VOLUME XXXIV PART 3A COMMISSION III
VOLUME BAND TEIL

PROCEEDINGS OF THE ISPRS COMMISSION III SYMPOSIUM
PHOTOGRAMMETRIC COMPUTER VISION

September 9 - 13, 2002
Graz, Austria

Part A
Papers accepted on the basis of peer-review full manuscripts

Editors
R. Kalliany, F. Leberl
### TABLE OF CONTENTS

(Part A)

#### KEYNOTE PAPER

**3D Modeling and Registration Under Wide Baseline Conditions**  
Luc Van Gool, Tinne Tuytelaars, V. Ferrari, Christoph Strecha,  
Joris Vanden Wyngaerd, Maarten Vergauwen

#### PAPERS ACCEPTED ON THE BASIS OF PEER REVIEWED FULL MANUSCRIPTS

(in alphabetic order, according to name of 1st author)

- **Factorization with Erroneous Data**  
  Henrik Aanes, Rune Fisker, Kalle Åström, Jens Michael Carstensen

- **Laboratory Self-calibration of a Multi-Band Sensor**  
  Abdullatif Alharthy, James Bethel

- **Heuristic Filtering and 3D Feature Extraction from LIDAR Data**  
  Abdullatif Alharthy, James Bethel

- **Bayesian Object Recognition for the Analysis of Complex Forest Scenes in Airborne Laser Scanner Data**  
  Hans-Erik Andersen, Stephen E. Reutebuch, Gerard F. Schreuder

- **Scene Constraints for Direct Single Image Orientation with Selfdiagnosis**  
  Mirko Appel, Wolfgang Förstner

- **A Machine Learning Approach to Building Recognition in Aerial Photographs**  
  Chris J. Bellman, Mark R. Shortis

- **Applications of the Robust Interpolation for DTM Determination**  
  Christian Briese, Norbert Pfeifer, Peter Dorninger

- **Semantic Interpretation of Remote Sensing Data**  
  Jürgen Bückner, Martin Pahl, Oliver Stahlhut

- **Laser Strip Adjustment for Data Calibration and Verification**  
  Helen Burman

- **Inductive Clustering: Automating Low-level Segmentation in High Resolution Images**  
  Annie Chen, Gary Donovan, Arcoi Sowmya, John Trinder

- **System Calibration for Direct Georeferencing**  
  Michael Cramer, Dirk Stallmann

- **Assessing Height Precision of Laser Altimetry DEMs**  
  Marc Crombaghs, Sander Oude Elberink, Regine Brügelmann, Erik de Min

- **Reconstructing 3D Building Wireframes from Multiple Images**  
  Ahmed Elaksher, James Bethel, Edward Mikhail

- **Assessment of Two Cheap Close-Range Feature Extraction Systems**  
  Ahmed Elaksher, Mohammed Elghazali, Ashraf Sayed, Yasser Elmanadilli

- **Reconstructing 3D Buildings from LIDAR Data**  
  Ahmed F. Elaksher, James S. Bethel
3D Line Reconstruction from Airborne Three-Line Scanner Data
Sander Oude Elberink, George Vosselman .................................................. 108

Ground Surface Estimation from Airborne Laser Scanner Data Using Active Shape Models
Magnus Elmquist .................................................................................. 114

Surface Clustering from Airborne Laser Scanning Data
Sagi Filin .............................................................................................. 119

Precise Orientation of SPOT Panchromatic Images with Tie Points to a SAR Image
José A. Gonçalves, Ian J. Dowman ......................................................... 125

Automatic DTM Generation from Three-Line-Scanner (TLS) Images
Armin Grün, Li Zhang ............................................................................ 131

Processing of 3D Building Models for Location Aware Applications
Norbert Haala, Jan Böhm, Martin Kada .................................................. 138

New Approach for Calibrating Off-the-Shelf Digital Cameras
Ayman F. Habib, Sung W. Shin, Michel F. Morgan ................................. 144

Automatic Pose Estimation of Imagery Using Free-Form Control Linear Features
Ayman F. Habib, Sung W. Shin, Michel F. Morgan ................................. 150

Triangulation of LH Systems ADS40 Imagery Using Orima GPS/IMU
Ludger Hinsken, Scott Miller, Udo Tempelmann, Robert Uebbing, A. Stewart Walker ........................................................................... 156

Urban Road Net Extraction Integrating Internal Evaluation Models
Stefan Hinz, Albert Baumgartner ............................................................ 163

Knowledge-Based Building Detection Based on Laser Scanner Data and Topographic Map Information
Alexandra D. Hofmann, Hans-Gerd Maas, André Streilein .................... 169

Parallel Approach to Binocular Stereo Matching
Herbert Jahn ............................................................................................ 175

A Combined Estimation-Deformation Model for Area Detection: Application to Topographic Area Feature Update
Sylvie Jodouin, Layachi Bentabet, Djemel Ziou, Jean Vaillancourt, Costas Armenakis ........................................................................... 181

MetropoGIS: A Semi-Automatic City Documentation System
Andreas Klaus, Joachim Bauer, Konrad Karner, Konrad Schindler .......... 187

Perceptual Organization of 3D Surface Points
Impyeong Lee, Toni Schenk ..................................................................... 193

Feature Extraction for Quality Assessment of Aerial Image Segmentation
Valérie Letournel, Bülent Sankur, Frédéric Pradeilles, Henri Maître .......... 199

Characterizing Image Quality: Blind Estimation of the Point Spread Function from a Single Image
Marc Luxen, Wolfgang Förstner .............................................................. 205

Estimation of and View Synthesis with the Trifocal Tensor
Helmut Mayer ...................................................................................... 211
Canonical Representation and Three View Geometry of Cylinders  
Nassir Navab .......................... 218

On the Calibration of Mapvision 4D system  
Ilkka Niini ......................... 225

Stereo Plane Matching Technique  
Kazuo Oda, Takeshi Doihara, Ryosuke Shibasaki .......... 228

Knowledge Based Multitemporal Interpretation  
Kian Pakzad .......................... 234

OSIRIS: A Simulator of Outdoor Scenes in Thermal Infrared Range  
Thierry Poglio, Eric Savaria, Lucien Wald .......... 240

Indirect Georeferencing of Airborne Multi-Line Array Sensors: A Simulated Case Study  
Daniela Poli .......................... 246

Video-to-3D  
Marc Pollefeys, Luc Van Gool, Maarten Vergauwen, Frank Verbiest, Kurt Cornelis, Jan Tops .......... 252

The Resolution Enhancement by Software Method of Random Shift  
Tomas Ponik, Jaroslav Placek .......................... 258

Simultaneous Registration of Multiple Views of a 3D Object  
Helmut Pottmann, Stefan Leopoldseder, Michael Hoferl .......................... 265

Recognition and Reconstruction of Special Surfaces from Point Clouds  
Helmut Pottmann, Stefan Leopoldseder, Johannes Wallner, Martin Peternell .......................... 271

A Minimal Set of Constraints and a Minimal Parameterization for the Trifocal Tensor  
Camillo Ressl .......................... 277

The Impact of Conformal Map Projections on Direct Georeferencing  
Camillo Ressl .......................... 283

Object Segmentation with Region Growing and Principal Component Analysis  
Marco Roggero .......................... 289

A New Method for Building Extraction in Urban Areas from High-Resolution LIDAR Data  
Franz Rottensteiner, Christian Briese .......................... 295

Assessment of Forest Parameters by Means of Laser Scanning  
Mathias Schardt, Michaela Ziegler, Andreas Wimmer, Roland Waack, Juha Hyppä .......................... 302

Fusion of LIDAR Data and Aerial Imagery for a More Complete Surface Description  
Toni Schenk, Bea Csathó .......................... 310

Automated Image Registration Using  
Geometrical Invariant Parameter Space Clustering (GIPSC)  
Gamal Seedahmed, Lou Martucci .......................... 318

Methodical Alternatives to the Glacier Motion Measurement  
from Differential SAR Interferometry  
Aleksey Sharov, Karl-Heinz Gutjahr, Franz Meyer, Mathias Schardt .......................... 324

Filtering Strategy: Working Towards Reliability  
George Sithole ................................ 330
