Fracture Mechanics of Concrete Structures

Edited by

René de Borst
Koiter Institute Delft, Delft University of Technology, the Netherlands

Jacky Mazars
Laboratoire 3S, Institut National Polytechnique de Grenoble
L.M.T., Ecole Normale Supérieure de Cachan, France

Gilles Pijaudier-Cabot
R&DO, Laboratoire de Génie Civil de Nantes-Saint Nazaire,
Ecole Centrale de Nantes, France

Jan G.M. van Mier
Faculty of Civil Engineering and Geosciences, Delft University of Technology,
the Netherlands.

VOLUME I
Table of contents

Preface

Microstructure and materials engineering

Fracture Mechanics of Fibre-Reinforced Concrete: Material Modeling and Experimental Technique
O.Bayard, O.Plé & A.Alvand

Mesoscopic approach for modelling the nonlinear hysteretic response of damaged porous media in quasi-static and dynamic loading: Effects of pressure and moisture saturation
J.Carmeliet & K.Van Den Abeele

Uniaxial tensile test and fractal evaluation of softening damage in concrete
A.Carpinteri & S.Invernizzi

Fracture Modeling with a Microstructural Mechanics Approach
C.S.Chang, T.K.Wang, L.J. Sluys & J.G.M.van Mier

Length Scales of Fiber Reinforced Cementitious Composites - a Review
E.Chuang, M.Overland, & F.-J.Ulm

Material response fluctuations and correlation with internal lengths
A.Delaplace, S.Roux & G.Pijaudier-Cabot

Boundary effect on concrete fracture induced by non-constant fracture energy distribution
K.Duan, X.Z.Hu & F.H.Wittmann

Three-dimensional Numerical Concrete applied to investigate effective properties of composite materials
T.Hörsch & F.H.Wittmann

Investigation of ductile cementbased composites for seismic strengthening and retrofit
K.E.Kesner & S.L.Billington

Numerical Simulation for Quasi-Brittle Interface Fracture in Cementitious Bi-material System
Y.M.Lim, M.K.Kim & S.K.Shin & V.C.Li

Fractological investigations on the fracture in concrete
V.Mechtcherine & H.S.Müller

Cohesive multiscale 3-D FE model applied to study the dynamyc mixed-mode fracture of concrete
G.Ruiz, A.Pandolfi & M.Ortiz

Numerical Investigations on Damage in Cementitious Composites under Combined Drying Shrinkage and Mechanical Load
H.Sadouki & F.H.Wittmann
An isotropic damage model for non linear creep behavior of concrete in compression
C. Mazzotti, M. Savoia & A. Tralli

Structural concrete behavior: coupled effect of drying and loading
L. Molez, Y. Berthaud, D. Beaupré & B. Bissonnette

On the modeling of thermo-mechanical concrete for the finite element analysis of structures submitted to elevated temperatures
W. Nechnech, J.-M. Reynouard & F. Meftah

Realistic models for degree of hydration and moisture distribution in concrete at early age
B. H. Oh & S. W. Cha

Experimental and numerical study on the effect of sulfates on calcium leaching of cement paste
D. Planel, J. Sercombe, P. Le Bescop, F. Adenot, A. Sellier, B. Capra, & J.-M. Torrenti

Plasticity and damage mechanics models for concrete with alkali-aggregate reaction
H. X. Wen

The time scale in concrete fracture: A model based on partitions of unity
G. P. A. G. van Zijl & G. N. Wells

Cracking of a saturated hydrated cement system exposed to frost action - numerical modeling
B. Zuber, J. Marchand & G. Pijaudier-Cabot

Experimental techniques

Internal Structure and Fracture in Three Dimensions
E. N. Landis

Fracture process zone in high strength concrete
G. Appa Rao & B. K. Raghu Prasad

Gas permeability tests on concrete damaged by drying shrinkage and its anisotropy effect
N. Burlion & F. Skoczylas

Behavior of plain concrete subjected to tensile loading at high strain-rate
E. Cadoni, C. Albertini, K. Labibes & G. Solomos

Mixed mode fracture of double-edge notched specimens of concrete
J. C. Gálvez, D. A. Cendón & M. Elices

Softening properties of concrete under biaxial loading
S. Ishiguro

Fracture Mechanics Approach to Nondestructive Evaluation of Crack Depth in Concrete by Ultrasonic Method
T. Kamada, K. Wakatsuki, M. Asano, M. Kunieda & K. Rokugo

Draft on the JCI Standard Test Method for Determining Tension Softening Properties of Concrete
Y. Kitsutaka, Y. Uchida, H. Mihashi, Y. Kaneko, S. Nakamura & N. Kurihara

Internal alterations of the structure of concrete due to compressive loading
K. Klemt, O. Krooggel & P. Gübel

Flexural Failure Behavior of Concrete Beams Repaired by Crack Injection Techniques
M. Kunieda, T. Kamada, K. Rokugo & T. Kawase

Acoustic emission measurements of fracture energy
E. N. Landis & L. Baillon

</table>
Concrete splitting and bond in prestressed concrete beams with indented wires 557
J.C.Galvez, B.Tork, D.A.Cendon, J.Planas & S.Gupta

Importance of Multiple Damage model for Analysis of RC Structures 565
S.Gupta

Fatigue Behaviour of Concrete in Tension 573
C.Kessler-Kramer, V.Mechtcherine & H.S.Mueller

A comparison in tension softening curves obtained by a uniaxial tension test 579
and a 3-point bending test with an inverse analysis
H.Koide, H.Akita, D.Sohn & M.Tomon

Stress-Strain Relation of Confined Concrete under Dynamic Loading 585
S.Kono, F.Watanabe & A.Kajitani

Nonlinear interfacial softening for concrete beams retrofitted with composite plate 593
C.K.Y.Leung, M.Klenke, W.K.Tung & H.C.Y.Luk

Constitutive relations for numerical analysis of stressdeformation behavior of concrete 601
subjected to thermal loads
V.Mechtcherine & H.S.Mueller

Microplane model with relaxed kinematic constraint 609
J.Ozbolt, Y.-J.Li & I.Kozar

On regularized plasticity models for strain-softening materials 617
S.Rolshoven & M.Jirasek

Mixed mode fracture of an higher-order beam model in gradient plasticity 625
M.G.Salomon, J.-M.Reynouard & F.Meftah

Rotating smeared crack and orthotropic damage modeling for concrete 629
A.Sellier, B.Bary & B.Capra

Modeling of fatigue crack growth in concrete subjected to mode I crack opening 637
A.Toumi, A.Bascoul & A.Turatsinze
