Contents

Preface xiii

Introduction xv

Jens Bergström

Part I Hot Work

Comparison of Different Characteristics of Modern Hot-Work Tool Steels

P. Gümpel, T. Bogatzky, A. Huber and B. Geigges 3

Hot-Work Tool Steels with Improved Properties for Die Casting Applications

K.-D. Fuchs 15

Influence of the Temperature on the toughness of a new chromium hot-work tool steel

H. Jesperson 23

A New Hot Work Tool Steel for High Temperature and High Stress Service Conditions

A. Grellier, M. Siaut 33

The Influence of Tramp Elements on the Spalling Resistance of Hot Work Tool Steel...

W. Bleck and M. Pant 43

Influence of Surface Heat Treatment on Thermal Fatigue Behaviors of Hot Work Steel

Y. Min, L. Xu and X. Wu 55

Heat and Surface Treatment of Hot-Work Tool Steels for Optimum In-Service Performance

B. Taljat, J. Tusek, D. Klobcar, P. Boscarol, G. Scavino 67

Investigations of Friction and Wear Mechanisms of Hot Forging Tool Steels

O. Barrau, C. Boher, C. Vergne and F. Rezai-Aria, R. Gras 81

Improving the Performance of Forging Tools — A Case Study

H-W. Brockhaus, A. Guderjahn, I. Schraff 95

New Tool Steel for Warm and Hot Forging

K. Fisher, H. Schweiger, J. Hasenberger and H. Dremel 109

Balancing Tool Steel 119
D. Bonin

Practical Tests of Coated Hot Forging Dies

M. Kolbe, F. Kunath, T. Kerl

Investigation of the Soldering Reaction in Magnesium High Pressure Die Casting Dies

C. Tang, M. Z. Jahedi, M. Brandt

Part II  Cold Work

A New Generation for Tool Steel Casting.

A. Oldewurtel and C. Escher

A New High Tensile Steel With High Toughness

E. Wulfmeier

Material Behaviour of Powder-Metallurgically Processed Tool Steels in Tensile and...

S. Marsoner, R. Ebner and R. Minichmayr, F. Jeglitsch

Mechanical Study of a Sheet Metal Forming Dies Wear

D. Attaf, L. Penazzi, C. Boher, C. Levaillant

Comparison of the Tribological Properties of Different Cold Work Steels at...

G. A. Fontalvo, C. Mitterer

Steel for Press Tools

B Högman

Influence of Nitrogen Alloying on Galling Properties of PM Tool Steels

I. Heikkilä and L. Slycke, O. Sandberg

Effect of Niobium and Vanadium as an Alloying Element in Tool Steels with High...

S. Wilmes, G. Zwick

Carbide Distribution Effects in Cold Work Tool Steels

J. Blaha, C. Krempaszky and E.A. Werner, W. Liebfahrt

Optimizing Microstructure for High Toughness Cold-Work Tool Steels

D. Viale, J. Béguinot, F. Chenou and G. Baron

Part III  Plastic Mould Steels

Optimized Steel Selection for Applications in Plastics Processing

C. Ernst, W. Pannes

Development Trends of Corrosion Resistant Plastic Mould Steels

K. Sammt, J. Sammer, J. Geckle and W. Liebfahrt

PM Plastic Mould Steels – Wear Resistant and Corrosion Resistant Martensitic...

C. Kerschenbauer, M.O. Speidel, G. Lichtenegger, J. Sammer and K. Sammt
Contents

Part IV High Speed Steels and Processes

New Optimised Manufacturing Route for PM Tool Steels and High Speed Steels
C. Tornberg and A. Fölzer 305

New Powder Metallurgy High Speed Steel with Excellent Hot Hardness
I. Maili, R. Rabitsch, W. Liebfahrt, H. Makovec and E. Putzgruber 317

High Speed Steel Produced Through Conventional Casting, Spray Forming and ...
R. A. Mesquita and C. A. Barbosa 325

Electro-Slag Remelting of AISI M41 High-Speed Tool Steel Scrap
T. Mattar 339

Effect of EAF and ESR Technologies on the Yield of Alloying Elements in Tool Steels
T. Mattar, H.S.R. El-Faramawy, A. Fathy, M. Eissa, K.A. El-Fawakhry 345

Influence of Vacuum Heat-Treatment on Microstructure and ...
V. Leskovšek and B. Ule 355

Primary Carbides in Spincast HSS for Hot Rolls and Their Effect on the Oxidation...
A. Molinari, M. Pellizzari, A. Biggi, G. Corbo and A. Tremea 365

Creep of High Speed Steels Part I – Experimental Investigations
H. Berns, C. Broeckmann and H. F. Hinz 379

Creep of High Speed Steel Part II – Numerical Simulation
A. Höfter, C. Broeckmann and H. Berns 399

Unit Cell Models for Thermomechanical Behavior of Tool Steels
H.J. Böhm, T. Drabek and A. Eckschlager 415

Microstructure and Wear Resistance of High Speed Steels for Rolling Mill Rolls
M. Boccalini Jr., A. Sinatoria 425

Wear Studies of Commercial and Ti/Nb High-Speed Steels
J. Richter 439

Part V Heat Treatment

Carbide Dissolution Rate and Carbide Contents in Usual High Alloyed Tool Steels...
S. Wilmes and G. Kientopf 445

On the Precipitation Behaviour in Maraging Steels

Thermal Fatigue in New Lower Hardening Temperature Hot Work Steels
M. Pirovano 469

Optimized Heat Treatment and Nitriding Parameters for a New Hot-work Tool Steel
D. Duh and I. Schruff 479
Comparison of Thermal Fatigue Behavior of Plasma Nitriding with Compound...
W. Peng, X. Wu, Y. Min, L. Xu

The Behaviour of two New Tool Steels Regarding Dimensional Change
R. Pierer, R. Schneider, H. Hiebler

Numerical Simulation of Gas Quenching of Tool Steels and the Influence of...
A. Thuvander

Vacuum-Heat-Treatment of Hot-Work Steel
B. Zieger

Deep Cryogenic Treatment of Cold Work Tool Steel
M. Pellizzari and A. Molinari

Cryogenic Treatment and it’s Effect on Tool Steel
T. Yugandhar, P.K. Krishnan, C.V. Bhaskar Rao and R. Kalidas

Part VI  Fatigue of Tool Steels

Tempering Effect on Cyclic Behaviour of a Martensitic Tool Steel
Z. Zhang, D. Delagnes, G. Bernhart

Thermal Fatigue and Softening Behavior of Hot Work Tool Steels
D. Caliskanoglu, I. Siller and R. Ebner, D. Caliskanoglu, H. Leitner and F. Jeglitsch, I. Siller and W. Waldhauser

Evaluation of the Cyclic Behaviour During High Temperature Fatigue of Hot Work...
J. Sjöström and J. Bergström

Relationship Between Microstructure and Mechanical Properties of a 5% Cr Hot...
N. Mebarki, P. Lamesle, D. Delagnes, C. Levaillant, F. Delmas

Effect of Microstructural Homogeneity on Mechanical and Thermal Fatigue...
W. Tang, X. Wu, Y. Min and L. Xu

Numerical Models and Their Validity in the Prediction of Heat Checking in Die...
A. Srivastava, V. Joshi and R. Shivpuri

Computer Aided Evaluation of Thermal Fatigue Cracks on Hot-Work Tool Steel
X. Wu and L. Xu

Thermal Fatigue of a Tool Steel: Experiment and Numerical Simulation
V. Velay, G. Bernhart and L. Penazzi, A. Persson and J. Bergström

Prediction of Fatigue Life of Cold Forging Tools by FE Simulation and Comparison...
M. Meidert and C. Walter, K. Pöhlundt

A New Model for Fatigue Failure due to Carbide Clusters
A Melander and S Haglund

Crack Resistance of Hardened Steels Against Thermal Shock
