Second International Conference on Petroleum Phase Behavior and Fouling

Conference Preprints

Sponsored by:

The American Institute of Chemical Engineers (AIChE)

Haldor Topsøe A/S, Denmark

The Royal Danish Academy of Sciences and Letters

Center for Phase Equilibria and Separation Processes (IVC-SEP), Department of Chemical Engineering, Technical University of Denmark

Copenhagen, Denmark, August 27-31, 2000

Conference Chairs: Simon I. Andersen & Irwin A. Wiehe
Contents

Fourth International Symposium On Thermodynamics of Heavy Oils and Asphaltenes I

Paper 01
An Investigation of Heat Effects in N-Alkanes + Asphaltenes Systems
Ch. Stachowiak, J.-P.E. Grolier, S.L. Randzio, C. Achard, M. Rogalski, and J.R. Voguié

Paper 02
Dielectric Studies of Asphaltenes in Toluene Solutions
Carsten Pedersen, and Simon I. Andersen

Paper 03
Study of Asphaltene Precipitation with Aid of Refractive Index
Piyarat Wattana, David J. Wojciechowaki, and H.S. Fogler

Paper 04
Association Behaviours of Asphaltene in Solution
Masashi Iino, Koyo Norinaga, Isao Sogou, and Susumu Takasugi

Paper 05
Microstructural Studies of Asphaltene Aggregates by Electron Microscopy
Camacho-Bragado, G.A; Pérez-Hernández, R; Espinosa-Pesqueira, M, R; Romero.Guzmán, E.T, and José-Yacamán, M.

Paper 06
Transitiometric Investigation of Asphaltenic Fluids under real Conditions of Temperature and Pressure
Ch. Stachowiak, J.-P.E. Grolier, and S.L. Randzio

Paper 07
Solubilization of Water by Petroleum Asphaltenes in Toluene Solution
Simon Ivar Andersen, Carlos Lira-Galeana, and Jose Manuel del Rio-Garcia

Paper 08
The Effect of Asphaltene-Paraffin Interactions on Crude Oil Stability
María del Carmen García, and Lante Carbogani
Third International Symposium On Wax Thermodynamics and Deposition

Paper 09
Aging and Morphological Evolution of Wax-Oil Gels During Externally Cooled Flow Through Pipes
Probjot Singh, Ramachandran Venkatesan, H. Scott Fogler, and N.R. Nagarajan

Paper 10
A Compositional Model Simulation Wax Deposition in Pipeline Systems
Niels Lindeloff, Kristian Kreibjerg, and Allan K. Rydahl

Paper 11
Numerical Approach to Model Wax Deposition in Oil Wells
E. Ramirez-Jaramillo, C. Lira-Galeana, and O. Manero

Paper 12
Bounded Models for Wax Deposition in Pipelines

Paper 13
Empirical Cold Finger Modeling Using Model Fluids
Klaus Weispfennig

Paper 14
Low and High Pressure Modeling of Wax Formation in Crude Oils
Fátima I.C. Mirante, João A.P. Coutinho, J. Pauly, and Jean-Luc Daridon

Paper 15
A Thermodynamic Model for Wax Precipitation
Julian Y. Zuo, and Dan D. Zhang

Paper 16
Minimum Oil Analysis for Reliable WAT Modeling
K. Delmas, V. Ruffier-Meray, and F. Brucy

Paper 17
Measurements and Predictions of T and P effects on Wax content in a Partially Frozen Paraffinic System
Jérôme Pauly, Christophe Dauphin, Jean-Luc Daridon, and Hervé Carrier
Fourth International Symposium on Thermodynamics of Heavy Oils and Asphaltenes II

Paper 18
Improved Modeling of the Onset of Asphaltene Flocculation
Jianxin Wang, and Jill S. Buckley

Paper 19
Determination of the Three-Dimensional Solubility Parameter of Petroleum Asphaltenes
Andrew P. Sullivan, and Peter K. Kilpatrick

Paper 20
Asphaltene Precipitation & Deposition from Live Oil: NIR and Microscopic Investigation
Ahmed Hammami, John Ratulowski, Moin Muhammad, and Jeff Creek

Paper 21
A High Pressure Asphaltene Deposition Technique for Evaluating the Deposition Tendency of Live Oil and for Evaluating Inhibitor Performance
Christopher Gallagher, and Sam Asomaning

Paper 22
Asphaltene Precipitation & Deposition From Live Oil: Relevance of NIR
Jefferson L. Creek, Jim McFadden, Moin Muhammad, Ahmed Hammami, and John Ratulowski

Paper 23
Stimulation of Asphaltene Deposits in Oil Producing Wells
Wolfram Kleinitz, and Simon I. Andersen

Paper 24
Adsorption Isotherms of Asphaltene Stabilizers on Asphaltene Particles
León, Olga; Contreras, Eliasara; Acevedo, Sócrates; Rogel, Estrella; Dambakli, Gilberto

Paper 25
Control of Asphaltene Deposition Laboratory Screening and Evaluation of Asphaltene Inhibitors
Stephan Allenson

Paper 26
Methods for Determining Asphaltene Stability in Oils and Selecting Asphaltene Inhibitors
Samuel Asomaning
Phase Behavior and Fouling: Diamondoids, Hydrates, and Foam

Paper 27
High Pressure Phase of Binary Methane-diamondoid and Carbon dioxide-diamondoid Systems
*Th. De Loos, and W. Poot*

Paper 28
Foamy Oil PVT and Rheology Measurements
*Nasser Albartamani, and John Ratulowski*

Paper 29
Control of Natural Gas Hydrates in Production Systems Using Anti-Agglomerant Hydrate Inhibitors
*L.M. Frostman, and H. Downs*

Paper 30
Flow Properties of Hydrate Suspensions in Asphaltenic Crude Oil
*Camargo, R., Palermo, T., Maurel, P., and Bouchard, R.*

Paper 31
Apparatus for Liquid-Vapour Equilibria Measurements at Low Temperature and High Pressure
*S. Lhyvernet, J. Ghanem, I. Mokbel, T. Getachew, A. Barreau, P. Moign, and J. Jose*

Poster Session

Paper 32
Investigation of Asphaltenene Flocculation in Crude Oils by an Acoustic Method of Phase Comparison
*Plantier F., Carrier H., Daridon J.L., and Lagourette B.*

Paper 33
Low Temperature Behavior of Some High Temperature Distillation Cuts
*João A.P. Coutinho*

Paper 34
Modelling Wax Formation in Crudes with WAXtracker
*João A.P. Coutinho*

Paper 35
Low Temperature Treatment of Petroleum Tar in the Production of Anode Binder Pitch
*Hansen, B.E., Malmros, O., Turner, N.R., Stenby, E.H., and Andersen, S.I.*
Paper 36
A Multivariate Screening Analysis of Crude Oil Indigenous Chemical Components and their Influence on Transportability and Subcooling of Natural Gas Hydrates in Multiphase Systems
Linn Bergflödt, and Lars Henrik Gjertsen

Paper 37
PVT Calculations on Condensate Gases Using Distribution Functions
Jean-Noël Jaubert, Roland Solimando, Patrice Paricaud, and Alain Barreau

Paper 38
Comparison of the Molecular Weight changes in Asphaltenes during Hydrotreating using different Methods
Morten Mejlholm, Simon I. Andersen, and Jesper Bartholdy

Paper 39
On The Electrodeposition of Asphaltenes
Simon Ivar Andersen, Adriana de Jesus Aguirre-Gutierrez, and Carlos Lira-Galeana

Paper 40
Molecular Weights of Heavy Petroleum Fractions: Comparison between Ebulliometric Measurements and MALDI-TOF-MS
Vellut D., Moriyama R., Chiba T., Delolme F., Dessalces G., Behar E., Jose J. Presented by Ilham, M.

Paper 41
Isothermal Vapor-Liquid Equilibria and Excess Enthalpies of Sulfane + Benzene, + Isopropylbenzene or + Hex-1-Yne. Measurements and Analysis on the Basis of the Modified Unifac Group Contribution Model
Latifa Negadi, Mokbel Ilham, Ahmed Ait Kaci, Jacques Jose

Paper 42
Prevention of Organic Deposition by Chemical Injection: Field Cases of Asphaltene and Wax Treatment
Groffe, D., Groffe, P., and Takhar, S.

Paper 43
Solid-Liquid-Vapor Phase Boundary of a North Sea Waxy Crude: Measurement and Modeling
Jean-Luc Daridon, Jérôme Pauly, João A.P. Coutinho, and François Montel

Paper 44
Estimation of Solubility Parameters of Complex Crude Oil Mixtures Using Sound Velocity Carsten Pedersen and Simon I. Andersen
Mechanisms and Mitigation of Fouling of Refinery Units

Paper 45
The Impact of Liquid-Liquid-Vapour Phase Behaviour on Coke Formation from Model Coke Precursors
D. Minicucci and J.M. Shaw

Paper 46
Visbreaking of Heavy Oils for Pipeline Transportation - Quality and Stability
Richard J. Parker, Brent Lefebvre, and Arnold Pipke

Paper 47
Effect of Hydrotreatment on Product Sludge Stability
Jesper Bartholdy, Ryan Lauridsen, Morten Mejholm, and Simon I. Andersen

Paper 48
Fouling of Nearly Incompatible Oils
Irwin A. Wiehe, Raymond J. Kennedy, and G. Dickakian

Paper 49
Automatic Heavy/Residual Fuel Oil Stability Analyzers, Effective Tools for Optimization of Heavy Oil Processes and Improving Profitability
Juha Vilhunen

Mechanisms and Mitigation of Heat Exchanger Fouling in Petroleum Service

Paper 50
Logical Approach to Troubleshooting Crude Preheat Exchanger Fouling
Glen Brons, and Thomas M. Rudy

Paper 51
The Spirelf® System - Fouling Mitigation in Refinery Units
Claude A. Baudelet. Presented by Arthur W. Kreuger

Paper 52
CFD Investigation of Maldistribution Effects on Crude-oil Fouling in Shell and Tube Exchangers
R.H. Clarke, and F. Nicolas
Paper 53
Helical Baffles in Shell & Tube Heat Exchangers
_Bert Boxma_

Paper 54
TEMA Fouling Factors – Too High or Too Low?
_Palen, Joe_

Paper 55
Towards Heat Exchanger Design Methods that take direct Account of Fouling
_G.T. Polley, T. Cordes, and S.J. Pugh_

Paper 56
Mitigation of Fouling in Refinery Pre-Heat Trains by Optimal Management of Cleaning and
Antifoulant Treatment
_D.I. Wilson, F. Smaiti and V.S. Vassiliadis_

Paper 57
Fouling Allowance in The Design of Refinery Heat Exchangers
_G.M. Jones, J. Campbell, and T.R. Bott_

Paper 58
Designing Shell-and-Tube Heat Exchangers with Velocity Dependent Fouling
_David Butterworth_

**The Chemistry and Physics of Petroleum-Water Emulsions**

Paper 59 – Not available

Paper 60
Colloid Chemistry in Sub Sea Petroleum and Gas Processing
_Johan Sjöblom, Einar Eng Johnsen, and Arild Westvik_

Paper 61 – Not available

Paper 62 – Not available

Paper 63 – Not available

Paper 64 – Not available

Paper 65 – Not available

Paper 66
Separation of Live Crude Oil at Brine Pressure and Temperature in Laboratory.
Effects of Pressure Drop and Separation Pressure
_Einar Eng Johnsen and Arild Westvik_
