Session BW12: Wireless Networks II

BW12-1 Methods for Preventing Protocol Stalling in UMTS Radio Link Control ........................................ 2246
    Qiqing Zhang, Hsuan-Jung Su (Bell Laboratories, Lucent Technologies)

BW12-2 Multi-Dimensional Adaptation and Multi-User Scheduling Techniques for Wireless OFDM Systems .......... 2251
    Brian Classon, Philippe Sartori, Vijay Nangia, Xiangyang Zhuang, Kevin Baum (Motorola Labs)

BW12-3 Maximizing Static Network Lifetime of Wireless Broadcast Adhoc Networks ...................................... 2256
    Intae Kang, Radha Poovendran (University of Washington)

BW12-4 Wireless Optical Communications via Diversity Reception and Optical Preamplification ...................... 2262
    Mohsen Razav, Jeffrey H. Shapiro (Massachusetts Institute of Technology)

TRACK 10—ADVANCED SIGNAL PROCESSING FOR COMMUNICATION

Session ASP1: MIMO-Space-Time Coding

ASP01-1 Efficient Multicarrier Realization of Full-Rate Space–Time Orthogonal Block Coded Systems .................. 2267
    Behrouz Farhang-Boroujeny (University of Utah); Christian Schlegel (University of Alberta)

ASP01-2 Mean Square Error Optimality of Orthogonal Space–Time Block Codes ........................................ 2272
    Erik G. Larsson (University of Florida); Petre Stoica (Uppsala University)

ASP01-3 On Optimal Linear Space–Time Constellations ............................................................................. 2276
    Mohamed Oussama Damen, Normam C. Beaulieu (University of Alberta); Hesham El Gamal (The Ohio-State University)

ASP01-4 Adaptive Modulation for Multi-Antenna Transmissions with Channel Mean Feedback ...................... 2281
    Shengli Zhou, Georgios B. Giannakis (University of Minnesota)

Session ASP2: MIMO-Space-Time Coding/Algorithms

ASP02-1 Properties of Space–Time Codes for Frequency Selective Channels and Trellis Code Designs ............... 2286
    Mu Qin, Rick S. Blum (Lehigh University)

ASP02-2 Successive Detection Algorithm for Frequency Selective Layered Space–Time Receiver ...................... 2291
    Dirk Wübben, Volker Kühn, Karl-Dirk Kammeyer (University of Bremen)

ASP02-3 Turbo Equalization and Demodulation of Multicode Space Time Codes ........................................ 2296
    Ami Wiesel, Xavier Mestre, Alba Pagès, Javier R. Fonollosa (Universitat Politècnica de Catalunya)

ASP02-4 Antenna Saturation Effects on MIMO Capacity .................................................................................. 2301
    T. S. Pollock, T. D. Abhayapala, R. A. Kennedy (The Australian National University)

Session ASP3: MIMO Systems

ASP03-1 Detection with Particle Filtering in BLAST Systems .......................................................................... 2306
    Yufei Huang (The University of Texas at San Antonio); Jianqiu Zhang (University of New Hampshire);
    Petar M. Djuric (State University of New York at Stony Brook)

ASP03-2 Application of Particle Filters to MIMO Wireless Communications .............................................. 2311
    Kris Huber, Simon Haykin (McMaster University)

ASP03-3 Transmit Diversity and Spatial Multiplexing in Four-Transmit-Antenna OFDM ................................... 2316
    Xiangyang Zhuang, Frederick W. Voût, Stéphanie Rouquette-Leveil, Karine Gosse (Motorola Labs)

ASP03-4 Single-Carrier Communication using Decision-Feedback Equalization for Multiple Antennas .......... 2321
    Jan Tubbax, Liesbet Van der Perre, Stéphane Donnay, Marc Engels (IMEC)

Session ASP4: Decoding Algorithms for MIMO Systems

ASP04-1 Decision Directed Iterative Channel Estimation for MIMO Systems .............................................. 2326
    Xinmin Deng, Alexander M. Haimovich (New Jersey Institute of Technology); Javier Garcia-Frias (University of Delaware)

ASP04-2 Soft Quasi-Maximum-Likelihood Detection for Multiple-Antenna Channels .................................. 2330
    Baldur Steingrimsson, Zhi-Quan Luo, Kon Max Wong (McMaster University)

ASP04-3 Joint Space–Time Adaptive Filtering for DS-CDMA Systems with Antenna Arrays Based on the Multistage Wiener Filter ................................................................. 2335
    Seema Slid, Wilbur L. Myrick, J. Scott Goldstein (Science Applications International Corporation)

ASP04-4 Space–Time Joint Truncated Multistage Wiener Filtering for Asynchronous DS-CDMA in Multipath ...... 2340
    Chia-Chang Hu, Irving S. Reed, Xiaoli Yu (University of Southern California)

xxxii
Session ASP5: Multicarrier Communication Systems

ASP05-1 Per-Tone Equalization for MIMO-OFDM System
Geert Leus, Imad Barbumi, Marc Moonen (KU Leuven) ................................................................. 2345

ASP05-2 Subband Methods for OFDM Equalization
Damian Marelli, Minyue Fu (University of Newcastle) ................................................................. 2350

ASP05-3 A Novel Reception Method to Mitigate Frequency Offset in OFDM Receivers
Aliereza Seyedi, Gary J. Saulnier (Rensselaer Polytechnic Institute) ........................................... 2355

ASP05-4 Bitrate Maximizing Time-Domain Equalizer Design for DMT-based Systems
Koen Vanbleu, Geert Ysebaert, Gert Cuypers, Marc Moonen (Katholieke Universiteit Leuven); Katleen Van Acker (Alcatel) ................................................................. 2360

Session ASP6: Adaptive Equalization

ASP06-1 MMSE FIR Zero-Forcing Equalizer for Shorten Length Trailing Zero Precoder
Man-Wai Kwan, Chi-Wah Kok (Hong Kong University of Science and Technology) ................. 2365

ASP06-2 Fully Adaptive MLSE Equalizer Performance with MPSK Signals
Iain B. Collings, Dae Han Won (University of Sydney) ................................................................. 2370

ASP06-3 Minimum Relevant Error MIMO Decision-Feedback Equalizer for High-Speed Wireless Data Communications
Cheng-Kang Wang, Yumin Lee (National Taiwan University) ........................................................ 2375

ASP06-4 Hybrid Decision Feedback Equalization
Srikant Jayaraman, Ivan Fernandez-Corbaton, John E. Smee (Qualcomm Inc.) ................................ 2380

Session ASP7: Channel Estimation I

ASP07-1 Turbo Embedded Estimation with Imperfect Phase/Frequency Recovery
Stefano Cioni, Giovanni E. Corazza, Alessandro Vanelli Coralli (University of Bologna) ............... 2385

ASP07-2 Estimation of Rapid Time-Variant Channels for OFDM using Wiener Filtering
Christian Sgraja, Jürgen Lindner (University of Ulm) ...................................................................... 2390

ASP07-3 Low Complexity PN Code Acquisition with Tree Search in Wideband CDMA Multipath Channels
Bin Dong, Steven D. Blostein (Queen’s University) ........................................................................ 2396

Session ASP8: Channel Estimation II

ASP08-1 Iterative Channel Estimation and Multiuser Detection in Multipath CDMA Channels
Husheng Li, H. Vincent Poor (Princeton University) ................................................................. 2401

ASP08-2 Space–Time Algorithms for Multiuser Channel Estimation in the Downlink of UMTS/TDD
K. Kopsa, H. Artés, G. Matz, F. Hlawatsch (Vienna University of Technology) ......................... 2406

ASP08-3 Joint Channel Estimation and Multiuser Detection for Multipath Fading Channels in DS-CDMA Systems
Sau-Hsuan Wu, Urbashi Mitra, C.-C. Jay Kuo (University of Southern California) ...................... 2411

ASP08-4 Blind Channel Estimation for Downlink CDMA Systems
Xenofon G. Doukopoulos, George V. Moustakides (IRISA-INRIA) .............................................. 2416

Session ASP9: DSL

ASP09-1 Echo Cancellation for Discrete Multitone Frame-Asynchronous ADSL Transceivers
Geert Ysebaert, Koen Vanbleu, Gert Cuypers, Marc Moonen (Katholieke Universiteit Leuven); Jan Verlinden (Alcatel-Bell) ................................................................. 2421

ASP09-2 A Simple Byte-Erasure Method for Improved Impulse Immunity in DSL
Dimitris Tountopakis, John M. Cioffi (Stanford University); Wei Yu (University of Toronto); Daniel Gardner, Meryem Ouzzif (France Télécom R&D) ........................................... 2426

ASP09-3 A Byte-Erasure Method for Improved Impulse Immunity in DSL Systems using Soft Information from an Inner Code
Dimitris Tountopakis, John M. Cioffi (Stanford University); Wei Yu (University of Toronto); Daniel Gardner, Meryem Ouzzif (France Télécom R&D) ........................................... 2431

ASP09-4 Reducing Measurement Noise Effects in Digital Predistortion of RF Power Amplifiers
Dennis Morgan, Zhengxiang Ma (Bell Laboratories, Lucent Technologies); Lei Ding (Georgia Institute of Technology) ................................................................. 2436

Session ASP10: CDMA I

ASP10-1 Code-Timing Estimation for CDMA Systems with Bandlimited Chip Waveforms
Rensheng Wang, Hongbin Li (Stevens Institute of Technology) ..................................................... 2440

ASP10-2 Adaptive Spreading Code Optimization in Multiantenna Multipath Fading Channels in CDMA
Vikram Krishnamurthy (University of British Columbia); Xiaodong Wang (Columbia University); G. Yin (Wayne State University) ................................................................. 2445

xxxiii
ASP10-3 Deterministic Perturbation Gradient Approximation for Transmission Subspace Tracking in FDD-CDMA
Balaji Raghothaman (Nokia Research Center)

C. Gupta (Motorola); T. Mumtaz, M. Zaman, A. Papandreou-Suppappola (Arizona State University)

Session ASP11: CDMA II

ASP11-1 Regularized MMSE Multiuser Detection Using Covariance Matrix Tapering
L. Rugini, P. Banelli, S. Cacopard (University of Perugia)

ASP11-2 Iterative Interference Cancellation and Channel Estimation for Coded OFDM-CDMA
Volker Kühn (Universität Bremen)

ASP11-3 A Multiuser Detection Method for Overlay CDMA Systems
Hongbo Yan (University of Washington)

ASP11-4 Blind MMSE Combining for RAKE Receivers
Yongpeng Zhang, Ruiqeng Zhang (Drexel University)

Session ASP12: CDMA III

ASP12-1 Characterization of Non-WSSUS Fading Dispersive Channels
Gerald Matz (Vienna University of Technology)

ASP12-2 Frequency Offset Compensation with MMSE-MUD for Multi-Carrier CDMA in Quasi-Synchronous Uplink
Osamu Takyu, Masao Nakagawa (Keio University); Tomoki Ohtsuki (Tokyo University of Science)

ASP12-3 Bayesian Multiuser Detection for CDMA System with Unknown Interference
Lili Wu, Guisheng Liao, Chao Wang (Xidian University); Yong Shang (Peking University)

ASP12-4 Implementation of a 3G W-CDMA Software Radio
Jay R. Moorman (Bell Laboratories, Lucent Technologies)

TRACK 11—COMMUNICATION THEORY

Session CT1: Optimization of Multiuser Systems

CT01-1 Binary CDMA Signature Sets with Concurrently Minimum Total-Squared-Correlation and Maximum-Squared-Correlation
George N. Karyntinos, Dimitris A. Pados (State University of New York at Buffalo)

CT01-2 Signal Design for Bandwidth Efficient Multiple Access with Guaranteed Bit Error Rate
Aset Kapur, Mahesh K. Varanasi (University of Colorado, Boulder)

CT01-3 Iterative Power Control and Multiuser Detection with Outage Probability Constraints
John Papandriopoulos, Jamie Evans, Subhrakanti Dey (The University of Melbourne)

CT01-4 Coding across Multicodes and Time in CDMA Systems
J. Park, S. B. Gelfand (Purdue University); J.-H. Lim (Samsung Electronics)

Session CT2: Linear Methods for DS-CDMA

CT02-1 A Widely Linear LMS Algorithm for MAI Suppression for DS-CDMA
R. Schober (University of British Columbia); W. H. Gerstacker, L. H.-J. Lampe (University of Erlangen-Nürnberg)

CT02-2 Efficient Use of Pilot Signals in Wideband CDMA Array- Receivers
Sophie Affes, Nahi Kandil, Paul Mermelstein (Université du Québec)

CT02-3 Performance Analysis of Multistage BLUE/MMSE Receivers for DS-CDMA
in Frequency Selective Fading Channels
Sau-Hsuan Wu, Urbas i Mitra, C.-C. Jay Kuo (University of Southern California)

CT02-4 Design of MMSE Multiuser Detectors using Random Matrix Techniques
Linbo Li, Antonia M. Tulino, Sergio Verdú (Princeton University)

Session CT3: Acquisition and Detection for Multiuser CDMA

CT03-1 A Technique to Improve the Performance of Serial, Matched-Filter Acquisition in Direct-Sequence Spread-Spectrum Packet Radio Communications
Arvind Swaminathan, Daniel L. Noneaker (Clemson University)

CT03-2 Channel Acquisition and Tracking for the Uplink of a Code-Division Multiple-Access System
C. Carbonelli, A. A. D'Amitio, U. Mengali, M. Morelli (University of Pisa)
Session CT4: Signal Processing for Communication Systems

CT04-1 The Impact of the Observation Model on the Cramer-Rao Bound for Carrier Phase and Frequency Synchronization
Nele Noels, Heidi Steendam, Marc Moneclaey (Ghent University) ................................................................. 2562

CT04-2 Transmit Filter Optimization Based on Partial CSI Knowledge for Wireless Applications
Francesc Rey, Meritxell Lamarca, Gregori Vázquez (Polytechnic University of Catalonia)................................. 2567

CT04-3 Joint DOA and Channel Parameter Estimation for Code-Division Multiple-Access Systems
A. A. D’Amico, U. Mengali, M. Morelli (University of Pisa) .................................................................................. 2572

CT04-4 Convergence and Performance Analysis of Godard Family of Blind Equalization Algorithms
Vinod Sharma, Naveen Raj V (Indian Institute of Science, Bangalore) ............................................................... 2577

Session CT5: STC and Unknown Channels

CT05-1 Space-Time Constellations for Unknown Frequency-Selective Channels
Jochen Giese, Mikael Skoglund (Royal Institute of Technology Stockholm) .............................................................. 2583

CT05-2 Differential Space-Time Modulation with Maximum Spatio-Spectral Diversity
Hongbin Li (Stevens Institute of Technology) ........................................................................................................ 2588

CT05-3 Differential Space-Time Modulation—Coding and Capacity Results
Lutz H.-J. Lampe, Robert F. H. Fischer (University of Erlangen-Nürnberg);
Robert Schober (University of British Columbia) ..................................................................................................... 2593

CT05-4 Adaptive Blind Decoding of Unitary Space-Time Constellations in ISI Channels
Emre Akkas (Ohio State University); Urbashi Mitra (University of Southern California) ......................................... 2598

Session CT6: Space-Time Modulations and Codebooks

CT06-1 A Simple Approach to Near-Optimal Multiple Transmit Antenna Space-Time Codes
K. Y. Wu, W. K. Leung, Li Ping (City University of Hong Kong) .............................................................................. 2603

CT06-2 Robust Signal Constellations for Spatial Multiplexing in the Presence of Real Fading Propagation Channels
Bruno Clerckx, Danielle Vanhoeunakan-Janvier, Claude Oestges, Luc Vandendorpe (Université Catholique de Louvain) ...................................................................................................................................................... 2608

CT06-3 Super-Quasi-Orthogonal Space-Time Trellis Codes
Navid Hassanpour (Stanford University); Hamid Jafarkhani (University of California, Irvine) ................................ 2613

CT06-4 Grassmannian Beamforming for Multiple-Input Multiple-Output Wireless Systems
David J. Love, Robert W. Heath Jr. (The University of Texas at Austin);
Thomas Strohmer (University of California, Davis) .................................................................................................. 2618

Session CT7: Capacity of MIMO Channels

CT07-1 Impact of Correlation on the Capacity of MIMO Channels
Ming Kang, Mohamed-Slim Alouini (University of Minnesota) .............................................................................. 2623

CT07-2 The Outage Capacity of BLAST for MIMO Channels
Tommy Guest, Hao Zhang, Timour V. Kotchiev (University of Virginia) ................................................................. 2628

CT07-3 On the Asymptotic Capacity of MIMO Systems with Fixed Length Linear Antenna Arrays
Shuangqing Wei, Dennis L. Goeckel, Ramakrishna Janaswamy (University of Massachusetts–Amherst) .............. 2633

CT07-4 Mutual Coupling Effects on the Channel Capacity and the Space-Time Processing of MIMO Communication Systems
Bruno Clerckx, Danielle Vanhoeunakan-Janvier, Luc Vandendorpe, Claude Oestges (Université Catholique de Louvain) ...................................................................................................................................................... 2638

Session CT8: MIMO Decoder Design

CT08-1 Multiuser Joint Equalization and Decoding of Space-Time Codes
S. N. Diggavi, N. Al-Dhahir, A. R. Calderbank (AT&T Shannon Laboratory) .......................................................... 2643

CT08-2 On Decision-Feedback Detection of Nondiagonal Differential Space-Time Modulation in Temporally Correlated Fading Channels
Cong Ling, Kwok. H. Li, Alex C. Kot (Nanyang Technological University) .............................................................. 2648
CT08-3 Iterative Detection of MIMO Transmission Using a List-Sequential (LISS) Detector
Stephan Bäro, Joachim Hagenauer, Melanie Witzke (Institute for Communications Engineering, TU München)

CT08-4 Suboptimum Receiver Interfaces for Coded Multiple-Antenna Systems
Ezio Biglieri, Alessandro Nordio, Giorgio Taricco (Politecnico di Torino)

Session CT09: Theory of Multiple Antenna Systems

CT09-1 Optimal Partial Feedback Design for MIMO Block Fading Channels with Causal Noiseless Feedback
K. N. Lau, Youjian Liu, Tai Ann Chen (Bell Laboratories, Lucent Technologies)

CT09-2 Generalized Water-Filling for Multiple Transmit Antenna Systems
Gesualdo Scutari, Sergio Barbarossa (University of Rome “La Sapienza”) 

CT09-3 Wireless Communications Systems with Spatial Diversity: A Volumetric Approach
L. W. Hanlen, M. Fu (The University of Newcastle)

CT09-4 Comparing Application- and Physical-Layer Approaches to Diversity on Wireless Channels
J. Nicholas Laneman, Emin Martinian, Gregory W. Wornell (Massachusetts Institute of Technology); John G. Apostolopoulos, Susie J. Wee (Hewlett-Packard Laboratories)

Session CT10: Performance Analysis of MIMO Methods

CT10-1 On Signal Strength and Multipath Richness in Multi-Input Multi-Output Systems
Thomas Svantesson, Jon Wallace (Brigham Young University)

CT10-2 Performance Analysis of Coded Cooperation Diversity
Todd E. Hunter, Aria Nosratinia (University of Texas at Dallas)

CT10-3 Bit Error Probabilities in a Two-Rate Communication System
Jyri Hämäläinen, Risto Wichman (Helsinki University of Technology)

CT10-4 Pairwise Probability of Error for Differential Space–Time Modulation over a Time-Varying Rician Channel
Christian B. Peel, A. Lee Swindlehurst (Brigham Young University)

Session CT11: LDPC

CT11-1 Design of Low Density Parity Check Codes for Turbo Multiuser Detection
Guosen Yue, Krishna R. Narayanan (Texas A&M University); Xiaodong Wang (Columbia University)

CT11-2 LDPC Code Construction with Flexible Hardware Implementation
Dale E. Hocevar (Texas Instruments Inc.)

CT11-3 Low Complexity Decoding of Finite Geometry LDPC Codes
Zhenyu Liu, Dimitris A. Pados (State University of New York at Buffalo)

CT11-4 Polynomial Complexity ML Sequence and Symbol-by-Symbol Detection in Fading Channels
Idin Motedayen, Achilles Anastasopoulos (University of Michigan)

Session CT12: Turbo Codes

CT12-1 Construction of Coset-based Low Rate Convolutional Codes and Their Application to Low Rate Turbo-like Code Design
Durai Thirupathi, Keith M. Chugg (University of Southern California)

CT12-2 Bit Error Rate Estimate of Finite Length Turbo Codes
Jeong W. Lee, Richard E. Blahut (University of Illinois at Urbana–Champaign)

CT12-3 Synchronization of Turbo Codes Based on Online Statistics
Jian Sun, Matthew C. Valenti (West Virginia University)

CT12-4 An Improved Pragmatic Turbo Encoding Scheme for High Spectral Efficiency Using Constellation Shaping
Dan Raphaeli, Assaf Gurevitz (Tel-Aviv University)

TRACK 12—COMMUNICATION THEOREY

Session CT13: Fading Channels

CT13-1 Difference Threshold Test for M-ary Orthogonal FSK Signaling in Rayleigh Fading Channels
Young Gil Kim (University of Seoul); Sang Wu Kim (Korea Advanced Institute of Science and Technology)

CT13-2 Buffer and Channel Adaptive Modulation for Transmission over Fading Channels
Anh Tuan Hoang, Mehul Motani (National University of Singapore)

CT13-3 The Capacity Region of Frequency-Selective Gaussian Interference Channels under Strong Interference
Seong Tack Chung, John M. Cioffi (Stanford University)

CT13-4 Type-I Hybrid-ARQ Using MTCM Spatio-Temporal Vector Coding for MIMO Systems
Zhihong Ding, Michael Rice (Brigham Young University)
Session CT14: Performance Analysis in Fading Channels I

CT14-1 SER of Two-Dimensional Signalings in Rayleigh Fading with Channel Estimation Errors..................................................2763
Xiaodai Dong, Norman C. Beaulieu (University of Alberta)

CT14-2 Average Bit Error Probability Performance for Optimum Diversity Combining of Noncoherent FSK Over Rayleigh Fading Channels ..................................................2768
Marvin K. Simon (Jet Propulsion Laboratory); Mohamed-Slim Alouini (University of Minnesota)

CT14-3 Performance Analysis of Generalized Selection Combining of M-ary NCFSK Signals in Rayleigh Fading Channels .................................................................................2773
A. Ramesh, L. B. Milstein (University of California, San Diego); A. Chockalingam (Indian Institute of Science)

CT14-4 Performance of Frequency Hopped Noncoherent GFSK in Correlated Rayleigh Fading Channels .................................................................................2779
Huaping Liu, Vinod Venkatesan, Mario Magana (Oregon State University); Curt Nilsen, Ron Kyker (Sandia National Labs)

Session CT15: Performance Analysis in Fading Channels II

CT15-1 Analysis of Rake Reception with Multiple Symbol Weight Estimation for Antipodal Signaling ..................................................2784
Ranjan K. Mallik (Indian Institute of Technology-Delhi); Deepti Singh (Centre for Development of Telematics); Anita Kumari (Evalueserve Pvt. Ltd.)

CT15-2 Generalized Selection Combining Based on the Log-Likelihood Ratio .................................................................................2789
Sang Wu Kim (Korea Advanced Institute of Science and Technology); Young Gil Kim (University of Seoul); Marvin K. Simon (Jet Propulsion Laboratory)

CT15-3 Asymptotic SINR Analysis of Multi-User MC-CDMA in Rayleigh Fading .................................................................................2795
Matthew J. M. Peacock, Iain B. Collings (The University of Sydney); Micheal L. Honig (Northwestern University)

CT15-4 SNR Penalty of Hybrid Diversity Combining in Rayleigh Fading .................................................................................2800
Sasan Haghani, Norman C. Beaulieu (University of Alberta); Moe Z. Win (Massachusetts Institute of Technology)

Session CT16: Modulation

CT16-1 Modulation Optimization under Energy Constraints .................................................................................2805
Shuguang Cui, Andrea J. Goldsmith, Ahmad Bahai (Stanford University)

CT16-2 Bit-interleaved Rectangular Parity-Check Coded Modulation with Iterative Demodulation in a Two-Node Distributed Array .................................................................................2812
Xin Li, Tan F. Wong, John M. Shea (University of Florida)

CT16-3 Multiple Bit Differential Detection of Offset Quadrature Phase-Shift-Keying .................................................................................2817
Marvin K. Simon (Jet Propulsion Laboratory)

CT16-4 Further Error Event Diagram Reduction Using Algorithmic Techniques .................................................................................2822
Jun Shi, Richard Wesel (University of California, Los Angeles)

Session CT17: OFDM MIMO Systems

CT17-1 Bit Interleaved Space-Frequency Coded Modulation for OFDM Systems .................................................................................2827
Deniz Rende, Tan F. Wong (University of Florida)

CT17-2 Per-Antenna-Coded Schemes for MIMO OFDM .................................................................................2832
A. van Zelst (Eindhoven University of Technology)

CT17-3 Space-Frequency Coded MIMO-OFDM with Variable Multiplexing-Diversity Tradeoff .................................................................................2837
Helmut Bölcskei, Moritz Borgmann (ETH Zurich); Arogyaswami J. Paulraj (Stanford University)

CT17-4 Modulation and Coding Rate Selection to Improve Successive Cancellation Reception in OFDM and Spread OFDM MIMO Systems .................................................................................2842
Timothy A. Thomas, Kevin L. Baum, Frederick W. Voook (Motorola Labs)

Session CT18: OFDM and DMT

CT18-1 A Concatenated Coded Multiplexing Scheme for Multiuser OFDM Downlink .................................................................................2847
Krishnakamal Sayana, Saul. B. Gelfand (Purdue University)

CT18-2 Combining Raised Cosine Windowing and Per Tone Equalization for RFI Mitigation in DMT Receivers .................................................................................2852
Gert Cuypers, Koen Vanbleu, Geert Ysebaert, Marc Moonen (Katholieke Universiteit Leuven); Piet Vandaele (Alcatel)

CT18-3 A Subspace-based Method for Error Correction with DFT Codes .................................................................................2857
Gagan Rath, Christine Guillemot (IRISA-INRIA, France)

CT18-4 The Optimal Power Allocation for Equal-Length Twisted-Pair Channels .................................................................................2862
Jungwon Lee, John M. Cioffi (Stanford University)
Session CT24: OFDM and DMT/Wireless Networks

CT24-1 On the Average Power of Multiple Subcarrier Intensity Modulated Optical Signals:
Nehari’s Problem and Coding Bounds ............................................................. 2969
Masoud Sharif, Babak Hassibi (California Institute of Technology)

CT24-2 Convex Optimization Theory Applied to Joint Beamforming Design in Multicarrier MIMO Channels ......................................................... 2974
Daniel Pérez Palomar, Miguel Angel Lagunas (Universitat Politécnica de Catalunya); John M. Cioffi (Stanford University);
Antonio Pascual Iserte (Universitat Politécnica de Catalunya and Centre Tecnològic de Telecom. Comm. de Catalunya)

CT24-3 Power Optimal Routing in Wireless Networks ....................................... 2979
Rajit Manohar, Anna Scaglione (Cornell University)

CT24-4 A Wireless Packet Multiple Access Method Exploiting Joint Detection ................................................................. 2985
Preeti Kota (University of Utah); Christian Schlegel (University of Alberta)

Author Index

Volume 5

TRACK 13—GENERAL CONFERENCE: COMMUNICATIONS

Session GC1: MIMO Capacity

GC01-1 Analysis of MIMO Capacity with Interference ......................................... 2991
Rick S. Blum (Lehigh University)

GC01-2 Closed-Form Formulas for Ergodic Capacity of MIMO Rayleigh Fading Channels ................................................. 2996
Hyundong Shin, Jae Hong Lee (Seoul National University)

GC01-3 Capacity of MIMO Channels: A Volumetric Approach ......................... 3001
L. W. Hanlen, M. Fu (The University of Newcastle)

GC01-4 MIMO Capacity Scaling and Saturation in Correlated Environments ........ 3006
Vasanthan Raghavan, Akbar M. Sayeed (University of Wisconsin–Madison)

Session GC2: MIMO Performance

GC02-1 A Sphere Packing Bound on Rayleigh Block-Fading MIMO Channels ........ 3011
Majid Fozunbal, Steven W. McLaughlin, Ronald W. Schafer (Georgia Institute of Technology)

GC02-2 Performance Analysis for ST-BICM System with an Arbitrary Constellation ........................................... 3016
Hyounhee Koo (LG Electronics Inc.); Byeong Gi Lee (Seoul National University)

GC02-3 Performance Bounds for Antenna Selection in MIMO Systems .............. 3021
A. Gorokhov (Philips Research Labs); D. Gore, A. Paulraj (Stanford University)

GC02-4 Performance Analysis of MIMO Maximum Likelihood Receivers with Channel Correlation,
Colored Gaussian Noise, and Linear Prefiltering ............................................. 3026
Mario Kiessling, Joachim Speidel (University of Stuttgart); Norbert Geng, Markus Reinhardt (Siemens AG)

Session GC3: MIMO Capacity and Performance

GC03-1 Capacity and Performance Analysis for Hybrid Selection/Maximal-Ratio Combining in Nakagami Fading
with Unequal Fading Parameters and Branch Powers .................................... 3031
Jay Cheng, Toby Berger (Cornell University)

GC03-2 Capacity-Optimal Training for Space–Time Modulation over a Time-Varying Channel ......................... 3036
Christian B. Peel, A. Lee Swindlehurst (Brigham Young University)

GC03-3 Performance of Generalized Selection Combining on General Fading Channels ................................. 3041
Yao Ma (Iowa State University); S. Pasupathy (University of Toronto)

GC03-4 Level Crossing Rates and MIMO Capacity Fades: Impacts of Spatial/Temporal Channel Correlation ......................... 3046
Andrea Giorgetti, Marco Chiani (University of Bologna); Mansoor Shafi (Telecom New Zealand);
Peter J. Smith (The University of Canterbury)

Session GC4: MIMO Techniques

GC04-1 Symmetric Information Rate for Continuous Phase Channel and BLAST Architecture with CPM MIMO System .... 3051
Xiaoxia Zhang (Qualcomm Inc.); Michael P. Fitz (University of California Los Angeles)

GC04-2 A Novel BLAST Detection Algorithm Based Instantaneous Error Ordering ................................................ 3056
Xu Jing, Chen Ming, Shi-xin Cheng (Southeast University); Hai-Feng Wang (Nokia Mobile Phones)

xxxix
