## Contents

### Volume 1

**Cold Spray**

**Numerical and Microstructural Investigations of the Bonding Mechanisms in Cold Spraying** ............................................. 1  
F. Gaertner, C. Borchers, T. Stoltenhoff, H. Kreye, University of the Federal Armed Forces Hamburg, Germany  
H. Assadi, Tarbiat Modarres University, Tehran, Iran

**High Strain Rate Deformation Phenomena in Explosive Powder Compaction and Cold Gas Spraying** .......... 9  
T. Schmidt, F. Gaertner, H. Kreye, University of Federal Armed Forces, Hamburg, Germany

**Optimizing the Cold Spray Process**  ........................................................................................................................................... 19  
R. Dykhuizen, R. Neiser, Sandia National Laboratories, Albuquerque, New Mexico, USA

**Modeling of Particle-Substrate Adhesive Interaction Under the Cold Spray Process**  .............................................................. 27  
A. Papyrin, Ktech Corporation, Albuquerque, New Mexico, USA  
S.V. Klinkov, V.F. Kosarev, ITAM, Novosibirsk, Russia

**A Systematic Approach to Material Eligibility for the Cold Spray Process** ................................................................. 37  
J. Vlcek, L. Gimeno, H. Huber, EADS GmbH, Ottobrunn, Germany  
E. Lugscheider, Material Science Institute, University of Technology, Aachen, Germany

**Particle-Substrate Interactions in Cold Gas Dynamic Spraying** ................................................................................................. 45  
D. Zhang, P. Shipway, G. McCartney, University of Nottingham, Nottingham, United Kingdom

**Evaluation of Coatings Produced via Kinetic and Cold Spray Processes** ................................................................. 53  
J. Smith, T. Van Steenkiste, Delphi Research Labs, Shelby Township, Michigan, USA

**Potential Applications of Cold-Spray Technology in Automotive Manufacturing** ......................................................... 63  
R. McCune, Ford Motor Company, Dearborn, Michigan, USA

**Development of Cold Gas Sprayed Coatings**  ........................................................................................................................................... 71  
J. Voyer, T. Stoltenhoff, H. Kreye, University of the Federal Armed Forces, Hamburg, Germany

**Cold Spray Copper Application for Upper Stage Rocket Engine Design** ................................................................. 79  
J. Haynes, Pratt & Whitney Space Propulsion, Jupiter, Florida, USA  
J. Karthikeyan, ASB Industries, Inc., Barberton, Ohio, USA

**Kinetic Spray of Aluminum Metal Matrix Composites for Thermal Management Applications** ................................. 85  
D. Morelli, A. Elmoursi, T. Vansteenkiste, D. Gorkiewicz, B. Gillispie, Delphi Research Labs, Shelby, Michigan, USA

**Effect of Spray Angle on Deposition Characteristics in Cold Spraying** ................................................................. 91  
C.-J. Li, W.-Y. Li, Y.-Y. Wang, Xi'an Jiaotong University, Xi'an, Shaanxi, P.R.China  
H. Fukanuma, Plasma Giken Co., Saitama, Japan
Cold Spraying - Equipment and Application Trends.................................................................97
  W. Kroemmer, P. Heinrich, Linde AG, Unterschleissheim, Germany
  P. Richter, CGT GmbH, Ampfing, Germany

Automated Cold Spray System: Description of Equipment and Performance Data ....................103
  R. Blose, T. Roemer, D. Beatty, A. Mayer, A. Papyrin, Ktech Corporation, Albuquerque,
  New Mexico, USA

Helium Recovery: Design Considerations for Cold Spray Systems...........................................113
  S. Jaynes, F. Lauricella, Praxair Inc.

Cold Spray Technology: An Industrial Perspective.................................................................117
  K. Karthikeyan, C. Kay, ASB Industries, Inc, Barberton, Ohio, USA

Applications

Production Coating Cost Comparison.........................................................................................123
  P. Meyer, W. Rusch, Sulzer Metco (US) Inc., Westbury, New York, USA

Thermal Spray Solutions for Diesel Engine Piston Rings........................................................129
  C. Herbst-Dederichs, Federal Mogul Burscheid GmbH, Germany

Low-Cost High-Performance Coatings Produced by Internal Plasma Spraying for the Production of
  High Efficiency Engines........................................................................................................139
  G. Barbezat, Sulzer Metco AG, Wohlen, Switzerland

Development of Thermal Spray for Automotive Cylinder Bores...............................................143
  D. Cook, M. Zaluzec, Ford Motor Company, Dearborn, Michigan, USA
  K. Kowalsky, Flame Spray Industries, Port Washington, New York, USA

316L - An Alternative to NiCr Bondcoats for Cr2O3-Coatings on Anilox Rolls.............................149
  S. Hartmann, R. Winkler, F. Bueltmann, SLV Duisburg, NL der GSI mbH, Duisburg, Germany
  H. Burkard, Carpenter Powder Products GmbH, Düsseldorf, Germany

Plasma-Sprayed Ceramic Coatings for Molten Metal Environments..........................................153
  K. Hollis, M. Peters, B. Bartram, Los Alamos National Laboratory, Los Alamos, New Mexico, USA

Influence of Powder Size in Aluminum Oxide Coatings for Use in the Semiconductor Industry........159
  R. Gansert, Hardface Alloys, Inc., Santa Fe Springs, California, USA

Intermediate Temperature SOFC Based on Fully Integrated Plasma Sprayed Components...............163
  X.Q. Ma, S. Hui, Inframat Corporation, Farmington, Connecticut, USA
  Connecticut, USA

Investigation of the Photocatalytic Efficiencies of Plasma Sprayed TiO2-Fe3O4 Coatings ..............169
  F. Ye, A. Ohmori, Joining and Welding Research Institute, Osaka University, Osaka, Japan
  C.-J Li, Welding Research Institute, School of Mechanical Engineering, Xi'an Jiaotong University,
  Shaanxi, PR China

Protection of Titanium Alloy Surfaces by Thermal Spraying and Laser Treatment.....................175
  B. Wielage, A. Wank, H. Podlesak, K. Matthes, G. Kolbe, Chemnitz University of Technology,
  Chemnitz, Germany
  J. Wilden, Ilmenau Technical University, Ilmenau, Germany
Fabrication of TiO$_2$ Photocatalytic Coatings on PET by Thermal Spraying ........................................ 183
T. Kanazawa, A. Ohmori, Osaka University, Osaka, Japan

Photocatalytic Decomposition of Ammonia by Thermal Sprayed TiO$_2$ Coatings ........................................ 189
K. Nakade, A. Ohmori, Y. Yamamoto, Osaka University, Osaka, Japan

Optimization of Axial Injection Conditions in a Supersonic Induction Plasma Torch: Application to
SOFCs ........................................................................................................................................ 195
G. Renouard-Vallet, F. Gitzhofer, M. Boulos, CEA/CRTP/SPCTS, Sherbrooke, Canada
P. Fauchais, M. Vardelle, SPCTS, University of Limoges, Limoges, France
L. Bianchi, CEA le Ripault, Monts, France

Methodology for Meeting Standards and Environmental Requirements in Thermal Spraying,
Hardfacing and Sand Blasting ........................................................................................................ 203
M. Ducos, Consultant, Mornas, France
D. Duchateau, Cetim, Senlis, France

Erosion Resistance of Arc Spray Composite Coatings at High Temperature on Boiler Tubes of
Pulverized Coal Fired Power Station .......................................................................................... 211
J. Hu, X. Chen, S. Ma, C. Li, Q. Liu, H. Jiang, Surface Engineering Institute of CMES, Beijing, China

Corrosion & Wear Protective Coatings

Assessing the Feasibility of Using Diamond as a Reinforced Phase in Metal Matrix Composite
Coatings ......................................................................................................................................... 217
A. Neville, A. Richardson, J. Wilson, Heriot-Watt University, Edinburgh, Scotland

New Carbide Based Materials for HVOF Spraying ............................................................................. 227
S. Zimmermann, H. Keller, H.C. Starck GmbH, Laufenburg, Germany
G. Schwier, H.C. Starck GmbH, Goslar, Germany

Advanced Oxide Ceramic Coatings for Applications Demanding High Wear Resistance ......................... 233
K. Niemi, S. Rekola, Metso Paper Inc., Service, Jyväskylä, Finland
P. Vuoristo, J. Laurila, M. Vippola, T. Mäntylä, Tampere University of Technology, Tampere, Finland

Development and Application of WC-Cr$_3$C$_2$-Ni Coating with High Impact Resistance ......................... 237
Y. Itsukaichi, S. Osawa, Fujimi Incorporated, Kakamigahara, Gifu, Japan

Preparation and Characterization of Powders and Coatings Containing Solid Lubricants ......................... 243
U. Männikkö, A. Määtä, P. Vuoristo, T. Mäntylä, Tampere University of Technology, Tampere, Finland

Properties of Plasma and D-Gun Sprayed Metal-Matrix-Composite (MMC) Coatings Based on
Ceramic Hard Particle Reinforced Fe-, Ni-aluminide Matrix .................................................................. 249
Fr.-W. Bach, Z. Babiaik, T. Rothardt, Institute for Materials Science, Hannover, Germany
B. Formanek, Silesian Technical University, Katowice, Poland

Ceramic Coating of Alloy 625 Using Controlled Atmosphere Plasma Spraying for Sea Water
Corrosion Protection ......................................................................................................................... 255
V. Guipont, J. Fauvarque, S. Beauvais, M. Jeandin, Ecole Nationale Supérieure des Mines de Paris,
Evry, France
H. Le Guyader, H. Lepresle, A. Grolleau, DCN – Direction des Constructions Navales, Cherbourg,
France
Protection of Steel Components Against Marine Corrosion by Thermally Sprayed Anodic Coatings
M. Schiefler, Federal Center for Technological Education - Curitiba, PR, Brazil
F. Gärnter, J. Voyer, A. Kirsten, H. Kreye, University of the Federal Armed Forces - Hamburg, Germany
A. Buschinelli, Federal University of Santa Catarina - Florianopolis, SC, Brazil

Development and Implementation of HVOF WC/Co/Cr Coating as Alternative to Electrolytic Hard Chrome Plate in Landing Gear Applications Using Natural Gas as Fuel
D. Lee, Stellite Coatings, Goshen, Indiana, USA
R. Eybel, R. Evans, Messier-Dowty, Ajax, Ontario, Canada

Fatigue and Deformations of HVOF Sprayed WC-Co Coatings vs. Hard Chrome Plating
A. Ibrahim, Farmingdale State University, Farmingdale, New York, USA
C. Berndt, State University of NY at Stony Brook, Stony Brook, New York, USA

Optimization of Heat Transferring Components under Severe Wear Stress Conditions
B. Wielage, A. Wank, G. Reisel, Chemnitz University of Technology, Chemnitz, Germany
U. Gross, G. Barth, Freiberg University of Mining and Technology

Studies of Cavitation Resistant Thermally Sprayed and Welded Coatings
C. Lima, UNIMEP- Methodist University of Piracicaba, Santa Bárbara d'Oeste, São Paulo, Brazil
P. Marques, UFMG - Federal University of Minas Gerais, Belo Horizonte, MG, Brazil

Corrosion of WC-Co-Cr Cermet Coatings Using In-Situ Atomic Force Microscopy
V. Souza, A. Neville, Heriot-Watt University, Edinburgh, Scotland, United Kingdom

Erosion Behavior of WC-10Co-4Cr HVOF Coatings
J. Legoux, B. Arsenault, NRC Canada - Industrial Materials Institute, Boucherville, Québec, Canada
H. Hawthorne, NRC Canada- Innovation Center, Vancouver, British Columbia
J. Immarigeon, NRC Canada-Institute for Aerospace Research, Ottawa, Ontario, Canada

Surface Changes of Several Thermal Spray Coatings Abraded by a TiO₂ Slurry
A. Stavros, Praxair Surface Technologies, Inc., Indianapolis, Indiana, USA

Erosion and Abrasion Resistance of Boride and Carbide-Based Weld Overlays
F. Lapointe, S. Dallaire, Synthesarc, Boucherville, Quebec, Canada

Tribological Testing of High Velocity Oxy Fuel (HVOF) Sprayed Composite Cermet Coatings Using Ball on Disk Configuration
P. K. Aw, B. H. Tan, Singapore Institute of Manufacturing Technology, Singapore

Relation Between Abrasive Wear and Microstructure of HVOF Cermet Coatings
C.-J. Li, Y.-Y. Wang, G.-C. Ji, Xi'an Jiaotong University, Xi'an, Shaanxi, P.R. China
A. Ohmori, Osaka University, Ibaraki, Osaka, Japan

Design of HVOF Sprayed Tungsten Carbide Coatings for Best Sliding Wear and Fatigue Life Characteristics
R. Isaac, J. Savarimuthu, J. Shadley, E. Rybicki, The University of Tulsa, Tulsa, Oklahoma, USA
W. Emery, W. Kalivas, Southwest Aeroservice, Inc., Tulsa, Oklahoma, USA

Plasma Sprayed Stainless Steel Coatings Doped with Graphite Particles: Study of Their Dry Friction Coefficient Against 100Cr Steel Using a Pin on Disk Test
A. Harir, H. Ageorges, A. Grimaud, P. Fauchais, University of Limoges, France
F. Platon, ENSCI, Limoges, France
