</table>
Technology and Collaboration: A Qualitative Study in one Secondary School in Botswana .......... 97
Tshepo Batane, Ohio University, USA

Beyond W3C: TruVision- Enhanced online learning for people blind or vision impaired .......... 99
Ron Oliver, Edith Cowan University, Australia; Frank Bate, eLearn, Australia

Utilizing the PDA as a Vehicle for User Interface Design Pedagogy ..................................... 105
Michael Battig, Saint Michael’s College, USA

Media combinations and learning styles: A dual coding approach .................................................. 111
Amanda Elliott, Nigel Beacham, James Alty, Ahmed Al-Sharrah, Loughborough University, UK

Non-traditional Students Learning in a Non-traditional Environment ........................................... 117
melissa becker, Northeastern State University, USA

Computer-Based Distance Education for Vocational Use in Southern Nevada ............................... 119
Paul Van Schaik, University of Teesside, School of Social Sciences, UK; Philip Barker, University of Teesside,
School of Computing and Mathematics, UK; Scott Beckstrand, Community College of Southern Nevada, USA

Cooperative Learning: Assessment of Team-work .............................................................................. 124
Ron Wakkary, Karen Belfer, Technical University of British Columbia, Canada

Kids Can Care About Cyberethics! ...................................................................................................... 127
Mary Ann Bell, Sam Houston State University, USA

“Wireless Instructional Strategies in the Humanities (WISH): Training Traditional Faculty for
Change.” .............................................................................................................................................. 133
Kathleen Bennett, University of Tennessee, USA

A Rose By Any Other Name Could Be a Daisy! How the Words Might Make a Difference .......... 138
Alfred Benney, Fairfield University, USA

Building a molecular workbench: underpinning core science concepts ......................................... 140
Dan Damelin, Boris Berenfeld, Concord Consortium, USA

Changing Places: A Case Study in Adapting an Educational Pen-based Groupware System
for use at a Distance .............................................................................................................................. 142
Dave Berque, Brian Brinkman, Jason Geringer, Kyle Maynor, DePauw University, USA

Prototyping the Development of Groupware to Help Low-Vision Students View an Instructor’s
Blackboard Notes ................................................................................................................................. 148
Ben Betz, DePauw University, USA

Introduction of Technology Integration through Case Based Learning ........................................... 154
Leslie Bevill, Caroline Sanzone, Erin Hunt, University of Northern Colorado, USA

Satellite-Based Synchronous Tutorials vs. Satellite-Based Asynchronous Videocassettes:
Factors Affecting Students’ Attitudes and Choices ............................................................................. 160
Kelly Saporta, Ruth Beyth-Marom, The Open University of Israel, Israel

Lessons Learned from the Teaching, Technology and Teamwork Program .................................... 166
Joan Wines, David Graniss, Julius Bianchi, California Lutheran University, USA

An Empirical Evaluation ofSonar Courseware Developed with Intelligent Tutoring Software
(InTrain) at Naval Submarine School ................................................................................................. 168
Marcy Birchard, Sonalysts, Inc., USA

Collaborative Integrative Applications of Mathematics and Science Content and Pedagogy
Among University Faculty and Public Schools .................................................................................... 174
Sally Blake, University of Texas at El Paso, USA; Arturo Pacheco, UTEP, USA; Mourat Tchoshanov, utep, USA;
Connie Kubo Della-Piana, NSF, USA; Tom Brady, UTEP, USA

Awareness and Cohesion as Key Factors for Interaction – Lessons Learned from the VFH .............. 176
Udo Hinze, Gerold Blakowski, University of Applied Sciences Stralsund, Germany

A Delivery Server Infrastructure for Multimedia Distance Learning Services .................................. 178
Andrea Boer, Institute of Communication Networks, Munich University of Technology, Germany

A Services-Based Architectural Model for E-learning ........................................................................ 180
Dimiter Bogdanov, Institute of Computer & Communication Systems, Bulgaria

E-Learning in College and Corporate Settings: The Present State and Beyond ............................ 182
Curtis Bonk, Indiana University, USA

An object based system for developing and delivering e-learning content ..................................... 185
Louis Botha, Potchefstroom University for CHE, South Africa

The Use ofWebCT as a Course Component of the Teaching and Music Technology
Undergraduate Course ......................................................................................................................... 188
Marie-Michele Boulet, Faculté de musique - Université Laval, Canada
A semi-automatic tool for the indexation of learning objects .................................................. 190
  Yolaine Bourda, Walid Kekhia, Bich-Lien Doan, Supelec, France
Exploring the development of learning communities in online settings .................................. 192
  Chris Brook, Ron Oliver, Edith Cowan University, Australia
Web-based Interactive Visualization in an Information Retrieval Course ............................... 198
  Peter Brusilovsky, University of Pittsburgh, USA
Group members’ Cooperative Orientation and Academic Achievement as Determinants of
  Perceived Quality of Group Functioning ................................................................................... 204
  Jan Van den Bulck, Steven Eggenmont, Herman Buelens, K.U.Leuven, Belgium
Interacting with Interactive Papers: A Situated Evaluation of a Computer-Supported
  Collaboration Tool .................................................................................................................... 208
  James Buell, University of Illinois at Urbana-Champaign, USA
A Framework for the Instructional Design of Multi-Structured Educational Applications .......... 210
  FELIX BUENDIA-GARCIA, Universidad Politécnica de Valencia, Spain
The Construction Kit Metaphor for a Software Engineering Design of an E-Learning System ...... 216
  Michael Bungenstock, University of Hamburg, Dept. of Informatics, IMA Lab, Germany; Andreas Baudry,
  University of Hamburg, Dep. of Informatics, IMA Lab, Germany; Baerbel Mertsching, University of Hamburg,
  Dept. of Informatics, IMA Lab, Germany
Collaboration by Design: Creating a Course Explicitly for a Collaborative Environment ............ 218
  Michael Burke, Innovative Technology Center, University of Tennessee, USA
Assessing the Use of Technology Student Responses ................................................................. 220
  Karin Camihort, Springfield College, USA
First Year of Technology Mentoring for Teachers and Faculty: Lessons Learned ...................... 222
  Shirley Campbell, Songil Örgül, University of Pittsburgh, USA
Computer Mediated Collaboration in an Academic Setting. An Experience on Web Business
  Models at the University of Lugano (Switzerland) .................................................................... 228
  Lorenzo Cantoni, Davide Bolchini, Università della Svizzera italiana, Switzerland
A Classification of Document Reuse in Web-based Learning Environments ............................ 234
  Kris Cardinaels, Henk Oliévi, Erik Daval, K.U.Leuven, Belgium
Issues in Automatic Learning Object Indexation ........................................................................ 239
  Kris Cardinaels, K.U.Leuven, Belgium; Henk Oliévi, Erik Daval, KULeuven, Belgium
Towards the Flexible University: conditions for change ............................................................ 241
  Eduardo Cardoso, UCP, Portugal; Pedro Pimenta, Universidade do Minho * Portugal - EU, Portugal
Multimedia and visual Learning: build Interactive elements for course/syllabus ....................... 243
  Aldegonda (Mieke) Caris, Astrid Palm, Adelphi University, USA
On-line AACE Forums: Joining, Participating, and Leading ..................................................... 245
  Roger Carlsen, Wright State University, USA
Activating Web-Based Learning .................................................................................................. 250
  Judi Repman, Randal D. Carlson, Georgia Southern University, USA
Introduction to Educational Computer Technology: Evaluating a first phase of a Distance
  Learning Program in Brazil ......................................................................................................... 252
  Elizabeth Soares Bastos, Alberto Tornaghi, Janete Bolite Frant, Rosane Mello, CEDERJ, Brazil; Angela Carrancho
da Silva, CEDERJ/UERJ, Brazil; Carmen Granja, Fábio Ferrentini Sampaio, CEDERJ, Brazil
Instigating Cultural Change Via Targeted Initiatives in a Research-led University ...................... 254
  Vincent Wade, Centre for Learning Technology, Trinity College Dublin, Ireland; Catherine Bruen, Trinity College,
  Ireland; Valerie Carroll, Teachers College, Columbia University, USA
NASA Langley/CNU Distance Learning Programs ........................................................................ 256
  Thomas Pinelli, NASA Langley Research Center, USA; Randall Caton, Christopher Newport University, USA
The Evolving Electronic Classroom .............................................................................................. 261
  Robert Cavenagh, Dickinson College, USA
A personalized navigation tool for online listening and free browsing: The Glass Engine .......... 263
  Margaret Chan, Columbia University, New York, USA; Mark Podlaseck, IBM TJ Watson Research Center, USA
Assessing and Analyzing the Effects of WBLP on Learning Processes and Achievements:
  Using the Electronic Portfolio for Authentic Assessment on University Students’ Learning ........ 265
  Chi-Cheng Chang, National Taipei University of Technology, Taiwan
Record desktop activity as streaming videos for asynchronous, video-based collaborative
  learning ........................................................................................................................................ 271
  Chih-Kai Chang, Da-Yeh University, Taiwan

Christian Gütl, Institute for Information Processing and Computer Supported New Media, Austria; Maja Pivec, Information Design, Technikum Joanneum, Austria

Designing Multimedia Presentations for the Learning Content .................................................. 673
Sissel Guttormsen Schär, Institute of Hygiene and Applied Physiology, Swiss Federal Institute of Technology, Switzerland

Cognitive user profiles for adapting multimedia interfaces .................................................. 675
Halima Habieb-Mammar, Franck Tarpin-Bernard, ICTT, France

Supporting Online Video-based Correction for Language Learning through Markup-based Video Editing .................................................. 677
Yoshiaki Hada, Tokushima University, Japan

Keeping it Simple: The Case for E-Mail .................................................. 683
Gila Haimovic, Open University of Israel, Israel

Museum Education in an Age of Wireless Communication .................................................. 688
Michael Haley Goldman, Teachers College, Columbia University, USA; Danielle E. Kaplan, Teachers College, Columbia University, USA

Recognizing and Closing New Technological Divisions: A Case Study .................................................. 690
Renee Gilpin, Newport Elementary School, USA; Grey Hall, East Carolina University, USA

Evaluating Online Instruction: Adapting a Training Model to E-Learning in Higher Education .................................................. 691
Karen Hallett, Chris Essex, Indiana University, USA

sTeam- Providing Primary Media Functions for Web-Based Computer-Supported Cooperative Learning .................................................. 698
Thorsten Hampel, Heinz Nixdorf Institut, Germany

Using Scripting to Increase the Impact of Highly Interactive Learning Objects .................................................. 704
Frank Hanisch, WSI/GRIS University of Tübingen, Germany

Planning, Implementing, and Evaluating a Blended Delivery Model, Using Synchronous and Asynchronous Online Instruction .................................................. 706
Kevin Campbell, Elizabeth Hanlis, University of Alberta, Canada
Tagging the didactic functionality of learning objects ................................................................. 709
Per Skafte Hansen, IMM, DTU, Denmark

Exploring student performance on a multimedia exam program (Vexam) ................................. 711
Yungwei Hao, The University of Texas at Austin, USA

Designing Simulations for complex skill development ............................................................... 713
Barry Harper, University of Wollongong, Australia

Distance Learning Comes Home: Resource-based learning for Campus-based Students .......... 719
Stylianos Hatzipanagios, Middlesex University, UK

Videoconferencing: A Tool For Collaboration And Professional Development ....................... 725
Joan Hanor, California State University San Marcos, USA; Katherine Hayden, California State University San Marcos/Escondido School District, USA

From Desktop to Web: Standalone CBT to Web-based Instructional Application .................... 727
Scott Heath, Bonfils Blood Center, Research Department, USA; Daniel R. Ambruso, MD, Bonfils Blood Center and University of Colorado School of Medicine, USA

Designing High Quality Learning Environments: Reflections on Some Successes and Failures ........................................................................................................... 729
John Hedberg, Univ. of Wollongong, Australia

Developing Evaluation Frameworks for Assessing Quality ICT-based Learning in Higher Education ............................................................................................................................................... 736
John Hedberg, University of Wollongong, Australia

Student Modeling in Computer-Assisted Language Learning ...................................................... 742
Janine Toole, Simon Fraser University, Canada; Trude Heift, Simon Fraser University, Canada

The Development Project for University-Level Teaching Methods, New Learning Environments in the Work of the Teacher (NET) - Development and the Assessment of Effectiveness ........................................................................................................... 748
Heli Ruokamo, University of Lapland, Faculty of Education, Center for Media Pedagogy, Finland; Sirpa Liimatta, University of Lapland, Center for Media Pedagogy, Finland; Irmeli Heikkilä, University of Lapland, Finland

A User Interface and Knowledge Delivery Solution for a Modern WBT System ......................... 753
Hermann Maurer, Denis Helic, Nick Scerbakov, IICM, TU Graz, Austria

Playing video games and cognitive effects: Teenagers’ thinking skills and strategies ................ 759
Lyn Henderson, James Cook University, Australia

Researching teenagers’ recreational video/computer gameplaying .............................................. 761
Lyn Henderson, James Cook University, Australia; Joel Klemes, Open University of Israel, Israel; Yoram Eshet, Tel Hai Academic College, Ireland

Students composing music in a cognitive apprenticeship interdisciplinary online curriculum: An analysis of systemic issues in the MUSYC-IT program ...................................................... 763
Donna Rigano, Frank York, Lyn Henderson, James Cook University, Australia

A System to Help Detect and Remediate Novice Programmer’s Misconceptions ........................ 769
Koen Hendriks, Laurent Loyaerts, Henk Olivie, K.U.Leuven, Belgium

You Are Entering a World of Sight and Sound: The Effects of Self-Generated Images on Music Ear-Training as a Possible Alternate Teaching Approach for Music Education Within a Web-Based Environment ........................................................................................................... 775
George Henik, New York University, USA

Pixed : towards the sharing and the re-use of experience to assist training ................................ 777
Alain Mille, Jean-Mathias Heraud, Universite Lyon I, France

Communication and Collaborative Learning in a Cross-Atlantic Design Course ...................... 783
Paulien M. Herder, Adam L. Turk, Delft University of Technology, Netherlands; Arthur W. Westerberg, Eswaran Subrahmanian, Carnegie Mellon University, USA

Jigsaw Method in the Context of CSCL ......................................................................................... 789
Gerold Blakowski, Udo Hinze, University of Applied Sciences Stralsund, Germany; Michael Bischoff, University of Applied Sciences Lübeck, Germany

The New Four R’s: Reading, Writing, Arithmetic and the Internet-Teaching Teachers to develop Web-Based Units of Instruction ........................................................................................................... 795
Jeannine Hirtle, The University of Texas at Arlington, USA

The design and development of an electronic performance support system for university professors in the field of biomedical science and biotechnology in Taiwan ........................................................................................................... 797
Li-An Ho, Tamkang University, Taiwan
