7th International Conference on

Probabilistic Methods
Applied to Power Systems

Organized by
PMAPS International Society,
University of Cassino and Second University of Naples

CONFERENCE PROCEEDINGS

VOLUME II

September 22 – 26, 2002
Naples, Italy
INDEX PER SESSION

VOLUME II

TDPO I - T & D PLANNING AND OPERATION I

A Hybrid Meta-Heuristic Algorithm for Transmission Expansion Planning ........................................ 465
J. Fonseka, V. Miranda

Decision Support for Distribution Network Planning ................................................................................. 473
T. Ponce de Leño

Using Cluster Analysis in Power System Planning under Uncertainty ..................................................... 479
S. Deladreue, P. Dessante, F. Brouaye, P. Bastard

Statistical Adaptive Algorithms for Fault Location on Power Transmission Lines based on
Method of Monte-Carlo ................................................................................................................................. 485
A. Sauhats, A. Jonins, M. Danilova

Calculation and Use of System States Probabilities Using Bayesian Belief Networks ......................... 491
J. Pompeé, O. Pourret, Y. Schlumberger, M. De Pasquale

Probabilistic Assessment of the Bus Voltage Stability Margin Using P-Q Curve ..................................... 497
M. Sobierański, K. Wilkosz, J. Bertsch, M. Fulczyk

EG - EMBEDDED GENERATION

Opportunities and Risks for Distributed Generation in the Context of Liberalized Energy Markets ........ 505
M. Biffoni, F. De Rossi, S. Massucco, F. Silvestro, G. Burt, S. Galloway, J.R. McDonald

Probabilistic Approach to Assess the Performance of Grid-Connected PV Systems .............................. 513
S. Conti, T. Crimi, S. Raiti, G. Tina, U. Vagliasindi

Probabilistic Cost Allocation of Losses in Networks with Dispersed Renewable Generation ................. 519
N. Hatziargyriou, T. Karakatsanis, K. Papadogiannis

Embedded Generation Planning under Uncertainty Including Power Quality Issues .......................... 525
G. Carpinelli, G. Celli, F. Pilo, A. Russo

An Optimal Reinforcement Strategy for Distribution Utilities with Distributed Generation Using
an Evolutionary Parallel Tabu Search Approach .......................................................................................... 535
A. Augugliaro, L. Dusonchet, M. G. Ippolito, E. Riva Sanseverino

Statistical Characteristics of Energy Production by Solar Dish-Stirling Systems .................................. 543
B. Karam, Y. Baghzouz, R. F. Boehm

VD - VOLTAGE DIP STATISTICS AND STOCHASTICS

Stochastic Prediction of Voltage Sags: An Overview ................................................................................. 551
G. Olguin, M. H. J. Bollen

The Method of Fault Positions for Stochastic Predictions of Voltage Sags: A Case Study ....................... 557
G. Olguin, M. H. J. Bollen

Voltage Sags Caused by Faults at Different Power System Levels and Experienced by Low Voltage
Customers ......................................................................................................................................................... 563
P. Heine, M. Lehtonen

Probabilistic Neural Network Procedure for Classification and Forecasting Voltage Sags
on Distribution Systems ................................................................................................................................. 569
M. Albano, R. Caldron, R. Turri

XIII
Ongoing Standard Work on Statistical Presentation of Voltage Dips

M. H. J. Bollen

Effect of Adverse Weather on the Voltage Dip Mitigation Capability of a Static Transfer Switch

A. Sannino, M. H. J. Bollen

TDPO II - T & D Planning and Operation II

Probabilistic Power System Security Analysis Considering Protection Failures

X. Yu, C. Singh

On the Implicit Probabilistic Risk Embedded in the Deterministic "n-a" Type Criteria

M. Th. Schilling, A. M. Rei, M. B. Do Coutto Filho, J. C. S. de Souza

Dynamic Parameter Estimation for Dynamic Security Assessment

E. De Tuglie, M. Dicorato, M. La Scala, F. Torelli

A Flexible and Comprehensive Approach to the Assessment of Large-Scale Power System Security under Uncertainty

J. P. Paul, K. Bell

Application of Data Mining to Optimize Settings for Generator Tripping and Load Shedding System (RPTC) in Emergency Control at Hydro-Québec

J.A. Huang, S. Harrison, G. Vanier, A. Valette, L. Wehenkel

A Probabilistic Approach to Manage Security Levels through the Unit Commitment

A.M. Quelhas, J. D. McCalley, M. Ni, Y. Schlumberger

DM - Diagnostics & Maintenance: Models and Applications

Using Life Curves in the Management of Equipment Maintenance

G. J. Anders, J. Endrenyi

Simulation of Complex Reliability Systems in the Presence of Aging and Maintenance Crew Limitation

A. Cavallini, D. Fabiani, G.C. Montanari

A Probabilistic Approach to the Estimation of Wood Pole Maintenance Cost in Aging Networks

M. D. Pandey, S. Krishnasamy

Probabilistic Analysis of the Life-Loss of MV Insulated Cables on the basis of Expected Loading Conditions at MV/LV Substations

A. Campoccia, M.G. Ippolito, F. Massaro, L. Mineo, G. Morana

Estimation of the Annual Resistive Loss on LV Residential Feeders

S.W. Heunis, R. Herman

Defects Recognition by Means of PD Digital Measurements Analysis

R. Candela, P. Romano, R. Schifani

LT - Statistics on Lightning and Transients

Substation Lightning Shielding and Risk Assessment

A.P. Sakis Meliopoulos, G.J. Cokkinides

Statistical Characteristics of Lightning Discharges

V. A. Rakov

Probabilistic Analysis of Varistor Dependability Due to Lightning Flashes

Effect of Tall Instrumented Towers on the Statistical Distributions of Lightning Current Parameters and its Influence on the Power System Lightning Performance Assessment

A. Borghetti, C. A. Nucci, M. Paolone

XIV
Risk Assessment of Overvoltages on a Series Capacitor Compensated Transmission Line
H. Kuisti

Characteristics of Distant Lightning Electric Fields
A. Pavlick, D. E. Crawford, V. A. Rakov

LEMI - NEW CHALLENGES FOR LIBERALIZED ENERGY MARKETS I

Evaluation of Transfer Capabilities of Transmission Systems in Competitive Environment

Probabilistic Available Transfer Capability and Associated Statistical Indices and Risk Evaluation
Y. Ou, C. Singh

A Comparison between Bilateral and Multilateral Congestion Management Based on Reliability Indices of Power Transactions
A. B. Rodrigues, M. G. Da Silva

Probabilistic Evaluation of ATC in a Market Characterized by Intense Bilateral Contracts
S. Bruno, M. La Scala, P. Scarpellini, G. Vimercati

Using of Probabilistic Technique for Power System Scheduling
K. Mášlo, S. Vnouček

MEE - PROBABILISTIC METHODS FOR EARTHQUAKE ENGINEERING

Dynamic Interaction between Electrical Substation Equipment during Earthquakes
A. Der Kiureghian, J. Song, J. L. Sackman

Seismic Risk Assessment and Retrofit of Civil Engineering Structures and Systems
C. Nuti, I. Vanzi

Seismic Reliability Analysis of Concrete Gravity Dams
M. Meghella, M. Ciccotelli

A Neural Network Model for Dam Management Based on Surveillance Systems Data
L. Bolognini, M. Meghella

Fragility Evaluation of High Voltage Station Components
F. Bettinali, F. Gatti

Statistical Analysis of the Seismic Action
T. Trombetti, G. Imbruglini

Stochastic Damage Indexes Accounting Low-Cycle Fatigue Phenomenon
A. Zambrano, P. Malangone

MPS - UNCERTAINTY IN MEASUREMENTS ON POWER SYSTEMS

Evaluation of the Uncertainty in DSP-Based Power Quality Measurements
E. Ghiani, N. Locci, C. Muscas

Probabilistic Method for Characterization of Analog-to-Digital System
V. Zagursky, I. Zarumba

A Monte Carlo-like Approach to Uncertainty Estimation in Electric Power Quality Measurements
A. Ferrero, S. Salicone

A Monte Carlo Method for the Auto-Evaluation of the Uncertainties in the Analog-to-Digital Conversion Based Measurements
S. Nuccio, C. Spataro

FFT-Analyzer with Uncertainty Auto-Evaluation Capabilities
C. Liguori, A. Paolillo

XV
LEM II - NEW CHALLENGES FOR LIBERALIZED ENERGY MARKETS II

Probabilistic Supply Reliability Evaluation for Liberalized Electricity Markets................................. 817
S. Niioka, A. Kozu, R. Yokoyama

Fuel Prices Scenario Generation based on a Multivariate GARCH Model for Risk Analysis in a Wholesale Electricity Market.......................................................... 823
C. Batlle, J. Barquin

Minimizing Price-Risk Exposure for Deregulated Electricity Market Participants........................................ 831
S. Galloway, K. Dahal, G. Burt, J. McDonald

Regression Analysis of Energy Prices in Competitive Electricity Markets.............................................. 839
W. Mieleczarski, G. Michalik-Mieleczarska

A Probabilistic Approach for Setting Power Flow Limits in Electric Networks....................................... 845
S. Barsali, M. Ceraulo, P. Pelacchi, D. Poli

PEE I - SPECIAL PROBLEMS IN EARTHQUAKE ENGINEERING I

Performance Based Seismic Design for Power Systems.............................................................................. 853
T. Trombetti, C. Ceccoli, D. Polazzi

Reliability of Electric Power Networks under Scenario and Probabilistic Earthquakes............................. 859
A. Rasulo

Dynamic Characterization and Control of Large Structures in Seismic Areas........................................... 865
D. Foti, P. Monaco

Seismic Risk Mitigation of Gas Insulated Stations by means of Energy Dissipation Devices....................... 871
F. Bettinalli, G. Bergamo, A. H. Muhr, A. Diehl

ECC I - ELECTRICAL COMPONENT CHARACTERIZATION I

Application of Smoothing Techniques to Solve the Cooling and Heating Residential Load Aggregation Problem ................................................................. 879
A. Molina, A. Gabaldón, M. Kessler, J.A. Fuentes

Electric Energy Customer Characterization by Means of Load Curve Indexes........................................... 887
M. Scutariu, P. Postolache, C. Toader

Quality of Supply Management by Means of Interruption Statistics and Voltage Quality Measurements.......................................................... 893
G. H. Kjolle, H. Seljeseth, J. Heggset, F. Trengereid

Clustering Direct Load Control Curves Using Self-Organizing Maps....................................................... 899
H.-T. Yang, S.C. Chen, W.N. Tsai

Probabilistic Load Estimation for Distribution Feeders .............................................................................. 907
V. Borozan, N. Hatziargyriou, N. Trimeseska, E. Zafiropoulos

LEM III - NEW CHALLENGES FOR LIBERALIZED ENERGY MARKETS III

Electric Energy Trade in Brazil................................................................................................................ 917
E. M. Azevedo, P. B. Correia

Challenges for Statistical Analysis in Balancing Electricity Markets - the Polish Market Example................ 923
S. Kasprzyk, W. Mieleczarski, G. Michalik-Mieleczarska

Strategic Bidding with Spot and Derivatives Transactions: a Literature Review........................................ 929
A. Martini, L. Pellegriini, G. Bellandi

The Strata Tree: A Useful Tool for Monte Carlo Simulation of Electricity Markets..................................... 937
M. Amelin, L. Söder

XVI
New Forecasting Method for the Residual Demand Curves Using Time Series (ARIMA) Models
A. Martin Calmarza, J. I.de la Fuente

PEE II - SPECIAL PROBLEMS IN EARTHQUAKE ENGINEERING II

Seismic Risk Formulation of Atmospheric Steel Tanks in Oil Storage Systems
G. Fabbrocino, I. Iervolino, G. Manfredi

Base Isolation of High Voltage Equipment: Comparison between Two Different Solutions
M. Di Donna, G. Serino

Influence of Vertical Irregularities on Seismic Response of R/C Frames
G. Magliulo, R. Ramasco, R. Realfonzo

Inelastic Response of Plan-Irregular Structures under Multi-Component Earthquake Excitations
M. De Stefano, B. L. Pintucchi

ECC II - ELECTRICAL COMPONENT CHARACTERIZATION II

Stochastic Simulation and Constraint Relaxation for Risk Mitigation in the Optimization Process of Hydroelectric Generators
E. Schlemmer, W. Harb, F. Mueller

Statistical Methods of Bearing Damage Risk Estimation in PWM Inverter-Fed Drives
R. Smolenski, J. Bojarski, A. Kempski, R. Strzelecki

Probabilistic Method for Parallel Filter's Power Selection in Interline Power Flow Controller
R. Strzelecki, J. Bojarski, G. Benysek

Analysis of Chaotic and Quasiperiodic Processes in DC/DC Converters
I. Ye Korotyeyev

Structure Analysis of Electromechanical Oscillations in Electric Power Systems
A. A. Grobovoy, N. N. Lizalek
