## Contents

**Greetings**

Greetings from the Conference Co-Chairs ............................................................................................................. I
Greetings from the Programme Co-Chairs ............................................................................................................... II

**Keynote Speech**

Learning with Kernels
Bernhard Schölkopf ........................................................................................................................................... V

Mambient: a Platform for Data Mining
Zhong-Zhi Shi ..................................................................................................................................................... VI

Soft Computing for Sensor and Algorithm Fusion
James M. Keller ................................................................................................................................................. VII

From Data Mining and Neural Networks Modelling towards Rule Extraction
Jacek M. Zurada .................................................................................................................................................. X

**Contributed Papers (Sorted by Accepting Date)**

</tbody>
</table>
Artificial Immune Theory Based Network Intrusion Detection System and the Algorithms Design
Xiang-Rong Yang, Jun-Yi Shen and Rui Wang ............................................................................. 73

Research on Solution to Complex Container Loading Problem Based on Genetic Algorithm
D.Y.He and J.Z.Cha ...................................................................................................................... 78

RIDAS—a Rough Set Based Intelligent Data Analysis System
Guo-Yin Wang, Zheng Zheng and Yi Zhang .................................................................................. 83

Research of Real Time Robot Visual Servoing Based on Genetic Algorithm
Han Liu, Ding Liu and Yan-Xi Yang ............................................................................................... 87

An Improved Adaptive Neural Network and its Application on Random Shape
Can-Lin Mo and Jian-Rong Tan ....................................................................................................... 91

A Novel Clustering Algorithm Based on Weighted Support and its Application
Xiang-Rong Yang, Jun-Yi Shen and Qiang Liu ............................................................................. 95

Feedback Procedure Neural Network and its Training
Jiu-Zhen Liang and Ming-Sheng Zhao ........................................................................................... 101

Fuzzy Case-Based Reasoning: Weather Prediction
Kan Li and Yu-Shu Liu .................................................................................................................. 107

Research and Implementation of a Scalable Secure Active Network Node
Jian-Guo Wang, Zeng-Zhi Li and Yu-Nan Kou ............................................................................. 111

Matrix Computation for Data Cleaning and Rule Extraction in Knowledge System
Tian-Le Tan, Zhi-Huan Song and Ping Li ...................................................................................... 116

Recognition Using Extended Multiple Discriminant Analysis (EMDA) Method
Wen-Ming Zheng, Li Zhao, Cai-Rong Zou, Zhi-Fu Wang and Xian-Wei Yu ................................... 121

A Study of Dynamic Knowledge Representation Based on Neural Networks
Hao Pan, Luo Zhong and Jing-Ling Yuan ....................................................................................... 126

Robot Path Planning in Complex Environment Based on Delayed-Optimization Reinforcement Learning
Xiao-Dong Zhan, Qing-Chun Meng, Bo Yin and Han-Ping Wang ............................................... 129

The Research on Model of Mining Association Rules Based on Quantitative Extended Concept Lattice
De-Xing Wang, Xue-Gang Hu and Hao Wang .............................................................................. 134

Order-Based Genetic Algorithm for Flow Shop Scheduling
Zhan Zhang, Ling Wang and Fang Tang ....................................................................................... 139

Fuzzy Logic Control for Switched Reluctance Motor Drive
Hao Chen, Dong Zhang, Zi-Yue Cong and Zhi-Feng Zhang ......................................................... 145

Mining Web Log Data Based on Key Path
Ai-Bo Song, Zuo-Peng Liang, Mao-Xian Zhao and Yi-Sheng Dong ............................................. 150

Use of Immune Self-Adaptation Wavelet for Data Mining
Jian-Guo Zheng and Ping-Ping Song ............................................................................................ 156

A New PLS Approach with Hybrid Internal Models
Min-Jie Huang, Hao Ye and Gui-Zeng Wang .................................................................................. 161

Nonlinear Control of Robot Spatial Motion in Dynamic Environments
I.V.Miroshnik and Xian-Lin Huang ............................................................................................. 165

Mining Cross-Table Association Rules Based on Projections of Itemsets
Nai-Qian Li, Qiao-Ping Li and Jun-Yi Shen .................................................................................. 170

A New Approach for Automated Image Segmentation Based on Unit-Linking PCNN
Xiao-Dong Cui, Shi-De Guo and Dao-Heng Yu .......................................................................... 175

Analyzing Document Logic Structure By Machine Learning
Gong-Shen Liu, Yong-Cheng Wang and Pei-Hua Hu ..................................................................... 179

Application of Som Neural Network in Fault Diagnosis of the Steam Turbine Regenerative System
Jun-Fen Wu, Nian-Su Hu, Sheng Hu and Yu Zhao ....................................................................... 184

A Comparison of Neural Networks and Model-Based Methods Applied for
Fault Diagnosis of Electro-Hydraulic Control Systems
Hong Yue, Shi-Jie Dai, Zhan-Qun Shi and Ji-Zhong Wang ........................................................... 188

Research of Coalition Formation in Time-Bounded Multiagent Systems
Yong Gong, Li Yao, Wei-Ming Zhang, Ji-Chang Sha and Chang-Ying Wang ................................ 194

The Minimum Mean Square Error Linear Estimator and Ridge Regression
Zhi-Fu Wang, Xian-Wei Yu .......................................................................................................... 199

Dynamic Node Creation and Fast Learning Algorithm for a Hybrid Feedforward Neural Network
Hong-Fei Xia and Lian-Kui Dai ...................................................................................................... 202

Separation and Reconstruction of Specular and Diffuse Reflection Images
Zhan-Wei Li and Ji-Zhou Sun ........................................................................................................ 206

Chaos in PWM Controller of a CUK Converter
Jia Yi and Xue-Ye Wei ................................................................................................................ 210

Information Extraction for Chinese Free Text Based on Pattern Match Combine with Heuristic Information
Ying Yu, Xiao-Long Wang and Yi Guan ....................................................................................... 214
Cooperative Path Planning for Multiple Air Vehicles Using a Coevolutionary Algorithm
Chang-Wen Zheng, Ming-Yue Ding and Cheng-Ping Zhou ................................................................. 219
Stereo Camera System and Its Application in Networked Virtual Environment
Ling Chen, Mei-Hong Tian, Gen-Cai Chen and Chuen Chen ............................................................... 225
A Practicable Control System with Hierarchical Structure
Zhong-Hua Sun, Fu Ping and He-Xin Chen ............................................................................................ 230
Quantifying Semantic Similarity of Chinese Words from Hownet
Yi Guan, Xiao-Long Wang, Xiang-Yong Kong and Jian Zhao .............................................................. 234
A Local-To-Holistic Face Recognition Approach Using Elastic Graph Matching
Da-Rui Sun and Le-Nan Wu .................................................................................................................. 240
An Entropy-Based Discretization Method for Classification Rules with Inconsistency Checking
Ren-Pu Li and Zheng-Ou Wang ............................................................................................................. 243
Sliding Mode Control of an Autonomous Underwater Vehicle
Li-Rong Wang, Jian-Chen Liu, Hua-Nan Yu and Yu-Ru Xu ................................................................. 247
Combining Multiple Classifiers Based on Statistical Method for Handwritten Chinese Character Recognition
Lei Lin, Xiao-Long Wang and Bing-Quan Liu ......................................................................................... 252
Research of Discovery Feature Sub-Space Model (DFSSM) Based on Complex Type Data
Bing-Ru Yang and Jing Tang .................................................................................................................. 256
A Novel Cluster Method in Fuzzy Neural Networks
De-Qiang Li, Sha-Bai Huang, De-Qiang Li and Sha-Bai Huang ............................................................ 261
The Computational Complexity of Dynamic Programming Algorithm for Combinatorial Auctions
Shan-Li Hu and Chun-Yi Shi .................................................................................................................. 266
Multi-Model Adaptive Control for the Superheated Steam Temperature
Wen-Jie Zhao, Yug-Uang Niu and Ji-Zhen Liu ....................................................................................... 269
Rough Sets Model Based on Partition
Shu-Hong Yi ......................................................................................................................................... 273
A Niching Negative Selective Genetic Algorithm for Self-Nonself Discrimination in a Computer
Ya-Jing Zhang, Chao-Zhen Hou, Fang Wang and Li-Min Su ............................................................... 276
A Fuzzy Comprehensive Evaluation Based Distributed Intrusion Detection
Ming-Guang Ouyang, Wei-Nong Wang and Yun-Tao Zhang .............................................................. 281
A New Adaptive Weighted Fusion Algorithm for Multi-Sensor Tracking
Jiao Zhao and Shi-Qiang Hu ................................................................................................................... 285
An Object Tracking Algorithm Based on Occlusion Mesh Model
Jian-Wei Zhao, Peng Wang and Chong-Qing Liu .................................................................................... 288
Novel Fuzzy Predictive PID Control for a Class of Nonlinear Systems
Lin-Huan Li, Hong-Ye Su, Jian Chu and Xin-Pin Guan ........................................................................ 293
Traditional Chinese Medicine Recognition Based on Fnn
Yi-bo Li and Xiao-yuan Huang ................................................................................................................ 298
Optimizing Index for Semistructured Data
Li-Xin Han, Xia-Qin Zheng and Xiao-Fang Li ....................................................................................... 303
Probing Modification of BP Neural Network Learning-Rate
Pan Hao, Jing-Ling Yuan and Luo Zhong ............................................................................................... 307
A Fuzzy Parameter S Adaptive PID Controller Design of Digital Positional Servo System
Yu Yang, Wen-Ge Wang, De-Jie Yu and Ge Ding ................................................................................. 310
Stock Market Time Series Data Mining Based on Regularized Neural Network and Rough Set
Xiao-Ye Wang and Zheng-Ou Wang ....................................................................................................... 315
Predictive Control Based on Neural Network for Nonlinear System with Time-Delay
Xue-Mei Sun, Chang-Ming Ren, Pi-Lian He and Yu-Hong Fan ............................................................ 319
The H∞ Control of 10mwh Class Energy Storage Flywheel System Using
Yi-Chong Zhang, Ya-Jun Zhang and Guo-Ji Sun .................................................................................... 323
Communication Performance Optimization for Mobile Agent System
Bo Yang, Da-You Liu and Kun Yang .................................................................................................... 327
Adaptive Synchronization of Discrete Chaotic Systems
Zhi-Liang Wang and Hua-Guang Zhang ............................................................................................... 336
Data Distributions Automatic Identification Based on Som and Support Vector Machines
Jia-Yuan Zhu, Heng-Xi Zhang, Ji-Lian Guo and Jing-Lei Feng ............................................................ 340
Intelligent Q&A System Based on Case Based Reasoning
Peng Han, Rui-Min Shen and Fan Yang ............................................................................................... 345
A Semantic-Based Image Retrieval System: Visengine
Jian-Yong Sun, Zheng-Xing Sun, Ruo-Hong Zhou and Hui-Feng Wang .............................................. 349
An Application of Fuzzy-Inference-Based Neural Network in DTC System of Induction Motor
Cheng-Zhi Cao and Hai-Ping Li ............................................................................................................ 354
Hybrid Knowledge Representation in Compositional Modeling
Dong-Feng Wang, Sheng-Bo Wang and Ying-Wu Chen .......................................................... 360

Time Series Prediction Via New Support Vector Machines
Jia-Yuan Zhu, Bo Ren, Heng-Xi Zhang and Zhen-Ting Deng ............................................... 364

The Effect of the Fractional-Order Controller’s Orders Variation on the Fractional-Order Control Systems
Qing-Shan Zeng, Guang-Yi Cao and Xin-Jian Zhu ................................................................. 367

Multiuser Detection Method Based on Support Vector Machine
Tao Yang and Jian-Ying Xie ........................................................................................................ 373

Mas-Based Model of Intelligent Control-Maintenance Management System (ICMMS) and its Application
Chuang Fu, Lu-Qing Ye, Yuan-Chu Cheng, Yong-Qian Liu and Benoi Jung ............................. 376

HMMs (Hidden Markov Models) Based on Anomaly Intrusion Detection Method
Bo Gao, Hui-Ye Ma and Yu-Hang Yang .................................................................................. 381

Research on Web Mining-Based Intelligent Search Engine
Yan Li, Xin-Zhong Chen and Bing-Ru Yang ............................................................................. 386

Anthropomorphic Intelligent PID Control and Its Application in the Hydro Turbine Governor
Yuan-Chu Cheng, Lu-Qing Ye, Fu Chuang and Wei-You Cai ................................................... 391

Statistics-Based Fuzzy Operator of the Compound Fuzzy Proposition
Yi-Jiang Chen ............................................................................................................................ 396

New Control Algorithm of Loss-DOF Serial Manipulators Near Singular Configurations
Zhun-Qing Hu, Zhi-Guo Fu and Hai-Rong Fang .................................................................... 401

Study of Singularity Robust Inverse of Jacobian Matrix for Manipulator
Zhun-Qing Hu, Zhi-Guo Fu and Hai-Rong Fang .................................................................... 406

Fuzzy Vibration Fault Diagnosis System of Steam Turbo-Generator Rotor
Dan-Mei Xie, Xiao Song, Hai-Long Zhou and Ming-Wan Guo ................................................. 411

The Mill Load Control for Grinding Plant Based on Fuzzy Logic
Yao-Geng Tang and Gao Song .................................................................................................. 416

Knowledge Aggregation and Navigation High-Level Petri Nets-Based in E-Learning
Xiao-Qiang Liu, Min Wu and Jia-Xun Chen ............................................................................. 420

The Lattices of Normal Intuitionistic Fuzzy Subgroups
Tao Wang and Yan-Ping Wang ................................................................................................. 426

Recognition of Water Surface in Scene Images
Meng-You Yuan, Hua-Yong Zhu and Lin-Cheng Shen ................................................................ 430

A Stochastic Strategy for Solving Job Shop Scheduling Problem
Ai-Hua Yin and Wen-Qi Huang ............................................................................................... 434

Expert System for Earth-Rock Allocation Management Based on Knowledge Engineering
Sheng-Rong Cao and Xian-Jia Wang ....................................................................................... 440

Exponential Stability for Delayed Cellular Neural Networks
Xiao-Ping Li and Li-Cheng Jiao ............................................................................................... 446

An Efficient Iris Recognition System
Ya-Ping Huang, Si-Wei Luo and En-Yi Chen ........................................................................... 450

Research on an Improved Genetic Algorithm Based Knowledge Acquisition
Li-Min Su, Hong Zhang, Chao-Zhen Hou and Xi-Qin Pan ....................................................... 455

Mining Frequent Itemsets with Tough Constraints
Lei Jia, Ren-Qing Pei and Song-Qian Zhang ........................................................................... 459

Improved Self-Adaptive Smith Predictive Control Scheme for Time-Delay System
Dong-Mei Feng, Feng Pan and Ru-Cheng Han ........................................................................ 463

Model Information Metric Based on Selection Criterion
Xiao-Jun Duan, Xiao-Yong Du and Zheng-Ming Wang .............................................................. 467

Theoretical Study on Diversity of Population in Parallel Genetic Algorithms
Mei-Qin Pan and Guo-Ping He .................................................................................................. 472

A UML Extension of Distributed System
Ying Dong, Mingshu Li and Qing Wang ................................................................................... 476

Corba/Java Technology Based Legacy Systems Reusability Research and Design
Hai-Yun Fang, Jian-Chao Zeng and Yin-Zhang Guo ................................................................. 481

Time-Variable-Parametric Relaxation Labeling and its Application in Texture Segmentation
Yun-Tao Qian, Qi Wang and Ching Y. Suen ............................................................................. 486

Intelligent Resource Planning of Testing Lab Based on Corba and Multi-Agent
Yi-Min Huang, Jian-Ming Zhang, Quan-Lin Zhang and Shu-Qing Wang ............................... 492

Cache Prefetching Adaptive Policy Based on Access Pattern
Ke Zhou, Jiang-Ling Zhang, Dan Feng and Zhi-Kun Wan ....................................................... 496

A New Neural Network Approach to Economic Emissionload Dispatch
Xian Wang, Yu-Zeng Li and Shao-Hua Zhang ...................................................................... 501
