SEVENTH INTERNATIONAL CONFERENCE ON CONCRETE PAVEMENT

"The Use of Concrete In Developing Long-Lasting Pavement Solutions for the 21st Century"

Organized By:

International Society for Concrete Pavements

September 9-13, 2001

Disney’s Coronado Springs Resort
Lake Buena Vista, FL 32830

Volume 1 of 3
Volume 1

Session 1 – Analysis of Concrete Pavement Response to Environment, I
Moderator: Dan G. Zollinger, Texas A&M University, College Station, Texas, USA

*Environmental Influences on Warping and Curling of PCC Pavements*
Yingwu Fang, Law PCS, A Division of Law Engineering, Inc., USA ........................................... 1

*A Temperature and Moisture Module for Hydrating Portland Cement Concrete Pavements*
Jin-Hoon Jeong, Ligang Wang, and Dan Zollinger, Texas A&M University, USA ......................... 9

*Effects of Temperature and Moisture on the Response of Jointed Concrete Pavements*
Chetana Rao and Ernest Barenberg, University of Illinois, USA
Mark B. Snyder, Concrete Paving Association of Minnesota, USA
Sarah Schmidt, Design Engineer, Mark Thomas & Co., USA ...................................................... 23

*Back-Estimation of Slab Curling and Joint Stiffness*
Edward H. Guo, Galaxy Scientific Corporation, USA ................................................................. 39

Session 2 – Analysis of Concrete Pavement Response to Environment, II
Moderator: Dan G. Zollinger, Texas A&M University, College Station, Texas, USA

*Effects of Construction Curling on Concrete Pavement Behavior*
H. Thomas Yu, Applied Pavement Technology, Inc., USA
Lev Khazanovich, ERES Consultants, A Division of Applied Research Associates, Inc., USA ........ 55

*Diurnal Changes in Profile of Eleven Jointed PCC Pavements*
Steven M. Karamihas, University of Michigan, USA
Rohan W. Perera, Soil and Materials Engineers, Inc., USA
Thomas D. Gillespie, University of Michigan, USA
Starr D. Kohn, Soil and Materials Engineers, Inc., USA ............................................................ 69
Measurement and Analysis of Slab Curvature in JPC Pavements Using Profiling Technology
Dennis Sixbey and Mark Swanlund, Federal Highway Administration, USA
Nicolas Gagarin, Starodub, Inc., USA
James R. Mekemson, LENDIS Corporation, USA

Concrete Temperature Modeling and Strength Prediction Using Maturity Concepts in the FHWA HIPERPAV Software
J. Mauricio Ruiz, The Transtec Group, Inc., USA
Anton K. Schindler, University of Texas at Austin, USA
Robert O. Rasmussen, Patricia J. Nelson, and George K. Chang, The Transtec Group, Inc., USA

Session 3 – Concrete Pavement Design, I
Moderator: Kathleen T. Hall, ProTech Engineering, Santiago, Chile

Development and Calibration of a Mechanistic Design Procedure for Jointed Plain Concrete Pavements
Mark B. Snyder, Concrete Paving Association of Minnesota, USA
Shreenath Rao and John Hallin, ERES Consultants, A Division of Applied Research Associates, Inc., USA

A Mechanistically and Risk Based Design Method for Concrete Pavements in South Africa
Peter J. Strauss and M. Slavik, BKS Consulting Engineers, South Africa
B.D. Perrie, Cement and Concrete Institute, South Africa

Recent Developments in Australia in Concrete Pavement Thickness Design
George Vorobieff, Head to Head International Pty Ltd., Australia

Dynamic Analysis of Rigid Pavements with Different Subgrade Support Models
Karim Chatti and Taekuk Kim, Michigan State University, USA

Session 4 – Concrete Bases, Joint Sealants, and Curing, I
Moderator: Charles Scholer, Purdue University, West Lafayette, Indiana, USA

Sorptivity-Based Service Life Predictions for Concrete Pavements
Dale P. Bentz, Mark A. Ehlen, Chiara F. Ferraris, and Edward J. Garboczi, National Institute of Standards and Technology, USA

Permanent Deformation of Base Course Under Concrete Pavement and Its Effect to Fatigue Failure
Yasushi Takeuchi and Masashi Koyanagawa, Tokyo University of Agriculture, Japan
Tatsuo Nishizawa, Ishikawa National College of Technology, Japan
Makoto Kimura, Ministry of Construction, Japan

Identifying Combinations of Materials that Lead to Premature Deterioration in Concrete Pavements
Rachel J. Detwiler, Mohamad A. Nagi, and Sankar Bhattacharja, Construction Technology Laboratories, Inc., USA
Using Maturity Concepts to Determine Strength of Rapid Setting Hydraulic Cement Concrete
Jon I. Mullarky and Leif G. Wathne, SaLUT, Inc., USA

Session 5 – Concrete Pavement Design, II
Moderator: Tom Kazmierowski, Ministry of Transportation, Ontario, Canada

Modeling Transverse Joint Spalling for Jointed Plain Concrete Pavements
Leslie Titus-Glover, Michael I. Darter, and Jagannath Mallela, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Peter Kopac, Federal Highway Administration, USA

Characterization of Mechanical Properties and Variability of PCC Materials for Rigid Pavement Design

Concrete Pavements: It's More Than a Thickness Design Chart
Raymond S. Rollings, U.S. Army Corps of Engineers Cold Regions Research and Engineering Laboratory, USA

From the Road to the Street: Diversified and Innovative Concrete Pavement Structures French Trends and Guidelines
Joseph Abdo, Cement Industry Information Center, France
Jean-Pierre Christory, French Public Works Ministry, France

Session 6 – Concrete Bases, Joint Sealants, and Curing, II
Moderator: Jason Weiss, Purdue University, West Lafayette, Indiana, USA

A New Approach to Estimate the In-Situ Thermal Coefficient and Drying Shrinkage for Jointed Concrete Pavement
Tom Burnham, Minnesota Department of Transportation, USA
Amir Koubaa, University of Minnesota, USA

Performance of Arizona’s SHRP SPS-4 Joint Sealing Experiment
Kathleen T. Hall, ProTech Engineering, Chile
Lynn D. Evans, ERES Consultants, A Division of Applied Research Associates, Inc., USA
James A. Crovetti, Marquette University, USA
Carlos E. Correa, ProTech Engineering, Chile
Larry Scofield, Arizona Department of Transportation, USA

Methods for Measuring Application Rate of Liquid Membrane-Forming Curing Compounds on Concrete Pavements
Toy Poole, U.S. Army Corps of Engineers Research and Development Center, USA

A Recipe for Compaction of Concrete
Geoff Ayton, Roads and Traffic Authority, New South Wales, Australia
Session 7 – Concrete Pavement Construction, 1
Moderator: Jim Grove, Iowa Department of Transportation, Ames, Iowa, USA

A Concrete Pavement Project with a 10-Year Performance Guarantee in Quebec
Bertrand Cormier and Denis Thebeau, Ministry of Transportation of Quebec, Canada
Louis Carol Duschesne, Consultant, Canada
Yvan Dault, DEMIX Construction, Division of St. Lawrence Cement, Canada
Curt A. Beckemeyer and Michael I. Darter, ERES Consultants, A Division of Applied Research Associates, Inc., USA

Demonstration of Lightweight Inertial Profilers for Construction Quality Control: Status Report
Mark E. Swanlund and David Law, Federal Highway Administration, USA

Improvement in IRI Values of Concrete Pavements Constructed in Argentina with Slip-Form Pavers
Marcelo Dalimier, Portland Cement Institute of Argentina, Argentina
Roberto Torrent, Holcim Group Support Ltd., Switzerland

A Probabilistic Approach to Sawcut Timing and Depth Requirements for Newly Constructed Portland Cement Concrete Pavements
Jin-Hoon Jeong, Niraj Chapke, and Dan Zollinger, Texas A&M University, USA

Session 8 – Concrete Pavement Practice – Regional Experiences
Moderator: Michael I. Darter, ERES Consultants, Champaign, Illinois, USA

Recent Development in Design and Construction of Concrete Pavements at German Expressways (Autobahns)
Rupert Springenschmid, Technical University of Munich, Germany
Walter Fleischer, HEILIT Verkehrswegebau GmbH, Germany

CRCP in Virginia Lessons Learned
Mohamed Elfino, Virginia Department of Transportation, USA
Celik Ozyildirim, Virginia Transportation Research Council, USA
Richard Steele, Virginia Department of Transportation, USA

Concrete Pavements in Canada: State-Of-The-Practice
Susan Tighe, University of Waterloo, Canada
Rico Fung and Tim Smith, Cement Association of Canada, Canada

Composite Pavements: An Example of a “Shared Technique” for Better Public Spaces and Road Infrastructures
Jean-Pierre Chriistory, French Public Works Ministry (LTOP), France
Daniel Grob, SPECBEA, France
Yves Guidoux, French Public Works Ministry, France
Alain Sainton, LOGMA, France
Session 9 – Concrete Pavement Construction, II
Moderator: Jamshid Armaghani, Florida Concrete Products Association, Orlando, Florida

Reconstruction of Urban Intersections Using Portland Cement Concrete Pavement
Jeff S. Uhlmeyer and Linda M. Pierce, Washington State Department of Transportation, USA

Effect of Variability and Central Tendency in Performance-Related Specifications for Concrete Pavements
Nasir G. Gharaibeih, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Peter A. Kopac, Federal Highway Administration, USA
Michael I. Darter, ERES Consultants, A Division of Applied Research Associates, Inc., USA

Investigation of the Optimum Time for Cutting Joints in Concrete Roads
Malin Löfjsjögård, Swedish Cement and Concrete Research Institute, Sweden

Mechanistic Evaluation of Vertical Misalignment of Dowel Bars and Their Effects on Joint Performance
Lev Khazanovich, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Neeraj Buch, Michigan State University, USA
Alex Gotlif, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Michael Eacker, Michigan Department of Transportation, USA

Volume 2

Session 10 – Load Transfer at Joints and Cracks
Moderator: Mark B. Snyder, Concrete Paving Association of Minnesota, Minneapolis, Minnesota, USA

Aggregate Interlock Load Transfer Efficiency at Joints in Concrete Pavements During Dynamic Loading
Anna-Carin Hanekom, BKS (Pty) Ltd., South Africa
Emile Horak and Alex Visser, University of Pretoria, South Africa

Study on Mechanical Behavior of Dowel Bar in Transverse Joint of Concrete Pavement
Tatsuo Nishizawa, Ishikawa National College of Technology, Japan
Masashi Koyanagawa and Yasushi Takeuchi, Tokyo University of Agriculture, Japan
Makoto Kimura, Public Works Research Institute, Japan

Mechanism of Load Transfer-Crack Width Relation in JPCP: Influence of Coarse Aggregate Properties
Elin A. Jensen and Will Hansen, University of Michigan, USA

Using Fiber-Reinforced Polymer Load Transfer Devices in Jointed Concrete Pavements
Ahmed Shalaby and Scott Murison, University of Manitoba, Canada
