Proceedings of The Sixth International Symposium on
ARTIFICIAL LIFE AND ROBOTICS
(AROB 6th '01)
for Cognitive and Behavioral Intelligent Artificial Liferobot

January 15-17, 2001
U-Port, Gotanda, Tokyo, JAPAN

Editors: Masanori Sugisaka and Hiroshi Tanaka
TECHNICAL PAPER INDEX

Plenary Lecture (Plenary Talks)

P1 Evolutionary Computing in Robotics

T. Fukuda (Nagoya University, Japan)

P2 E-CELL Project: Building Working Cells in Silico

M. Tomita (Keio University, Japan)

MA1: Intelligent Control and Modeling I (General Session)(Room Sakura)

MA1-1 Adaptive fuzzy controller for a class of uncertain operation systems

L. Siwek (Wroclaw University of Technology, Poland)

MA1-2 Design and optimization of fuzzy controllers based on the operator’s knowledge

H. Bae, S. Kim, M.H. Lee (Pusan National University, Korea)

MA1-3 Fuzzy identification of chaotic and complex behavior of human operator stabilizing an inverted pendulum on a cart

Y. Kawazoe (Saitama Institute of Technology, Japan)

MA1-4 Adaptive visual control of a sm5 robot with a hand-eye coordinated camera

H. D. Kim (Yenam Collage, Korea)
D. Y. Jeong, S. H. Han (Kyungnam University, Korea)
M. H. Lee (Pusan National University, Korea)
H. Hashimoto (University of Tokyo, Japan)

MA2: Brain Science and Complexity I (General Session)(Room Sakura)

MA2-1 Dynamical behaviors of extended Hogg-Huberman model

T. Tanaka, J. Shibata, K. Okuhara (Hiroshima Prefecture University, Japan)
M. Inoue (Kagoshima University, Japan)
MA2-2 *A chaos oscillator model of temporal-frequency characteristics on human visual search*

H. Mizuhara, T. Saito (Yamaguchi University, Japan)
J. L. Wu (Kagawa University, Japan)

MA2-3 *Analysis of small-world networks with high broadcast speed*

T. Maeshiro, K. Shimohara (ATR, Japan)
N. Ohi (Ryukoku University, Japan)

MA3: Artificial Life I (General Session) (Room Sakura)

MA3-1 *On multistage breeding processes*

T. Odanaka, T. Arimizu (Tokyo Metropolitan Institute of Technology, Japan)

MA3-2 *Sequential dynamical systems*

C. L. Barrett, H. Mortveit, C. M. Reidys (Los Alamos National Laboratory, USA)

MA3-3 *A computational model of the interaction between environmental dynamics and economic behaviors*

T. Yamaoka, T. Arita (Nagoya University, Japan)

MA3-4 *The problems under the dynamic environments need the consideration of the evaluation standard between the environments that are changing.*

K. Yamasaki (Tokyo University of Information Science, Japan)

offprint

MA3-5 *Stochastic Matching Agents*

G. Hernandez, F. Nino, Y. Garcia (National University of Columbia, Columbia)
K. Khouri (Northwest Mississippi Community College, USA)

MB1: The Significance and Meaning for Emergence (Organized Session) (Room Kaede)

MB1-2 *The third wholeness driving emergent property*

Y. G. Pegio (University of Kobe, Japan)

offprint
MB1-6 The physical constraint programming for real emergent system

K Hajiri (IBM Tokyo Research Laboratory, Japan)

MB2: Communications with Life-like Creatures and Robots (Organized Session) (Room Kaede)

MB2-1 What is the ultimate form of communications?

R. Nakatsu (ATR, Japan)

MB2-2 Muu: Embodied interface for social bonding

S. Shoji, N. Suzuki, M. Okada (ATR, Japan)

MB2-3 Robovie: Communication technologies for a Social Robot

M. Imai, T. Ono, H. Ishiguro (ATR, Japan)

MB2-4 Mixing with Aliens: Life and music on Gakki-mon Planet

R. Berry, P. Dahlstadt, C. Haw (ATR, Japan)

MB3: Neural Network, Recognition and Behavior Control (Organized Session) (Room Kaede)

MB3-1 Integration system for emotional recognition using visible and infrared face images and voice

T. Ikeda, Y. Yoshitomi, T. Kitazoe, S. I. Kim (Miyazaki University, Japan)

MB3-2 Fractal evaluations of fish school movements in simulations and real observations

T. Shinchi, T. Kitazoe, M. Tabuse (Miyazaki University, Japan)
H. Nishimura (Hyogo University, Japan)
N. Azuma (Hirosaki University, Japan)

MB3-3 Application of visual recognition neural network to hearing system for continuous speech

M. Funamori, T. Kitazoe, T. Ichiki (Miyazaki University, Japan)
MB3-4 *Evolutionary robot controllers with competitive and cooperative neural network*  
A. Todaka, T. Kitazoe, M. Tabuse, K. Sugihara (Miyazaki University, Japan)

MB3-5 *Control systems for real robot using classifier systems*  
T. Jinguuji, M. Tabuse, K. Sugihara (Miyazaki University, Japan)

**MC1: Genetic Algorithms and Evolutionary Computation I (General Session)**  
(Room Natsume)

**MC1-1 Evolutionary simulations of "SUMIWAKE" habitat segregation in a finite and heterogeneous ecosystem**  
T. Oohashi, T. Maekawa (ATR, Japan)  
O. Ueno, (Gifu University School of Medicine, Japan)  
N. Kawai, (Foundation for Advancement of International Science, Japan)  
E. Nishina, (National Institute of Multimedia Education, Japan)

※ **MC1-2 A macro-micro evolutionary algorithm: multi agents model for optimization**  
S. K. Oh, K. H. Seo, J. J. Lee (Korea Advanced Institute of Science and Technology, Korea)

※This paper would be changed from oral session to poster session.

**MC1-3 DNA computing for shortest path problem**  
N. Matsuura, M. Yamamoto, T. Shiba, A. Ohuchi (Hokkaido University, Japan)

**MC1-4 The optimization of neural network structure using genetic algorithm**  
M. Itou, M. Sugisaka (Oita University, Japan)

**MC2: Neural Networks I (General Session)(Room Natsume)**

**MC2-1 Self-learning probabilistic neural network hardware using reconfigurable LSIs**  
N. Aibe, M. Yasunaga (University of Tsukuba, Japan)  
I. Yoshihara (Miyazaki University, Japan)
MC2-2 New camera calibration method for stereo vision using neural network

Y. Kang, Y. Shin (Kwangju University, Korea)
N. Kim (Chosun College of Science & Technology, Korea)

MC2-3 Structure Minimization using impact factor in neural networks

K. H. Seo, J. S. Song, J. J. Lee (KAIST, Korea)

MC2-4 Dynamical associative memory model consists of structurally unstable oscillators and learning rule based on the internal state of the network

K. Kojima, K. Ito (Tokyo Institute of Technology, Japan)

MC3: Robotics I (General Session)(Room Natsume)

MC3-1 Network-based human assist robotic system using CORBA

S. Jia, K. Takase (University of Electro-Communications, Japan)

MC3-2 Cooperative behavior of multi robot system with simple interaction

K. Sugawara, (University of Electro-Communications, Japan)
M. Sano, (University of Tokyo, Japan)
I. Yoshihara, (Miyazaki University, Japan)
K. Abe, (Tohoku University, Japan)
T. Watanabe, (University of Electro-Communications, Japan)

MC3-3 Resolved motion rate control of a free-floating underwater robot with horizontal planar 2 link manipulator

S. Sagara, T. Danjoh, M. Tamura, R. Katoh (Kyushu Institute of Technology, Japan)

MC3-4 Legged robot control using multi-agent robot language

M. Obayashi, H. Nishiyama, F. Mizoguchi (Science University of Tokyo, Japan)

MC3-5 Control of manipulator mounted on floating underwater robot while maintaining vehicle attitude

M. Tamura, S. Sagara, R. Katoh (Kyushu Institute of Technology, Japan)
TB-1: Softcomputing in Robotic Intelligence (Organized Session)(Room Kaede)

TB-1-1 Achieving synergy through acquisition of human skill

T. Nanayakkara, K. Watanabe, K. Kiguchi, K. Izumi (Saga University, Japan) · 126

TB-1-2 On the fuzzy model-based control for an acrobot

K. Watanabe, K. Izumi, K. Kiguchi (Saga University, Japan) · 130

TB-1-3 Control for a rings gymnastic robot using fuzzy reasoning and genetic algorithms

T. Yamada, Keigo Watanabe, K. Kiguchi, K. Izumi (Saga University, Japan) · 134

TB-1-4 Fuzzy behavior-based control of mobile robot in dynamic environments using modules learned in static environments

K. Izumi, K. Watanabe, K. Kiguchi (Saga University, Japan) · 138

TB-1-5 Energy optimal gait analysis of quadruped robots

K. Kiguchi, Y. Kusumoto, K. Watanabe, K. Izumi (Saga University, Japan), T. Fukuda (Nagoya University, Japan) · 142

TB-2: Artificial Brain (Organized Session)(Room Kaede)

TB-2-1 MemeStorms: cellular working memory and dynamics of judgment

A. Buller, T. Chodakowski, K. Shimohara (ATR, Japan), L. Kaiser (Wroclaw University, Poland), A. Nowak (Warsaw University, Poland) · 146

TB-2-2 Dynamic fuzzy sets for cognitive modeling

A. Buller (ATR, Japan) · 150

TB-2-3 Suitable evolutionary strategies for large scale neural networks

P. Eggenberger (ATR, Japan) · 152

TB-2-4 Development of an artificial brain structure for the behavior control of the welfare liferobot

A. Loukianov, M. Sugisaka (Oita University, Japan) · 156
TB-3: Methodology of Emergent Synthesis (Organized Session)(Room Kaede)

TB3-1 *Methodology of emergent synthesis* ............................................................... 160
K. Ueda, H. Tamaki, I. Hatono (Kobe University, Japan)

TB3-2 *A coevolutionary approach to adaptive encoding for genetic algorithms* ...... 164
H. Murao, A. Yamamoto, H. Tamaki, S. Kitamura (Kobe University, Japan)

TB3-3 *Adaptive segmentation of the state space based on bayesian discrimination* in reinforcement learning ................................................................. 168
K. Yamada, K. Ohkura, K. Ueda (Kobe University, Japan)
M. Svinin (RIKEN, Japan)

TB3-4 *A Study on the multicriteria optimization support by using evolutionary algorithms* .................................................................................................. 172
T. Inamoto, K. V. Victor, H. Tamaki, S. Kitamura (Kobe University, Japan)

TB3-5 *An evolutionary approach to decentralized reinforcement learning for walking robots* .............................................................. 176
S. Ushio, K. Ueda (Kobe University, Japan)
M. Svinin, S. Hosoe (RIKEN, Japan)

TB3-6 *Emergence of supply chains by producers' selection of suppliers* ............ 180
D. Nakanishi, I. Hatono, K. Ueda (Kobe University, Japan)

TC1: Brain Science and Complexity II (General Session)(Room Natsume)

TC1-1 *Chaotic information maximization for blind source separation* ............... 184
W. Yu, H. Yokoi, Y. Kakazu (Hokkaido University. Japan)

TC1-2 *An experimental platform for analyzing interaction between human, machine and environment* .............................................. 188
K. Morikawa (Matsushita Electric Industrial Co., Ltd., Japan)
N. Oka (Matsushita Research Institute Tokyo, Inc., Japan)
S. Agarwal (University of California, San Diego)
TC1-3 Criticality of cooperative society
M. Kubo, H. Satoh, A. Namatame (National Defense Academy, Japan)

TC2: Intelligent Control and Modeling II (General Session)(Room Natsume)

TC2-1 Real time gaze control of active head-eye system without calibration
D. Y. Kim, J. R. Ryoo, H. K. Park, M. J. Chung
(KAIST, Korea)

TC2-2 Fast and stable learning in direct-vision-based reinforcement learning
K. Shibata, M. Sugisaka (Oita University, Japan)
K. Ito (Tokyo Institute of Technology, Japan)

TC2-3 Evolving neurofuzzy systems for system identification
Y. Chen, S. Kawaji (Kumamoto University, Japan)

TC2-4 Labeling Q-learning in hidden state environments
H. Y. Lee, K. Abe (Tohoku University, Japan)
H. Kamaya, (Hachinohe National College of Technology, Japan)

TC3: Artificial Life II (General Session)(Room Natsume)

TC3-1 The voice sound source separation based on the grouping in the frequency domain
K. Ninagawa, T. Umeyama, Y. Sagawa, N. Sugie (Meijo University, Japan)

TC3-2 Social evolution in imperfect world
H. Satoh, K. Uno, M. Kubo, A. Namatame (National Defense Academy, Japan)

TC3-3 Application of uncertain variables and logics to complex intelligent systems
Z. Bubnicki (Wroclaw University of Technology, Poland)
TD1: Mobiles Vehicles I (General Session)(Room Aoi)

TD1·1 Simulation of aerodynamics of micro air vehicles TH380 airfoils

H. Wu, Z. Zhou, S. Xiong, X. Wang, G. Bao, S. Li, Z. Li
(Tsinghua University, China) ······ 224

TD1·2 A study on the optimal design of a mobile robot based upon mobility and Recurrency

T. S. Jin, J. M. Lee (Pusan National University, Korea) ······ 228

TD1·3 Autonomous robot navigation and dynamical system tasks architecture

M. K. Habib (GMD, Japan) ······ 232

TD1·4 Supervised learning technique for a mobile robot controller in a visual line tracking task

A. Loukianov, M. Sugisaka (Oita University, Japan) ······ 238

TD2: Related fields I (General Session)(Room Aoi)

TD2·1 A resolution of the puzzle of the posinega switch mechanism in the globally coupled map lattice

T. Shimada, S. Tsukada (Meiji University, Japan) ······ 242

TD2·2 Classification and function prediction of the protein by using data compression

K. Sugawara, T. Watanabe (University of Electro-Communications, Japan) ······ 246

TD2·3 Spatial frequency specific visual adaptation may cause paradoxical transient improvements in visual acuity · experimental and simulation studies ·

Y. Nagai, T. Tanaka, N. Sugie (Meijo University, Japan)
K. Uchida, K. Ueda, H. Onodera (Nagoya Electric Works Co., Ltd., Japan) ······ 250

TD2·4 Teleoperation of CAN-based systems using a Java in the internet

J. W. Park, M. S. Jeong, J. M. Lee (Pusan National University, Korea) ······ 254

TD3: Robotics II (General Session)(Room Aoi)
TD3-1 Self-organization of behavior-based world model for autonomous mobile robot
S. Ishigaki, M. Ida, O. Katai (Kyoto University, Japan)

TD3-2 Behavior patterns emerging among mobile robots with a diversity of personalities Cooperating in collection cleaning-up tasks
E. Uozumi, Y. Sagawa, N. Sugie (Meijo University, Japan)

TD3-3 Adaptive and economic data representation in control architectures of autonomous real world robots
J. Fischer, R. Breithaupt, (GMD, Germany)
M. Bode (Westfaehlische Wilhelms University, Germany)

TD3-4 Implementation of a virtual manufacturing line for agile assembly
J. Y. Choi, S. M. Cha, S. H. Kim, J. I. Bae, M. H. Lee (Pusan National University, Korea)
H. C. Lee (Yangsan College, Korea)

TD3-5 Statistical analysis of subjective evaluations of mental commit robot
T. Shibata, T. Mitsui, K. Wada, L. Yan, K. Tanie (AIST, MITI, Japan)
A. Touda (Sankyo Aluminum Industry Co., Japan)

WA1: Artificial Life III (General Session) (Room Sakura)

WA1-1A framework of deliberative decision making in "conscious" software agents
R. Kondadadi, S. Franklin (University of Memphis, USA)

WA1-2 Object recognition using the stereo vision for underwater robots
H. Tanaka, E. Shimizu, M. Ito (Tokyo University of Mercantile Marine, Japan)

WA1-3 Humanized robot (Hubot) with K-Artificial brain
Y. G. Zhang (Academia Sinica, China)
M. Sugisaka (Oita University, Japan)

WA1-4 Investigation summary of physiological and psychological influence of animals on people
K. Wada (University of Tsukuba, Japan)
T. Shibata, T. Mitsui, L. Yan, K. Tanie (AIST, MITI, Japan)
