SEVENTH INTERNATIONAL CONFERENCE ON CONCRETE PAVEMENT

"The Use of Concrete In Developing Long-Lasting Pavement Solutions for the 21st Century"

Organized By:

International Society for Concrete Pavements

September 9-13, 2001

Disney’s Coronado Springs Resort
Lake Buena Vista, FL 32830

Volume 2 of 3
Session 9 – Concrete Pavement Construction, II
Moderator: Jamshid Armaghani, Florida Concrete Products Association, Orlando, Florida

Reconstruction of Urban Intersections Using Portland Cement Concrete Pavement
Jeff S. Uhlmeyer and Linda M. Pierce, Washington State Department of Transportation, USA ........ 497

Effect of Variability and Central Tendency in Performance-Related Specifications for Concrete Pavements
Nasir G. Gharaibeh, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Peter A. Kopac, Federal Highway Administration, USA

Investigation of the Optimum Time for Cutting Joints in Concrete Roads
Malin Löfsjögd, Swedish Cement and Concrete Research Institute, Sweden ...................................... 525

Mechanistic Evaluation of Vertical Misalignment of Dowel Bars and Their Effects on Joint Performance
Lev Khazanovich, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Neeraj Buch, Michigan State University, USA
Alex Gotlif, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Michael Eacker, Michigan Department of Transportation, USA .................................................. 539

Volume 2

Session 10 – Load Transfer at Joints and Cracks
Moderator: Mark B. Snyder, Concrete Paving Association of Minnesota, Minneapolis, Minnesota, USA

Aggregate Interlock Load Transfer Efficiency at Joints in Concrete Pavements During Dynamic Loading
Anna-Carin Hanekom, BKS (Pty) Ltd., South Africa
Emile Horak and Alex Visser, University of Pretoria, South Africa .................................................. 555

Study on Mechanical Behavior of Dowel Bar in Transverse Joint of Concrete Pavement
Tatsuo Nishizawa, Ishikawa National College of Technology, Japan
Masashi Koyanagawa and Yasushi Takeuchi, Tokyo University of Agriculture, Japan
Makoto Kimura, Public Works Research Institute, Japan ................................................................. 571

Mechanism of Load Transfer-Crack Width Relation in JPCP: Influence of Coarse Aggregate Properties
Elin A. Jensen and Will Hansen, University of Michigan, USA .......................................................... 589

Using Fiber-Reinforced Polymer Load Transfer Devices in Jointed Concrete Pavements
Ahmed Shalaby and Scott Murison, University of Manitoba, Canada ............................................ 607
Session 11 – Concrete Pavement Rehabilitation
Moderator: Kathleen T. Hall, ProTech Engineering, Santiago, Chile

Investigation of Dowel Bar Retrofitting on PCC Pavement Responses
Jacob E. Hiller and Neeraj Buch, Michigan State University, USA .............................................. 623

The New Concrete Pavement Maintenance and Rehabilitation Guide for Quebec: A Comprehensive Approach
Denis Thebeau and Bertrand Cormier, Quebec Ministry of Transportation, Canada
Louis Carol Duchesne, Consultant, Canada .................................................................................. 639

A Framework for Repair and Rehabilitation Treatment Selection for Portland Cement Concrete Pavements
Dan Zollinger, Texas A&M University, USA
Kurt Smith, Applied Pavement Technology, Inc., USA
Shiraz Tayabji, Construction Technology Laboratories, Inc., USA ............................................ 653

An Evaluation of Retrofit Load Transfer Materials and Dowel Bar Configurations
David Rettner, Minnesota Department of Transportation, USA
Mark Snyder, Concrete Paving Association of Minnesota, USA .................................................. 669

Session 12 – Continuously Reinforced Concrete Pavements
Moderator: David Lippert, Illinois Department of Transportation, Springfield, Illinois, USA

Performance of Continuously Reinforced Concrete Pavements in the LTPP Program
Shiraz Tayabji and Chung Wu, Construction Technology Laboratories, Inc., USA
Mike Plei, Concrete Reinforcing Steel Institute, USA ................................................................. 685

CRCP: A Long-Lasting Pavement Solution for Today’s Motorways, the Dutch Practice
Marc Stet, Dutch Road Research Laboratories, The Netherlands
Adrian van Leest, CROW, The Netherlands .................................................................................. 701

Monitoring Program for CRCP Highway Pavement: Interim Performance Evaluation
Dennis van der Ven, Kars P. Drenth, and Rudi J. Dekkers, Netherlands Pavement Consultants, The Netherlands
Lambert Houben, Delft University of Technology, The Netherlands ........................................... 715

Mechanistic Analysis of Factors Leading to Punchout Development for Improved CRC Pavement Design Procedures
Olga Selezneva, ERES Consultants, A Division of Applied Research Associates, Inc., USA
Dan Zollinger, Texas A&M University, USA

Session 13 – Concrete Airport and Industrial Pavements
Moderator: David Pittman, U.S. Army Corps of Engineers, Vicksburg, Mississippi, USA

Analysis of Pavement Responses to Aircraft and Environmental Loading at Denver International Airport
Dulce Rufino, Jeff Roesler, Ernest Barenberg, and Erol Tutumluer, University of Illinois, USA .... 747
Concrete Pavements at the Munich Airport: Design, Construction, and Performance
Rupert Springenschmid, Technical University of Munich, Germany
Rudolf Hessler, Munich Airport Authority, Germany
Walter Fleischer, HEILIT Verkehrswegbau GmbH, Germany .......................................................... 763

Review of Roller Compacted Concrete (RCC) Pavement Design Methods
Jacob Hiller and Neeraj Buch, Michigan State University, USA ..................................................... 775

Swedish Design of Industrial Concrete Pavements
Johan Silfwerbrand, Royal Institute of Technology, Sweden .......................................................... 791

Session 14 – Concrete Overlays, I
Moderator: Geoff Ayton, Roads and Traffic Authority, New South Wales, Australia

The Measured Response of Ultra-Thin and Thin Whitetopping to Environmental Loads
Julie M. Vandenbossche, Minnesota Department of Transportation, USA ........................................ 807

Behavior and Performance of UTW on Thin Asphalt Pavements
José T. Balbo, Deividi S. Pereira, Andréa A. Severi, PTR-EPUSP, Brazil ........................................ 825

Performance and Repair of UTW Pavements
Chung-Lung Wu, Shiraz Tayabji, Matthew Sheehan, Construction Technology Laboratories, Inc.
James Sherwood, Federal Highway Administration, USA ................................................................. 839

UTW: Test Section at Vilvoorde on the R22 in Belgium
Christian Caestecker, Tim Lonneux, and Freddy Haemels, Ministry of the Flemish Community,
Belgium ........................................................................................................................................ 857

Session 15 – Prestressed and Precast Pavements
Moderator: Ernest J. Barenberg, University of Illinois, Urbana, Illinois, USA

Prestressed Concrete Pavement Technology Update
Shiraz D. Tayabji, Construction Technology Laboratories, Inc., USA
Ernest J. Barenberg, University of Illinois, USA
Wade Gramling, CGH Engineering, Inc., USA
Paul Teng, Federal Highway Administration, USA ........................................................................ 871

Rapid Repair with Precast Concrete Slab Pavements Using Compression Joint System
Yoshitaka Hachiya, Port and Harbor Research Institute, Ministry of Transport, Japan
Fumishige Akamine, PS Corporation, Japan
Osamu Takahashi, Port and Harbor Research Institute, Ministry of Transport, Japan
Yutaka Miyaji, Second Port Construction Bureau, Ministry of Transport, Japan ................................. 891

Feasibility Study for the Use of Precast Portland Cement Concrete Panels for Rehabilitation of
Airfield Pavements
Richard Speir, LAW PCS, A Division of Law Engineering, Inc., USA
Shiraz Tayabji, Construction Technology Laboratories, Inc., USA
Gonzalo Rada, LAW PCS, A Division of Law Engineering, Inc., USA
Yue Sun Chen and Scott Murrell, Port Authority of New York and New Jersey, USA ......................... 907
**Feasibility of Precast Prestressed Concrete Pavements**
David Merritt and B. Frank McCullough, Center for Transportation Research, The University of Texas at Austin, USA
Mark E. Swanlund, Federal Highway Administration, USA.......................... 923

**Theoretical Investigation of Cross-Tensioned Concrete Pavement**
Muhammet V. Akpınar, Kansas State University
Jeffrey Hancock, Parson Brinkerhoff, USA
Mustaque Hossain, Kansas State University
Andrew J. Gisi, Kansas Department of Transportation ........................................ 939

**Session 16 – Concrete Overlays, II**
Moderator: Jose T. Balbo, PTR-EPUSP, Brazil

*Evaluation of Hydraulic Cement Concrete Overlays Placed on Three Pavements in Virginia*
Michael Sprinkel and Celik Ozyildirim, Virginia Transportation Research Council, USA.......................... 953

*The Ultrathin Whitetopping Option*
James Cable, Iowa State University, USA
John Hart, Iowa Department of Transportation, USA
Thomas Ciha, Iowa State University, USA......................................................... 969

*An Analysis of Ride Quality of the Ultra-Thin Whitetopping Overlays at the FHWA Accelerated Loading Facility*
Robert O. Rasmussen, W. James Wilde, and J. Mauricio Ruiz, The Transtec Group, USA
James Sherwood, Federal Highway Administration, USA
James Mack, American Concrete Pavement Association, USA.......................... 977

*An Analysis of the Performance of Ultra-Thin White Topping Subjected to Slow Moving Loads in Accelerated Pavement Testing Facility*
Sudarshan Rajan, Jan Olek, Thomas L. Robertson, and
Khaled Galal and Tommy Nantung, Indiana Department of Transportation, USA
Jason Weiss, Purdue University, USA............................................................... 993

**Session 17 – High-Performance Concrete Pavements**
Moderator: Roger Larson, Federal Highway Administration, Washington, DC, USA

*The “Systems” Approach to Concrete Pavements*
Stephen Forster, Federal Highway Administration, USA.................................... 1013

*Status of High-Performance Concrete Pavements Constructed Under FHWA’s TE-30 Program*
Kurt Smith, Applied Pavement Technology, USA
Mark Swanlund, Federal Highway Administration, USA................................. 1029

*The Ohio HPCP Joint Sealant Experience*
Anastasios Ioannides, Jason Sander, and Issam Minkarah, University of Cincinnati, USA........ 1045
Session 18 – Pavement Performance and Testing
Moderator: Adrian van Leest, CROW, The Netherlands

*Use of Nondestructive Testing for Concrete Pavements*
Gary Crawford, Federal Highway Administration, USA
Leif Wathne, SaLUT, USA ........................................................................................................... 1061

*Evaluation of a Lightweight Profiler for Measurement of PCC Pavement Roughness in Florida*
Bouzid Choubane and Ronald McNamara, Florida Department of Transportation, USA ................................................................................................................................. 1077

*A New Approach to Non-Destructive Evaluation of Pavement Structures Using the Rolling Dynamic Deflectometer*
Dan Rozycki, James Wilde, and Robert Rasmussen, The Transtec Group, USA ....................... 1091
