Control of Thermal and Moisture Deformations in Building Masonry
Walls and Confining Reinforced Concrete Elements
J. L. Miranda Dias ................................................................. 1481

Characterization of Natural Ventilation Systems in Residential
Buildings in Portugal - The Importance of Standardization
Manuel Pinto, Vasco Peixoto de Freitas ................................................................. 1487

New European Fire Reaction Tests and Classification (Euroclasses)
C. Pina Santos ................................................................. 1495

Application of Thermography for Moisture Detection:
A Laboratory Research Study
C. Pina Santos, Luis Matias ................................................................. 1501

Steel Fiber High-Strength Concrete - Degradation in Case of Fire
M. Lurdes B. Costa Reis ................................................................. 1507

The Effects of Differential Thermal Insulation of Walls
Fernando M. A. Henriques ................................................................. 1515

Ventilation of Dwellings: Requirements and Experiments
João C. Viegas, Fernando M. Silva, Armando Pinto, Luis Matias ................................................................. 1523

A Holistic Integrated Housing System that is Self- Heating/Cooling and More
Yvan J. Beliveau ................................................................. 1531

Thermal and Environmental Simulation of Buildings
J.E.Ramos, R.A.Pitarma, M.G.Carvalho ................................................................. 1537

Steel Mechanical Properties Evaluated at Room Temperature after Being
Submitted at Fire Conditions
P. A. G. Piloto, P. Vila Real, L. Mesquita, M. A. P. Vaz ................................................................. 1545
The “Cuif” Tree: Useful Roofing for Temporary Activities in the Hot-Humid Climate of Maracaibo, Venezuela.
Marina G. de Kauffman, Maria V. Machado, Helen Barroso .......................... 1555

Fire Safety Engineering - the Curricula Challenge in Portugal
Miguel Chichorro Gonçalves, Maria da Luz Garcia ............................... 1563

Delamination of External Wall Finishes of Housing
Y. LO ................................................................................................. 1571

Daylight Evaluation of a MBT Solution - A Case Study
M. Almeida, L. Bragança, A. Silva, P. Mendonça ...................................... 1577

Acoustic Performance of a MBT Solution – a Case Study
L. Bragança, M. Guedes de Almeida, S. Monteiro Silva, P. Mendonça .......... 1585

Thermal Performance of a MBT Solution – a Case Study
M. Guedes de Almeida, L. Bragança, S. Monteiro Silva, P. Mendonça .......... 1593

Some Remarks on the Substructuring Method Applied to Fire Resistance Tests of Columns
Manfred Korzen, Kai-Uwe Ziener, Sven Riemer, Georges Magonette, Philippe Buchet ................................................................. 1601

Cost Effective and Thermal Efficient Constructive Solutions – an Economical Analysis
Manuela Guedes de Almeida, Sandra Monteiro Silva, Luís Bragança ......... 1609

Sound Pressure Attenuation Provided by Double Acoustic Barriers
L. Godinho, A. Tadeu ........................................................................... 1617

Sound Transmission Through Single and Double Glazing – Analytical versus an Experimental Evaluation
A. Tadeu, J. António, D. Mateus ............................................................. 1625

Building Condensation How to Solve the Problem in Portugal
Vasco Peixoto de Freitas .................................................................. 1633

Fire Resistance Tests on Steel Columns – A Summary Review
João Paulo C. Rodrigues, Fernando C. Teixeira Gomes, I. Cabrita Neves .... 1639

Building Materials

The Usage Trends of Materials in High-Rise Buildings
Nihal Arioglu ............................................................... 1655

XXVI
No Point NL: National Laboratory on Housing

J. Westra ................................................................. 1661

Analysis of Solutions Aiming Adhesion Improvement of Traditional Renders on Concrete Backgrounds

Vidália Miranda, Maria do Rosário Veiga, J. M. Gaspar Nero .................. 1669

Use of Brick Dust and Pozzolans in Lime Mortars for Conservation Purposes

A. L. Velosa, R. Veiga .................................................. 1677

Compressive Strength, Modulus of Elasticity and Drying Shrinkage of Concrete with Coarse Recycled Concrete

José R. Santos, Fernando A. Branco, Jorge de Brito ......................... 1685

The use of Compacted Earth Blocks (BTC) in Modern Construction

Patricia Lourenço, Jorge de Brito, Fernando Branco ..................... 1693

Ghiara: History, Culture and Technology of a Volcanic Inert

Alessandro Lo Faro, Angelo Salemi ................................ 1701

The Effects of Hydraulic Components on Lime Mortars

P. Faria Rodrigues, F. M. A. Henriques ........................................... 1711

Modern Solutions of Composite Structures Containing Timber in Association with other Materials

Horia-A. Andreica, Adrian Berindean, Gratiela Andreica, Silviu Rosu ...... 1719

Rediscovering “Material” in Eastern Sicily Architecture

Grazia Lombardo .................................................................. 1727

Phase Change Materials in Concrete Building Elements:
Performance Characterization

Massimo Lemma, Marco Imperadori ............................................. 1737

Wood in Construction in Portugal - A Promising Future

J. Amorim Faria .................................................................. 1745

Durability of High Performance Lightweight Aggregate Concrete

A. da Fonseca Magalhães, S. Jalali, P. J. S. Cruz ......................... 1753

Discussion of Aggregate and Concrete Water Absorption and Permeability Testing Methodology

J. P. Castro-Gomes, L. A. Pereira de Oliveira, C. N. Gonilho-Pereira, F. M. Pacheco Torgal ............................................................ 1761

Experimental Study of Concrete Durability Parameters Produced with Different Types of Aggregates

F. Pacheco-Torgal, J. P. Castro-Gomes, S.M.R. Lopes .................... 1769
Building Pathology

Cracking of Ancient Gypsum Plasters
Paulo Malta da Silveira, Rosário Veiga, Jorge de Brito .......................... 1779

A Note Regarding the Safeguard of the Baroque Architecture of Noto (Siracuse, Italy): the Restauration of the Facade of San Carlo Borromeo Church
F. Barbera, A. Lo Faro, A. Moschella, A. Salemi, G. Sanfilippo, C. Rizzuto ...... 1787

Non-structural Pathology in Modern Residential Buildings
César Díaz Gómez .................................................................................. 1795

Inspection Methodology for Defects Due to Moisture in Buildings
António Vilhena...................................................................................... 1803

Development of Exigencial Diagnosis Methodology Applied to Building Rehabilitation
João Carlos Gonçalves Lanzinha, Vasco Peixoto de Freitas, João Paulo de Castro Gomes ................................................................. 1811

The Rehabilitation of Distressed Timber Domestic Structures - A South African Case Study
A. C. Malherbe, B. Eksteen........................................................................ 1819

Diagnosis of Anomalies of Wall Renderings. Experimental Techniques for in situ Application
Ana Cristian Magalhães, Maria do Rosário Veiga, Fernanda Carvalho ...... 1827

The Occurrence of Pathologies in Residential Buildings, in TMAD, and the Relation with the Orientation
S. Pereira, J. Faustino, J. Vieira, A. Paiva .................................................. 1835

Health and Safety

Accessibility and Safety in Housing for the Elderly
Birgitta Mekibes, Bachir Mekibes ............................................................... 1845

Utilisation Safety Assurance of Buildings
José M. Cardoso Teixeira, Luís Miguel Azevedo ........................................ 1853

The New Qualification System for Companies Operating in the Field of Public Works: a New Opportunity to Increase Health and Safety within the Company
M. Pacciana, I. G. Laterza .......................................................................... 1859

Implementation Study of Safety’s Plan in Building
C. Reis, A. Soeiro ...................................................................................... 1865
Maintenance and Refurbishment

Service Life of External Renderings
*H. Kas* .............................................................. 1875

The “Futurity” of Older Inner-City Apartment Blocks
*A. Blum, J. Banse, K.-H. Effenberger* ......................... 1883

Rehabilitation of Buildings
*S. D. Dave* .......................................................... 1891

Building Façades Maintenance Support System
*Inês Flores Colen, Jorge de Brito* ................................ 1899

Durability and Reliability of Large-Panel System Blocks of Flats
*J. Kowalski* ............................................................ 1909

Residential Housing at Beginning of XX Century: Study of Material, Technological and Structural Features for its Conservation
*F. Fatiguso, D. De Tommasi* ..................................... 1919

Reinvestment Decisions and Rehabilitation in Housing
*O. Burcu Ozdemir* .................................................. 1927

Application of a Building Inspection Method to a Group of Rural Houses
*João Carlos Gonçalves Lanzinha, João Paulo de Castro-Gomes, Vasco Peixoto de Frettas* .......................... 1935

Maintenance and Durability of External Mortars and Renders Applied to Field Conditions
*P. Gaspar, I. Flores Colen, J. de Brito* ......................... 1943

Social Housing Maintenance
*Beatriz Amarilla, Renée Dunowicz, Rodolfo Hasse* ........ 1951

The Use of Checklists and Repair Work Sheets in a Building Maintenance System
*Mariça Antunes, Helena Corvacho* ............................. 1959

Rehabilitation Techniques

Collapse of a Reinforced Concrete Retaining Wall. Cases and Rehabilitation Propositions
*Luiz António Pereira de Oliveira, Luís Filipe Almeida Bernardo* .......................... 1967

Need and Strategies in Housing Rehabilitation: The Romanian Case
*Mariana Brumaru* .................................................. 1975
Pathologies in New Buildings - Identification, Repair Solutions and Preventive Measures
Álvaro Araújo, Manuela Guedes de Almeida .................................................. 1985

Anomalies Survey on the City of Xai-Xai Dwellings
J. Osvaldo Machatine, Luís Bragança, Manuela Almeida .............................. 1993

Modelling versus Experimental Study of Rising Damp in Historical Buildings
M. Isabel M. Torres, Vasco Peixoto de Freitas ........................................... 1999

Late Submissions

Safety and Functional Assessment of MBT Building Solutions in View of Sustainability
Helena Gervásio, Aldina Santiago, Luís Simões da Silva, Luís Bragança, José Mendes ................................................................. 2009

House as Cultural Heritage Learning from the past - Adapting into future
Iraj Etessam, AIA ....................................................................................... 2021

Master Planned Community: The Better Alternative for Housing Projects
Khalid Alskait ............................................................................................. 2027

Coupling Urban Planning
Isabel C. Bravo, Natibel Pedroza, Fabiola C. Deus, Patricia C. Bohórquez, Andrea T. Griborio, María V. Machado, Helen Barroso ....................... 2029

Supraurbe, as a Sustainable Model of the Suburbs
D. Contreras, R. Rubio ................................................................................ 2039

Structures and Architecture Modelling
Ding Dajun .................................................................................................. 2045

Decomposed Prism as a Bioclimatic Container that Appeals to an Infinite Interior
Fabiola C. Deus, Maria V. Machado ......................................................... 2057

Urban Eco-Piece
Fabiola C. Deus, Patricia C. Bohórquez, Andrea T. Griborio, María V. Machado, Isabel C. Bravo, Natibel Pedroza, Helen Barroso ....................... 2065

Using Multi-Criteria Analysis in Assessing Housing Design Performance
Crina Oltean-Dumbrava ............................................................................. 2073

Transgressing Limits, Inhabiting Borders, Making Frontiers
Andrea T. Griborio ................................................................................... 2081
Studies into the Mix of Concrete made of Light Expanded Clay Aggregate - LECA®
Jorge F. Lourenço ................................................................. 2089

Vibrocompressed Lightweight Concretes of Expanded Clay Influence of some Parameters in Compression Resistance
A. Fontes de Melo, Hipólito de Sousa, Ana Maria Sarmento .............. 2099

Vibra2002 – A Toolkit for Vibration Control
José P. Pontes ........................................................................ 2111

Community Housing in South Australia
John Schenk ............................................................................. 2119

An Attempt to Support Housing and Housing Science by the Method Holistic Participation - MHP in the Light of Sustainable Development
Peter Schmid, Gabriella Pa’l ....................................................... 2125

Fugacity as a Link between Environment and Cover
Aki E. Serizawa, Maria V. Machado ............................................ 2137
