Fraunhofer Institut
Chemische Technologie

6th International Symposium and Exhibition on Sophisticated Car Occupant Safety Systems

Edited by Karl-Friedrich Ziegahn

Karlsruhe, Germany Congress Center
2002, December 2 - 4

http://www.Airbag2000plus.de
The Proceedings are published at the beginning of the conference and contain the written versions of the oral presentations and posters. Due to the shortage of time, printing had to commence prior to receipt of all contributions. Therefore partly only the abstract had been printed.

**TABLE OF CONTENTS**

**LECTURES**

**V1**

*Keynote Lecture*

Our Vision of Occupant Protection – A View into the Future

Jacques Lacambre  
Senior Vice President and Member of the Board, Renault, F

**Occupant Protection – General Issues**

**V2**

Occupant Safety and Advanced Airbags – US Experiences and Regulations

Annette M. Sanberg  
NHTSA, Washington, USA

**V3**

International Product Liability Law – An Update

Timothy C. Smith  
Lungershausen & Smith, Böblingen, D

**V4**

Capturing Vehicle Crash Data – An Information Revolution

Ricardo Martinez  
Safety Intelligence Systems Corp., Atlanta, USA

**Field Experiences and Technology Strategies**

**V5**

The Protection Effect of the Airbag – Field Experience in Germany

Klaus Langwieder, Thomas Hummel  
Institut für Fahrzeugsicherheit IFM, München, D
V6  
Good is not enough – Side Protection Systems Today and in the Future

Klaus Friedewald  
Volkswagen AG, Wolfsburg, D

V7  
AARU Accident Research – Evaluation Example of Side Airbag Performance in Real Accidents

Eckart Donner, Birgit Graab  
AUDI AG, Ingolstadt, D

Sensor Systems, PreCrash Sensing and Actuation

V8  
What is Achievable Today and in the Near Future? – Overview on Technologies: Radar, Video, IR

Hans Spies  
Ingenieurbüro Spies, Hohenwart, D

V9  
PreCrash Sensing by Use of a Radar Based Surround Sensing System

Michael Bunse, Alfred Kuttenerger, Marc Theisen  
Robert Bosch GmbH, Stuttgart, D

V10  
Advanced Sensors for Future Restraint Systems

Thomas Görning  
Conti Temic microelectronic GmbH, Ingolstadt, D

V11  
Technologies for Static Airbag Suppression Systems

Robert C. Jones  
Robert Bosch Corp., Farmington Hills, USA

V12  
PreSafe – A New Preventive System for Occupant Safety

Ralf Bogenrieder, Roland Bachmann, Markus Woldrich  
DaimlerChrysler AG, Sindelfingen, D
Side Impact Sensing

V13
New Pressure Sensor for Side Impact Sensing
Boris Adam, Pascal Kocher, Rolf-Jürgen Recknagel
Robert Bosch GmbH, Stuttgart, D

V14
Combining Acceleration and Dynamic-Pressure Sensing for Side-Impact Restraint Activation
Gerd Winkler, Thomas Stierle, Thomas Malbouef
Siemens VDO Automotive, Regensburg, D

Inflator/Airbag Design

V15
An Innovative Inflator Designed to Reduce Inflation Time for Roof-Rail Airbags
Gregory J. Scaven, David Shilliday, Greg Mowry
Simula Automotive Safety Devices Inc., Tempe, USA

V16
Textile Innovations for Future Head Protection Systems
Christian Agostini, Philipp Ritter
TRW ORS GmbH, Alfdorf, D

V17
Service Life of Airbags: A Scientific Approach to Systems Evaluation
Hiltmar Schubert, Karl-Friedrich Ziegahn
Fraunhofer ICT, Pfinztal, D

System Development

V18
Dual Belt Pretension & its Potential for Occupant Protection in Frontal Impact
Farid Bendjellal, Gilbert Walfisch
Renault, Guyancourt Cedex, F
Investigation of Adaptive Vehicle Body Structure Concepts with Respect to Different Crash Worthiness Requirements

Johannes Vetter, Jörg Hoffmann, Albrecht Kretzschmar
Siemens Restraint Systems GmbH, Alzenau, D

Key Note Address
Active and Passive Car Safety – An integrated Approach to Reduce Accidents

Erkki Liikanen
Commissioner for Enterprise and the Information Society, EU Commission Brussels, B

Development Issues

Advanced Methods for Inflatable Curtain Development – The Virtual Approach

Gerald Krabbel, Kurt Fograscher
Autoliv GmbH, Dachau, D

Ringairbag – Smart Driver Airbag Concept

Walter Krönes, Werner Schmidt
AUDI AG, Ingolstadt, D

Out-of-Position Simulation: Possibilities and Limitations with Conventional Methods

Benno Beesten, Stefan Hagen, Matthias Rabe
Volkswagen AG, Wolfsburg, D

Benefits of Inflatable Belts in Reducing Serious Injury to Vehicle Occupants During Crashes

Said Nakhla
Goodrich Passenger Restraint Systems, Phoenix, USA

Airbag Deactivation by Automatic Child Seat Identification

Wolfgang Hahn, Matthias Brunner
Adam Opel AG, Rüsselsheim, D
Tetsuo Ito
Mazda Motor Corp., Hiroshima, JAP
Thilo Moerke
Ford AG, Köln, D
Claus-Christian Kedenburg, Paul Schockmel, Michael Virnich
IEE, Luxembourg, L
Manfred Geyer
Siemens VDO Automotive AG, Regensburg, D
P26
Spherical Ammonium Nitrate for Gas Generators
Thomas Heintz, Werner Reinhard, Michael Herrmann, Ulrich Teipel
Fraunhofer ICT, Pfinztal, D

P27 (Manuscript not available)
Airbag Deployment Simulation Technics
Jean Bloch
ESI Software, Lyon, F

P28
Developments in the Technology of Silicone Elastomers
Graham Budden
Dow Corning Ltd., GB

P29
Dual Stage Pyrotechnic Inflator
Chi-Wung Wong, Jiag-Huei Wang, Jin-Pang Wang
Chung Shan Institute of Science and Technology, Lung-Tan Taiwan, ROC
Wen H. Hsieh
National Chung Cheng University, Chia-Yi Taiwan, ROC

P30
Velocity and Temperature Measurements on Gas Generators
Volker Aust, Gerd Zimmermann
Fraunhofer EMI, Efringen-Kirchen, D

P31
New Composite Propellant with High Temperature Stability and Low Toxicity Combustion Gases for Micro Gas Generators for Automotive Safety
Christian Perotto
Autoliv Inflators-Livbag, Pont-de-Buis, F
Laurent Banes
Autoliv Inflators-NCS, Survilliers, F

P32
Numerical Simulation for Airbag Inflator Development
Bernard Martin, Roger Andry
Autoliv Inflators-Livbag, Pont-de-Buis, F
P33
Flexible Inflator for Automotive Airbag Systems
Franck Lebaudy, Francois Peremarty, Christian Perotto
Autoliv Inflators-Livbag, Pont-de-Buis, F

P34
Active Pedestrian Protection Systems – A Challenge for Contact Sensorics
Jörg Hoffmann, Marco Krüger, Albrecht Kretzschmar
Siemens Restraint Systems GmbH, Alzenau, D

P35
Electronic Safing Concept for Car Occupant Restraint Systems with New Electrodynamic DeltaV-Safing Sensor (DVS) by Direct Measurement of the Collision Severity
Manfred Sondergeld, Manfred Fischer, Albrecht Hilmes
Schmidt Feintechnik GmbH, St. Georgen, D

P36
The Re-Use of Air-Bags
Alan F. Charles
ACE Consultancy, Winsford, GB

P37
Crash Sensing Using Piezoelectric Sensors on Vehicle Windshields
Philip W. Kithil
Advanced Safety Concepts Inc., Santa Fe, USA
Jim L. Novak
Innovaq Corp., Albuquerque, USA

P38
Why and How to Test Airbags
Bryan Webb
Microsys Technologies Inc., Mississauga, CAN

P39
Airbag Manufacture Considering Safety Relevant Quality Assurance Systems integrated in GHD Sewing Units and Sewing Work Stations
Dieter Schätz, Rainer Zuber
KSL, Lorsch, D

P40
The Research and Development of M-Bag
Cheng Yi, Liu Jianbin, Wang Weiguo
Nanjing University of Science and Technology, Nanjing, PRC
P41  
A new ME Sensor for Airbag  
Cheng Yi  
Nanjing University of Science and Technology, Nanjing, PRC

P42  
A new Gas Generant with Azide Free and Smokeless  
Liu Jian-Bing, Cheng Yi  
Nanjing University of Science and Technology, Nanjing, PRC

P43  
Airbag Emissions: The Quantification of Gas, Dust and Acoustic Exposure in Different Environments  
Julius A. Nickl  
GWP mbH, Zorneding, D

P44  
Clean Inflator, Light Bag for Soft Airbag  
Paul Philippe Cord  
SEVA Technologies, Paris, F

P45  
Investigation of Ageing Behaviour of Nitrocellulose-based Propellants for Modern Car Occupant Safety Systems  
Alice Skriver, Alexander Huber, Beat Vogelsanger  
Nitrochemie Wimmis AG, Wimmis, CH

P46  
Nitrogen-rich Organic Solids as Components for Gas Generators? – The Thermal Decomposition Behaviour of BTT and DAAT  
Stefan Löbbecke, Heike Schuppler, Wenka Schweikert  
Fraunhofer ICT, Pfinztal, D

P47  
Numerical Modeling of Processes in Combustion Chambers of Automotive Airbags  
Alexander Rychkov, N. Shokina  
Institute of Computational Technologies, Novosibirsk, RUSSIA  
Jochen Neutz, Norbert Eisenreich  
Fraunhofer ICT, Pfinztal, D

P48  
Production of FRP with In-Line-Compounded Thermoplastic Matrix in the LFT-D-ILC Direct Process  
Stefan Tröster, Frank Henning, Oliver Geiger, Wenzel Krause, Alexander Stark, Stephan Ihle, Peter Eyerer  
Fraunhofer ICT, Pfinztal, D
Advanced Components for Pressure Based Side Airbag Systems

Michael Wycisk
Infineon Technologies AG, München, D

Bipolar Polymer Lithium Accumulator

Thomas Berger, Jürgen Dreher, Jens Tübke, Michael Krausa
Fraunhofer ICT, Pfinztal, D

Hydrogen Generation for Fuel Cells based on Supercritical Reforming

Thomas Bayha, Wolfgang Lutter, Karsten Pinkwart, Holger Ziegler, Michael Krausa
Fraunhofer ICT, Pfinztal, D

New Aspects of Microwaves in Polymer Processing

Rudolf Emmerich, Matthias Graf, Mathias Kaiser, Christian Ress, Gunnar Kronis, Helfried Urban
Fraunhofer ICT, Pfinztal, D

Latest Development in Testing of Airbag Modules

Bodo Streich
HuDe Datenmesstechnik GmbH, Erkelenz, D

Non-Contacting Measurement Technology for Component Safety Assessment

Ralf Lichtenberger, Hubert Schreier
LIMESS Messtechnik und Software GmbH, Pforzheim, D
