Preface I
Silver Jubilee of the Working Party on Mixing of the EFCE III
Index of Symbols XII

### Lectures

#### Plenary Lecture

**PL**
M. Sommerfeld, S. Decker, Universität Halle-Wittenberg, D-Merseburg
*State of the art and future trends in CFD simulation of stirred vessels* 1

#### Session 1: Turbulence Characteristics in Stirred Systems

1.1 S. Baldi, A. Ducci, M. Yianneskis, King's College London, UK-London
*Determination of dissipation rate in stirred vessels through direct measurement of fluctuating velocity gradients* 21

1.2 J. Kilander, A. Rasmuson, Chalmers University of Technology, S-Göteborg
*Hydrodynamics in a stirred square tank investigated using a 3D PIV LES decomposition approach and LDA measurements* 31

*Large Eddy Simulation of turbulent flow in Rushton impeller stirred reactor with a sliding-deforming mesh methodology* 39

1.4 F. R. Khan, C. D. Rielly, G. K. Hargrave, Loughborough University, UK-Loughborough
*A multi-block approach to obtain angle-resolved PIV measurements of the mean flow and turbulence fields in a stirred vessel* 47

1.5 I. Baldyga, L. Makowski, Warsaw University of Technology, PL-Warsaw
*CFD modeling of mixing effects on the course of parallel chemical reactions carried out in a stirred tank* 55

#### Session 2: Advanced Measurement Techniques

2.1 K. Kling, D. Mewes, University of Hannover, D-Hannover
*Quantitative measurements of micro- and macromixing using two-colour laser induced fluorescence* 63

2.2 J. F. Hall, M. Barigou, M. J. H. Simmons, University of Birmingham, UK-Birmingham; E. H. Stitt, Johnson Matthey Catalysts, UK-Billingham
*Flow patterns in mechanically agitated high throughput experimentation (HTE) reactors* 71

2.3 A. Fall, O. Lecoq, R. David, Laboratoire de génie des Procédés des Solides Divisés, F-Albi
*Application of PLIF-technique to characterize the mixing of miscible liquid flows in two innovative contact devices: a 90°-impinging-jet and a sheathed feed mixer* 79
### Session 3: Micromixing in Precipitation Processes

3.1 J. Baidyga, A. Krasinski, M. Jasinska, A. Rzen, Warsaw University of Technology, PL-Warsaw  
*Agitation and mixing effects in agglomerative precipitation*  
87

3.2 B. Judat, A. Racina, M. Kind, University of Karlsruhe, D-Karlsruhe  
*Macro- and micromixing in a TAYLOR-COUETTE reactor with axial flow and their influence on the precipitation of barium sulfate*  
95

3.3 A. Paschedag, University of Technology Berlin, D-Berlin  
*Modeling of mixing and precipitation using CFD and population balances*  
103

3.4 H.-C. Schwarzer, M. Manhart, University of Technology Munich, D-Garching  
W. Peukert, University Erlangen-Nuremberg, D-Erlangen  
*Characterization of mixing in a T-mixer: A combined experimental and numerical study*  
113

### Session 4: Solid/Liquid Systems

4.1 J. J. Derksen, Delft University of Technology, NL-Delft  
*Simulation of solid particle dispersion in agitated tanks*  
121

4.2 T. Virdung, A. Rasmuson, Chalmers University of Technology, S-Goteborg  
*PIV Measurements of solid-liquid mixing at elevated concentrations*  
129

4.3 W. F. C. van Wageningen, R. F. Mudde, H. E. A. van den Akker, Delft University of Technology, NL-Delft  
*Numerical investigation into mixing of particle-laden flows in a Kenics static mixer*  
137

4.4 S. Castellino, F. Scargiali, F. Grisafi, A. Brucato, University of Palermo, I-Palermo; J. Cermakov, V. Macho, Prague Institute of Chemical Technology, CZ-Prague  
*Residence time distribution of solid particles in a high-aspect ratio multiple-impeller stirred vessel*  
145

*Some experiments on the unsteady behavior of continuous stirred vessels with slurries*  
153

### Session 5: Special Apparatuses

5.1 H. Brod, U. Liesenfelder, Bayer Technology Services GmbH, D-Leverkusen  
*The mixing efficiency of an eccentric-disc kneading zone in fully intermeshing co- and counter-rotating twin screw extruders*  
161

5.2 P. Forschner, D. Houlton, R. Krebs, EKATO Rühr- und Mischtechnik GmbH, D-Schopfheim; R. Klepper, EKATO Corporation, USA-Salt Lake City; V. Kassera, CFD Consultants, D-Rottenburg  
*Design of horizontal vessels operated as CSTR – basic mixing tasks, RTD, productivity*  
169

5.3 S. Foucault, G. Ascanio, P. A. Tanguy, Ecole Polytechnique, CAN-Montreal  
*Coaxial mixer hydrodynamics with non-Newtonian rheologically complex fluids and suspensions*  
177

</tr>
</tbody>
</table>
Contents

9.3 M. Hoffmann, N. Räbiger, M. Schlüter, University of Bremen, D-Bremen; S. Blazy, D. Bothe, C. Stemich, A. Warnecke, University of Paderborn, D-Paderborn
Experimental and numerical investigations of T-shaped micromixers 269

9.4 M. Engler, C. Föll, N. Kockmann, P. Woias, University of Freiburg, D-Freiburg
Investigations of liquid mixing in static micro mixers 277

Posters

P 1 H. Hartmann, J. J. Derksen, H. E. A. van den Akker, Delft University of Technology, NL-Delft
An LES investigation of the flow macro-instability in a Rushton turbine stirred tank 285

P 2 J. Vanags, U. Viesturs, Latvian State Institute of Wood Chemistry, LV-Riga
Local mixing control in a laboratory bioreactor with an electromagnetic drive 293

P 3 S. Schütz, M. Piesche, University of Stuttgart, D-Stuttgart
Numerical investigation on the macro- and micromixing in miscible, highly viscous liquids 299

P 4 C. Galletti, A. Paglianti, University of Pisa, I-Pisa, K. C. Lee, M. Yianneskis, King's College London, UK-London
Macro-instability phenomena in stirred vessels in the laminar, transitional and turbulent flow regimes 307

P 5 T. Berger, K. Strohmeier, University of Technology Munich, D-Garching
Structural dynamic analysis of stirrers with a fluid-structure-coupling algorithm in CFD 315

P 6 A. Rożeń, J. Bałdyga, Warsaw University of Technology, PL-Warsaw
Study of reactive micromixing of liquids differing in viscosity in laminar flows 323

P 7 S. D. Vlaev, P. Staykov, Bulgarian Academy of Sciences, BG-Sofia, St. Kraitschev, Technical University Sofia, BG-Sofia
Numerical analysis of the drag-reducing performance of blade shape in stirred power law fluids 331

P 8 J. Aubin, J. Bertrand, C. Xuereb, Laboratoire de Génie Chimique, F-Toulouse; D. F. Fletcher, University of Sydney, AUS-Sydney
Effect of geometry on the mixing quality in micromixers 339

P 10 R. Angst, E. Harnack, M. Singh, M. Kraume, University of Technology Berlin, D-Berlin
Grid and model dependency of the solid/liquid two phase flow CFD simulations of stirred vessels 347

P 11 L. Vicum, M. Mazzotti, ETH, Swiss Federal Institute of Technology, CH-Zürich; J. Baldyga, Warsaw University of Technology, PL-Warsaw
Modeling of barium sulfate mixing-precipitation processes 355

P 12 J. Bałdyga, M. Henczka, R. Czarnocki, D. Kubicki, Warsaw University of Technology, PL-Warsaw; K. Smith, Nektar Therapeutic UK Ltd, UK-Bradford
Modeling of turbulent mixing under supercritical conditions—application to particle formation 363
