PART 6

Heat Transfer Enhancement

The Effect of Liquid Side Heat Transfer Improvement on a Compact Heat Exchanger
J. Suihkonen, R. Lankinen, P. Sarkomaa and R. Castrén .......................................................... 841

Experimental Study on a Bank of Finned Pipes with Inclined Fins
I. Carvajal-Mariscal, F. Sánchez-Silva, P. Quinto-Diez and V.A. Pronin ........................................ 847

Heat Transfer Intensification by Small Particles in a Supersonic Flow
E.B. Vasilevskii, L.V. Yakovleva, A.V. Chirikhin and A.N. Osiptsov ............................................. 853

Two-Phase Flow Stabilization and Heat Transfer Enhancement at Vapour-Liquid Flow in Horizontal Tube under Subatmospheric Pressures
O.N. Kaban'kov, L.A. Sukomel and V.V. Yagov ......................................................................... 859

Heat Transfer Enhancement in Tubes of Ceramic Heat Exchangers
A.V. Soudarev, B.V. Soudarev, V.V. Grishaev and A.S. Leznov .................................................... 865

Enhanced Boiling Tubes with Subsurface Structures: Investigation, Visualization and Industrial Application
R. Mertz, R. Kulenovic and M. Groll .......................................................................................... 871

Heat Transfer to Highly Viscous Fluids in a Vessel Agitated by a Non Standard Helical Ribbon Impeller
G. Delaplace, J.C. Leuliet, L. Fillauudeau and N. Belaubre .............................................................. 877

Improvement of Heat Transfer in Joule Effect Tubular Heat Exchanger by Geometrical Modifications - Applications to Model (Milky Dessert) and Real (Whole Egg) Fluids -
L. Fillauudeau, G. Delaplace, S. Lefebvre, J.C. Leuliet and F. Quenard ........................................ 883

Turbulent Swirling Flow Structure in Complex Shape Channels and its Effect on Enhancement of Heat Transfer Processes
B.V. Dzyubenko and G.A. Dreitser ............................................................................................... 889

Heat Transfer Enhancement due to Swirl Created by Tangential Injection of Flow at the Inlet of an Artificially Roughened Annulus
S.A. Abdel-Moneim, A.R. El-Shamy and N.S. Berbish ................................................................. 895

Experimental Analysis of the Performances of Finned Elliptical-Section Tube Air-Cooled Compact Heat Exchangers
G. Fabbri and S. Lazzari .............................................................................................................. 903

Friction Factor and Heat Transfer in Triangular Ducts with Ridge Type Two Dimensional Roughness
S.W. Ahn and B.C. Lee ................................................................................................................ 909

Influence of Macro-Roughened Surfaces on Convective Film Boiling Heat Transfer
A. Omrani and E.G. Keshock ........................................................................................................ 915

Investigations In Heat Transfer Enhancement In Natural Convection In a Rectangular Enclosure With Suspensions of Microencapsulated Phase Change Materials - A Parametric Study
P. Datta, S. Sengupta and T. Singh .............................................................................................. 923
An Experimental Investigation on Heat Transfer of Internally Ribbed Tube in The Near Critical Pressure Region
D. Sun, T. Chen, Y. Luo, Z. Hu and H. Luan

PART 7

Jets

Jet Arrays

Heat Transfer of Phase-Locked Modulated Impinging-Jet Arrays

Local Heat-Transfer Characteristics of Impinging Jets in In-Line and Staggered Arrays
R. Matsumoto, T. Ishihara and Y. Nakatsuka

Heat/Mass Transfer Characteristics of Arrays of Impingement Jets with Effusion Holes
H.H. Cho, P.H. Yoon, D.H. Rhee

Impingement of Inline and Staggered Arrays of Jets with and without Initial Crossflow-Local and Average Heat Transfer Measurements
P. Brevet, E. Dorignac, M. Jolly and J.J. Vullierme

Flows Generated by the Impingement of Inline and Staggered Arrays of Jets
L.E. Brizzi, P. Brevet and C. Dejeu

General Studies

The Effects of Hole Arrangements on Heat/Mass Transfer of Impingement/Effusion Cooling System

Heat Transfer Experiments in a Submerged Impinging Round Jet Using Liquid Crystal Thermometry
J. Vejrazka, P. Marty and V. Sobolik

Near Wall Flow Characteristics Beneath a Turbulent Impinging Jet
S. Ashforth-Frost, B.C.Y. Cheong and P.T. Ireland

Jet Cooling System of Gas Turbine Blades
B.M. Galitsyansky

Heat Transfer at Interaction of Liquid Nitrogen Jet with Surfaces
G.A. Dreitser, V.P. Firsova, I.V. Antyukhov and A.S. Prokopenko

Diffusion of Two-Dimensional Jets into Counterflowing Flow
N. Ogawa and A. Miura

Phase-Averaged PIV Measurements of Turbulent ZNMF Jets
J. Cater, K. von Ellenrieder and J. Soria

Mixing and Diffusion Processes of Twin Circular Free Jets with Various Nozzle Spacing
T. Harima, S. Fujita and H. Osaka

Spectral Analysis on the Disturbance of a Round Water Jet with an Annular Airflow
Y. Morozumi, A. Kuwata, J. Fukai and O. Miyatake

Quantitative Visualization of Turbulent Mixing in Parallel Triple Plane Jets
K. Yamamoto and K. Hishida

Instantaneous Behavior of Pulsating Submerged Planar Jets
E.C. Mladin and D.A. Zumbrunnen

A 'Thin Layer' Model of Heat Transfer in a Laminar Liquid Film Formed by Impinging Jet
J. Mikielewicz and D. Mikielewicz
Helical Vortices in the Axisymmetric Jets with Peripheral Suction  
X.L. Xie, H.L. Zhou and W.W. Mar .......................... 1045

Experimental Investigation on Heat Transfer Characteristics of Heated Jet in Crossflow  
H. Wang, Y. Luo, D. Lu and T. Chen .......................... 1051

Hydrodynamics and Heat Exchange of Free Swirl Gas Jet  
B.V. Berg, B.P. Zhilkin and A.N. Shuba .......................... 1057

Jet Impingement Heat Transfer

Heat Transfer during Transient Cooling of High Temperature Surface with an Impinging Jet in an Evacuated Enclosure  
Y. Mitsutake, M. Monde and J. Hammad .......................... 1063

Annular Impingement Heat Transfer on an Oscillated Heated Surface  
K. Ichimiya and Y. Matsushima .......................... 1069

Controlled Cooling of a Hot Plate with a Water Jet  
H. Robidou, H. Auracher, P. Gardin and M. Lebouché .......................... 1075

Heat Transfer Measurements of Impinging Two-Dimensional Slot Jets  
X. Gao and B. Sunden .......................... 1081

Hydromechanics and Heat Exchange in Gaseous Impinging Jets  
A.A. Gulakov, B.P. Zhilkin and Yu.M. Brodov .......................... 1087

PART 8

Measurement Techniques

Instrumentation

Quantitative Temperature Imaging in a Gas-Phase Turbulent Thermal Convection by Laser-Induced Fluorescence of Acetone  
S.P. Kearney and F.V. Reyes .......................... 1093

Measurements of Bed Suction Effects on an Open Channel Flow with Laser-Doppler/Hot-Film Anemometry  
A. Zeris and P. Prinos .......................... 1099

Data Filtering Applied to Infrared Thermographic Measurement intended for the Estimation of Local Heat Transfer Coefficient  
S. Rainieri and G. Pagliarini .......................... 1105

Experimental Investigation of the Convective Heat Transfer Using Gradient Heat Flux Sensors  

An Experimental Technique for Near-Wall Turbulent Measurement  
D. Poggi, A. Porporato and L. Ridolfi .......................... 1117

Surface Thermometry by Laser-Induced Fluorescence of Dy³⁺:YAG  
K. Kontis, Y. Syogenji and N. Yoshikawa .......................... 1123

Application of LDA and PIV to Solid/Liquid Flow in Jet Loop Reactors with High Dispersed Phase Volume Fractions  
R. Angst, P. Mier and M. Kraume .......................... 1129

Fast Wire-Mesh Sensors for Gas-Liquid Flows and Decomposition of Gas Fraction Profiles according to Bubble Size Classes  
H.M. Prasser, E. Krepper and D. Lucas .......................... 1135

Microscale Temperature Measurement at an Evaporating Liquid Meniscus  
C. Höhmann and P. Stephan .......................... 1141
Measurements of Gas Flow Parameters Inside Complex Geometry Industrial Units
A.G. Ghiaus, D.P. Margaris and D.G. Papanikas ........................................... 1147

Flow-Field Measurements near Two Helicoid Fans by Cross-Correlation Particle Image Velocimetry
F. Peyrin and P.S. Mirade ................................................................. 1153

A Thermal Imaging Procedure for Landmine Detection
J. Deans, B. Dempster, G. Schmithals and L.J. Carter ............................. 1159

An Image Recording Method Utilising Two Cameras with Application to PIV
A. Fournas and J. Soria ................................................................. 1165

Proper Orthogonal Decomposition of Vorticity PIV Data on a Backward Facing Step Flow
J. Kostas, J. Soria and M.S. Chong ................................................ 1171

High Time Resolution Ultrasonic Velocity Profiler
Y. Ozaki, T. Kawaguchi, Y. Takeda, K. Hishida and M. Macda .................. 1177

PTV Measurement on Interaction between Two Immiscible Droplets and Turbulent Uniform Shear Flow of Carrier Fluid
Y. Hagiwara, S. Sakamoto, M. Tanaka and K. Yoshimura ....................... 1183

Velocity Profile Measurement by Ultrasound Time-Domain Correlation Method
G. Yamanaka, H. Kikura and M. Aritomi ........................................... 1189

Acoustic Excitation and the Stability of Single Bubble Sonoluminescence for Various Noble Gases
G.A. Delgadino, F. Bonetto, R.T. Lahey, Jr. ........................................ 1195

LDA and PIV Measurements Applied to Single and Multiple Impinging Jets

Development of a Novel Artificial Heart Muscle Using Thermoelectric Actuators
S. Maruyama, R. Ibuki, S. Sakai, M. Yamada, M. Sato, T. Yanbe, T. Takagi, Y. Luo and M. Behnia ... 1207

LDV Measurements of the Flow of Water in the Volute of a Centrifugal Pump
W.G. Li ............................................................... 1213

Liquid Crystal Technique Application for Heat Transfer Investigation in a Fin-Tube Heat Exchanger Element
M. Wierzbowski and J. Stasiek ...................................................... 1219

Sensors/Trasmitters Data Acquisition System to Value Temperature Distribution in a Natural Ventilation Building
P. Principi, C. Di Perna and E. Ruffini .......................................... 1225

Identification of Chaotic Attractors in Gas Bubbling
J.T. Cieslinski and R. Mosdorf .................................................... 1233

Leak Detection in Pipelines. Pressure Transients Analysis Through On-line Computer Techniques
C.F. Braga, S.L. Cruz, S.A. Cariati and J.A.F.R. Pereira ....................... 1237

Thermophysical Properties

Experimental Investigation of Dynamic and Equilibrium Surface Tension Characteristics of Aqueous Surfactant Solutions
V.M. Wasekar, J. Zhang and R.M. Manglik ........................................ 1245

Effective Thermal Properties of Mexican Geothermal Cementing Systems from 25 to 220 °C
A. Garcia, J.M. Morales, E. Contreras, E. Santoyo and G. Espinosa ........ 1251

On the Effective Thermal Conductivity of Dry Olivine
F. Gori and S. Corasaniti .......................................................... 1257

Application of a Cubic Equation of State to a Self-Consistent Thermodynamic Model to Obtain Thermodynamic Surfaces for Various Organic Heat Transfer Fluids
E. Silvestri ................................................................. 1263

Experimental Determination of the Functional Relationship Among Concentration, Temperature and Refractive Index for Ammonium Chloride Solutions
C.S. Stampa and S.L. Braga ....................................................... 1269

Structure of Upward Slug Flow in a Vertical Pipe
O.N. Kashinsky, R.S. Gorelik and V.V. Randin .................................... 1471

A Transition Criterion for the Onset of Slugging or Mixing in Horizontal Conduits
J.N. Reyes, Jr ................................................................. 1477

An Experimental Investigation on the Formation of Oil-Gas Two Phase Annular Flow in Horizontal Pipes
Z. Hu, H. Qian and F. Zhou .......................................................... 1483
General Studies

Impedance Probe for Phase Distribution Measurements and Flow Pattern Identification in Oil-Water Flows
J. Lovick and P. Angeli .......................................................... 1489

Effects of Polymer, Surfactant, and Salt Additives to a Coolant on the Mitigation and the Severity of Vapor Explosions
M. Furuya and I. Kinoshita ...................................................... 1495

Behaviors of Bubble Formation from a Bottom Porous Nozzle in a Bath
M. Kaji, T. Sawai, K. Mori and M. Iguchi ..................................... 1503

A New Magnetic Fluid Circulator Utilizing Waste Gas and/or Heat - First Report, Feasibility Test
M. Sadatomi, H. Tsubone, A. Kawahara and Y. Sato ...................... 1509

Experimental Research of Magnetohydrodynamic Resistance to a Flow of Lead, Gallium, Lead-Bismuth, and Lead-Lithium Eutectics in a Transverse Magnetic Field
A.V. Besnosov, S.S. Pinaev, V.N. Zakhvatov, A.V. Semyonov, T.A. Bokova and P.V. Romanov .... 1515

Particle and Droplet Dynamics

Contact Angle Behavior during Impingement of Molten Solder Droplets on Metal Plates
C. Richard, I.S. Bayer and C.M. Megaridis .................................. 1521

Motion of Two Settling Particles in a Stagnant Viscous Fluid inside a Vertical Cylinder
M. Shinohara ........................................................................... 1535

Particle Deposition in Low-Speed, High-Turbulence Flows
M. Reck, P.S. Larsen and U. Ullum ........................................... 1541

Evaporation of the Array of Hydrocarbon Droplets in an Air Stream
T. Kadota, Y. Ohta, H. Enomoto and D. Segawa .......................... 1547

Oblique Impact of Droplets on Walls and Films
Ś. Sikalo, C. Tropea, M. Marengo and E.N. Ganić ......................... 1553

T-Junctions

The Split of Slug Flow at a Small Diameter Horizontal T-Junction
R. Jones, E. Wren, G. Baker and B.J. Azzopardi ............................ 1561

The Phase Separation and Pressure Drop for R-22 Refrigerant in a Horizontal T-Junction
S.J. Tae, Y.H. Choi, K.N. Cho .................................................. 1567

Fundamental Study on Fluid Mixing Mechanism in a Tee Junction Area
K. Yuki, K. Okuyama, S. Toda and T. Muramatsu ........................ 1573

Application of a T-Junction as a Partial Separator for Liquid/Liquid Flows
L. Yang, B.J. Azzopardi and A. Belghazi ...................................... 1579

PART 10

Nuclear Reactor Safety

Flow and Solidification of Corium in the Vulcano Facility
C. Journeau, E. Boccaccio, C. Jegou, P. Piluso and G. Cognet .......... 1587

Water/Air Tests to Investigate the RPV Exterior Two-Phase Flow Behavior in the Event of a Core Melt
Modelling the Influence of Aerosol Deposition onto Horizontal Finned Tubes on Heat Transfer under Cross-Flow Condensing Conditions
L.E. Herranz, J.L. Muñoz-Cobo and M.J. Palomo ................................................................. 1599

An Experimental Investigation on a Steam Explosion with a Small Scale Tin-Water System

Hot-Leg Injection: 3D Versus 1D Three Velocity Fields Modeling and Comparison with UPTF Experiment
N.I. Kolev, H. Seitz and I. Roloff-Bock .................................................................................... 1611

Experimental Investigation on Heat Transfer in Surge Line Nozzle of Pressurizer in PWR
D. Lu, T. Chen, H. Wang and Y. Luo ...................................................................................... 1625

3-D Flow Field Studied in Rod Bundles with Spacer Grids
W.Y. Xiong, B.D. Chen, Z.J. Xiao and X.J. Ma .................................................................... 1631

Local Void Measurements in Integral-Type Experiments Simulating Nuclear Power Plant Transients
Gy. Ézsol, L. Szabados and H.M. Prasser .................................................................................. 1637

Experiments on the GEST-SIP1 Facility for Testing an Innovative Passive Injection System for LWRs
A. Achilli, G. Cattadori, R. Ferri and S. Gandolfi ................................................................. 1643

Simulation Method Research on Nuclear-Heat-Release Transient Characteristics
X. Wu, H. Zhao, X. Jiang, J. Liu and K. Wang .................................................................... 1649

High Temperature Behaviour of Reactor Core Materials under Air Oxidation Conditions

RELAP5/MOD3.2 Post Test Simulation and Accuracy Quantification of LOBI Test BT-02
R.C. Borges, F. D'Auria and A.C.M. Alvim ........................................................................... 1661

Experimental Research on the Double Tube Gravity Driven Boron Injection System
S.Y. Jiang, Y.J. Zhang, L.L. Gao and C.W. Ma ..................................................................... 1667

VOLUME III

PART 11

Thermalhydraulics

Fluidized and Packed Beds

Flow Characteristics in Channel with Local Blockage Packed with Spheres

Radial Dispersion in Liquid Flow through Packed Beds for 50 < Sc < 750 and 10^3 < Pe_m < 10^5

Instability of a Gas-Solid Fluidized Bed at High Particle Reynolds Numbers
P. Vainshtein, M. Shapiro and C. Gutfinger ............................................................................ 1689

Direct Contact Air-Water Heat Transfer in a Column with Structured Packing
S. Kypritzis and A. J. Karabelas ............................................................................................ 1695

Determination of Molecular Diffusion Coefficient through Measurement of Mass Transfer around a Cylinder Exposed to Liquid Flow in a Packed Bed
J.R.F. Guedes de Carvalho, M.A. Alves and J.M.P.Q. Delgado ........................................... 1701

Fluid Mechanics and Heat Transfer in Bubbling Fluidized Beds
O. Molerus ............................................................................................................................. 1707
