Sixth International Conference on

CLEAN STEEL

ORGANIZED BY THE

HUNGARIAN MINING AND METALLURGICAL SOCIETY (OMBKE)

AND

THE STEEL DIVISION OF THE INSTITUTE OF MATERIALS, (IOM)

IN CO-OPERATION WITH THE

INTERNATIONAL IRON AND STEEL INSTITUTE (IISI)

AND THE

EUROPEAN STEEL INSTITUTES CONFEDERATION (ESIC)

Balatonfüred, Hungary

10-12 June 2002
## CONTENTS

### OVERVIEW

**Development of clean steel from 1970 (Clean Steel 1) to 2002 (Clean Steel 6)**  
*P. Tardy, Gy. Károly, Hungary*

### MAKING CLEAN STEELS

**Iron and steel refining with magnesium vapor produced in-situ by reduction of magnesium oxide**  
*M. Sano, K. Okumura, J. Shan, J. Yang, Japan*

**KOBSM versus EAF steel – which is cleaner**  
*T. Vert, P. Rasmussen, Canada*

**Utilization of metallized briquettes in steel production**  
*J. Melecky, S. Wojtas, I. Zajicek, M. Glos, Czech Republic*

**Slag free tapping with the INTERSTOP tap hole gate for clean steel production**  
*U. Grethe, A. Berghöfer, E. Schnurrenberger, H. Amsler, Germany*

**Size distribution gradients of inclusions during stirring**  
*M. Söder, P. Jönsson, L. Jonsson, M. Hallberg, Sweden*

**Non metallic inclusions entrapment by slags: a laboratory investigation**  
*P. Rocabois, J. Lehmann, C. Gatellier, J. P. Teres, France*

**Slag optimisation practices during the production of low carbon aluminium killed steels**  
*C. Cicutti, M. Valdez, J. Petroni, R. Ares, R. Donayo, A. Gómez, Argentina*

**The effect of slag conditioning on steel cleanliness in ultra low carbon steel**  
*S.B. Ahn, L.K. Young, H.S. Choi, C.H. Yim, South Korea*

**An experimental study on steel’s reoxidation rate caused by SiO₂-, MgO-Cr₂O₃- and MgO-C-refractories**  
*E.P. Heikkinen, T. Kokkonen, R. Mattila, J. Härkki, Finland*
Reoxidation during ladle treatment
B. Coletti, B. Gommers, C. Vercruysse, B. Blanpain, P. Wollants, F. Haers, Belgium

Considerations on nucleation and growth kinetics of inclusions during liquid steel deoxidation
L. Zhang, W. Pluschkell, Germany

Thermodynamic examination on inclusion modification and precipitation from calcium treatment to solidified steel
L. Holappa, M. Hämäläinen, M. Liukkonen, M. Lind, Finland

Deep steel desulfurization technology at LF treatment in KSC
D. Takahashi, M. Kamo, Y. Kurose, H. Nomura, Japan

Non-metallic inclusions in ferroalloys
T. Sjökvist, P. Jönsson, Sweden

A study of the effect of varying FeO content and temperature on reactions between slag and steel during vacuum degassing

The behaviour of inclusions in a RH vacuum degasser
C. J. Treadgold, United Kingdom

Development of a dynamic process model for inclusion removal in vacuum ladle degassing
Y. Sheng, M. Hallberg, Sweden
B. Kleimt, Germany

Current status and future plans of the LSHR method
T. Hansén, K. Törresvoll, P. Jönsson, Sweden

High purity steels – a challenge to improved steelmaking processes
H. Lachmund, K. H. Tacke, Y. Xie, Germany

CHARACTERISING CLEAN STEELS

Improving oxide cleanness on basis of MIDAS method
H. Jacobi, K. Wünnenberg, Germany

Prediction of the big inclusions in large volumes of steel: fatigue tolerant design of steel components
J.R. Yates, G.S. Shi, H.V. Atkinson, C. M. Sellars, C.W. Anderson, S. Wei, United Kingdom
Practical aspects of sampling during steelmaking
B. Wahlberg, T. Hansén, P. Jönsson, Sweden

Rapid characterization of defects (inclusions and segregation) by static and mapping PDA-OES
R. Meilland, France

The measurement of insoluble aluminium in steel by oxides separation method in oxygen analysis - a comparison with the peak integration method by OES
G. Vlaicu, F. Parsan, N. Pavel, Romania

Cleanliness assessment of high quality steels produced by RH treatment
V. Tusset, Ch. Marique, H. Mathy, B. Gommers, N. Vanpoucke, Belgium

The effect of a spatial distribution of particles of in as-continuously cast HLSA steels on grain size development
C. L. Davis, M. Strangwood, United Kingdom

Size distribution and composition of sulphides formed in steel during solidification of thin sections
B. Garbarz, J. Marcisz, Poland

Analysis of non metallic inclusions in deep drawing steels
W. Jaeger, W. Steinberg, B. Holtz, F. Friedel, Germany

Some aspects about behaviour of calcium in silicon killed steels
W. Tiekink, R. Bogert, T. Breedijk, A. Ferguson, Netherland

The simulation of the coagulation of the nonmetallic inclusion in the tundish and its trapping into the solidified shell in the continuous casting mold

Prediction of the composition, size and spatial distribution of oxide inclusions precipitating during solidification of semi-killed steels
J. Lehmann, P. Rocabois, H. Gaye, France

New type of submerged entry nozzle for casting of round blanks
J. Pindor, K. Michalek, Czech Republic

A review of strand casting factors affecting transverse cracking
E. S. Szekeres, USA

The hook formation and its mechanism in ultra low carbon steels
H-J. Shin, S-H. Kim, S-M. Kang, H-S. Kim, J-S. Kim, Republic of Korea
MAKING CLEAN HIGH ALLOY AND STAINLESS STEELS

Improving the cleanliness of VAR and ESR material directed by the needs of demanding applications 348
J. Loh, K. Benedens, B. Erpenbeck, E. Schmilinsky, Germany

Morphology and thermodynamics of TiN–formation in stainless steel 354
P. R. Scheller, A. F. Rudolphi, E. Steinmetz, Germany

Development of low inclusion content steels at the SMACC melting shop of Avesta Polarit 355
D. A. Clarke, A. Hawksworth, A. G. Wilkinson, J. S. Pickford, G. K. Allan, United Kingdom

Very clean powder-metallurgical tool steels and high speed steels using latest processing technology 361
A. Fölzer, C. Tornberg, Austria

The role of Ti on precipitation and toughness in 300m 369
C. L. Davis, M. Strangwood, United Kingdom

USER ORIENTED CLEAN STEELS

Steel cleanness requirements for X65 to X80 ERW linepipe steels 379
I. D. Simpson, Z. Tritsiniotis, L. G. Moore, Australia

Accomplishment of the production of the high-purity and niobium micro alloyed steel family at DUNAFERR 395
L. Szűcs, Á. Horváth, P. Lukács, S. Sebő, Á. Szélig, Hungary

Metallurgy of plastic inclusions to improve the fatigue life of engineering steels 400
C. Bertrand, J. Molinero, S. Landa, R. Elvira, Spain
M. Wild, Sweden,
G. Barthold, P. Valentin, Germany,
H. Schifferl, Austria

Conditions of manufacturing quality and high-grade steel in Diósgyőr 408
M. Ceccarelli, O. Grega, Gy. Károly, Hungary

Benchmarking clean steel technologies and practices for the world steel industry 423
K. Wünnenberg, Y. Kawai, IISI
