Proceedings of The Seventh International Symposium on

ARTIFICIAL LIFE AND ROBOTICS

(AROB 7th '02)

for Information Technology

January 16-18, 2002
B-Con Plaza, Beppu, Oita, Japan

Editors: Masanori Sugisaka and Hiroshi Tanaka
TECHNICAL PAPER INDEX

January 16 (Wednesday)

Room D

11:00~12:00 PT-1 Plenary Talk1
Chair H. Tanaka

PT-1 Advances in multi-robot systems
   L. E. Parker (Oak Ridge National Laboratory, USA)

January 17 (Thursday)

11:00~12:00 PT-2 Plenary Talk2
Chair M. Sugisaka

PT-2 Interaction and Intelligence
   H. Hashimoto (The University of Tokyo, Japan)

January 16 (Wednesday)

8:00~10:40 WS1 Workshop 1

WS1-1 Constructing artificial life in the laboratory (offprint)
   S. Rasmussen (Los Alamos National Laboratory and Santa Fe Institute,
   USA)

WS1-2 The inside story on systems, minds and mechanisms
   J. Casti (Technical University of Vienna, Austria, and Santa Fe Institute,
   USA)

January 17 (Thursday)

9:00~10:20 WS2 Workshop 2

WS2 Quantifying Darwinism: methods for measuring adaptive innovations in (offprint)
   artificial and natural evolving systems
   M. Bedau (Reed College and University of Oklahoma, USA)
January 16 (Wednesday)

Room A

9:00~10:30 GS1 Intelligent control and modeling 1
Chair: Y. Zhang

GS1-1 Mobile robots' intelligent control in autonomous decentralized FMS
H. Yamamoto (Gifu University, Japan)
Y. Tsujimoto (Wakayama University, Japan) 30

GS1-2 Modeling of motor control on manual tracking for developing hand
movement compensation technique
T. Sugi, M. Nakamura (Saga University, Japan)
J. Ide (Seinan Gakuin University, Japan)
H. Shibasaki (Kyoto University, Japan) 34

GS1-3 Motor control system with skill by construction of internal model
K. Okuhara, T. Matsui, T. Tanaka (Hiroshima Prefectural University, Japan) 38

GS1-4 Direct-Vision-based reinforcement learning in a real mobile robot
M. Iida, M. Sugisaka, K. Shibata (Oita University, Japan) 42

GS1-5 Effectiveness of sensory motion in the learning of capturing task of a
moving object
S. Maehara, M. Sugisaka, K. Shibata (Oita University, Japan) 46

GS1-6 Knowledge-based unmanned automation and control systems for the SBR
wastewater treatment process
H. Bae, J. R. Jung, S. Kim, M. H. Lee, C. W. Kim (Pusan National University, Korea) 50

13:00~14:15 S1 Biological complexity: from neural network to genetic
network
Chair: S. Kumagai (Osaka University, Japan)
Co-Chair: S. Doi (Osaka University, Japan)

S1-1 Frequency variability of neural rhythm in a small network of pacemaker
neurons
K. Sugimoto, Y. Nii, S. Doi, S. Kumagai (Osaka University, Japan) 54

S1-2 Stability and bifurcation analysis of robust circadian oscillators
T. Kobayashi, K. Aihara (The University of Tokyo, Japan)
L. Chen (Osaka Sangyo University, Japan) 58

S1-3 Pulse-type hardware chaotic neuron model constituting from CMOS
processing
62
S1-4 A design method of model gene networks
N. Ichinose, K. Aihara (The University of Tokyo, Japan)  

S1-5 A genetic network model on selective expressions
Y. Morishita, K. Aihara (The University of Tokyo, Japan)

14:15~15:00 GS5 Complexity
Chair: A. Dorin

GS5-1 A study on the predictability of high-frequency financial data
M. Tanaka-Yamawaki (Miyazaki University, Japan)

GS5-2 Does information flow in high-frequency financial data as energy does in turbulence?
M. Tanaka-Yamawaki, T. Itabashi, S. Komaki (Miyazaki University, Japan)

GS5-3 Complexity science for the design of intelligent geometry compressors for jet aircraft engines
J. Johnson, A. L. Smith, P. Wiese (The Open University, UK)

15:10~16:10 GS8 Artificial brain research & Artificial intelligence
Chair: H. Tanaka

GS8-1 3d position analysis and real time transportation of an object using image process
D. Y. Lee, M. H. Lee (Pusan National University, Korea)
J. I. Bae (Pukyung National University, Korea)
S. K. Kim (Samsung Electronic Co. Ltd., Korea)

GS8-2 Might we train an artificial brain as a baby?
Y. Zhang (Academia Sinica, Korea)
M. Sugisaka (Oita University, Japan)

GS8-3 Application of uncertain variables for a class of intelligent knowledge-based assembly systems
Z. Bubnicki (Wroclaw University of Technology, Poland)

16:10~17:25 S4 Nonlinear neurodynamics : analysis and application
Chair: K. Aihara
Co-Chair: H. Suzuki

S4-1 Grazing bifurcation and mode-locking in reconstructing chaotic dynamics with leaky integrate-and-fire model
Y. Ono, H. Suzuki, K. Aihara (The University of Tokyo, Japan)
J. Murakami, T. Shimozawa (Hokkaido University, Japan)
S4-2 Dimension analysis of the Hodgkin-Huxley equations with noise: effect of random noise on chaos
H. Tanaka (CREST, Japan Science and Technology Co., Japan)
K. Aihara (The University of Tokyo, Japan)

S4-3 Statistical analysis on BVP equations stimulated by white, colored and chaotic noises
R. Hosaka, Y. Sakai, T. Ikeguchi, S. Yoshizawa (Saitama University, Japan)

S4-4 Symbolic dynamics of bimodal maps and homomorphism
K. Fukuda, K. Aihara (The University of Tokyo, Japan)

S4-5 Tabu search for traveling salesman problems and its extension to chaotic neurodynamical search
M. Hasegawa (Communications Research Laboratory, Japan)
T. Ikeguchi (Saitama University, Japan)
K. Aihara (The University of Tokyo, Japan)

Room B

9:00~10:30 GS2 Artificial life 1
Chair: S. Rasmussen

GS2-1 Cascade process in the transient behavior of the "game of life"
S. Ninagawa (Kanazawa Institute of Technology, Japan)

GS2-2 Cellular automata modeling in edge recognition
C. Yang, H. Ye, G. Z. Wang (Tsinghua University, P. R. China)

GS2-3 A performance analysis of a mobile anti-virus system
T. Okamoto, Y. Ishida (Toyohashi University of Technology, Japan)

GS2-4 Development of simulation system for artificial life
N. Tanaka, H. Kanoh (Meiji University, Japan)

GS2-5 Emergent function as rapid changing the foraging route formation by ants pheromone maker
Y. Yonezawa (Ibaraki University, Japan)
H. Matsuda (Furukawa Denki Kogyo, LTD, Japan)

GS2-6 A method to correct the distortion of the projector using an artificial life type of function discovery system
K. Yamashita, S. Serikawa, T. Shimomura (Kyushu Institute of Technology, Japan)

13:00~14:15 S2 Complex neural systems
Chair: N. Homma
Co-Chair: K. Abe
S2-1 Correlation Functions in Nonlinear Neural Networks
N. Ishii, M. Nakamura, M. Ohta (Nagoya Institute of Technology, Japan) 148

S2-2 Dynamics of a recurrent neural network acquired through the learning of a context-based attention task
K. Shibata, M. Sugisaka (Oita University, Japan) 152

S2-3 Learning method by a statistical approximation for simultaneous recurrent networks
M. Sakai, N. Homma, K. Abe (Tohoku University, Japan) 156

S2-4 A study of improvement in robustness of sensor information for autonomous robots
H. Takeuchi, N. Ishii (Nagoya Institute of Technology, Japan)
K. Yamauchi (Hokkaido University, Japan) 161

S2-5 Superimposing neural learning by dynamic and spatial changing weights
N. Homma (Tohoku University, Japan)
M. M. Gupta (University of Saskatchewan, Canada) 165

14:15~15:00 GS6 Artificial life 2
Chair: D. Green

GS6-1 Analysis of transient change in bio reactive rate constants - introduction of method by zhou and szabo -
H. Hirayama (Asahikawa medical College, Japan)
Y. Okita (Shizuoka University, Japan) 169

GS6-2 Reaction field tensor analysis for a bio molecular particle
H. Hirayama (Asahikawa medical College, Japan)
Y. Okita (Shizuoka University, Japan) 171

GS6-3 Several information space conditions for the evolution of complex forms of life
H. Suzuki (ATR International, Japan)
N. Ono (Kyoto University, Japan) 175

15:10~16:10 S3 Machine learning
Chair: S. Kawata
Co-Chair: K. Miyazaki

S3-1 Learning robust policies for uncertain and stochastic multi-agent domains
S. Arai, K. Sycara (Carnegie Mellon University, USA)
K. Miyazaki (National Institution for Academic Degrees, Japan) 179

S3-2 Reinforcement learning in 2-players games
K. Miyazaki (National Institution for Academic Degrees, Japan)
S. Tsuboi (Toshiba Co., Japan)
S. Kobayashi (Tokyo Institute of Technology, Japan) 183
S3-3 Evolutionary reinforcement learning for pursuit game
N. Okahara, T. Tateyama, S. Kawata, T. Oguchi (Tokyo Metropolitan University, Japan)

S3-4 A teaching method by using self-organizing map for reinforcement learning
T. Tateyama, S. Kawata, T. Oguchi (Tokyo Metropolitan University, Japan)

16:10~17:25 GS10 Artificial life 3 & Innovative computations
Chair: C. Taylor

GS10-1 Changeable graphical images of 3-d systems and means of work with them (offprint)†195
in machines
H. Astrowskaja, S. Novikava, K. Miatliuk, P. Buka (The Institute of Mathematics & Cybernetics, Belarus)

GS10-2 A review of identification methods applicable to artificial life and robotics systems
W. R. Wells (University of Nevada-Las Vegas, USA)

GS10-3 Life-based paradigm in system design
S-B Ko (Chonan National Technical College, Korea)
G-Y Lim (Hanbat National University, Korea)

GS10-4 A stochastic model on lattice space and antigenic diversity threshold†198
H. Ueda, Y. Ishida (Toyohashi University of Technology, Japan)

Room C

9:00~10:30 GS3 Robotics 1
Chair: P. Sapaty

GS3-1 Development of basic structure for an exoskeleton cyborg system
T. Onishi (Tsuyama N.C.T., Japan)
T. Arai, K. Inoue, Y. Mae (Osaka University, Japan)

GS3-2 Physically grounding the lexical semantics of words in a robot visual perception
N. Bredeche, Y. Zucker (University Pierre & Marie Curie, France)

GS3-3 Effectiveness of simplified geometric models in planning using manipulation skills
A. Nakamura, T. Suehiro (AIST, Japan)

GS3-4 The influence of counterbalances on the dissipated energy of a vertically articulated robot manipulator
J. Amano (Matsue National College of Technology, Japan)
T. Izumi (Shimane University, Japan)

GS3-5 Robotic cane for blind travelers based on interactive technology paradigm (offprint)†

P – 16
I. Shim, J. Yoon (Pusan National University, Korea)

GS3-6 Resolved acceleration control of an underwater robot with vertical planar 2-link manipulator
S. Yamada, S. Sagara (Kyushu Institute of Technology, Japan)

13:00~14:00 GS4 Mobile vehicle 1
Chair: M. H. Lee

GS4-1 Improvement of the precision of the gradient method and object tracking using optical flow
M. Sugisaka, S. Sato (Oita University, Japan)

GS4-2 Obstacle avoidance in the mobile robot using the CCD camera
M. Sugisaka, T. Maeyama (Oita University, Japan)

GS4-3 Safe and efficient navigation for an intelligent wheelchair robot with human-robot interaction
I. Moon, S. Joung (Yonsei University, Korea)

GS4-4 Obstacle avoidance algorithm for visual navigation using ultrasonic sensors and a CCD camera
S. H. Choi, I. M. Kim, T. S. Jin, J. M. Lee (Pusan National University, Korea)

14:00~15:00 GS7 Mobile vehicle 2
Chair: Z. Bubnicki

GS7-1 Causality-driven motion intelligence of free-wheeled mobile manipulator to ride over waved road
A. Tamamura, M. Minami, T. Asakura (Fukui University, Japan)

GS7-2 Concurrent map building and localization using the quantification in the mobile robot navigation
K. S. Yun, J. W. Park, J. M. Lee (Pusan National University, Korea)

GS7-3 Map building for mobile robots with ultrasonic sensors using neural networks
C. H. Kim, J. J. Lee (Korea Advanced Institute of Science and Technology, KAIST, Korea)

GS7-4 Study on calibration of stereo cameras for a mobile robot prototype
J. Wang, M. Sugisaka (Oita University, Japan)

15:10~16:10 GS9 Mobile vehicle 3 & Micro-machines
Chair: G. James

GS9-1 A selective vision and landmark based approach to improve the efficiency probabilistic localization
A. A. Loukianov, M. Sugisaka (Oita University, Japan)

GS9-2 Colour-based landmark tracking for use in a mobile robot indoor navigation
M. Sugisaka, R. Chen (Oita University, Japan) 267

GS9-3 Solving problems of noise and uneven illumination for line navigating visual mobile robot duality in multi-edge detection and texture analysis
X. Wang, M. Sugisaka (Oita University, Japan) 271

GS9-4 Experimental study of femoral canal shaping by Super-broach, a femur mounted mini robot
H. C. Shin, Y. B. Park, Y. S. Yoon (Korea Advanced Institute of Science and Technology, KAIST, Korea)
A. Hodgson (University of British Columbia, Canada) 275

16:10~17:40 GS11 Genetic algorithms
Chair: G. Wang

GS11-1 Improving the performance of multi-objective genetic local search algorithms
H. Ishibuchi, T. Yoshida (Osaka Prefecture University, Japan) 278

GS11-2 A study on several variants of cellular genetic algorithms
T. Nakashima, T. Ariyama, H. Ishibuchi (Osaka Prefecture University, Japan) 282

GS11-3 An analysis on the efficiency and complexity of genetic algorithms
S. Wang, J. Wang (Tsinghua University, P. R. China) 286

GS11-4 Efficient numerical optimization technique based on real-coded genetic algorithm for inverse problem
T. Ueda, M. Okamoto (Kyushu University, Japan)
N. Koga (Kyushu Institute of Technology, Japan)
I. Ono (Tokushima University, Japan) 290

GS11-5 Improvement of the efficiency of distributed GA
M. Sugisaka, K. Mori (Oita University, Japan) 294

January 17 (Thursday)

Room A

9:00~10:45 S5 The origin and evolution of life & Interaction and intelligence
Chair: M. Bedau
Chair: H. Hashimoto

S5-1 Bridging nonliving and living matter (offprint)
S. Rasmussen (Los Alamos National Laboratory, USA) 298
S5·2 An origin of combinatorial complexity in replicator networks
   T. Ikegami (University of Tokyo, Japan) ........................................ 300

S5·3 Quantifying the environment for adaptation
   M. Bedau (Reed College and University of Oklahoma, USA) ............. 302

S5·4 A framework of evolvable systems and measures for intelligent agents
   S. I. Lee, S. B. Cho (Yonsei University, Korea) .............................. 306

S5·5 Evaluation of CCD camera arrangement for positioning system
   in intelligent space
   T. Akiyama, J. H. Lee, H. Hashimoto (The University of Tokyo, Japan) 310

S5·6 Examination of change of street reaction in uninary test between before
   and after introduction of mental commit robot to elder people at an elderly
   institution
   T. Saito, T. Shibata (AIST, Japan)
   K. Wada (Tukuba University, Japan)
   K. Tanie (AIST, Japan) ..................................................................... 316

S5·7 Human centered interface at cyber-agent system
   T. Yamaguchi, T. Yoshifuji, F. Harashima
   (Tokyo Metropolitan Institute of Technology, Japan) ...................... 320

13:00~14:15 S6 Dynamical networks
   Chair: Y. Suzuki
   Co-Chair: H. Tanaka

S6·1 Self-rewiring network based on an artificial chemistry
   Y. Suzuki, H. Tanaka (Tokyo Med. and Dent. University, Japan) .... 324

S6·2 Network structure of genetic codes
   T. Maeshiro (ATR Human Information Science Lab, Japan) ............ 328

S6·3 Diffusion property of dynamically generated scale-free networks
   Y. Hayashi (Japan Advanced Institute of Science and Technology, Japan) ......................................................... 332

S6·4 Wealth distribution in complex networks
   W. Souma (ATR International, Japan)
   Y. Fujiwara (Keihanna Research Center CRL, Japan)
   H. Aoyama (Kyoto University, Japan) .............................................. 336

S6·5 Network of words
   Y. Fujiwara (Keihanna Research Center CRL, Japan)
   Y. Suzuki (Tokyo Medical and Dental University, Japan)
   T. Morioka (Kyoto University, Japan) ............................................. 340

14:30~15:45 S8 Complex dynamics in recurrent neural networks
Chair: N. Homma  
Co-Chair: K. Gohara

S8-1 Memory dynamics of associative conditioning in terrestrial mollusk  
M. Yano, Y. Makino, H. Miura, H. Makinae (Tohoku University, Japan)  

S8-2 Generalization and spatio-temporal perception  
T. Ikegami (The University of Tokyo, Japan)  

S8-3 Fractals in neurodynamics -from hybrid dynamical systems point of view  
K. Gohara (Hokkaido University, Japan)  

S8-4 Speech recognition using pulse coupled neural networks with a radial basis function  
T. Sugiyama, N. Homma, K. Abe (Tohoku University, Japan)  

S8-5 The level organization by "forwarding forward models": from robot experiments  
J. Tani (RIKEN, Japan)  

15:45~17:00 GS17 Micro-robot world cup soccer tournament & Related fields

Chair: A. Hirst

GS17-1 Adaptive mediation based modular Q-Learning(AMMQL) for agents dynamic positioning in robot soccer simulation  
K. D. Kwon, H. B. Kim, D. W. Nam I. C. Kim (Kyonggi University, Korea)  

GS17-2 What is the best environment-language for teaching robotics using Lego Mind Storms ?  
A. Hirst, J. Johnson, M. Petre, B. A. Price, M. Richard (The Open University, UK)  

GS17-3 Improved performance from collaborating robots  
J. Johnson, M. Rooker (The Open University, UK)  

GS17-4 The switched reluctance motor's encoder for the tank's cannon breech automation system  

GS17-5 Improved performance of SVPWM inverter based on noval dead time (offprint) and voltage drop compensation  
D. H. Lee, Y. J. Lee (Pusan National University, Korea)  

Room B

9:00~10:45 GS12 Fuzzy control & Evolutionary computations
