Proceedings of ED-MEDIA 2002
WORLD CONFERENCE ON EDUCATIONAL MULTIMEDIA, HYPERMEDIA & TELECOMMUNICATIONS
June 24-29, 2002; Denver, Colorado, USA
Making Web-based Learning Adaptive .......................................................... 1436
Ray Armstrong, Rheumatology Unit, Mail Point 78, Southampton General Hospital, UK; Pat Maier, Center of Learning and Teaching, University of Southampton, UK; Wendy Hall, Intelligence, Agents and Multimedia Research, University of Southampton, UK; Muan Hong Ng, University of Southampton, UK

Integrated environment for Web-based experimentation in engineering education ................................................. 1442
Anh Vu Nguyen, Yassine Rekik, Denis Gillet, Swiss Federal Institute of Technology in Lausanne, Switzerland

A Tool for Real Time On-Line Collaboration in Web-Based Learning ................................................................. 1448
Mikka Miettinen, Helsinki Institute for Information Technology, Finland; Juakko Kurnila, University of Helsinki, Finland; Petri Nokelainen, Henry Tirri, Helsinki Institute for Information Technology, Finland

A Study of Changes in Attitude Towards Science in a Technology Based Classroom ........................................... 1454
Rena Faye Norby, Black Hills State University, USA

A Framework for Online Professional Development ............................................................................................. 1456
Karen Rasmussen, Pam Northrup, University of West Florida, USA

Learner Perceptions of Online Interaction .................................................................................................................. 1462
Pam Northrup, Joseph (Vance) Burgess, Russell Lee, University of West Florida, USA

Beyond Animation and Simulation: Teaching Mechanics with Explorations ......................................................... 1468
Olaf Nowaczyk, Heinz Nixdorf Institute, Germany

Collaborative learning with dynamic business game simulation ........................................................................... 1473
Sami Nurmi, Educational Technology Unit, University of Turku, Finland; Timo Lainema, Department of Information systems, Abo Akademi, Turku, Finland

Online Student Retention: Can It Be Done? ............................................................................................................... 1479
Barbara O’Brien, Wright State University, USA

Teaching and Learning Activities in the Online Classroom ..................................................................................... 1484
Jaishree Odin, University of Hawaii at Manoa, USA

Rethinking multimedia teaching: examining developments in multimedia course provision. ......................... 1490
Michael O’Donoghue, Lancaster University, UK

MICROTEXT: The revolutionary user interface of Continuous Zoom applied to texts ......................................... 1496
José Bezerra Silva, Francisco Oliveira, Universidade de Fortaleza, Brazil

Learning management Systems: One Size Fits All? ............................................................................................ 1498
Ron Oliver, Edith Cowan University, Australia; Barry Harper, University of Wollongong, Australia; Tom Reeves, The University of Georgia, USA; Duan vd Westhuizen, Rand Afrikaans University, South Africa; Allard Strijker, University of Twente, Netherlands

online learning design for dummies: professional development strategies for beginning online designers ........... 1500
Jan Herrington, Ron Oliver, Edith Cowan University, Australia

A Web-Based Run-Length Encoded Map Generating System .............................................................................. 1506
John Leggett, Texas A&M University, USA; Peter Nuernberg, Department of Computer Science, Aalborg University Esbjerg, Denmark; Erich Schneider, Information Technology Services, California Institute of Technology, USA; Monique Reed, Hugh Wilson, Department of Biology, Texas A&M University, USA; Teongjoo Ong, Center for the Study of Digital Libraries, Texas A&M University, USA; Stephan Hatch, Department of Rangeland Ecology and Management, Texas A&M University, USA; Gaurav Maini, Center for the Study of Digital Libraries, Texas A&M University, USA

QIICC - Using Technology to Involve Students In Assessment ............................................................................ 1508
Simon Richmond, Dwight Allen, Old Dominion University, USA; Patrick O’Shea, Brunswick County Public Schools, USA

Virtual Knowledge Community in an Industrial Environment ............................................................................ 1509
Nelly Osorio, Honeywell CA, Venezuela

Learning Collaborative Learning: A Distance Learning Project in the DUSC Programme .............................. 1511
Leif Erik Otteera, Bergen University College, Norway; Anja Stoffberg, Rotterdam University of Professional Education, Netherlands; Sija Geers van Gemeren, Haarlem University of Professional Education, Netherlands; Ida Margrethe Knudsen, Bergen University College, Norway

Web-Based Drills in Maths Using a Computer Algebra System ............................................................................. 1513
Kathrin Padberg, University of Paderborn, Germany; Sabine Schiller, FernUniversitaet Hagen, Germany

Community Technology Centers in Rural America: Bridging the Digital Divide for Adult Learners ................. 1515
Andy Page, University of Georgia, USA
ACT: Acting Cartoons for Trainers' presentations .................................................. 1517
George Palaigeorgiou, Aristotle University of Thessaloniki, Multimedia Lab, Computer Science Department, Greece

Discovery of Ontologies for Learning Resources using Word-based Clustering ........................................ 1523
Alexandra Vassiliou, NCSR “Demokritos”, Greece; Bernd Simon, Dept. Information Systems, Vienna University Economics and Business Administration, Austria; Christos Papatheodorou, Ionian University, Dept. of Archive and Library Sciences, Greece

New Learning Environments - Role of Human Education Interactive Network ........................................ 1529
Paulo Ribeiro, Pedro Paraiso, Ciro Martins, Werner Schneider, UCP-Centro Regional das Beiras, Portugal

Every Word a Click-the hypertext being smart .............................................................. 1531
Young Park, Teachers College, Columbia University, USA

The role of a reusable assessment framework in designing computer-based learning environments .......................................................... 1533
Young Park, Teachers College, Columbia University, USA; Malcolm Bauer, Educational Testing Service, USA

Hurricane Strike! A Case Study in Instructional Multimedia Development ........................................ 1539
Patrick Parrish, UCAR/COMET, USA; Dwight Owens, Oregon State University, USA; Victoria Johnson, COMET (Cooperative Program for Operational Meteorology, Education and Training), USA

Education Communities, Government & Technology: Partnering for a Better Tomorrow ................................ 1545
Martie Parsley, La Sierra University, USA

Designing for a moving target ................................................................................. 1547
Kathy Siedlaczek, Seneca College, Canada; Sandi Barber, Northern Alberta Institute of Technology, Canada; Beverly Pasian, McGraw-Hill Ryerson Ltd., Canada

Assessing Student Programming Knowledge with Web-based Dynamic Parameterized Quizzes ......................................... 1548
Sharad Pathak, Peter Brusilovsky, University of Pittsburgh, USA

EQUAL: Novice Programming Language and Computing Environment for Native Users .......................... 1554
Basavaraj Patil, Fraunhofer Institute for Integrated Publication and Information Systems, Germany

The Portal Project: Video Windows Between Cultures ..................................................... 1561
Laura Zadoff, Danielle E. Kaplan, Teachers College, Columbia University, USA; Serge Putzuk, Freeze Pictures, USA

Reusable Models of Pedagogical Concepts - a framework for pedagogical and content design .................. 1563
Jan Pawlowski, University of Essen, Germany

Essential Elements in the Design and Development of Inclusive Online Courses ................................ 1569
Tony Kopp, University of New South Wales, Australia; Elaine Pearson, University of Teesside, UK

Guidance for a learner using an aided learning-to read software ............................................. 1575
Chrysta Pélissier, LRL - Maison de le Recherche - 4 rue Ledru - Clemont-Ferrand (France), France

Case Study. Oral Pathology Online: A Three-Year Experience in a Blended Course ............................ 1581
Lorenza Canegallo, Department of Oral Pathology and Medicine - University of Milan, Italy; Iris Pinelli, Ctu - University of Milan, Italy

Better Living Through Faculty Development? How Teachers Can Develop Better Practices by Using Multimedia to Document and Share Their Work ........................................ 1587
Desiree Pointer, Carnegie Programming Language and the use of TBT for Special Needs: Effectiveness? ........................................................................................................ 1592
Brien Maguire, Ointra Poobrasert, University of Regina, Canada

Pre-service Teacher Ed Students Teach Their Teachers Technology! ............................................. 1594
Anne Porter, Oakland University, USA

Understanding Participation in Online Courses: A Triangulated Study of Perceptions of Interaction ......................................................................................... 1596
Noppadol Prammanee, Lara Luettehans, Northern Illinois University, USA

Internet Work Strategies and their Influence on Learning Outcome ............................................. 1598
Lutz-Helmut Schön, Burkhard Priemer, Humboldt-University Berlin, Germany

Daskom On-Line:Implementation Distance Learning on Basic of Computer Course .......................... 1600
Anak Agung Putri Ratna, University of Indonesia, Indonesia
Using Computer-Based Learning Environments to Offer Collaborative Opportunities to Engage Students: One Case Study Using the Program “Alien Rescue” ................................. 1603
Ondrea Quiros, University of Texas at Austin, USA

New Devices .................................................................................................................. 1605
Ganesan Rajamal Kandan, Kedar Sivashanmugam, Sri Venkateswara College of Engineering, India

Computer based investigative laboratory experiences for distance learners in biology .......... 1607
Paul Ramp, Pellissippi State Technical Community College, USA

“Citizen Jane”: Rethinking Design Principles for Closing the Gender Gap in Computing ............ 1609
Chad Raphael, Santa Clara University, USA

Usability and Instructional Design Heuristics for E-Learning Evaluation ............................ 1615
Lisa Benson, Michael Grant, Dean Elliott, Doug Holschuh, Beaunie Kim, Thomas C. Reeves, Erick Lauber, Sebastian Loh, Hyojeun Kim, The University of Georgia, USA

The Role of the Facilitator in Active Learner Support ....................................................... 1622
Franz Reichl, Ursula E. Vierlinger, Vienna University of Technology, Austria

Computer assisted assessment: Designing online quiz questions to assess a range of cognitive skills ................................................................. 1625
Catherine McLaughlin, Australian Catholic University, Australia; Nick Reid, University of New England, Australia

Using computers to evaluate teachers’ understanding of physics concepts .......................... 1631
Ali Reza Rezaei, California State University, Long Beach, USA

Assessing out-of-the-box thinkers: Professional development for IT support staff ............... 1637
Suzanne Rhodes, Joe Sanchez, Center for Instructional Technologies, University of Texas, USA

Flexible Learning: Latest International Research Discoveries as a Part of High School Curriculum ................................................................................................................................. 1640
Riitta Rinta-Filppula, Helsinki Institute of Physics, Finland

Supporting the Claims of Campus Transformation Through Assessment of Southeast Missouri State University’s “Technology Serving Learning Institutes” .................................. 1643
Michael Rodgers, David Starrett, Southeast Missouri State University, USA

Learning-Centric Online Teaching for Non-Computer Science Students ........................... 1645
Karin Tillack, Max Mühlhäuser, Guido Roessling, Jana Trnkova, Uwe Langendorf, TU Darmstadt, FB 20 / FB TK, Darmstadt, Germany, Germany

Deploying an Infrastructure for Technologically Enhanced Learning ............................... 1651
Sami Rollins, Kevin Almroth, UC Santa Barbara, USA

Information Technology Groupware: The Impact of Electronic Collaboration on Project Teams ......................................................................................................................... 1657
Jonathon Romanow, Brian Mackie, Northern Illinois University, USA

Web-Notes: an tool for supporting contextual asynchronous discussion on an e-learning platform ............................................................. 1663
Matteo Rizzi, Marco Ronchetti, Università di Trento, Italy

The Good, The Bad, & The Ugly: lessons learned from electronic portfolio implementation ...... 1665
Ann Rose, West Liberty State College, USA

Online Mastery: A Certification Curriculum for Faculty ................................................ 1670
Allen Rowe, Metropolitan State College of Denver, USA; Denise Schuette, Metropolitan State College of Denver, USA

Pedagogical Models in the Design and Assessment of Network-Based Education ................... 1676
Sanna Vahtivuori, University of Helsinki, Faculty of Education, Media Education Center, Finland; Heli Tuovinen, University of Lapland, Faculty of Education, the Centre for Media Pedagogy, Finland; Seppo Tella, University of Helsinki, Faculty of Education, Media Education Center, Finland; Heli Ruokamo, University of Lapland, Faculty of Education, the Centre for Media Pedagogy, Finland; Varpu Tissari, University of Helsinki, Faculty of Education, Media Education Center, Finland

The University of Lapland Faces the Challenges of the Virtual University ............................ 1682
Maire Syrjäkari, Päivi Karpinnen, University of Lapland, the Centre for Media Pedagogy, Finland; Heli Ruokamo, University of Lapland, Faculty of Education and the Centre for Media Pedagogy, Finland

A Case Study on the Use of Video Teleconferencing to Study Geography at the United States Air Force Academy: Lessons Learned, Barbara Rusnak .............................. 1687
Barbara Rusnak, United States Air Force Academy, USA

Bringing reality back to online education ................................................................. 1693
Peter Seredyukov, Mark Ryan, National University, USA
How Does Learner Transform Knowledge Through Hypermedia Authoring: A Case Study 1695
Jeeheon Ryu, Florida State University, USA

Children's Participation in the Design of an Interactive Encyclopedia: An Exploration of Cooperative Inquiry .......................................................... 1701
Sally Brenton-Haden, Bonnie Sadler Takach, University of Alberta, Canada

Children's Visual Representation of Information Presented in Print and CD-ROM
Encyclopedias: Implications for Research-based Design ........................................... 1703
Bonnie Sadler Takach, Connie Varnhagen, Jason Daniels, University of Alberta, Canada

Pilot Study: Student Expectations of a Web-Based Collaborative ......... 1705
Janthrathip Sae-Chin, Paul Resta, The University of Texas at Austin, USA

Exploring the strengths and limitations of learning styles towards the design of an adaptive web-based instructional system ........................................... 1707
Konstantinos Tarabanis, Thanasis Giouvanakis, Haido Samaras, Despina Bousiou, University of Macedonia, Greece

Utilizing SmartBoards to Enhance Technology Integration in University Classrooms 1713
Jane Strickland, Dorothy Sammons, Idaho State University, USA; Margaret Murandu, Idaho State University, USA

Accommodating Learning Styles in Adaptation Logics for Personalised Learning Systems ...... 1715
Charalampos Karagiannis, Demetrios Sampson, Center for Research and Technology - Hellas, Greece

Educational Metadata Management System using a Deductive Object-Oriented Database Approach .......................................................... 1727
Demetrios Sampson, Vicky Papaioannou, Center for Research and Technology - Hellas, Greece; Ioannis Vlahavas, Nikos Bassiliades, Aristotle University of Thessaloniki, Greece

Learning Statistics in the net ....................................................... 1735
Teresa Sancho, Universitat Oberta de Catalunya, Spain

WebSaber: Solving Problems in a Computer-Supported Cooperative Learning Environment .......................................................... 1738
Neide Santos, State University of Rio de Janeiro, Brazil

CyberBiblio: An Interactive Multimedia Digital Library ........................................... 1740
Sara Sanz, Julián Gutiérrez, Javier López, Tomás A. Pérez, Mikel Villamañe, Silvia Sanz, Dept. of Computer Languages and Systems (University of the Basque Country UPV-EHU), Spain

Sharing best practices and resources in multi-instructor courses .......... 1746
John Savery, Teresa Hallam, University of Akron, USA

Online Discussion Techniques for Teacher Trainers and Language Learners .......... 1748
Kathleen Saville, American University in Cairo, Egypt

Teaching the Woburn Case Study ....................................................... 1750
Rob Schadr, Richard Clapp, Nancy Maxwell, Boston University School of Public Health, USA

Accessible distance education based on collaborative learning .......... 1752
Katarina Schenker, Malmoe University, Sweden

Hypertext for Discovery: Having The Whole Library to Oneself .......... 1754
Colin Schmidt, Besancon & Sorbonne Universities, France

Community, Content and Collaboration Management Systems: socio-constructivist scenarios for the masses ? ....................................................... 1756
Cathérine Fréié, Vivian Synteta, Daniel Schneider, University of Geneva - TECFA, Switzerland

User-centered Design of a Web-based Tool for Medical Residency Training ....................................................... 1758
Jane Schubart, Jonathan Einbinder, William Knaus, Kenneth Scully, Jason Lyman, University of Virginia School of Medicine, USA

Virtually There: Online Case Studies ....................................................... 1764
Diane Schuch-Miller, Greenfield Coalition, USA

Japan's Widespread Use of Cellular Telephones to Access the Internet: Implications for Educational Telecommunications ....................................................... 1770
Douglas Scott, Waseda University, Japan

Kamran Sedig, The University of Western Ontario, Canada

TileLand: A Microworld for Creating Mathematical Art .......... 1778
Kamran Sedig, Jim Morey, The University of Western Ontario, Canada

New Roles for Teaching and Learning: A Collaborative University Project for the Government ....................................................... 1784
Penelope Semrau, Barbara Boyer, California State University, Los Angeles, USA
To make e-learning work, send clear messages! ............................................. 1866
Dolf Steyn, University of Pretoria, South Africa

A Case for Multimedia: Designing a Problem-Based Interactive Learning Environment ............................... 1872
Anne Strehler, Carina Eksteen, University of Pretoria, South Africa

Learning to Integrate Technology in the Classroom: A Case-Based Reasoning Approach ...................... 1878
Joi Moore, Johannes Strobel, John Wedman, David H. Jonassen, Wu He, University of Missouri-Columbia, USA; Feng-Kwei Wang, University of Missouri - Columbia, USA; Dan Cernusca, Hui-Chuan Hsieh, Chi-Ren Shyu, Tannya Means, Jaturon Harnsomburana, University of Missouri-Columbia, USA

Debunking the Buzz Words OR Can hermeneutic analysis be used to evaluate pedagogically based learning objects designed from constructivist epistemological ontologies defined in XML Metadata? .............................................. 1880
Jim Hensman, Coventry University, UK; Barbara Dewey, University of Tennessee, USA; Bronwyn Stuckey, Queensland University of Technology, Australia; Tobias Hofmann, Bauhaus University Weimar, Germany; Sonja Cameron, University of Glasgow, UK; Helen Brown, BECTA, UK

Introducing a “Means-End” Approach to Human-Computer Interaction: Why Users Choose Particular Web Sites Over Others ...................................................... 1886
DEEPAK SUBRAMONY, INDIANA UNIVERSITY-BLOOMINGTON, USA

Automatic Camera Control System for a Distant Lecture with Videoing a Normal Classroom ................. 1892
Akira Suganuma, Shuichiro Nishigori, Kyushu University, Japan

Automatic Generating Appropriate Exercises Based on Dynamic Evaluating both Students’ and Questions’ Levels ................................................................. 1898
Akira Suganuma, Tsunenori Mine, Takayoshi Shoudai, Kyushu University, Japan

Instructional Design of Scientific Simulations and Modeling Software to Support Student Construction of Perceptual to Conceptual Bridges .................................. 1904
Moustapha Diack, Southern University-Baton Rouge, USA; Jerry P. Suits, McNeese State University, USA

Learning through online discussion: Where’s the beef? .............................................. 1910
Karen Swan, University at Albany, USA

Situated Professional Development: The CATIE Model ........................................................................ 1915
Karen Swan, University at Albany, USA; Sybillyn Jennings Jennings, The Sage Colleges, USA; Lester Rubenfeld, Rensselaer Polytechnic Institute, USA

Technology and Literacy Learning: A National Survey ........................................................................ 1921
Ron Dugan, Annie Moore-Cox, Joseph Baltrus, Karen Swan, Robert Bangert-Drownis, University at Albany, USA

Turning terror into discovery: Traditional narrative strategies and interactive educational media .................................................................................................................. 1924
Geo Takach, University of Alberta, Canada

Could oral communication be successfully taught entirely online? .................................................... 1926
Kandy James, Sherryll Tanian, Edith Cowan University, Australia

Skills Needed for Managing Multimedia Development – Invisible or Visible? .................................... 1928
Pina Tarricone, Joe Luca, Edith Cowan University, Australia

Construction of Web-based Japanese Listening Program and the results of its Preliminary Experimental Results ........................................................................ 1934
Lumi Tatsuta, Dokkyo University, Japan; Giichi Tomizawa, Science University of Tokyo, Japan; Yaeko Nakanishi, Masayuki Ohnishi, Atsuho Iguchi, Dokkyo University, Japan

Modeling of Courses through Workflow using the standard SVG/XML ................................................ 1940
Tiago Teleckn, Universidade Federal do Rio Grande do Sul, Brazil

LOMster: Peer-to-peer Learning Object Metadata ......................................................................... 1942
Stefaan Ternier, Pieter Vandepitte, Erik Duval, Katholieke Universiteit Leuven, Belgium

Mental Models: Do they exist, how are they taught, can they be measured? Preliminary research findings using computer based systems ........................................... 1944
Martin Tessmer, University of Colorado at Denver, USA

Teachers, Identity, Psychological Capital and Electronically Mediated Representations of Cultural Consciousness .................................................................................. 1946
Sharon Tettegah, University of Illinois, Urbana Champaign, USA; Sharon Tettegah, University of Illinois, USA

A Brief Overview of An Instructor Facilitated Instructional Chat System (IFICS) ................................. 1948
M. O. Thirunaranayan, Aixa Perez-Prado, Florida International University, USA

On the Effectiveness of a Programming Coach in a Distance Learning Environment ......................... 1950
Pete Thomas, Open University, UK
The Computer, The Discipline and the Classroom: Two Perspectives .......................................................... 1956
Barton Thurber, University of San Diego, USA

Students' Epistemological Beliefs and the Learning of Introductory Computing Concepts ........ 1961
Denise Tolhurst, University of New South Wales, Australia

International Education Online: Project THRO ................................................................. 1967
Howard Tolley, University of Cincinnati, USA

Task Generator: A Portable System for Generating Learning Tasks for Intelligent Language Tutoring Systems .......................................................... 1972
Trude Heift, Janine Toole, Simon Fraser University, Canada

Interactivity and Threaded Discussion ........................................................................................................ 1978
Wayne Tousignant, Centre for Flexible Learning, University of Windsor, Canada

Barriers in Using Technology ........................................................................................................... 1980
Burcu Tunca, The George Washington University, USA

The Relevance of Haptic Experience in Remote Experiments ................................................................. 1983
Joerg Tuttas, Bernardo Wagner, University of Hannover, Germany

Evaluating the Effectiveness of Online Courses .................................................................................... 1985
Hakan Tuzun, Indiana University, USA

Instructor Support in Web-Based Instruction ......................................................................................... 1987
Ozgul Yilmaz, Hakan Tuzun, Indiana University, USA

Returning power to users: the effect of computers that apologize .................................................... 1993
Jeng-Yi Tseng, Indiana University, USA

Novice designers of online learning: A contribution to principles for instructionally effective online learning design, .......................................................... 1995
Geoffrey Lautenbach, Duan vander Westhuizen, Rand Afrikaans University, Johannesburg, South Africa

Using Computer-Assisted Case-Based Instruction in Corporate Training ......................................... 1997
Nancy Vye, Vanderbilt University, USA

Karen Belfer, Ron Wakkary, Technical University of British Columbia, Canada

Role with IT… the Evolution of Faculty and Faculty Support Roles and Responsibilities in the Rapidly Changing Climate of Educational Technology .................................................................................................. 2001
Sarah Walkowiak, Worcester Polytechnic Institute, USA

Joseph Walsh, University of Montevallo, USA; Kristie Pretti-Frontczak, Kent State University, USA

On Using Data-Mining Technology for Browsing Log File Analysis in Asynchronous Learning Environment .......................................................................................................................... 2005
Feng-Hsu Wang, Department of Computer and Communication Engineering, Ming Chuan University, Taiwan

A Knowledge Management Framework of Building a Technology Integration Community of Practice .......................................................................................................................... 2007
Feng-Kwei Wang, John Wedman, Ch-Ren Shyu, University of Missouri - Columbia, USA

Missouri-Specific Web-based Lesson Planning System ........................................................................... 2009
Feng-Kwei Wang, Guan-Yu Lin, University of Missouri - Columbia, USA

Investigating Education Faculty’s Perspectives of Their Experiences in a Technology Project: Issues and Problems Related to Technology Integration ........................................................................ 2011
Li Wang, Richard Speaker, University of New Orleans, USA

Student Perceptions of Relative Advantages in Physical Versus Online Submission of Multimedia ePortfolio Projects in Graduate Coursework ........................................................................ 2017
Lih-Ching Chen Wang, Cleveland State University, USA

Electronic Cognitive Apprenticeships: Building Students’ Understanding of ID ............................. 2019
Ling Wang, Purdue University, USA

An Investigation of a Web-Based Learning Environment Designed to Enhance the Motivation and Achievement of Students in Learning Difficult Mental Models in High School Science ........................................................................................................... 2022
Shiang-Kwei Wang, Chia-chi Yang, Dept. of Instructional Technology at University of Georgia, USA

If you build it, will they come? Helping Instructors Change Their Role ........................................... 2028
Diane Schuch-Miller, Greenfield Coalition at Focus: HOPE, USA; Jenny Wang-Chavez, Greenfield Coalition at Focus: HOPE, USA
Yes I Can: Teachers Developing Interactive Classroom Activities Using Digitized Resources
Wendy Trivette, AAM Cluster Coordinator, USA; Marion Ward, Montreat College, USA

Mitigating Risks During the Transition to Fully Automated Exams
Edgar Weippl, Software Competence Center Hagenberg, Austria

The Transition from Computer-Based Training to eEducation
Edgar Weippl, Software Competence Center Hagenberg, Austria

XML based content and its integration into existing e-learning solutions: results and consequences of a survey
Elfriede Kelp, Technical University of Munich, Germany; Franz Weil, Institute of information systems and software engineering, Germany; Andre Wiesner, Technical University of Karlsruhe, Germany

Towards a Discipline Based Reflective Thinking Process for K-12 Students and Teachers
Through On-line Discourse and Action Research
Elizabeth Wellman, California History-Social Science Project, UCLA, USA

The SASK Mentor Project: Using Software and Socratic Methods to Foster Reflective Thought in a Learning Environment
Baba Kofi Weusijana, Joseph Walsh, Christopher Riesbeck, Northwestern University, USA

Rejuvenating the Social Foundations of Education Course Using Digital Technology and the Case Method
Keith Whitescarver, The College of William and Mary, USA

EduBeans: Efficient development of interactive instructional exhibits leveraging a multi-layered, component based framework
Simon Wiest, Andreas Zell, Wilhelm-Schickard-Institute for Computer Science, University of Tuebingen, Germany

Software Agents, Activity Theory, and Mentoring - A Preliminary Model
Kay Wijekumar, The Pennsylvania State University Beaver, USA

Making web-based academic and student services section 508-compliant: Whose job is it anyway?
Shahron Williams van Rooij, Datatel, Inc., USA

Web based learning support for experimental design in Molecular Biology
Ton Bisseling, Rob Hartog, Tinri Wilmsen, Wageningen University, Netherlands

The Role of Group Development and Facilitative Teaching in Online Courses
Jean Wilson, University of Kansas, USA

Completing a Life: Content and Design Challenges in Creating Educational Multimedia
Brian Winn, Karen Ogle, Michigan State University, USA; Angela Lamling, Leslie Bricker, Henry Ford Health Systems, USA; Darcy Greene, Michigan State University, USA

E-Learning, Semantic Web Services and Competency Ontologies
Darrell Woelk, Elastic Knowledge Solutions, USA

It takes a village: Cultivating effective online instruction
Victoria Wood, Scott Grabinger, Travis Chillemi, Dana Ewald, Veronika Eskova, Apryl Johnson, Luci Mello, Nancy Clayton, University of Colorado at Denver, USA

MASTER: A Computer-Mediated Tool for the Development of Probability Mental Models
Danielle E. Kaplan, Chia-Ling Wu, Teachers College, Columbia University, USA

IDIOMA-TIC © A CALL authoring system for web and cd-rom with intelligent feedback and half-open questions
Ludo Melis, K.U.Leuven Campus Kortrijk, Belgium; Piet Desmet, Bert Wylin, K.U.Leuven Campus Kortrijk, Belgium

A New Model for Teachers' Development in the Information Age
Edna Yaffe, The Open University of Israel, Israel

Digital Video as an Educational Tool in Distance Education
Edna Yaffe, The Open University of Israel, Israel

The Development of The Learning Object Standard Using A Pedagogic Approach: A Comparative Study
John Jenkins, Chai Wan IVE, Hong Kong; Mohammed Yusoff; Yazrina Yahya, National University Malaysia, Malaysia

Integration of laptops into a K-12 learning environment: A case study of a science teacher in the middle school
Chia-chi Yang, Dept. of Instructional Technology at University of Georgia, USA
Asynchronous On-Line Discussions: Facilitating Critical Thinking Skills in Distance Education
Ya-Ting Yang, Purdue University, USA

Instructor Strategies for Web-Based Bulletin Boards to Stimulate Interaction and Improve Student Learning Performance in Distance Education
Ya-Ting Yang, Purdue University, USA

A Case Study for Promoting Collaboration on Online Project-Based Learning
Young-Sun Yang, Kwandong University, Korea (South)

Extending Educational Access Through Hand-held Devices
Vincent Tam, Barbara Yin, University of Hong Kong, Hong Kong

WebQuests for Reflection and Conceptual Change: Variations on a Popular Model for Guided Inquiry
Brent Wilson, David Young, University of Colorado at Denver, USA

Integrating the Internet in ESL Education in a Senior High School
Shelley S. C. Young, National Tsing Hua U. at Taiwan, Taiwan

Group Dynamics in a Synchronized Computerized Competitive Learning Environment: the effects of anonymity and proximity factors
Fu-Yun Yu, Graduate Institute of Education, National Cheng-Kung University, Taiwan; Tak-Wai Chan, Department of Computer Science and Information Engineering, National Central University, Taiwan

Web-based Testing: Dynamic Construction Of Assessments over the Web
Panagiotis Zaharias, Athens University of Economics & Business, Greece; Charalampos Vassiliou, Yannis Hadoukazs, Drakoulis Martakos, Stelios Halamandaris, University of Athens, Greece

Learning Activities Collaborative
John Black, Alyse Hachey, Doris Zahner, Teachers College, Columbia University, USA

The Status of Web Accessibility of Canadian Universities and Colleges
T. Craig Montgomerie, Nicholas Zaparyniuk, University of Alberta, Canada

A RDF Implementation Model for Personalized E-Services Composition in Adaptive E-Learning Systems
Peter Holt, Xiaokun Zhang, Centre for Computing and Information Systems, Athabasca University, Canada

Peer Modeling Method in Web-Based Intelligent Collaborative Learning System
Kanji akahori, Tokyo Institute of Technology, Japan; Jianhua Zhao, Kedong Li, Institute of Instructional Technology, South China Normal University, China; David McConnell, Educational Studies Department, University of Sheffield, UK

Understanding the social context for online learning
Melanie Zibit, Boston College, USA

MoBy: Modular Multiple Media Course Content for On-line Courses
Harry Matthews, Lisa Wilson, University of California at Davis, USA

The Virtual Platform SENEKA - A knowledge management network tool
Regina Oertel, Georg Schoeler, Department of Computer Science in Mechanical Engineering (IMA HDZ) - Aachen University of Technology, Germany

Weaving the Web for all: Creating institutional policy to support Web access for those with disabilities
Cyndi Rowland, Utah State University, USA
