Seventh International Symposium on Laser Metrology Applied to Science, Industry, and Everyday Life

Yuri V. Chugui
Sergei N. Bagayev
Albert Weckenmann
P. Herbert Osanna

Chairs/Editors

9–13 September 2002
Novosibirsk, Russia

Co-organized by
TDI SIE—Technological Design Institute of Scientific Instrument Engineering (Russia)
ILP—Institute of Laser Physics (Russia)

Sponsored by
SPIE—The International Society for Optical Engineering • SPIE Russia Chapter • OSA—Optical Society of America • ISTC—International Science and Technology Center (Russia) • MIST—Ministry of Industry, Science, and Technologies (Russia) • RFBR—Russian Foundation for Basic Research

Endorsed by
IMEKO—International Measurement Confederation • IMEKO TC-14—Technical Committee on Measurement of Geometrical Quantities • Russian Academy of Sciences, Siberian Branch • ISTS IEM—International Scientific-Technical Society of Instrument Engineers and Metrologists (Russia)

Cooperating Organizations
IAE—Institute of Automation and Electrometry (Russia) • LAS—Laser Association of the Russian Federation • ROS—D.S. Rozhdestvensky Optical Society (Russia) • ISA—The Instrumentation, Systems, and Automation Society (USA) • NRA—Novosibirsk Regional Administration (Russia) • WSR—West-Siberian Railroad of the Russian Federation • IPMC—Institute of Precision Mechanics and Control (Russia) • AES—Academy of Engineering Sciences of the Russian Federation, Siberian Branch

Published by
SPIE—The International Society for Optical Engineering

Volume 4900
Part One of Two Parts

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.
Contents

Part One

xxi Symposium Committee
xxiii Introduction

SESSION 1 LASER AND OPTICAL MEASUREMENTS IN SCIENTIFIC RESEARCH

1 Space laser technologies for Earth observations [4900-01]
G. G. Matvienko, Institute of Atmospheric Optics (Russia)

10 Simultaneous measurements of optical and thermal properties of solids at laser heating up to 2500°C [4900-02]
O. G. Tsarkova, S. V. Garnov, V. I. Konov, E. N. Lubnin, General Physics Institute (Russia); F. Dausinger, Univ. of Stuttgart (Germany)

20 Problems of phase compensation under strong intensity and full-aperture tip-tilt correction from LGS [4900-03]
V. P. Lukin, Institute of Atmospheric Optics (Russia)

28 Modulation spectral method to measure amplitude-phase characteristics of optical signals and transfer functions varying in time [4900-04]
V. A. Zubov, P.N. Lebedev Physical Institute (Russia)

37 Perspectives of laser sounding using optical frequency converters [4900-05]
Yu. M. Andreev, P. P. Geiko, M. V. Kabanov, Institute for Optical Monitoring (Russia)

46 Ellipsometric measurements of the optical constants of solids under impulse heating [4900-06]
V. A. Shvets, N. N. Mikhailov, M. V. Yakushev, E. V. Spesivtsev, Institute of Semiconductor Physics (Russia)

53 Causality and demodulation of signals with monotonic phase [4900-07]
V. A. Tartakovskiy, Institute for Optical Monitoring (Russia)

61 Optical limiting mechanisms in fullerene-containing π-conjugated organic materials: polyimide and COANP [4900-08]
N. V. Kamanina, S.I. Vavilov State Optical Institute (Russia); A. I. Piekhanov, Institute of Automation and Electrometry (Russia)

72 Metrological aspects of optical and laser determinations of the Earth rotation parameters [4900-09]
B. S. Moghlinitsky, A. S. Tolstikov, Siberian State Research Institute of Metrology (Russia)

78 Lidar measurements of iodine molecule concentration [4900-10]
V. E. Privalov, V. G. Shemanin, E. I. Voronina, Baltic State Technical Univ. (Russia)

83 Light-field polarization of the point monodirected source in small-angle approximation [4900-11]
V. P. Boudak, B. B. Veklenko, Moscow Power Engineering Institute (Russia)
89 Optimal estimates of optical signal parameters at analogue detection [4900-12]
V. S. Sobolev, G. A. Kashcheeva, I. V. Filimonenko, M. N. Prokopenko, Institute of Automation and Electrometry (Russia)

98 Nonlinear-optical monitoring system of materials' local crystalline characteristics [4900-13]
P. E. Berezhnaja, M. F. Stupak, Technological Design Institute of Scientific Instrument Engineering (Russia)

104 Method of the round-trip time stabilization of mode-locking lasers' USP for lidars [4900-14]
B. V. Anikeev, R. Sh. Zatrudina, V. N. Khramov, Volgograd State Univ. (Russia)

108 Nd:glass active rod thermo-optical distortions caused by millisecond pumping pulses [4900-15]
V. Yu. Khramov, V. V. Kramnik, V. F. Petrov, A. A. Solounin, L. M. Studenikin, St. Petersburg Institute of Fine Mechanics and Optics (Russia)

112 Light-pressure-induced line shape of the saturation resonance dip in an atomic gas and its influence on frequency measurements [4900-16]
A. A. Chernenko, A. V. Shishaev, Institute of Semiconductor Physics (Russia)

119 Use of laser beam technologies for modernization of the Siberian Solar Radio Telescope [4900-17]
A. T. Altyntsev, Institute of Solar-Terrestrial Physics (Russia); Yu. V. Chugui, V. P. Kiryanov, A. K. Potashnikov, Technological Design Institute of Scientific Instrument Engineering (Russia); O. I. Potaturkin, Yu. N. Tischenko, Institute of Automation and Electrometry (Russia); V. G. Zandanov, Institute of Solar-Terrestrial Physics (Russia)

SESSION 2 FUNDAMENTAL LASER METROLOGY

125 Femtosecond optical clock with the use of a frequency comb [4900-18]

132 Extended-cavity semiconductor lasers in fundamental metrology [4900-19]
J. Lazar, O. Čip, P. Jedlička, B. Růžička, Institute of Scientific Instruments (Czech Republic)

139 High-precision gravitational acceleration measurement with laser interferometry [4900-20]
G. P. Arnautov, E. N. Kalish, Yu. F. Stus, M. G. Smirnov, Institute of Automation and Electrometry (Russia)

147 Investigation of Ti:S femtosecond laser radiation spectrum broadened in tapered fiber [4900-21]

150 Standard refractometric complex based on dynamic laser goniometer [4900-22]
G. N. Vishnyakov, B. G. Levin, All-Russian Research Institute of Optical and Physical Measurements; G. N. Ziouzev, M. B. Lioudomirski, TMS Diagnostics (Russia); P. A. Pavlov, Yu. V. Filatov, St. Petersburg Electrotechnical Univ. (Russia)
Nonlinear laser spectropolarimetry of atomic degenerated systems with lower metastable state during optical pumping in intense laser fields [4900-23]
A. S. Ipokov, I. A. Kartashov, A. V. Shishaev, Institute of Semiconductor Physics (Russia)

Precise measurements of highly stable laser radiation frequency and phase [4900-24]
B. D. Borisov, A. M. Goncharenko, V. A. Vasiliev, V. A. Zhmud, Institute of Laser Physics (Russia)

High-resolution laser spectrometer based on an active interferometer [4900-25]
P. V. Pokasov, D. Yu. Primakov, S. N. Bagayev, Institute of Laser Physics (Russia)

SESSION 3 3D INSPECTION AND METROLOGY

Absolute 3D sensor with single fringe-pattern recording [4900-26]
Y. Kasai, Y. Miyamoto, M. Takeda, Univ. of Electro-Communications (Japan); H. Tanaka, R. Gu, OPTON Co. Ltd. (Japan)

Optoelectronic computer-aided systems for inspection of gas-turbine engine complex objects [4900-27]

Fast 3D measurement of gear wheels [4900-28]
J. Leopold, H. Günther, Fraunhofer Institute of Machine Tools and Forming Technology (Germany)

Online ablation measurement for laser material processing and its applications [4900-29]
P. Klinger, G. Häusler, Friedrich-Alexander Univ. Erlangen-Nürnberg (Germany)

Laser measuring machine for 3D noncontact inspection of geometric parameters of grid spacers for nuclear reactors VVER-1000 [4900-30]
O. I. Bityutsky, Technological Design Institute of Scientific Instrument Engineering (Russia); I. G. Chapaev, JSC Novosibirsk Chemical Concentrates Plant (Russia); V. M. Chernyshov, JSC TVEL (Russia); Yu. V. Chugui, A. A. Gushchina, Technological Design Institute of Scientific Instrument Engineering (USA); Yu. K. Karlov, JSC Novosibirsk Chemical Concentrate Plant (Russia); K. I. Kuchinsky, V. I. Ladygin, Technological Design Institute of Scientific Instrument Engineering (Russia); Yu. V. Pimenov, JSC TVEL (Russia); S. V. Plotnikov, Technological Design Institute of Scientific Instrument Engineering (Russia); V. V. Roznikov, JSC Novosibirsk Chemical Concentrate Plant (Russia); V. V. Vertyoprakhov, V. P. Yunoshev, Technological Design Institute of Scientific Instrument Engineering (Russia); M. G. Zarubin, JSC Novosibirsk Chemical Concentrates Plant (Russia)

Interference systems for 3D surface profiling and analysis using partially coherent light [4900-31]

3D inspection by conical wavefronts [4900-32]
L. M. Soroko, Joint Institute for Nuclear Research (Russia)
SESSION 4  MICRO- AND NANOTECHNOLOGY

225 Scanning probe microscopy for nanotechnology [4900-33]
V. A. Bykov, NT-MDT Co. (Russia)

240 Nanopositioning and measuring technique [4900-34]
G. Jäger, E. Manske, T. Hausotte, H.-J. Büchner, R. Grünwald, Technische Univ. Ilmenau (Germany)

247 Nanotechnologies in semiconductor electronics [4900-35]
O. P. Pchelyakov, A. I. Toropov, V. P. Popov, A. V. Latyshev, L. V. Litvin, Yu. V. Nastaushev, A. L. Aseev, Institute of Semiconductor Physics (Russia)

257 Applications of x-ray interferometry in metrology and phase-contrast imaging [4900-36]
G. Mana, IMGC-CNR (Italy)

269 Nanometrology: problems and solutions [4900-37]
V. V. Kalendin, Research Ctr. for Surface and Vacuum Investigation (Russia)

282 Development of the vacuum interferometric comparator for calibrating fine linear encoders and scales [4900-38]
M. Sawabe, F. Maeda, Y. Yamaryo, T. Shimomura, Y. Saruki, H. Sakai, S. Aoyagi, Mitutoyo Corp. (Japan)

290 Set of experimental methods for scale-linearity verification in laser interferometers with nanometer resolution [4900-39]
O. Čip, F. Petru, Institute of Scientific Instruments (Czech Republic)

298 Nonlinearity-free heterodyne laser interferometer [4900-40]
T. B. Eom, J. W. Kim, M. S. Chung, Korea Research Institute of Standards and Science

304 Interferometric system for measuring position and orientation of a positioning stage [4900-41]
J. Zhang, K. Iwata, H. Kikuta, Osaka Prefecture Univ. (Japan); C. S. Park, Osaka Science and Technology Ctr. (Japan)

312 Linear moving meters designed on the basis of laser probing of scales of the type surface acoustic wave (SAW)-diffraction grating (DG) [4900-42]
V. A. Komotskii, People's Friendship Univ. of Russia

SESSION 5  METROLOGY FOR LASER MEASUREMENTS

326 Current state of laserometry and prospects of its development as a measurement field [4900-44]
V. S. Ivanov, Yu. M. Zolotarevsky, A. F. Kotyuk, V. P. Kuznetsov, All-Russian Research Institute of Optical and Physical Measurements
331 **Shack-Hartmann wavefront sensor for beam quality measurements** [4900-45]
A. V. Kudryashov, V. Ya. Panchenko, V. Ye. Zavalova, Institute on Laser and Information Technologies (Russia)

339 **System of ISO standards for characterization of optical components and laser beams** [4900-46]
V. N. Krutikov, State Committee for Standardization and Metrology of Russian Federation; T. V. Bulygin, Scientific Ctr. for Optical and Physical Research (Russia); Yu. M. Zolotarevsky, G. G. Levin, All-Russian Research Institute for Optical and Physical Measurements

342 **Modified moving slit method for determination of laser beam parameters using second moments of the energy (power) distribution** [4900-47]
A. A. Malyutin, R. V. Serov, General Physics Institute (Russia)

346 **High-speed phase-locked-loop frequency control of identical lasers** [4900-48]
A. A. Voevod, Institute of Laser Physics (Russia); A. S. Farnosov, V. A. Zhmud, Novosibirsk State Technical Univ. (Russia)

352 **Residual reflectivity of amplification media for extended-cavity laser** [4900-49]
B. Růžička, J. Lazar, Institute of Scientific Instruments (Czech Republic); O. Wilbert, Brno Univ. of Technology (Czech Republic); P. Pokorny, Institute of Scientific Instruments (Czech Republic)

357 **Software of control system for mobile measurement standard of laser radiation average power unit** [4900-50]
A. A. Kostin, All-Russian Research Institute of Optical and Physical Measurements

367 **Analysis of the laser intensity distribution** [4900-51]
Yu. V. Sheldakova, Institute on Laser and Information Technologies (Russia); T. Yu. Cherezova, Moscow State Univ. (Russia); A. V. Kudryashov, Institute on Laser and Information Technologies (Russia)

373 **Decrease in the uncertainty of laser radiation average power measurement with the aid of discrete Fourier transform** [4900-52]
M. L. Gourari, A. A. Kostin, A. A. Liberman, V. E. Liandres, All-Russian Research Institute of Optical and Physical Measurements

379 **Working measurement standards of a short-pulse laser radiation energy unit** [4900-53]
Yu. M. Zolotarevsky, I. V. Mnev, M. V. Ulanowsky, All-Russian Research Institute of Optical and Physical Measurements

383 **Metrological assurance of laser safety in Russia** [4900-54]
V. T. Kibovsky, V. E. Prokopenko, All-Russian Research Institute of Optical and Physical Measurements

388 **Theoretical analysis of accuracy parameters for detectors of working measurement standards of short-pulse laser radiation energy unit** [4900-55]
I. V. Mnev, All-Russian Research Institute of Optical and Physical Measurements

**SESSION 6  OPTICAL FIBER SENSORS**

394 **Spectrally encoded fiber sensor systems** [4900-56]
H. Bartelt, Institute for Physical High-Technology (Germany)
Outlooks and features of metrological assurance of dynamic parameters measurements in fiber optic communication systems in the gigabyte range [4900-57]
A. P. Romashkov, S. V. Tikhomirov, All-Russian Research Institute of Optical and Physical Measurements

Fiber optic interferometer for absolute distance measurements with high measuring frequency [4900-58]
C. Bosbach, F. Depiereux, T. Pfeifer, Fraunhofer-Institute for Production Technology (Germany); B. Michelet, Jurca Optoelektronik GmbH (Germany)

Possibility of fiber optic rotational seismometer design [4900-59]
L. R. Jaroszewicz, Z. Krajewski, Military Univ. of Technology (Poland)

From photosensitive fibers to fiber Bragg grating sensor systems [4900-60]
H. Bartelt, S. Grimm, V. Hagemann, M. Rothhardt, W. Ecke, R. Willsch, Institute for Physical High-Technology (Germany)

Problems of metrological support of measurements in fiber optic transmission systems [4900-61]
V. S. Ivanov, V. E. Kravtsov, S. V. Tikhomirov, All-Russian Research Institute of Optical and Physical Measurements

Fiber Bragg gratings written by frequency-doubled argon laser for sensor applications [4900-62]
S. R. Abdullina, S. A. Babin, D. V. Churkin, S. I. Kablukov, V. V. Potapov, Institute of Automation and Electrometry (Russia)

Integrated optics refractometer on channel metal-clad waveguides: three-dimensional simulation and sensitivity considerations [4900-63]
M. M. Vekshin, O. A. Culish, N. A. Yacovenko, Kuban State Univ. (Russia)

Measurement of polarization parameters by in-line fiber optic devices [4900-64]
L. R. Jaroszewicz, P. Marć, Military Univ. of Technology (Poland)

Unification of measurements of the average power of optical radiation in fiber optical transmission systems (FOTS) [4900-65]
S. V. Tikhomirov, A. I. Glazov, M. L. Kozatchenko, A. B. Svetlichny, All-Russian Research Institute of Optical and Physical Measurements

Time-of-flight laser rangefinding systems [4900-66]
B. A. Journet, Ecole Normale Superieure de Cachan (France)

Diffraction method for checking the sidebar defects of a small round hole [4900-67]
V. G. Magurin, V. A. Tarlykov, St. Petersburg Institute of Fine Mechanics and Optics (Russia)

Optoelectronic computer-aided measuring OPTEL system [4900-68]
R. M. Gallulin, UFA State Aviation Technical Univ. (Russia)
497 Laser interference methods with focused probing beams for thickness measurements
\[4900-69\]
D. V. Lyakin, Institute of Precision Mechanics and Control (Russia) and Saratov State Univ. (Russia); M. I. Lobachev, I. F. Minenkov, Institute of Precision Mechanics and Control (Russia); V. P. Ryabukho, Institute of Precision Mechanics and Control (Russia) and Saratov State Univ. (Russia)

504 Advancements in the geometrical measurements of the birefringent filter's crystal plates and two-dimensional measurements of Doppler velocity in the solar atmosphere \[4900-70\]
G. I. Kushtal, V. I. Skomorovsky, Institute of Solar-Terrestrial Physics (Russia)

513 Estimation of measurement error of space laser rangefinder \[4900-71\]
A. A. Tikhomirov, Institute for Optical Monitoring (Russia)

519 Laser triangulation systems for sensing mirror surface \[4900-72\]
S. V. Mikhlyaev, Institute of Automation and Electrometry (Russia)

525 Peculiarities of interference method for measuring the diameters of circular reflecting cylinders \[4900-73\]
Yu. V. Chugui, Yu. A. Lemeshko, Technological Design Institute of Scientific Instrument Engineering (Russia)

534 High-precision pulsing laser ranger \[4900-74\]
A. V. Koshelev, I. V. Lesnykh, V. A. Seredovich, A. K. Sinjakin, A. P. Karpik, Siberian State Academy of Geodesy (Russia)

537 Noncontact measurements of local distances in partially coherent light \[4900-75\]
Ye. V. Sysoev, I. V. Golubev, R. V. Kulikov, Technological Design Institute of Scientific Instrument Engineering (Russia)

SESSION 8 DIMENSIONAL MEASUREMENTS AND QUALITY OF MANAGEMENT IN PRODUCTION

541 Measurement of conformity and wear of cutting tool inserts \[4900-76\]
A. Weckenmann, K. Nalbantic, Friedrich-Alexander Univ. Erlangen-Nürnberg (Germany)

548 Remote gauging with fiber optic low-coherence tandem interferometry: new industrial applications \[4900-77\]
V. V. Ivanov, M. A. Novikov, A. D. Tertyshnik, V. A. Markelov, V. A. Goryunov, Institute for Physics of Microstructures (Russia)

556 Optimization of measuring assignments by implementation of new industrial processes \[4900-78\]
K. Meissner, Univ. of Applied Science Jena (Germany)
565 Optoelectronic systems for a noncontact dimensional inspection of the cylindrical items in atomic industry [4900-79]
A. N. Baybakov, Yu. V. Chugui, Technological Design Institute of Scientific Instrument Engineering (Russia); Yu. K. Karlov, JSC Novosibirsk Chemical Concentrate Plant (Russia); K. P. Kascheev, K. I. Koutchinski, V. I. Ladygin, Technological Design Institute of Scientific Instrument Engineering (Russia); V. G. Marchenko, A. A. Palekhin, JSC Novosibirsk Chemical Concentrate Plant (Russia); A. I. Pastushenko, Technological Design Institute of Scientific Instrument Engineering (Russia); R. D. Pchelkin, JSC Novosibirsk Chemical Concentrate Plant (Russia); S. V. Plotnikov, Technological Design Institute of Scientific Instrument Engineering (Russia); V. V. Rozhkov, M. V. Shindryaev, JSC Novosibirsk Chemical Concentrate Plant (Russia); N. T. Tukubaev, S. P. Yunushev, Technological Design Institute of Scientific Instrument Engineering (Russia); Yu. A. Zhukov, JSC Novosibirsk Chemical Concentrate Plant (Russia)

572 Metrological problems of melting level and crystal geometry measurement during crystal growing [4900-80]
S. V. Mikhlyaev, E. S. Nejevenko, Institute of Automation and Electrometry (Russia)

579 Nondestructive analysis of the transverse structure of novel optical fibers by third harmonic generation microscopy [4900-81]
R. Barille, Lab. POMA/Univ. d'Angers (France); L. Canioni, S. Rivet, L. Sarger, CPMOH/Univ. Bordeaux I (France); F. Brechet, P. Roy, D. Pagnoux, IRCOM/Univ. de Limoges (France)

586 Optical systems for melt level measurement in the process of crystal growth [4900-82]
S. V. Mikhlyaev, Institute of Automation and Electrometry (Russia)

592 Some advanced metrology concepts applied to the thermal behaviour of modern machine tools [4900-83]
M. S. Popa, Technical Univ. of Cluj-Napoca (Romania)

599 Origin of defects in nonlinear BBO crystals [4900-84]
V. D. Antsygin, V. A. Gusev, O. Yu. Dashevsky, Institute of Automation and Electrometry (Russia); V. P. Solntsev, E. G. Tsvetkov, Institute of Mineralogy and Petrography (Russia)

606 Application of photoelasticity for analysis of residual stresses in CDs [4900-85]
S. I. Gerasimov, N. S. Bachurina, N. N. Emelyanova, Siberian State Transport Univ. (Russia)

611 Laser measurements of the optical parameters of objectives in ultraviolet, visible, and infrared spectral regions [4900-86]
A. G. Bougayenko, A. V. Lukin, A. N. Melnikov, A. E. Morozov, State Institute of Applied Optics (Russia)

618 Automatic device for reading and identification of symbolic information [4900-87]
V. S. Bazin, L. V. Finogenov, Technological Design Institute of Scientific Instrument Engineering (Russia); S. A. Gulyaevsky, Institute of Mathematics (Russia); I. V. Piekhanova, D. N. Potzev, Technological Design Institute of Scientific Instrument Engineering (Russia); Y. S. Schulman, Public Joint Stock Co. MSZ (Russia); A. G. Verkhogliad, Technological Design Institute of Scientific Instrument Engineering (Russia); N. G. Zagoruiko, Institute of Mathematics (Russia); M. Y. Zaitsev, Public Joint Stock Co. MSZ (Russia)
Use of the method of local anisotropic features for symbolic image recognition [4900-88]
I. V. Borisova, Siberian Research Institute of Optical Systems (Russia); L. V. Finogonov, Technological Design Institute of Scientific Instrument Engineering (Russia); V. N. Gorenok, Siberian Research Institute of Optical Systems (Russia); A. E. Kazikin, Public Joint Stock Co. MSZ (Russia); I. V. Plekhanova, Technological Design Institute of Scientific Instrument Engineering (Russia); P. G. Popov, Siberian Research Institute of Optical Systems (Russia); Yu. S. Schulman, Public Joint Stock Co. MSZ (Russia); A. G. Verkhogliad, Technological Design Institute of Scientific Instrument Engineering (Russia)

Optoelectronic computer-aided inspection of thread geometry [4900-89]

Effect of laser treatment on wear resistance of plasma coatings [4900-90]
V. P. Larionov, N. P. Bolotina, G. G. Vinokurov, Institute of Physical-Technical Problems of the North (Russia)

Study and development of triangulation meters at TDI SIE and their industrial use [4900-91]
S. V. Plotnikov, V. M. Podchernin, I. V. Bykovskaya, Technological Design Institute of Scientific Instrument Engineering (Russia)

Optoelectronic computer-aided inspection of blade mounting parameters [4900-92]
Rav. M. Galiulin, Rish. M. Galiulin, J. M. Bakirov, S. V. Petrov, Ufa State Aviation Technical Univ. (Russia)

Zone plate interferometer for testing spherical surfaces [4900-93]
V. P. Koronkevich, G. A. Lenkova, A. E. Matoshkin, Institute of Automation and Electrometry (Russia)

Optoelectronic devices control for noncontact dimensional inspection of fuel elements of nuclear reactors VVER-1000 and VVER-440 [4900-94]
V. A. Beloglazova, O. I. Bityutsky, Technological Design Institute of Scientific Instrument Engineering (Russia); I. G. Chapaev, JSC Novosibirsk Chemical Concentrates Plant (Russia); V. M. Chernyshov, JSC TVEL (Russia); Yu. V. Chugui, A. A. Gushchina, Technological Design Institute of Scientific Instrument Engineering (USA); Yu. K. Karlov, JSC Novosibirsk Chemical Concentrate Plant (Russia); B. E. Krivenkov, V. I. Ladygin, V. I. Nesin, A. I. Pastushenko, Technological Design Institute of Scientific Instrument Engineering (Russia); Yu. V. Pimenov, JSC TVEL (Russia); V. V. Rozhkov, JSC Novosibirsk Chemical Concentrate Plant (Russia); S. P. Yunoshev, V. P. Yunoshev, Technological Design Institute of Scientific Instrument Engineering (Russia)

Part Two

Optoelectronic system for size inspection of round through holes in sieves [4900-95]
D. N. Bondar, N. V. Budanov, JSC ALROSA (Russia); A. V. Budantshev, E. L. Emelyanov, Yu. V. Obidin, V. I. Paterikin, K. V. Petukhov, A. K. Potashnikov, Technological Design Institute of Scientific Instrument Engineering (Russia)

Nondestructive inspection of the fuel element weld seam by a panoramic tomography method [4900-96]
Yu. K. Karlov, JSC Novosibirsk Chemical Concentrate Plant (Russia); V. P. Kosych, Institute of Automation and Electrometry (Russia); Yu. V. Obidin, A. K. Potashnikov, Technological Design Institute of Scientific Instrument Engineering (Russia)
