PROCEEDINGS OF THE NINETEENTH
NATIONAL RADIO SCIENCE CONFERENCE
(NRSC’2002)

Organized By:
The Academy of Scientific Research and Technology,
The National Radio Science Committee (NRSC),
and
The Faculty of Engineering, Alexandria University.

Alexandria, Egypt,
March 19-21, 2002.
# TABLE OF CONTENTS

## 1. **INVITED PAPERS:**

**INV1:** Use of Active Phased Arrays for Multiple-Beam Cellular Communications Systems, Amir I. Zaghloul, Virginia Polytechnic Institute and State University - USA.

**INV2:** Convolutional Decoding in the Presence of False Alarms, Ahmed H. Tewfik and Mohamed F. Mansour, University of Minnesota – USA.

**INV3:** Radio Science on the CASSINI Mission to Saturn, Essam A. Marouf, San Jose State University – USA.

**INV4:** Analysis And Characterization Of Package Resonance, El-Badawy El-Sharawy and Hussein Ghouz, Arizona State University – USA.

**INV5:** Information Theoretic Unified Modelling of Autonomous Systems, Essam Badreddin, University of Mannheim – Germany.

**INV6:** Switched Capacitor Circuits and their applications: An Overview, El-Sayed M. Saad, Helwan University - Egypt.

## 2. **COMMISSION B: FIELDS & WAVES:**

**B1:** Multifilar-Curl Antenna, S. H. Zainud-Deen, K. R. Mahmoud*, Sabry M. Ibrahim* and A. A. M. Shaalan**, Faculty of Electronic Engineering, Menoufia University, Helwan University* and Zagazig University**.

**B2:** Investigation of an Octafilar Helix Antenna, S. H. Zainud-Deen, Nur Ad-Din M.Salem***, Sabrt M.M. Ibrahim** and H.A. Motaafy***, Helwan University, Faculty of Electronic Engineering*, Menoufia University** and Higher Technol. Inst. , Tenth of Ramadan City***.

B5: Cross-Element Log-Periodic Dipole Fed Planar Reflector Antenna, Hassan M. Elkamchouchi and Moataz M. AbdelWahab*, Alexandria University and Alexandria Inst. of Technology*.

B6: Pseudo-Exact Simple Closed-Form Solutions for Radiation and Scattering from Thin Straight Loaded and Unloaded Wires, Mostafa N. Ismail Fahmy and Islam A. Esharah, Cairo University.

B8: Performance and Feasibility of Different Switched-BEAM Antennas for the Stratospheric Platform Mobile Communications Covering Newly Developing Regions, Mostafa Nofal, Moawad Dessouky, Mohiy Hadhood and Yasser Albagory, Faculty of Electronic Eng., Menoufia University.

B9: The MVDR Guided Constant Modulus Adaptive Array (MVDR-GCMARY) for Signal Separation in Fading Channels, Said E. El-Khamy, Darwish M. Abd-Elaziz* and Ali M. Gab-Alla Alexandria University and Arab Academy for Science and Technology*.

B10: Modified Bat-Wing Broadcasting Antenna Element, Hassan M. Elkamchouchi and Mona N. Abd El-Salam*, Alexandria University and TELECOM Egypt*.

B11: Computational Electromagnetic Technique for Broadband Analysis of Microstrip Antennas, M. A. Mangoud, M. Aboul-Dahab, R. A. Abd-Allameed* and P. S. Excell*, Arab Academy for Science and Technology and Univ. of Bradford* - UK.

3. COMMISSION C: SIGNALS & SYSTEMS:

C1: Neural Networks Used for Speech Recognition, Salwa H. El-Ramly, Nemat S. Abdel-Kader * and Reem El-Adawi **, Ain Shams University, Cairo University*, and Mentor Graphics**.

C4: Multi-Band Based Recognition of Spoken Arabic Numerals Using Wavelet Transform, Weaam Alkhaldi, Waleed Fakhr and Nadder Hamdy Arab Academy for Science and Technology.

C5: Quality Improvement of Low Bit Rate Noisy Speech Using the Subspace Method, M. S. El-Mahallawy, W. Fakhr and N. Hamdy, Arab Academy for Science and Technology.

C6: Modified Very Low Bit Rate Coder for Wireless Messaging, Mohamed Nasr, Tanta University.

C7 : Turbo Coding Scheme for GPRS System Yasmine Fahmy, Hala G. Abdel-Kader, Magdi El-Soudani, Cairo University.

C8: A Robust Protocol for Authentication of mobile Users, Nawal El-Feshawy, Mostafa Nofal, and Albert Tadros, Faculty of Electronic Eng. - Menoufia University.

C9: Rotor Enhanced Block Cipher (REBC), Hassan M. El Kamchouchi and Ahmed M. Elshaifee, Alexandria University.

C11: ** Receivers for MACPM Signals Based Upon the Laurent's Representation**, Ehab Sabri, Salameh Ikki and El-Sayed Youssef*, Arab Academy for Science and Technology and Alexandria University*.

C14: **Improved Method For Blocking-Artifact Reduction in Block Coded Images in Wavele-Transform Domain** Mohiy M. Hadhoud, Mohamed M. Foaad* and Hanaa A. Abd Allah*, Menoufia University and Zagazig University*.
