Tuesday 3 June 2003

Velocities

P001  Velocity Analysis with a Two-Term Non-Hyperbolic Traveltime Approximation
      E. Causse* & B. Arntsen

P002  Optimal Temporal Frequency Selection for the Seismic Waveform Inversion in the Frequency-
      Space Domain
      T. Yokota* & J. Matsushima

P003  Determination of Weak Anisotropy Parameters Using Traveltimes and Polarisations
      S.M. Soukina*, D. Gajewski & B.M. Kashtan

P004  An Integrated Data-Driven Approach to Seismic Reflection Imaging
      T. Hertweck*, C. Jäger, J. Mann & E. Duveneck

P005  On the Meaning of Kirchhoff Pre-Stack Time Migration Velocities
      E. Robein*

P006  Geometrical-Spreading and Moveout Corrections of Anisotropic Data in the Tau-P Domain
      M. Van der Baan*

P007  Pulse Stretch Effects in the Context of Data-Driven Imaging Methods
      J. Mann* & G. Höcht

P008  Converted-Wave Velocity Analysis in Terms of P-Q Wavefront Attributes
      A. Druzhinin* & X-Y. Li

Rock Physics – Theory

P011  Accurate Anisotropic Finite-Difference Modeling Using the Rotated Staggered Grid
      E.H. Saenger* & T. Bohlen

P012  Seismic Scattering Theory Applied to AVO and Seismic-Well Correlations
      F.D. Lane* & D.J. Foster

P013  Velocity Modelling of Sandstones under Different Conditions of Wettability
      P.R. Domnesteau*, J. Sothcott, S.E. Johnstad, T.R. Astin & C. McCann

P014  Connection between Poisson Ratio and Microstructure in Microinhomogeneous Media
      E.B. Sibiriakov*

P015  Frequency-Power-Law Attenuation – Scattering by Fractal Inclusions
      V. Rok, A. Druzhinin*, J.R. Evans & X-Y. Li

P016  Wave Decomposition for Poroelastic Media and Algorithm for Reflection Coefficients
      F. Borocin*, S. Zatsepin & D. Taylor

P017  Wave Propagation in Cracked Media – Effects of Different Parallel Crack Arrangements on
      Effective Velocities
      B. Orlowsky*, E.H. Saenger & Y. Guéguen

P018  Fluid Flow Simulation in a Fractured Medium – Effects of Pore Pressure Changes on Seismic
      Waves
      S. Vlastos*, M. Schoenberg, B. Maillot, I. Main, E. Liu & X-Y. Li
Petroleum Systems

P021 Impact of Triggering Mechanism in the Deposit Geometry and Dynamics of Turbidity Currents

P022 Conditions of Forming Stratigraphically Trapped Reservoirs Clinoform Complex, West Siberia
M.D. Belonin, V.V. Shimansky*, A.M. Brekhuntsev, M.I. Kos & N.P. Deshenia

P023 Oil-Bearing Complexes and Stratigraphic Traps in the Sedimentary Cover of the South Caspian Megabasin
P.Z. Mammadov*

P024 Geological Model of the Kikinda-B Hydrocarbon Complex (Pannonian Basin, Yugoslavia)
D. Popovici*

P025 Assessment of Sandstone Rocks Compaction Due to Lithogenesis, Bahar Area, Caspian Shelf
L.A. Sadikh-Zadeh*

P026 Estimation of the Various Source Rocks Contribution in Oil Pools Formation
A.A. Feyzullayev* & E.A. Aliyeva

P027 Integrated Geochemical Analysis of Oils — Application to Reservoir Infill on Caspian Shelf
D.A. Huseynov*

P028 Petroleum Systems of Tersk-Caspian Foredeep and South Eastern Caucasus Periclinal Troughs
A. Suleymanov* & E. Alieva

Reservoir Characterisation

P031 Equiprobable Simulations of Seismic Heterogeneity Cubes
M.G. Imhof* & W.C. Kempner

P032 Palaeokarst Recognition & 3D Distribution — New Insights from the Upper Palaeozoic, Loppa High, Barents Sea

P033 Sesimic Fluid-Mobility-Analysis — A New Dhi Technique
M. Pastori* & P. Storer

P034 Reservoir Architecture Model for Heterolithic Tidal Deposits
M.E. Donselaar* & C.R. Geel

D05 Classification of Fault Interpretation with Respect to Well Planning at the Eldfisk Field

P036 From Isolated Pinnacles to Polygonal Networks — 3D Seismic Sheds New Light on Upper Palaeozoic Carbonate Buildups, Barents Sea
G. Elvebakk*, D.W. Hunt, L. Stemmerik, L.W. Kuilman & K. Hogstad

P037 Integrated Reservoir Characterization, Thick-Bedded Turbidites, Fram Vest Field, North Sea
O.M. Badescu*, M. Whitaker, M. Velvin & M. Skaug

P038 Sensitivity Study of Facies Based Geopseudo Two-Phase Upscaling in a Shallow Marine Environment
K.D. Stephen*, C. Yang, J.N. Carter, J.D. Matthews & J. Howell

P039 Lithology and Gas Detection by AVO Crossplot Polarization and Intercept Inversion
A. Kassouni* & H. Djaffer
Velocities & Imaging – Ray Theory

P041 Wavefront-Oriented Ray Tracing in 3D Anisotropic Media
T. Kaschwich* & D. Gajewski

P042 Viscoelastic Inversion of Real Data in the Class of Media with Power-Law Attenuation
A. Ribodetti* & A. Hanyga

P043 The Amplitude Preserving Migration in Anisotropic Media and Sensitivity Analysis
D.A. Kiyashchenko*, B. Kashtan & R.-E. Plessix

P044 Comparison of Quasi-Isotropic Approximations of the Coupling Ray Theory in 1-D Model 'OTC'
P. Bulant* & L. Klimeš

P045 Errors Due to the Common Ray Approximations of the Coupling Ray Theory
L. Klimeš & P. Bulant*

P046 Local Two-Way Traveltime Approximations in 3-D Media
J. Mispel*, E. Iversen, V. Vinje, R. Laurain & I. Lecomte

P047 Application of Signal Based Ray Tracing Imagery in 2-D Complex Medium
W.O. Makinde*, M. Sartoretti, P. Thore & C. Revaux

P048 Detection of Caustics and Interpolation of Later-Arrival Traveltimes
C. Vanelle*, J. Dettmer & D. Gajewski

Non-Seismic for Hydrocarbons

P051 Magnetotelluric Soundings - A Tool for Detecting Deep Source Rocks in Northern Germany
N. Hoffmann* & H. Jodicke

P052 New Electrical Prospecting for Oil – Some Results
V.S. Mogilatov*, V.V. Potapov & S.A. Feofilov

P053 Mapping of Gas-Condensate Deposits at Western Kamchatka by Gravity Data
A.A. Chernov* & V.A. Boldyreva

P054 Resistivity Signature of Hydrocarbon Deposits – MT Surveys in Western Uzbekistan
O. Ingerov, L. Fox*, Y. Avram, T.L. Babajanov, M.D. Basov & A.B. Kocherov

P055 FZIP Study for Prospecting and Exploration of Hydrocarbon Deposits
I. Bagriy, V. Dem'yanchuk*, O. Somov & O. Soroka

E. Cauquil*, L. Stephane, R.A. George & J.-P. Shyu

P057 Use of AUVs for Detailed Deepwater Pipeline Route Planning – A Gulf of Mexico Case Study
N. Tootill*, M. Morrison, M. Bik, A. Hill & R. George

P058 A Sea Bed Loggin (SBL) Calibration Survey over the Ormen Lange Gas Field
Case Histories in Exploration

P061 North-European Platform bellow the Accretionary Prism of the Western Carpathians
I. Hrušecky*, L. Pospisil, V. Fejdi & D. Plašienka

P062 Seismic and Geological Model of Zone of Joint of Black Sea Basin and Southern Crimea
V.B. Piip* & A.P. Ermakov

P063 Imaging beneath Complex Structure in the Southern Iran
M.A. Riahi* & O. Aghaei

P064 Stratigraphic Interpretation Using Post Stack Seismic Inversion – Case Histories from Indian Basins

P065 Passive Seismic Tomography a Complementary Geophysical Method – Successful Case Study
N. Martakis*, A. Tselentis, S. Kapotas & E. Karageorgi

P066 Pitfalls in Interpretation – Volcanics from Seismic Images
P. Werner*

P067 Perspectives of Integration of Seismic and Geoelectrochemical Methods for Hydrocarbon Prognosis and Prospecting
N.A. Voroshilov*, A.D. Galperin, S.A. Veshev & V.D. Voronkov

P069 Seismo-Genetic Models to Interpret Self-Potentials Connected with 2002 Molise Earthquake, Italy
G. Finzi-Contini*

General Seismic Processing

P071 The Importance of Bandwidth in Seismic Cross Equalisation – Well Tie and Other Examples
R.E. White* & R. Simm

P072 Imaging Shallow Near-Surface Anomalies with High-Resolution Seismic Reflection Data – A Case Study, Saudi Arabia
A. Al-Ramadan* & H.A. Hussein

P073 An Interactive 3D Method for Resolving of Statics Anomalies Caused by Heterogeneous Permafrost
I.P. Korotkov*, V.S. Kozyrev & A.A. Zhukov

P074 Enhancing Seismic Images Using Nonlinear Anisotropic Diffusion
M.G. Imhof* & J.H. Queen

P075 Nonstretch NMO
H. Perroud & M. Tygel*

P076 Geophysical Signal Denoising Using Multiple Wavelet Stacking
L.C. Duval*

P077 Apparent Attenuation from Short-Period Multiples and Intrinsic Absorption in the Seismic Wavelet Model
A. Mateeva*, D. Hart & S. MacKay

P078 Suppression of Near-Field Scattered Surface Waves
X.H. Campman*, K. van Wijk, J.A. Scales & G.C. Herman
### Wednesday 4 June 2003

#### Velocities & Imaging – Case Study

Acquisitions & Processing of Multicomponent Data

P101 Ekofisk VectorSeis® Test – Improvements in Vector Fidelity of 4C Seismic Data
G. Byeheyy*, C.K. Clausen & D.J. Tessman

P102 Calibrated Vector Fidelity and Coupling Matrix Measurements
F. Luc*, R. Dowle, P. Harvey & R. Khoo

P103 Wavefield Decomposition by 3-D/3-C Inversion Process in Tau-P Domain
J. Blanco* & G. Canadas

P104 S/N Enhancement of 3-C Data by ?-p Domain Wavefield Separation
A. Al-Anboori*, M. Van der Baan & M. Kendall

P105 Converted-Wave Travelt ime Equations in Layered Anisotropic Media – An Overview
X-Y. Li*, J. Yuanli & R. Bale

P106 Migration Velocity Analysis of C-Wave Using INMO-CIP Gathers of PKTM – A Case Study
H. Dai* & X-Y. Li

P107 3D Kirchhoff PS-Wave Prestack Time Migration for V(z) and VTI Media
C. Sun & R.D. Martinez*

P108 Post Stack Deghosting, Demultiple and Pre Stack Coherent Noise Attenuation
G. del Molino*, P. Terenghi, B. Boiardi & A. Mazzotti

Petroleum Systems

P111 Sediment Compation Trend in Rapidly Subsided Basins and Deeply Buried Reservoir Estimate
A.I. Aliyev*, E.A. Aliyev & R.K. Khayrulin

P112 Hydrocarbon Generation History of Triassic Sediments in the South Moesian Platform Margin
G.V. Georgiev & N.D. Botucharov*

P113 The Results of the Recent Petroleum Exploration Activities in the Polish Carpathian Foredeep
Z. Borys, K. Madej* & M. Myśliwiec

P114 New Hydrocarbon Play in the SW Margin of the Pannonian Basin, Croatia
S. Kolbah*, J. Buli?, D. Spani? & S. Grandi?
## Interpretations & Visualisation of Geodata

**P121** Low-Cost Interactive 3D Maps for Basin Exploration and Basin Modelling  
*J.D. van Wees*, R. Versseput, H.J. Simmelink & D. Garcia-Castellanos

**P122** Interpretation of Geological and Geophysical Data for Sedimentary Basin Model  
*L.P. Zabarinskaya*

## Multiwave & P-Wave AVO Analysis

**P123** Effects of Density and Velocity Changes on the Correlation of PP and PS Reflection Events  
*A. Vant* & R.J. Brown

**P124** Hydrocarbon Anomaly Discovery Using AVO Characteristics of P-SV Wave  
*Z. Hu*

**P125** Inverse Dinamic Problem for Thin-Layered Models by Multiwave AVO-Data  
*V.V. Bouzlokov* & V.I. Keller

**P126** Combining PP and PS Reflection Data – A Method for Lithology Identification  
*J.R. Carcuz* & *L.T. Ikelle*

**P127** Impedance-Type Approximations of the P-P Elastic Reflection Coefficient  
*L.T. Santos* & *M. Tygel*

**P128** The Effects of NMO Stretch on AVO Analysis  
*A.J. van Wijngaarden*

**P129** Time-Lapse Monitoring of Prestack Streamer Data from the Troll Field  
*J. Spetzler* & Ø. Kvam

## Risk Assessment

**P131** Characteristics of Reserve Growth in Oil Fields of the North Sea Graben Area  
*T.R. Klett* & D.L. Gautier
## Imaging

Case Histories in Exploration

S-A. Kristoffersen*, J. Moe, R.M. Pettersen & B. Kjølhamar

P162  Main Petroleum Objects of the Central Part Barents Region from Seismic Investigations
N.M. Ivanova*

P163  Deep Structure of the Mid-Norwegian Shelf — Insight from Potential Field Data
J.R. Skilbrei*, O. Olesen & P.T. Osmundsen

P164  Seismic and Geological Analysis of the Polish Rotliegend Basin in the Aspect of Hydrocarbons Discoveries
J. Zielinska-Pikulska* & L. Pikulski

Carbonates

P171  Petrophysical and Geochemical Variations within the Palaeozoic Dolomites from South-Estonian Boreholes
A. Shogenova*, A. Kleesment, A. Teedumäe, R. Einasto, R. Vaher, A. Jõeleht & V. Shogenov

P172  Prolific Hydrocarbon Traps in the Main Dolomite Porous Carbonate Slumps in Zechstein Basin
W. Gorska, M. Trela* & L. Pikulski

P173  From Low Quality Sections to Velocity Anomalies Characterization in Polish Zechstein Main Dolomite
P. Misiarz* & H. Jedrzejowska

P174  Hydrocarbon Potential of Recent and Cretaceous Carbonate Deposits of the Caspian Basin
G. Aliyev, E. Aliyeva & S. Veliyeva*

P175  Interpretation Driven 3D PSDM in Carbonates — A Case from the Barents Sea
J. Pajchel*, K. Hogstad, G. Elvebakk & A. Sagehaug

P176  Interval Velocity and Burial History Analysis of the Chalk, Netherlands Offshore
A.S. van der Molen* & T.E. Wong

P177  Chalk Structure Maps of the Central and Eastern North Sea
O.V. Vejbæk*, T. Bidstrup, P. Britze, M. Erlström, E.S. Rasmussen & U. Sivhed
Reservoir Monitoring & Management

P181 High Resolution (Semi-)Automatic Determination of Microseismic Event Locations
K. De Meersman*, M. van der Baan, J-M. Kendall & R.H. Jones

P182 Monitoring of Induced Microseismicity with a Vertical 1D Receiver Configuration
M. Roth*, V. Oye & H. Bungum

P183 Interpreted Warping for 4D Monitoring of Production-Induced Subsidence at Valhall
S.A. Hall*, C. MacBeth & O.I. Barkved

P184 Correcting for Source Bubble Time Variations in Time-Lapse Seismic
H. Wang* & M. Landrø

P185 Multicomponent Seismic Monitoring of a Miscible CO2 Flood, Weyburn Field, Canada
R.D. Benson* & T.L. Davis

P186 Permanent Downhole Seismic Sensors in Flowing Wells
P. Jaques, H. Ong, A. Jupe*, I. Brown & M. Janssens

P187 A Modeling Study on Seismic Data Regularisation for Time-Lapse Applications
M.A. Schonewille*

P188 Sparse-Spike Decomposition for Time-Lapse Cross-Calibration and Noise Reduction
A.L. Vesnaver*, J.J. Kim & R.A. Al-Mubarak

Multiples

P191 SRME Variations – Partial SRME and Hybrid SRME-Radon
P. Hugonnet* & P. Lecocq

P192 Attenuation of Free-Surface Multiples from Marine Pressure and Pressure Gradient

P193 Simultaneous Adaptive Least-Squares Subtraction of Multiples
R. Aláñi* & D.J. Verschuur
Near Surface Methods – Engineering

P201  Pulled Array Seismic (PAS) – A New Method for Shallow Reflection Seismic Data Acquisition
T. Vangkilde-Pedersen*, P. Skjellerup, J. Ringgaard & J.F. Jensen

P202  ISIS – Integrated Seismic Imaging System for the Geological Prediction ahead of Underground
Construction
G. Borm, R. Giese, C. Klose, S. Mielitz, P. Otto & T. Bohlen*

P203  Multichannel Analysis of Surface Wave and 2D Seismic Refraction Tomography – Vp and Vs
Estimation in Pyroclastic Soils
G. Bais*, P.P. Bruno, V. Di Fiore & A. Rapolla

P204  Integrated Investigation to Locate a Waste Disposal Area for Oil Drilling Products
G. Apostolopoulos*, K. Pavlopoulos, C. Antoniades, I. Louis & C. Vlachou

P205  Geophysical Investigations on a Rebuilt Dam after the August Flooding 2002 in Germany
T. Schicht* & O. Klippel

P206  Recovery of Near-Surface Cracked Areas by 3D Seismic Data
V.A. Pozdniakov*

P207  Estimation of Soils Stability for Coastal Structures by Near-Surface Seismic and CPT
V.P. Lisin* & L.D. Petuhov

P208  Mudslide Area and Moistening Zones Mapping with Geophysical Methods on the Slope of the
Dniper River in Kyiv
V.P. Bokovoy, S.P. Levashov, N.A. Yakymchuk, I.N. Korchagin & J.N. Yakymchuk*

Seismic Modeling

P211  Optimized 3D Finite Difference Modelling of Basaltic Region
L. Engell-Sørensen*

P212  3D Elastic Scattering by Near-Surface Heterogeneities
C.D. Riyanti* & G.C. Herman

P213  Computing the Elastic Scattering from Inclusions Using the 3-D MMP Method
M.G. Imhof*

P214  Numerical Simulation of 3D Seismic Waves Propagation
B. Mikhailenko & G. Reshetova*

P215  Interface Scattering of Seismic Wave Field from a 3D Random Interface
W. Makinde*, E. de Bazelaire & N. Favretto-Cristini

P216  Low Frequency Waves in Finely Layered Media
A. Stovas* & B. Amtsen

P217  Quantifying Seismic Scattering Attenuation in the (Un-)Saturated Wavefield Fluctuation Regime
T.M. Müller* & S.A. Shapiro

P218  Synthesis of the Reflection Response from the Transmission Response in the Presence of White
Noise Sources
D. Draganov*, K. Wapenaar & J. Thorbecke

EAGE 65th Conference & Exhibition — Stavanger, Norway, 2 - 5 June 2003

A. Shogenova*, A. Kleesment, A. Jõeleht, V. Shogenov & R. Vahe

Petrophysical Formation Evaluation

P261  The Interpretation of Well Log Data by Means of Float Encoded Genetic Algorithm  
P.N. Szabó*, M. Dobróka & L. Hursán

P262  A Fast and Direct Method of K-Phi Measurements on Drill Cuttings  
P. Egermann*, R. Lenormand, D. Longeron & C. Zarcone

P263  Some Aspects and Problems of Mature Oilfield Geological Reinterpretation  
B. Goricnik*, Z. Hernitz & N. Bokor

P264  Frequency-Dependent Anisotropy – Effects of Multi-Fracture Sets on Shear-Wave Polarizations  
E. Liu*, M. Chapman, J.H. Queen, S. Maultzsch & X.Y. Li

P265  Detection of Fractured Reservoirs on the Basis of Quasi-Anisotropy by Means of Conventional Sonic Logging  
V.Z. Koksharov*, Y.A. Nefyodkin & Y.A. Orlov
Fractured Reservoir Characterisation & Azimuthal Anisotropy

P271 In-Situ Stress State from Inversion of a New Elasto-Plastic Fracture Model
M. Belayneh* & B.S. Aadnoy

P272 Elasto-Plastic Anisotropic Modeling of 3D Stress-Dependent Fracturing and Pore Pressure
N.L. Baransky, I.A. Garagash, N.I. Kiryanova, A. Lowrie & E.A. Kozlov*

P273 Reservoir Characterisation and Modelling in a Fractured Upper Cambrian Quartzite Reservoir, Algeria
K.A. Foxford, J.C. Gutmanis*, M.M. Bowler, A. Lahmar & J.A. Lorsong

P274 Predicting Drilling Complications from Data on Near-Borehole Fracturing Acquired by SVSL

P275 Determination of Fracture Parameters from PM VSP Data
A.P. Sorokin* & G.V. Meged

P276 Reflection Coefficients for Isotropic-Fractured Interfaces
A. Grandi*, G. Bernasconi & G. Drufuca
