Pests & Diseases 2002

Proceedings of an international conference held at the Brighton Hilton Metropole Hotel, UK
18-21 November 2002
SESSION 7A
OPTIMISING THE USE OF SEED TREATMENT PESTICIDES

Seed treatment: uses and benefits
M C Hare .......................................................... 7A-1 .... 493

Meeting the requirements for modern seed treatment application
A Wainwright, A C Rollett and A B Cheer .................................. 7A-2 .... 499

The effects of surfactant and water volume on the coverage of the seed surface by a seed treatment formulation
S J Maude .......................................................... 7A-3 .... 507

Variety as a factor in the response of winter wheat to silthiofam seed treatment
R A Bayles, B A S Napier and D Leaper .................................. 7A-4 .... 515

SESSION 7B
PEST AND DISEASE MANAGEMENT IN ORGANIC FARMING

Organic agriculture and GM crops: is co-existence possible?
D Atkinson, C A Watson, B Pearce, L Woodward et al. .................................. 7B-1 .... 523

The role of functional biodiversity in managing pests and diseases in organic production systems
M S Wolfe .......................................................... 7B-2 .... 531

Development of a systems approach for the management of late blight (Phytophthora infestans) in organic potato production: an update on the EU-Blight MOP project
S L Phillips, C Leifert, J Santos, P Juntharathep et al. .................................. 7B-3 .... 539

Developing improved strategies for pest and disease management in organic vegetable production systems in the UK
G Davies, P Sumption, M Crockatt, P Gladders et al. .................................. 7B-4 .... 547

SESSION 7C
OILSEEDS–IMPROVING MANAGEMENT OF PESTS AND DISEASES

A review of pest and disease problems in winter oilseed rape in England and Wales
J A Turner, S J Elcock, K F A Walters, D M Wright and P Gladders .................................. 7C-1 .... 555

New perspectives on the epidemiology and management of phoma stem canker of winter oilseed rape in England
J S West, Y-J Huang, J M Steed, P K Leech et al. .................................. 7C-2 .... 563

Turnip rape (Brassica rapa) as a trap crop to protect oilseed rape (Brassica napus) from infestation by insect pests: potential and mechanisms of action
S M Cook, L E Smart, R J P Potting, E Bartlet et al. .................................. 7C-3 .... 569

</table>
Spatial pattern in the distribution of pests and yield in an oilseed rape crop: implications for ICM
A W Ferguson, J N Perry, I H Williams, S J Clark et al. .......................................................... 8A-14 ........................ 659

The use of baited and unbaited sticky traps to monitor the orange blossom midge, Sitodiplosis mosellana and its parasitoid, Macroglenes penetrans
J N Oakley and L E Smart ........................................................................................................... 8A-15 ........................ 665

Observations on integrated population management strategies for wheat bulb fly
J E B Young, G A Talbot and P Strachan ................................................................................ 8A-16 ........................ 671

Protecting oilseed rape from slug damage using metaldehyde, methiocarb and imidacloprid seed dressings
L C Simms, M J Wilson, D M Glen and D B Green .................................................................. 8A-17 ........................ 679

Semiochemicals for the control of cereal pests
T J Bruce, J L Martin, B J Pye, L E Smart and L J Wadhams ...................................................... 8A-18 ........................ 685

Clothianidin – a new chloronicotinyl seed treatment for use on sugar beet and cereals: field trial experiences from Northern Europe
R H Meredith, P J Heatherington and D B Morris ......................................................................... 8A-19 ........................ 691

POSTER SESSION 8B
PEST AND DISEASE MANAGEMENT IN ORGANIC FARMING

Health status of spring barley cultivated under organic, integrated and conventional farming conditions
A Baturo ........................................................................................................................................... 8B-1 ........................ 699

Management of plant parasitic nematode populations by use of vermicomposts
N Q Arancon, C A Edwards, S S Lee and E Yardim ................................................................... 8B-2 ........................ 705

Suppression of the plant diseases, Pythium (damping-off), Rhizoctonia (root rot) and Verticillium (wilt) by vermicomposts
H Chaoui, C A Edwards, A Brickner, S S Lee and N Q Arancon .................................................. 8B-3 ........................ 711

The effect of organic amendments on stem canker and black scurf (Rhizoctonia solani) of potatoes
G Davies, O Woolley, P Gladders, M Wolfe and R Haward ........................................................ 8B-4 ........................ 717

POSTER SESSION 8C
POST-GRADUATE STUDENT POSTERS

Behaviour-modifying chemicals of the damson-hop aphid, Phorodon humuli (Schrank)
T W Pope ........................................................................................................................................ 8C-1 ........................ 725

Maturation of ascospores of A-group and B-group Leptosphaeria maculans (stem canker) on winter oilseed rape debris
Y J Huang, B D L Fitt and A M Hall ......................................................................................... 8C-2 ........................ 729
Alternatives to methyl bromide method for the management of root-knot nematodes (*Meloidogyne* *spp.*) in greenhouse-grown tomato
G Neophytou, N Ioannou and D J Wright .................................................. 8C-3  ........................................ 733

Variety mixtures and the blighted organic potato
S L Phillips ........................................................................................................ 8C-4  ........................................ 737

Insect growth regulators inhibit acetylcholinesterase activity in B-biotype *Bemisia tabaci*
E L A Cottage and R V Gunning ................................................................. 8C-5  ........................................ 741

Behavioural consequences of pyrethroid resistance in the peach-potato aphid, *Myzus persicae*
I G Eleftherianos, S P Foster, M S Williamson and I Denholm ..................... 8C-6  ........................................ 745

Symbiotic bacteria from entomopathogenic nematodes acting as biological agents against fungal pathogens of tomato seedlings
A V Kapsalis, S R Gowen and F T Gravanis .................................................. 8C-7  ........................................ 749

Studies on population dynamics of *Bacillus subtilis* and *Fusarium oxysporum* f.sp. *lentis*, the causal organism of lentil vascular wilt
S A El-Hassan and S R Gowen ........................................................................ 8C-8  ........................................ 753

Differences between *Rhizoctonia solani* isolates from potato crops
J W Woodhall and P Jenkinson ........................................................................ 8C-9  ........................................ 757

Effect of mycelial inoculum level and cultivar susceptibility on *Rhizoctonia solani* development on potato stems and seed tubers
P Kyritsis and S J Wale .................................................................................... 8C-10 ........................................ 761

inhibition of common cereal pathogenic fungi by clove oil and eucalyptus oil
E M Byron and A M Hall .................................................................................. 8C-11 ........................................ 765

Biocontrol of canker on oilseed rape by reduction and inhibition of initial inoculum
M S Maksymiak and A M Hall ......................................................................... 8C-12 ........................................ 769

impact of spectral cladding materials on the behaviour of glasshouse whitefly *Trialeurodes vaporariorum* and *Encarsia formosa*, its hymenopteran parasitoid
D Doukas ......................................................................................................... 8C-13 ........................................ 773

The effect of granular nematicides on the development of *Rhizoctonia solani* diseases and their interaction with *Globodera rostochiensis* on potato
M A Back, P P J Haydock and P Jenkinson ...................................................... 8C-14 ........................................ 777

A malathion-specific esterase in a highly resistant strain of the red flour beetle *Tribolium castaneum*
A Rauf and R M Wilkins .................................................................................. 8C-15 ........................................ 781
POSTER SESSION 8D

RESISTANCE OF PESTS AND PATHOGENS TO PESTICIDES

Insecticide resistance in Egyptian strains of *Bemisia tabaci*
H El Kady, I Denholm and G J Devine ......................................................... 8D-1 ............... 787

Chlorfenapyr resistance in *Helicoverpa armigera* in Australia
R V Gunning and G D Moores ................................................................. 8D-2 ............... 793

Use of novel substrates to characterise esteratic cleavage of pyrethroids
G D Moores, P Jewess, A L Boyes, N Javed and R V Gunning ........................................... 8D-3 ............... 799

The effect of dose rate of imidacloprid and clothianidin on insecticide-resistant clones of *Myzus persicae*
L A Haylock, A M Dewar, B H Garner, R J N Sands et al. ........................................ 8D-4 ............... 805

Resistance to carbamate, organophosphate and pyrethroid insecticides in the potato aphid (*Macrosiphum euphorbiae*)
S P Foster, B Hackett, N Mason, G D Moores et al. ........................................ 8D-5 ............... 811

Resistance to insecticides in the currant-lettuce aphid, *Nasonovia ribisnigri*: laboratory and field evidence
M D Barber, G D Moores, I Denholm, N B Kift and G M Tatchell ........................................ 8D-6 ............... 817

PCR-based method for detecting mutation allele frequencies for Qoi resistance in *Plasmopara viticola*
C Sirven, E Gonzalez, E Bufflier, M-P Latorse and R Beffa ........................................ 8D-7 ............... 823

Interrelation between alternative respiration and target site mutations in resistance to Qoi fungicides
C Avila-Adame and W Köller ................................................................. 8D-8 ............... 829

Sensitivity of European Isolates of *Phytophthora infestans* to famoxadone and cymoxanil
T Barchietto and J L Genet ................................................................. 8D-9 ............... 835

Shift in sensitivity of *Alternaria solani* (potato early blight) to strobilurin fungicides
J S Pasche, C M Wharam and N C Gudmestad ........................................ 8D-10 .......... 841

Mefenoxam resistance in the North American population of *Phytophthora erythroseptica*: spatial distribution and frequency of resistance in soil and recombinant populations
R J Taylor, B Salas, G A Secor, V V Rivera et al. ........................................ 8D-11 .......... 847

Activity of zoxamide against European isolates of *Phytophthora infestans*
L R Cooke, D J Carlisle and R D McCall ................................................. 8D-12 .......... 853

Effect of dose rate and mixture on selection for reduced sensitivity to triazole fungicides in *Mycosphaerella graminicola*
V J Mavroidis and M W Shaw ................................................................. 8D-13 .......... 859

xv
### POSTER SESSION 8E
**ADVANCES IN FORMULATION AND APPLICATION TECHNOLOGY**

Technical advances in fumigant application for soil disinfestations  
M L Gullino, A Minuto, A Garabaldi and H A Ajwa .............................. 8E-1 867

Novel pesticides for slug and snail control in horticulture  
I Schüder, G Port and J Bennison ....................................................... 8E-2 873

A comparison of a direct injection sprayer with a conventional one  
A G Hodgekiss ........................................................................ 8E-3 879

### SESSION 9A
**FORECASTING, MODELLING AND RISK ASSESSMENT AS PART OF DECISION MAKING PROCESSES FOR PEST AND DISEASE MANAGEMENT**

The application of decision theory in pest and disease management  
G Hughes ................................................................................. 9A-1 887

Disease management decisions – making decisions that matter  
J Yuen ...................................................................................... 9A-2 889

Towards an early warning system for winter wheat disease severity  
S Pietravalle, F van den Bosch, M W Shaw and S R Parker ......................... 9A-3 897

Oilseed rape and cereal diseases – how are farmers responding to their control?  
N V Hardwick, J A Turner, J E Slough, S J Elcock et al. ........................... 9A-4 903

International developments in pest risk analysis for phytosanitary decision making: a review of methodologies for pest risk assessment  
L Zhu, R Black and J Holt .................................................................. 9A-5 911

### SESSION 9B
**INTERACTIONS BETWEEN PEST AND DISEASE CONTROL AND CROP PHYSIOLOGY**

Improving and exploiting self-defence against wheat diseases  
S R Parker, N D Paveley, M J Foulkes, D J Lovell et al. .......................... 9B-1 919

The influence of crop physiology on the development and impact of summer aphid infestations on wheat  
J N Oakley ..................................................................................... 9B-2 925

Effects of light leaf spot (*Pyrenopeziza brassicae*) infection on canopy size and yield of oilseed rape (*Brassica napus*)  
G D Lunn, J M Steed, A Baierl, N Evans et al. .................................... 9B-3 933

Anti-oxidative and anti-senescence effects of the strobilurin pyraclostrobin in plants: a new strategy to cope with environmental stress in cereals  
T Jabs, J Pfirrman, S Schäfer, Y X Wu and A v Tiedemann ......................... 9B-4 941
SESSION 9C
BIODIVERSITY IN ARABLE ECOSYSTEMS

Biodiversity in different farming systems
A R Leake .............................................................................................................. 9C-1 .......... 949

Biodiversity in British agro-ecosystems: the changing regional landscape context
S Petit, D C Howard, S M Smart and L G Firbank ..................................................... 9C-2 .......... 957

Indirect effects of pesticides on breeding yellowhammers Emberiza citrinella
A J Morris, R B Bradbury and J D Wilson .................................................................... 9C-3 .......... 965

Increasing the Government’s Farmland Bird Index through conservation management at the farm scale: a ten-year demonstration
C Stoate .................................................................................................................... 9C-4 .......... 971

SESSION 10A
GLOBAL ASPECTS FOR THE SAFE USE OF CROP PROTECTION AGENTS

Pesticides in the third world – changing role and a need for new thinking
J F Cooper and H M Dobson .................................................................................... 10A-1 .......... 979

The importance of product specifications to ensure availability of safe, high quality crop protection and public health products in world markets
T S Woods .................................................................................................................. 10A-2 .......... 987

Implementation of FAO Guidelines on Minimum Requirements for Pesticide Application Equipment: a case study in Cameroon
G Matthews, T Wiles, H Dobson and T Friedrich ....................................................... 10A-3 .......... 995

Safe and effective use of crop protection products in developing countries
J Frei .............................................................................................................................. 10A-4 .......... 1003

SESSION 10B
THE POTENTIAL ROLE OF TRANSGENIC CROPS IN SUSTAINABLE AND DURABLE PEST AND DISEASE MANAGEMENT

Transgenic crops: can European consumers benefit from eating them and will they want to?
J Wesseler .................................................................................................................. 10B-1 .......... 1013

Transgenic crops and integrated pest management
A H Hilbeck .................................................................................................................. 10B-2 .......... 1021

Transgenic papaya: a case for worldwide control of papaya ringspot virus
D Gonsalves ................................................................................................................. 10B-3 .......... 1029

Adaptive resistance management in Bt maize
D A Andow .................................................................................................................. 10B-4 .......... 1035
