TWENTY-FOURTH NATIONAL
INDUSTRIAL ENERGY
TECHNOLOGY CONFERENCE

April 16 — 19, 2002
Adam's Mark Hotel
Houston, Texas

W. D. Turner
Conference Director

Host
Energy Systems Laboratory
Texas A&M University

Sponsors
American Chemistry Council
Armstrong International, Inc.
BP
Global Energy Partners
LASS-TX
Spirax Sarco, Inc.
Texas State Energy Conservation Office
U.S. Department of Energy
U.S. Environmental Protection Agency, Energy Star Program

Portions or all of this workbook may be copied with the permission of the authors and Texas A&M only.

The statements and conclusions contained herein do not necessarily reflect the statements and conclusions of Texas A&M University, the Texas Engineering Experiment Station and the Energy Systems Laboratory.

Admission to Texas A&M University and any of its sponsored programs is open to qualified individuals regardless of race, color, religion, sex, age, national origin, or educationally unrelated handicaps.
# TABLE OF CONTENTS

**Energy Procurement Strategies and Services: The Real Deal**

- "Energy Price Projections and Efficiency Strategies," Pam Herman Milmoe, E Source.................................Not Available at Press Time
- "Tips for Purchasing Natural Gas," Carmen Andreoli, Pace Global Energy Services........................................Not Available at Press Time

**American Chemistry Council Award Winners**

- "Global Energy Management System Development and Deployment within ExxonMobil Chemical Company," Paul B. Fritsch, ExxonMobil Chemical Company...........1
- "Channelview Energy Reduction Teams," Elizabeth Ross, Equistar Chemicals, LP.........................2
- "A Systematic Approach to a Steam Balancing Project," Edward H. Chiu, Celanese.........................3
- "Reduce Natural Gas in Boilers," Eugene W. Solonek, Jr, Dupont.................................4

**Audits, Data Management, and Automation**

- "State of the Art Sub-metering at Texas Department of Criminal Justice Industries," John A. Bryant, Texas A&M University, John McBride, New Horizons Technologies, Inc., and Tom Merka, Texas Department of Criminal Justice........Not Available at Press Time
- "Closed-Loop Energy Management Control of Large Industrial Facilities," Ronald L. Childress, Jr., Automation Applications, Inc..........................5
- "Meters + AMR + Propane = Revolution," Dwain Willingham, Propane Resources..............................Not Available at Press Time
Selling Energy Efficiency in Your Organization

"Rationale of State Support of Industries of the Future," Carole Trabachino and Michael R. Muller, Rutgers University.................................................................24

"Energy Efficiency: Marketing and Service Potential for Energy Utilities’ Industrial Markets," Christopher Russell, Rebecca Tate, and Anthony Tubiolo, Alliance to Save Energy.................................................................33

Industries of the Future

"Working with a State Industry of the Future Program: A Texas Example," Kathey Ferland, Texas Industries of the Future.................................................................44

"Energy and Its Relationship to NOx and CO2 Abatement," Mark Koehn, BP................................................................. Not Available at Press Time

"Energy Improvement in Hydrocarbon Processing," Dave Culler, Shell Global Solutions (US), Inc.................................................................46

Energy Savings in Distillation and Refinery Processes

"Integrated Thermal and Hydraulic Analysis of Distillation Columns," Ketan Samant, Ian Sinclair and Ginger Keady, Aspen Technology.................................................................51

"Low Energy Distillation Schemes," G. T. Polley, Pinchtechnology.com.................................................................62

"Utility System Management and Operational Optimization," Vikas Dhole, Darryl Seillier and Kathleen Garza, Aspen Technology.................................................................73

"Heat Exchanger Technologies for Distillation Columns," G.T. Polley, Pinchtechnology.com.................................................................84

Saving Energy in Steam Systems 1

“Preliminary Results from the Industrial Steam System Market Assessment,” Glenn P. McGrath, Resource Dynamics and Anthony L. Wright, Oak Ridge National Laboratory

“Basewide Steam Decentralization Project at Naval Air Station/Jacksonville Florida,” Matthew Ossi, TECO

“ProSteam – A Structured Approach to Steam System Improvement,” Alan Eastwood, Linnhoff March Ltd

“Morning Star Saving in Energy Costs,” Elodie Geoffroy-Michaels, Turbosteam Corp

“Results From the Industrial Assessment Center (IAC) Steam Tool Benchmarking Support Project,” Anthony L. Wright, Oak Ridge National Laboratory, Kurt Bassett and Derek Hengeveld, South Dakota State University, Herb Eckerlin, North Carolina State University, Ahmad Ganji, San Francisco State University, Richard Jendrucko, University of Tennessee – Knoxville, Dragoljub Kosanovic, University of Massachusetts – Amherst, and Wayne Turner, Oklahoma State University

Motor Decisions Matter

“NEMA Premium Motors,” Rob Boteler, Emerson Motor Technologies

“Implementing Motor Management,” Randy L. Colip, Baldor Electric Company

“Working With Your Motor Service Center,” Chuck Yung, Electrical Apparatus Service Association

“Conducting a Motor Survey: Key Step for Establishing a Motor Management Policy,” Roy B. Miller, Advanced Energy
Energy Savings in Crude Oil Pre-heat Trains

“Identification of R&D Needs Relating to the Mitigation of Fouling in Crude Oil Pre-heat Trains,” G. T. Polley and S. J. Pugh, ESDU International Ltd. ..........................147

“Design of Crude Oil Pre-Heat Trains,” G. T. Polley, Pinchtechnology.com, B. L. Yeap and D. I. Wilson, University of Cambridge, and M. H. Panjeh Shahi, University of Tehran .................................................................156

“Models for the Prediction of Fouling in Crude Oil Pre-Heat Trains,” B. L. Yeap and D. I. Wilson, University of Cambridge and G. T. Polley, ESDU International Ltd. ....164

“Revamping Pre-heat Trains for Energy Saving,” B. L. Yeap and D. I. Wilson, University of Cambridge, B. Pretty, Veritech Inc. and G. T. Polley, Pinchtechnology.com ..........................................................172

Energy Savings in Process Systems

“The Insulation Energy Appraisal: Assessing the True Value of Insulated System” Sam Schell, SESCO Inc..........................................................178

“Energy Efficiency Opportunities in the Brewery Industry,” Ernst Worrell, Christina Galitsky, and Nathan Martin, Lawrence Berkeley National Laboratory ..................197

Savings in Steam Systems 2

“Case Study – Steam System Improvements at Dupont Automotive Marshall Laboratory,” Andrew Larkin, Trigen-Philadelphia Energy Corporation ..........................207

“Steam Partnership: Case Study of Improved Energy Efficiency,” Michael V. Calogero, Robert E. Hess, and Novi Leigh, Armstrong Services, Inc. ..........................213
“Process and Space Heating – When to Use Steam Tracing,” Horst Theime, James R. Risko, and the Fluid Controls Institute Steam Trap Section, Armstrong International.................................................................Presentation Only

“Steam System Optimization: A Case Study,” Nevena Iordanova, Ven Venkatesan, and Michael V. Calogero, Armstrong Services, Inc.................................222

“World Class Boilers and Steam Distribution System,” Vernon P. Portell, Armstrong Services, Inc.................................................................231

Analyzing Energy Usage

“Product Design for Energy: An Inverted Pyramid Approach,” B. Gopalakrishnan, Nasr M. Alkadi and Ralph W. Plummer, West Virginia University..........................245

“Impact of Electricity Deregulation on Industrial Assessment Strategies,” Donald J. Kasten, Michael R. Muller, and Frank Pavlovic, Rutgers University.................251

“Optimizing Student Use and Experiences in Industrial Assessments,” Madara M. Ogot, Michael R. Muller and Donald J. Kasten, Rutgers University.............256

“Energy Impacts of Productivity Improvements in Manufacturing,” Bojan Mitrovic, Michael R. Muller, Rutgers University.............................................261

Equipment Retrofits

**Distributed Generation**

“Clean Power for the Internet,” Elizabeth Brown, R. Neal Elliott, Anna Shipley, American Council for an Energy-Efficient Economy ................................................................. 306

**NOx Abatement Issues**

“Leadership in Low NOx/Lochinvar Corporation,” Dan Sheko, Stirling Boston and Jerry Moore, Lochinvar Corporation ................................................................. 313

“NOx Compliance Retrofits: An Opportunity to Address Fan Capacity, Efficiency, and Reliability Issues,” Vern Martin, Flowcare Engineering Inc Not Available at Press Time

“New Houston Nox Rules: Implications and Solutions,” Ron Cascone, Chem Systems/ Nexant Inc ................................................................. 319
