DURABILITY OF FIBER REINFORCED POLYMER (FRP) COMPOSITES FOR CONSTRUCTION

Proceedings of the second International Conference (CDCC 02)
Montréal (Québec) Canada • May 29-31, 2002

DURABILITÉ DES COMPOSITES EN POLYMÈRES RENFORCÉS DE FIBRES (PRF) POUR LA CONSTRUCTION

Comptes rendus de la deuxième Conférence Internationale (CDCC 02)
Montréal (Québec) Canada • 29-31 mai 2002

Editors • Éditeurs:
Brahim Benmokrane
Ehab El-Salakawy
Université de Sherbrooke
Sherbrooke (Québec) Canada

</table>
Effects of Severe Environmental and Loading Conditions on Concrete Beams Strengthened with Prestressed CFRP Sheets ................................................. 127
R. El-Hacha, M. Green, and R. Gordon

The Effect of Freeze-Thaw on Bond between FRP Stay-in-Place Deck Forms and Concrete ............................................................... 141

Durability of GFRP Bars for Concrete Structures: Assessment and Improvement ................................................................. 153
P. Wang, R. Masmoudi, and B. Benmokrane

Long-term Behaviour of Reinforced Concrete Members with Carbon Fiber Reinforced Plastics (CFRP) under Sustained Loads ............................................. 165
M. Arockiasamy, M. O. Manav, S. Chidambaram, and M. Shahawy

Long-term Durability Study of Sheet-Bonded GFRP ........................................... 179
T.E. Boothby, C.E. Bakis, A. Mukherjee, and T. Brown

GRFP Composites in Simulated Marine Environments ........................................... 191
L.J. Malvar, R.M. Jamond, T.A. Hoffard, and T. Novinson

Creep-Rupture Testing to Predict Long-term Performance .................................. 203
M.E. Greenwood

Durability of GFRP Rods, Laminates, and Sandwich Panels Subjected to Various Environmental Conditions ............................... 213
D.K. Stone, D. Koenigsfeld, J. Myers, and A. Nanni

Experimental Investigations on Epoxy Resin Repair of Wood Beam by Means of both Static and Dynamic Tests .............................................. 225
G. Rizzo, B. Megna, S. Benfratella, and L. D'Acquisto

Development of a Stress Analysis for Use in Strength and Life Predictions of a Hybrid FRP Beam .................................................. 235
M. Hayes, T. Schniepp, and J. Lesko
Environmental Durability of E-Glass/Vinylester Composites under the Combined Effect of Moisture, Temperature, and Stress ........................................... 247
C. Helbling and V.M. Karbhari

Durability Investigation of FRP Composites Wrap for Concrete Columns in Salt Environment .......................................................................................... 259
M. Abu-Khashaba, N.A. Yehia, and AH. Heikal

Effect on UV Aging on Strength in Vinyl Ester Matrix Composites ......................... 273
D.C. Haeberle, B.C. Starr, J. Lesko, and J.S. Riffle

Fatigue Behaviour of FRP-Wood Bonded Interface ............................................. 285
J.F. Davalos and J. Jia

The Use of CFRPs in Strengthening of Historical Masonry Structures: Investigation on Durability by Accelerated Testing ............................................. 297

Evaluation of Interface Fracture of Concrete Externally Reinforced with FRP .................................................................................................................. 309
D. Boyajian, J.F. Davalos, I. Ray, and P. Qiao

Thermo-Mechanical Properties of Vinyl Ester/Clay Nanocomposites ....................... 321
A. Shah, H. GangaRao, and R. Gupta

Environmental Effects on Concrete-FRP Bond under Various Degrees of Sustained Loading .............................................................................................. 333
S. Murthy, J. Myers, and F. Micelli

Effect of Sustained Tensile Stress and Temperature on Residual Strength of GFRP Composite Bars ............................................................................. 347
G. Nkurunziza, R. Masmoudi, and B. Benmokrane

Characterisation and Modelling of Moisture and Alkali Effects on E-Glass/ Vinylester Composites ................................................................. 359
W. Chu and V.M. Karbhari

LRFD Based Simulation Technique for the Assessment of the Durability of Composite Materials in Civil Applications ............................................. 371
J.V. Bausano and J. Lesko
Confining Effects of CFRP Laminates on Corroded Concrete Members .......... 383
B. Craig and K.A. Soudki

Repair of Glulam and Decking Structures in Difficult Environment Using FRP and LVL Components ................................................................. 395
S. Kent, R. Leichti, J. Stith, P. Favre, and D. Tingley

Studies on the Fire Behaviour of FRP Reinforced and/or Strengthened Concrete Members .................................................................................. 405
L.A. Bisby, B.K. Williams, M.F. Green, and V.K.R. Kodur

Use of FRPs for the Rehabilitation of Corroded Reinforced Concrete Columns ................................................................................................. 419
M. Demers, C. Deniaud, K. W. Neale, and P. Labossière

Design of FRP Composites in Rehabilitation for Durability and Damage Tolerance ......................................................................................... 429
V.M. Karbhari and L. Lee

Effects of Toughened Resin on FRP Bond and Durability of RC Beams Strengthened with FRP ................................................................. 441
J.K. Kim, B. Gao, and C.K.Y. Leung

Behaviour of Concrete Beams Reinforced with GFRP Bars under Sustained Load and Freeze-Thaw Cycles ........................................... 453
K. Laoubi, E. El-Salakawy, M. Pigeon, and B. Benmokrane

Fatigue Behavior of Concrete Slabs Strengthened with Prestressed CFRP Sheets ......................................................................................... 465
P. J. Heffernan, R. G. Wight, and M. A. Erki

A Fatigue Test Method and Facility for Investigation Aeronautical Constructions from Composite Materials .................................................. 475
B. Rasuo

Moisture Absorption and Strength Characterization of Hygrothermally Aged Neat and Clay Filled Vinylester and Pultruded Vinylester E-Glass Laminates ................................................................. 485
S.P. Phifer and J. Lesko
Use of Dielectrometry for Process and Health Monitoring of FRP Composites ................................................................. 499
M. Cordovez, Y. Li, and V.M. Karbhari

Effect of Fire on Concrete Cylinders Confined with FRP ........................................ 511
M. Saafi and P. Romine

Long-term Behaviour of GFRP Rebars in Stressed Concrete Elements ............. 523
T.H. Almusallam, Y. Al-Salloum, S.H. Alsayed, and A. Alhozimy

Tensile Characterization and Durability of Putty Used for Externally Bonded FRP Strengthening Subjected to Alkaline Attack .............................................. 535
M. Casareto, A. Oliveri, A. Romelli, A. Nanni, S. Lagomarsino, and D.K. Stone

Fatigue Behaviour of Connections for FRP Pultruded Members ...................... 549
M.A. Erki, C. Shyu, and R.G. Wight

Degradation in the Polyester Resin Matrix and E-Glass FRP Bars Embedded in Concrete ................................................................. 563
M.S. Thakur, K.Y. Billah, and A.S. Ezeldin

Fatigue Tests of Reinforced Concrete Beams Strengthened Using Carbon Fiber Reinforced Polymer Composites .................................................... 575
S.F. Brena, S.L. Wood, and M. Kreger

Water Absorption of FRP Seawall Panels ............................................................ 587
Y. Shao and S. Kouadio

Field Condition Surveys of FRP Applications on Bridges ................................. 597
R.J. Watson

Effect of Surface Roughness on the Bond Performance between FRP Laminates and Concrete ................................................................. 607
X. Shen, J. Myers, N. Maerz, and G. Galecki

Behaviour of Adhesive Bonded Concrete CFRP Joint ....................................... 617
G. Bilotti, A. Guerriero, A. Pantuso, and E. Pedron
Nondestructive Inspection of FRP-Reinforced Concrete ........................................ 627
J. Newman and C. Zweben

Thermo-Mechanical Characterization of Recycled Thermoplastic Polymers Aged under Harsh Environment ................................................................. 637
V. Vijay, H. GangaRao, J.R. Basto, and V.K. Tripathi

Durability of the Second Generation of GFRP Rebars under Sever Environments ............................................................................................................. 651
S.H. Alsayed, A.M. Alhoziamy, Y.A. Al-Salloum, and T.H. Almusallam

Fatigue Evaluation of FRP Composite Bridge Deck Systems under Extreme Temperatures ................................................................. 665

Performance-Based Material Evaluation of FRP Composite Reinforcement Bonded to Glulam Members ................................................................. 677

Field Evaluation of Epoxy Adhesives under Extreme Temperature Environments ............................................................................................................. 689
A. Mosallam and P.K. Dutta

Evaluation of Lap Splice Length Requirement of CFRP Sheets in RC Beams under Fatigue Loading ................................................................. 701
A. Belarbi, J.J. Myers, and S. Puliyadi
