Estimation of probable maximum flood hydrograph for Upper Kaneri Basin  
V. G. Bhave and M. S. Shitole  

Numerical simulation of flood lake behavior in Northeastern Bangladesh  
T. Oka, M. Iguchi, S. M. U. Ahmed and S. K. Bala  

Study on the 2000 flood in the Lower Mekong by field survey and numerical simulation  
S. Kazama, Y. Muto, K. Nakatsuji and K. Inoue  

Improvement of calibration procedure of the block wise TOPMODEL with Muskingum-Cunge  
routing method using sub basins simulated results: Application to part of the Lower Mekong river basin  
N. M. N. S. B. Nawarathna, S. Kazama and M. Sawamoto  

Estimation of parameters of a hydrodynamic runoff-erosion model with data from a semiarid  
region in Brazil  
R. de Aragao, V. S. Srinivasan, K. Suzuki and M. Watanabe  

Importance of rainfall models in catchment simulation  
K. Umakhanthan and J. E. Ball  

Flood control of Gutianxi cascaded reservoir under the circumstance of forecasting  
M. Hu  

Interaction of aquifer flow and observation wells detected by Particle-Image-Velocimetry  
J. Lengricht and K.-U. Grow  

VOLUME II  

Session 7: Water Resources Development and Management  

Towards efficient multipurpose reservoir operation: a new approach  
C. Sivapragasam, S.-Y. Liong and V. Chandramouli  

Multi-target rationalized research for local area water distribution  
H.-M. Shau, B.-L. Lin and W.-C. Huang  

GA-based nonlinear optimization for real-time reservoir operation  
A. B. Celeste, K. Suzuki, M. Watanabe and A. Kadota  

A study for joint operating policies of multiple reservoirs using genetic algorithms with  
rule-curve shape variables  
C.-C. Wei, S.-C. Lin and R.-S. Wu  

Relationship between inundation area and irrigation area on flood control in the lower Mekong  
T. Hagiwara, S. Kazama and M. Sawamoto  

A real-time management system of constructional draining water  
L.-K. Lin, C.-Y. Jian and J.-T. Huang  

Conjunctive use of surface water and groundwater: concept, theory vs practice  
A. D. Gupta  

Irrigation management in Meghna-Dhonagoda Project  
AFM A. Hossain and Md. Z. H. Khan  

How to alleviate global water stress: case study about China water diversion scheme  
S.-Q. Yang  

xiv
The improvement of enumeration algorithm for the optimization of water distribution networks
B.-L. Lin, R.-S. Wu, S.-L. Liaw and R.-T. Chen

The optimized design and expansion analysis of local area water distribution network
H.-M. Shau, B.-L. Lin, W.-C. Huang, R.-S. Wu and S.-L. Liaw

Fresh groundwater resources from artificial aquifers
M. W. Bo

The pattern of saltwater intruding into the Changjiang estuary and the utilization of freshwater resources
H. Shen, Z. Mao and Q. Huang

Strategy of water resources development in small islands
S.-Q. Yang

Hazard risk analysis of typhoon damages by applying grey system theory
R.-Y. Wang and S.-P. Cheng

Risk level analysis on the flood control capacity of River Levee
T. Li and Z. C. Liang

Integrated triangular irregular network (ITIN) model for flood risk analysis case study: Pari River, Ipoh, Malaysia
S. K. Sinnakaudan, A. A. Ghani, C. C. Kiat, M. S. S. Ahmad and N. A. Zakaria

On stochastic modelling of daily rainfall process
V.-T.-V. Nguyen, S.-Y. Han and H. Nagabayashi

Session 8: Hydroinformatics

Prediction of water level in a river mouth using neural network approach
H.-S. Lee and H. Tanaka

Evaluation of the storage function model parameters using fuzzy linear regression approach
J. Sujono, S. Shikasho and K. Hiramatsu

Derivation of effective and efficient data set for training forecasting model
S.-Y. Liong and C. D. Doan

Application of Arc/View GIS in design of Eco-Sci-Tec park case in Baifoshi watershed, Suining, Sichuan, China
C. Li, X. Liu, S. Cao and X. Lei

An approach combining chaos-theoretic approach and support vector machine: case study in hydrologic forecasting
X. Yu, S.-Y. Liong and V. Babovic

SEA: A robust evolutionary algorithm for rainfall-runoff model calibration
N. Muttil and S.-Y. Liong

Daily rainfall runoff modeling using artificial neural network
M. P. Rajurkar, U. C. Kothyari and U. C. Chaube

Genetic regression model for dam safety monitoring
W.-J. Chen, Z.-Y. Ma and Y.-X. Dong

River flow prediction using Fuzzy-Neural network modeling
P. Deka and V. Chandramouli
Optimal operation of reservoir based on neural network analysis of downstream flooding
G. N. Paudyal and N. S. Noman

Study to find remedial measures to overcome water logging problem in the Noakhali area of Bangladesh
A. S. Khan

Session 9: Maritime Hydraulics

A high-order numerical method for nonlinear wave dynamics
P. Tkalich and E. S. Chan

The new depth-averaged equations for wave propagation in deep and shallow water
P. Lin and C. Man

Analysis of strong reflection of water waves
Y.-T. Kim and Y.-S. Cho

Application of Boussinesq model to random wave transformation over non-uniform beach
K. Oki, H. Mase and T. Sakai

Effect of wave screens on the dynamic pressures on vertical wall on its Leeside
R. Balaji and V. Sundar

Verification of a refined Boussinesq equation by using vertical 2-D numerical analysis
S. Onda, T. Hosoda and I. Kimura

Nearshore circulation and its distribution in the vicinity of a groyne
J. S. Mani and K. Jyothi

Low frequency horizontal drift forces: potential vs. viscous
A. K. Dev

Lagrangian solid-liquid two-phase flow model for wave-seabed interaction
H. Gotoh, T. Sakai, M. Hayashi and S. Andoh

Wave energy dissipation on barred equilibrium beaches
D. E. Reeve, Y. Li, N. J. Shankar and C. F. Leung

On wave dissipating works and beach erosions in front of seawall
Y. Yamada, M. Takezawa and S. Tamai

Changes of cross-shore profiles in sandy beaches
M. Takezawa and S. Tomaki

Experimental study of the propeller wake of an outboard motor
L. Cheung, R. Tomlinson, R. J. Brown and C. S. Teoh

Block/block interaction model for predicting catastrophic destruction of armor blocks
E. Harada, H. Gotoh and T. Sakai

Numerical and physical models for a landslide-induced Tsunami-reliability of two-layer model
Y. Shigihara, D. Goto and F. Imamura

Stability characteristics of floating bulkhead
Z. Fu, Z. Yan and Y. Lu

Wave attenuation characteristics of a stepped-slope floating breakwater (SSFBW) system
H. Ismail and T. H. Min

Experimental study on head failure of rubble-mound breakwaters
J.-I. Lee, Y.-S. Cho and Y.-T. Kim
Comparison of reflecting capability of various submerged breakwaters  
Y.-S. Cho and J.-I. Lee  
816

Comparison of breaker height formulae using large-scale experiments  
W. Rattanapitikon and T. Vivattanasirisak  
819

Evaluation of the flow pattern in Madura Strait by the satellite images  
S. Tanaka, G. Uehara, B. Sarwono, H. Tsukada, K. Ogihara and N. Anwar  
825

Development of the Tsunami evacuation model combined with the recognition study for residents  
T. Suzuki, T. Hayakawa and F. Imamura  
830

Analysis of shoreline change on Sendai Coast using empirical eigenfunction method  
H. Tanaka and T. Nagasawa  
836

Shoreline changes in Misawa coast, Japan  
M. Sasaki, T. Takeuchi and Y. Fujita  
842

On the use of bakelite in small scale coastal modelling  
R. Gennaro  
847

Shoreline change around the mouth of Nagase River in lake Inawashiro  
Y. Fujita and H. Tanaka  
853

Numerical model for nearshore characteristics of Krueng Aceh River estuary  
S. Arif  
859

Forces exerted on seaside perforated semicircular breakwaters due to regular and random waves  
G. Dhinakaran, V. Sundar, R. Sundaravadivelu and K. U. Graw  
862

Summary of the phenomena on the surface and under the ground of lagoon  
K. Ogihara, S. Tanaka, T. Ishida, B. Sarwono, N. Anwar and Anggrahini  
867

A numerical study of multi-directional irregular wave fields around coastal structures  
T. Hosoyamada, S. Yoshida and G. Tsujimoto  
871

Wave induced pressures on pipelines near a sloping boundary due to random waves  
V. Sundar and K. A. Roopsekhkar  
877

Hydrodynamic calculation for flood meeting with tide  
H. Tong, M. Zhao, W. Huai and L. Zhang  
881

Application of the two dimensional computer model for impact assessments of the proposed interventions for the purpose of land reclamation in the Meghna estuary  
M. Mahboob-Ul-Kabir, M. H. Azam, J. M. A. Hye and M. A. Samad  
886

Effect of wave-induced current on algae community development on artificial reefs  
K. Inoue, H. Tanaka, O. Nishimura and S. Baba  
892

Assessment of open sea boundary condition approaches for coastal area models  
R. Mayerle and C. Palacio  
898

Computer simulation in the conceptualisation of the Kedah coastal reclamation scheme in Malaysia  
F. J. Sidek, A. K. A. Wahab and H. Ismail  
904

Study on the effect in reducing Tsunami by the coastal permeable structures  
K. Harada, F. Imamura and T. Hiraishi  
910

Tidal-level forecasting by using the Levenberg-Marquardt algorithm  
S. Supharatid  
916
Tidal inlet model for Wawar, Opak and Telomoyo River mouths in Indonesia
  
  T. Suprijo and A. Mano

Session 10: Eco-hydraulics and Water Quality Modeling

Simulated analysis of water quality transition in a sulfuric-acid lake
  H. Nagabayashi, Y. Fujita, Y. Ogawa and V.-T.-V. Nguyen

Evaluation of fish habitat based on velocity distribution in an area with discharge depletion
  N. Tamai and T. Chibana

Optimization model for allocation of pollutant loads from non-point sources in watershed using GIS
  A. Kumar, S. Maeda and T. Kawachi

Installation test of ladder-type fishway at diversion weirs in Japan and Indonesia
  Y. Yasuda, I. Ohtsu, N. Koizumi and A. Junaidi

Arsenic removal by oxidation of iron hydroxide and settlement of co-precipitation into gravel spaces
  K. Tanabe, K. Shiomori, K. Yabuuchi, K. Hamabe and H. Yokota

Impact evaluation of alternative wastewater management projects on the water quality of an urban stream
  S. B. Weerakoon and N. Tamai

Numerical experiment of the method for creating fishery ground in and around the BISAN-SETO

Applications of remote sensing and GIS for estimating water quality in the Ariake sea
  K. Ohgushi, H. Araki and T. Y. Gan

Study on stream water quality in the Kamafusa lake catchment considering vegetation cover
  B. Su, S. Kazama, S. Katayama and M. Sawamoto

Optimum operational conditions of a bubble plume for water quality restoration of a
thermally stratified reservoir
  G. B. Sahoo and D. Luketina

Assessment of the cumulative hydrodynamic and water quality effects of coastal developments in
Hong Kong
  G. Li

Risk analysis for water quality modeling of the Te-Chi Reservoir
  J.-T. Kuo, C.-P. Yang and M.-Y. Chao

Dynamic modeling of bacterial concentrations in coastal waters: effects of solar radiation on decay
  S. M. Kashefipour, B. Lin and R. A. Falconer

Flow analysis of a pool type fishway
  S. Maeno and S. Ogawa

Evaluation of the habitat distribution of raptorial birds in upstream basin by satellite remote sensing
  S. Tanaka, T. Hatta and K. Ogihara

Relation between pollution load and the long-term metabolism in a mountainous lake
  Y. Ogawa, H. Nagabayashi and V.-T.-V. Nguyen

Numerical simulation on the near-field behavior of wastewater in side-discharge
  W. Huai, H. Tong, M. Zhao and Y. Na

Numerical modeling of flows in vertical single-slot and double-slot fishways
  M. Fujihara, T. Fukushima and K. Tachibana
Towards dynamical modeling of bacterial concentrations in the near-shore zone: I driving the models with dynamic input variables

On the bottom sediment environment in Lake Koyama

M. Harada and I. Yoshida

Transport model with kinetics reaction of Ammonium, Nitrite and Nitrate on two dimensional waters of Semarang coast

Y. M. Yustiani, T. Suprijo, S. Notodarmodjo and A. Mano

Storage reservoir planning considering water quantity and quality

P. Chaves and T. Kojiri

The research of management system with constructional using water

L.-K. Lin, J.-J. Hsu and J.-X. Wei

Session 11: History of Hydraulics, and Supplementary Papers

Theory and practice of hyperconcentrated sediment-laden flow in China

G. Wang, J. Xia and H. Zhang

Relation between rainfall-runoff simulation with respect to rainfall time distribution and reservoir water level

J.-K. Lee and J.-H. Lee

Some characteristics of hilly and fluvial macro-tidal Cao’E Estuary

C. Pan, A. You and N. Fu

Flood hazard zonation using COMSSNED models of rivers and basins, remote sensing and GIS

J. Vahabi

Prototype test of new water-purification method in new Nagasaki Fishery Port, Japan

S. Yano, A. Tada, T. Nakamura, H. Nishinokubi, H. Nonaka, N. Kohashi and T. Komatsu

Engineering technology of ancient canal in China

L. Li

Hunter Rouse and Shields diagram

J. Guo
