The 2001 International Coalbed Methane Symposium
is Sponsored by

The University of Alabama
College of Continuing Studies
College of Engineering

Gas Technology Institute/Ticora Geosciences, Inc.

Advanced Resources International

CDX Gas, Inc.

Pense Brothers Drilling Company, Inc.

Coalbed Methane Association of Alabama

Black Warrior Methane Corp.

Geological Survey of Alabama

GeoMet Operating Company, Inc.

U.S. Environmental Protection Agency
TABLE OF CONTENTS

• GEOLOGY I

0102.............................................................................................................................. 1
Coal Cleat Classification and Permeability Estimation by Image Analysis on Cores and Drilling Cuttings; K.H.A.A. Wolf, R. Ephraim, W. Bertheux and J. Bruining, Delft University of Technology—Department of Applied Earth Sciences

0108.............................................................................................................................. 11
Geologic Controls on Effective Cleat Porosity Variation in San Juan Basin Fruitland Formation Coalbed Reservoirs; Charles R. Nelson, Gas Technology Institute

0140.............................................................................................................................. 21
Key Geological Controls to Formation of Coalbed Methane Reservoirs in Southern Qinshui Basin of China: I, Hydrological Conditions; Qin Yong, Fu Xuehai, Jiao Sihong, Li Tianzhong and Wei Chongtao, College of Mineral Resource and Geosciences, China University of Mining and Technology
RESOURCE ASSESSMENT/EXPLORATION, RECOVERY AND UTILIZATION

0101 ........................................................................................................................................... 29
Integrated Technologies for Coal Mine Methane Utilization;

0105 ........................................................................................................................................... 39
Advanced Gas Engine Fuelled by a Coal Seams Methane Gas;

0143 ........................................................................................................................................... 51
Carbon Sequestration Potential of Coalbed Methane Reservoirs in the Black Warrior Basin: A Preliminary Look;
Jack C. Pashin and Richard E. Carroll, Geological Survey of Alabama; and Richard H. Groshong, Jr., Department of Geology, The University of Alabama

0146 ........................................................................................................................................... 63
Mine Related Coalbed Methane Recovery & Utilization Project in India; P. Kumar and Rajiw Lochan, Central Mine Planning and Design Institute

0148 ........................................................................................................................................... 75
CO2-Enhanced Coalbed Methane Recovery Demonstration Pilot--A Case for Australia; S. Wong and W.D. Gunter, Alberta Research Council; K. MacLeod, Sproule International Ltd; M. Wold, CSIRO Petroleum; M.J. Mavor, Tesseract Corporation; and J. Gale, IEA Greenhouse Gas R & D Programme

0152 ........................................................................................................................................... 87
Reduction of Methane Emissions from Underground Coal Mining: Demonstration of Abatement and Utilisation in Mine Ventilation Exhaust Air; Richard Danell and Jason Nunn, BHP Minerals Technology; and Ake Kallstrand and Bjorn Heed, MEGTEC Systems AB

0156 ........................................................................................................................................... 101
Coalbed Methane Exploration-Indian Scenario; S.D. Prasad, Mineral Exploration Corporation, Ltd.
RESERVOIR CHARACTERIZATION/ENGINEERING I

0109 ..................................................................................................................... 111
Frontier Coalbed Gas Area Selection; Screening Process; S.W. Lambert and T.E. Lombardi, TICORA Geosciences, Inc.

0111 ..................................................................................................................... 121
Measuring Permeability in Coals Utilizing Well Log Data and LogFAC* Analysis; A.Thomas Rozak, RXO Technology Systems, Inc.; and R. Marc Bustin, University of British Columbia

0113 ..................................................................................................................... 133

0114 ..................................................................................................................... 151
Heat of Methane Adsorption of Coal: Implications for Pore Structure Development; Laxminarayana Chikatamarla, Department of Earth and Ocean Sciences, The University of British Columbia, Vancouver; and Peter J. Crosdale, Coalseam Gas Research Institute, School of Earth Sciences, James Cook University, Australia

0118 ..................................................................................................................... 163

0119 ..................................................................................................................... 177
High Pressure Methane and Carbon Dioxide Adsorption on Dry and Moisture-Equilibrated Carboniferous Coals; B.M. Krooss, Y. Gensterblum and N. Siemons, Aachen University of Technology; F. van Bergen, H.J.M. Pagnier, and P. David TNO-NITG, the Netherlands
Five-Spot Production Pilot on Tight Spacing: Rapid Evaluation of a Coalbed Methane Block in the Upper Silesian Coal Basin, Poland; C.Y. McCants, Kuwait Foreign Petroleum Exploration Company; S. Spafford, Texaco Inc.; and S.H. Stevens, Advanced Resources International, Inc.

Advanced Reservoir Modeling in Desorption-Controlled Reservoirs; S.R. Reeves and L.J. Pekot, Advanced Resources International

Application of Conventional Oil Reservoir Productivity Equations to Horizontal Coalbed Methane Wells; J.Q. Shi and S. Durucan, Imperial College of Science, Technology and Medicine

Identifying the Key Factors Controlling Openhole Cavity Completions at the San Juan Basin - A Numerical Study; J.Q. Shi and S. Durucan, Imperial College of Science, Technology and Medicine

Comparative Analysis of Coalbed Methane Production Trends and Variability - Impact on Exploration and Production; M.D. Zuber and C.M. Boyer II, Schlumberger Holditch-Reservoir Technologies
Recent Developments in the Application of the 29 Tax Credit to Coal Seam Gas; G.A. Sanderson and L.W. Berggren, Sanderson & Rotroff, LLP

Advances in Simulation of Gas Outburst Conditions in Underground Coal Mines; S.K. Choi and M.B. Wold, CSIRO Petroleum, Australia

Technical Decisions on Ecological Safety Ensuring at Constructing and Maintaining the Gas Mail-Line Russia-Turkey; A.I. Gritsenko and G.S. Akopova, Scientific Research Institute of Natural Gas (VNIIGAZ); and A.V. Amelin, Scientific Research Institute of Main-Line Construction

The Investment Prospects of Coal Mine Methane Projects in China; Huang Shengchu, China Coalbed Methane Clearinghouse
CANISTER DESORPTION METHODS: PROBLEMS, PITFALLS, PROSPECTS

Desorption Gas Properties of Japanese Coals; T. Yamazaki and K. Aso, Waseda University; K. Sasaki, Japan Coal Energy Center; and K. Yamazaki, Mitsui Mining Engineering Co., Ltd.

Canister Desorption Techniques: Variations and Reliability; L.M. Knox, El Paso Production Company; J. Hadro, R.R. Donnelley, Poland

The Modified Direct Method: A Solution for Obtaining Accurate Coal Desorption Measurements; W.P. Diamond, S.J. Schatzel, F. Garcia, and J.P. Ulery, National Institute for Occupational Safety and Health (NIOSH), Office for Mine Safety and Health Research, Pittsburg Research Laboratory
Hydrogen Sulphide Sorption on Coal with Comparisons to Methane, Carbon Dioxide, Nitrogen and Hydrogen: Implications for Acid Gas Sequestration and Co-production of Methane; R. Marc Bustin, The University of British Columbia

The Annealing Mechanisms of Cleats in Coal; Xianbo Su, Yanli Feng, Jiangfeng Chen and Jienan Pan, Jiaozuo Institute of Technology

Plate Tectonics and Exploitation of Coalbed Gas in China; Zhang Zimin, Zhang Ruilin and Liao Zhiping, Jiaozuo Institute of Technology

Key Geological Controls to Formation of Coalbed Methane Reservoirs in Southern Qinshui Basin of China: II, Modern Tectonic Stress Field and Burial Depth of Coal Reservoirs; Qin Yong, Fu Xuehai, Jiao Sihong, Li Tianzhong and Wei Chongtao, College of Mineral Resource and Geosciences, China University of Mining and Technology

Key Geological Controls to Formation of Coalbed Methane Reservoirs in Southern Qinshui Basin of China: III, Factor Assembly and CBM Reservoir-forming Pattern; Qin Yong, Fu Xuehai, Jiao Sihong, Li Tianzhong, and Wei Chongtao College of Mineral Resource and Geosciences, China University of Mining and Technology

The Relevance of Coal Petrology to Coalbed Methane Evaluation, Using the Gloucester Basin, Australia as a Model; L.W. Gurba, The University of New South Wales, School of Geology; and C.R. Weber, Pacific Power, Sydney
INTERNATIONAL DEVELOPMENT STATUS:
PRODUCTIVITY, ECONOMICS, FINANCE

Coalbed Methane Exploration in China and Where to Prospect Coalbed Methane; Liu Honglin, Zhang Jianbo and Wang Hongyan, Coalbed Methane Center of Natural Gas Research Institute, Langfang-Branch Research Institute Petroleum Exp. and Dev., PetroChina

Indian Coalbed Methane Scenario; U.P. Singh, Coal India Limited

Coal Industry Status and Development Perspectives of Coalbed Methane Recovery and Utilization in Russia’s Far East; I.V. Sadardinov, V.F. Moroz, A.I Agoshkov, SC Dalvostniiproektugol; O.V. Tailakov, Institute of Coal and Coal Chemistry; S. Shimada, The University of Tokyo; and K. Ohga, Hokkaido University, Japan

Coal Mine Methane in Ukraine: Assessment and Opportunities; Alexander E. Fillippov, Alexander A. Pisarenko and Jerry R. Triplett, Partnership for Energy and Environmental Reform, Kyiv, Ukraine
1. Investigations on the Micro- and Mesoporous Structure of Coals of Varying Rank: A Combined Small Angle Neutron Scattering (SANS) and Gas Adsorption Experiments Study; D. Prinz, B. Krooss, and R. Littke, Institute of Petroleum and Coal, University of Aachen, Germany; W. Pyckhout-Hintzen, IFF, Research Centre Juelich, Germany

2. Enhanced Methane Storage and Generation in the Shear Zones Along Coal Seams: A Potentially Significant Coalbed Methane Reservoir; H. Li and Y. Ogawa, University of Tsukuba

3. 4-D Permeability Characterization of Coal Enhances Exploration and Production of CBM; P. Massarotto, V. Rudolph and S.D. Golding, The University of Queensland

4. Coal Seam Gas Exploration in the Walloon Coal Measures - Northeast Surat Basin, Queensland; Steven G. Scott, Queensland Gas Company, Ltd.; and Bob Bell, GFK Investments Pty Ltd.

5. Basic Reservoir Characteristics and Development Strategy of Coalbed Methane Resource in China; Zhang Qun and Yang Xilu, Xi'an Branch, China Coal Research Institute; and Feng Sanli, China United Coalbed Methane Corporation, Ltd.
