Third International Conference on Nonlinear Problems in Aviation and Aerospace

VOLUME 1

Editor: Seenith Sivasundaram

Embry-Riddle Aeronautical University Daytona Beach, Florida, USA

Sponsored by

International Federation of Nonlinear Analysts International Federation of Information Processing Institute of Electrical and Electronic Engineers Inc. American Institute of Aeronautics and Astronautics Embry-Riddle Aeronautical University

European Conference Publications

Contents – ICNPAA 2000

Volume 1

Preface	ix
An Implicit Local Time Stepping Algorithm for Calculating Accurate Unsteady Solutions Kiran Kumar V. Adhikarala, Jianping Zhu, Edward Luke, Pasquale Cinnella	1
Comparison of Linear and Non-linear Mathematical Models Developed for Gas Turbine Control <i>Piroska Ailer</i>	11
The Aeroelastic Response of a 3-DOF Airfoil with Structural Nonlinearities Hekmat Alighanbari	21
AFT: Aeroelastic Flight Test: NASA – UCLA 1999 Oscar S. Alvarez-Salazar, A. V. Balakrishnan, Kenneth W. Iliff	31
Structure Preserving Stabilization of the Angular Velocity of a Rigid Body A. Astolfi, R. Ortega	47
Nonlinear Dynamics in the Attitude Control System of a Flexible Spacecraft Giulio Avanzini, Guido de Matteis	55
Mass Transport by Diffusion and Convection through Periodic Porous Media Diana Baltean, Agneta M. Balint, Adrian Neculae, St. Balint, Therese Levy	63
Numerical Modelization of Piezoelectric Thin Shells Michel Bernadou, Christophe Haenel	71
Some Qualitative properties of the Solutions of Boussinesq System S. Birauas, St. Balint	81
Application of Discrete Hierarchical Model to Competition Kbenesh W. Blayneh	87
Synthesis of Digital Regulators with Limited Word Length Nikolay N. Bondarenko	93
Intrinsic Geometric Shell Model for Structural-acoustic Stability John Cagnol, Irena Lasiecka, Catherine Lebiedzik, Jean-Paul Zolesio	97
Mathematical Foundation of Necessary Conditions for Convergence of B.P. Algorithm Wei Cao, James Burghart	109
On Optimal Control and Exact Controllability for Systems Governed by Stokes and Navier-Stokes Equations Y. Cao, M. Y. Hussaini	117
Hybrid Adaptive Control Domingos Salvio Carrijo, Waldemar de Castro Leite Filho	127
Automated Simulation of Aircraft and Robotic Dynamic Systems with a Fuzzy-fractal-genetic Approach Oscar Castillo, Patricia Melin	137
Intelligent Adaptive Control of Robotic Systems with a New Neuro-fuzzy-fractal Approach Oscar Castillo, Patricia Melin	147
Nonlinear Stability and Optimization Techniques Arthur G. Cave	155
Numerical Identification Techniques for Singular Neutral Functional Differential Equations Graciela Cerezo, Elena Fernandez, Terry Herdman, Janos Turi	163
Processing Results of Nonlinear Regression Experiments with Heterogeneous Objects Y. V. Chebrakov, V. V. Shmagin	169

The Stability of a Particular Motion of a Liquid-filled Spacecraft, in a Flight with Continuous Propulsion Dan Comanescu, Madeleine Pascal, Stefan Balint	179
Unsteady Three-dimensional Vortex Sheet Panel Solutions for Oscillating Wings John T. Conway, Fatih Tezok	187
Anticontrol of Chaotic Advection Yechiel Crispin	199
Computational Difficulties in High Angle of Attack Flow Prediction Russell M. Cummings	209
Finding the Dominant Rule when the Antecedants and the Consequents are Fuzzy Sets of Type II and the Inputs are Crisp or Fuzzy Elias Deeba, Andre de Korvin, Shohreh Hashemi, Chenyi Hu	219
On Extension of Boundary Integral Representations for Second Shape Derivatives Karsten Eppler	227
Mathematical Modeling of a Non-linear Damper Habib Eslami	235
Nonlinear Analysis of Unsymmetrical Composite Laminates under Cylindrical Bending with Arbitrary Angle of Orientation Habib Eslami, Eun Seon Park, Yumi Morisaki	239
Nonlinear Forced Vibrations of an Unsymmetrically Laminated Composite Beam Habib Eslami, Marie-Helene Pompei	249
Shape Differential Equation Solving Domain Large Evolution in a Visco-elastic Flow N. Gomez, J-P. Zolesio	257
Bifurcation Analysis for the Control of a Reentry Vehicle Norihiro Goto, Kazuya Matsumoto	267
Multichannel Kalman Filter based on Preliminary Data Compression for the Satellite Rotational Motion Parameters Identification Chingiz Hajiyev, Mumin Bahar	277
Evaluation of Laminar-turbulent Transition and Near Wall Turbulence Treatment Xiong He, Inanc Senocak, Wei Shyy, Siddarth Thakur, Sathya Gangadharan	285
Modal Approximations for the Dynamics of Shape Memory Alloys under External Thermomechanical Actions Terry Herdman, Pedro Morin, Ruben D. Spies	303
LMS and ARMA Processes Paul Hriljac	317
Solutions of the Nonlinear Wave Equation in the Case of a Finite Tube Victoria Iordan, Agneta M. Balint, Stefan Balint	323
Nonlinear Stochastic Differential Equations: Progress in Numerical Simulation and Optimal Estimation <i>N. Jeremy Kasdin</i>	331
Chaotic Attitude Motion of Symmetric Gyrostat via Melnikov's Integral Jinlu Kuang, Soonhie Tan, Kandian Arichandran	347
Dimension-independent Approximation by Neural Networks: How can we cope with the Curse of Dimensionality? Vera Kurkova, Marcello Sanguineti	355
Stability Theory Methods in Singular Problems of Mechanics (Theory and Applications) Lyudmila K. Kuzmina	365
Guaranteed Cost Control for Singularly Perturbed Systems under Controller Gain Perturbations Yan Li, Jian Liang Wang, Guang-Hong Yang	375
Simulation and Analysis of a Prestressed Panel Impacted by a Rectangular Plate Projectile Karen H. Lyle, Damodar R. Ambur	385
