Modelling the Influence of Aerosol Deposition onto Horizontal Finned Tubes on Heat Transfer under Cross-Flow Condensing Conditions
L.E. Herranz, J.L. Muñoz-Cobo and M.J. Palomo ................................................................. 1599

An Experimental Investigation on a Steam Explosion with a Small Scale Tin-Water System

Hot-Leg Injection: 3D Versus 1D Three Velocity Fields Modeling and Comparison with UPTF Experiment
N.I. Kolev, H. Seitz and I. Roloff-Bock ........................................................................... 1611

Experimental Investigation on Heat Transfer in Surge Line Nozzle of Pressurizer in PWR
D. Lu, T. Chen, H. Wang and Y. Luo ................................................................................. 1625

3-D Flow Field Studied in Rod Bundles with Spacer Grids
W.Y. Xiong, B.D. Chen, Z.J. Xiao and X.J. Ma ................................................................. 1631

Local Void Measurements in Integral-Type Experiments Simulating Nuclear Power Plant Transients
Gy. Ézsöl, L. Szabados and H.M. Prasser ........................................................................... 1637

Experiments on the GEST-SIP1 Facility for Testing an Innovative Passive Injection System for LWRs
A. Achilli, G. Cattadori, R. Ferri and S. Gandolfi ................................................................. 1643

Simulation Method Research on Nuclear-Heat-Release Transient Characteristics
X. Wu, H. Zhao, X. Jiang, J. Liu and K. Wang ..................................................................... 1649

High Temperature Behaviour of Reactor Core Materials under Air Oxidation Conditions
Z. Hózer, P. Windberg, I. Nagy, L. Marót, L. Matus, M. Horváth, A. Pintér and M. Balaskó 1655

RELAP5/MOD3.2 Post Test Simulation and Accuracy Quantification of LOBI Test BT-02
R.C. Borges, F. D’Auria and A.C.M. Alvim ........................................................................ 1661

Experimental Research on the Double Tube Gravity Driven Boron Injection System
S.Y. Jiang, Y.J. Zhang, L.L. Gao and C.W. Ma .................................................................... 1667

VOLUME III

PART 11

Thermalhydraulics

Fluidized and Packed Beds

Flow Characteristics in Channel with Local Blockage Packed with Spheres
G. Matsui, K. Mishiro, H. Monji, M. Tanaka and H. Kamide .............................................. 1675

Radial Dispersion in Liquid Flow through Packed Beds for $50 < Sc < 750$ and $10^3 < Pe_m < 10^5$

Instability of a Gas-Solid Fluidized Bed at High Particle Reynolds Numbers
P. Vainshtein, M. Shapiro and C. Gutfinger ........................................................................ 1689

Direct Contact Air-Water Heat Transfer in a Column with Structured Packing
S. Kypritzis and A. J. Karabelas .......................................................................................... 1695

Determination of Molecular Diffusion Coefficient through Measurement of Mass Transfer around a Cylinder Exposed to Liquid Flow in a Packed Bed
J.R.F. Guedes de Carvalho, M.A. Alves and J.M.P.Q. Delgado ........................................... 1701

Fluid Mechanics and Heat Transfer in Bubbling Fluidized Beds
O. Molerus ......................................................................................................................... 1707
Transmittance of Packed Bed as Effective Radiative Property  
B.J. Grochal  .......................................................... 1711

Experimental Investigation of Heat Transfer from a Cylinder to Fluidized Particles with a Latent Heat Sink  
H. Groenewold and E. Tsotsas .................................. 1717

The Phenomenon of “Thermal Trap Effect” in Packed Bed of Glass Spheres  
S. Polesek-Karczewska .......................................... 1723

Effect of Axial Tube Location on Heat Transfer in the Core of a Circulating Fluidized Bed  
A.K. Kolar and R. Sundaresan ................................. 1729

Natural Circulation

Experimental Dynamics of a Natural Circulation Loop  
G. Cammarata, A. Fichera, I.D. Guglielmino and A. Pagano ......................................................... 1737

Heat Island Effect in Urban Areas: Airborne Measurements to Determine the Radiation Intensity  
A.M. Papadopoulos and E.A. Kalognomou ................... 1743

Influence of Power Steps on the Thermohydraulic behavior of a Natural Circulation Loop  
M. Misale, D. Cavallero and M. Frogheri .................... 1749

Natural Circulation in a Adiabatic Air-Water Loop  
A. Kulkarni and K. Iyer ......................................... 1755

Pressure Drops

Experimental Results on Pressure Drop Reductions and Flow Regime Transitions in Oil-Water Mixtures  
G. Sotgia, G. Spartà, E. Vendola and P. Tartarini ........ 1763

A New Pressure Drop Correlation for Air-Water Flow in a Horizontal Tube  
A.M. Ribeiro, T. Pimenta, J.M.M.C. Lopes and L.F. Melo ......................................................... 1771

Heat Transfer and Pressure Loss in a 180°-Turn of a Rectangular, Rib-Roughened Two Passage Channel  
M. Schnieder, R. Höcker and J. von Wolfersdorf ........... 1777

Experimental Set-Up to Measure Tube-Side Heat Transfer and Pressure Drop in Laminar and Turbulent One-Phase Flow  
P.G. Vicente, A. Garcia and A. Viedma ................. 1785

Flow Structure and Pressure Gradient in Churn Flow  
T. Sawai and M. Kaji ........................................... 1791

Drag Reduction in Polymers and Surfactants Solutions  
L. Broniarz-Press, J. Rozanski and I. Poltorak ........... 1797

Two Phase Flow Patterns and Pressure Drop in the Heated Horizontal Tube at High Vapour Specific Volumes  
O.N. Kaban’kov, L.A. Sukomel and V.V. Yagov .......... 1803

Entrance Length and Pressure Drop in an Entry Gap Flow  
J. Wojtkowiak and C.O. Popiel ............................... 1809

Characteristics of Single-Phase Heat Transfer and Pressure Drop in Plate Heat Exchangers with and without PTFE Coatings  
L. Cheng and G. Xia ........................................... 1815

. Turbulent Air Flow Friction and Heat Transfer of Finned Circular Tube Heat Exchanger with Rectangular Fins  
D. Yang, T. Chen, C. Wan and M. Tang ...................... 1821
Shock Waves and Wave Propagation

Effect of Liquid Viscosity on Inception of Disturbance Waves and Droplets in Gas-Liquid Two-Phase Flow
K. Mori and K. Nakano ................................................................. 1829

Flat Plate Impingement of the Shock Wave Discharged from an Open End of a Shock Tube

Control of Shock Wave Using Nonequilibrium Condensation of Moist Air

Thermodynamic Aspects in Modelling the Wave Phenomena in a Liquid-Vapour System
Z. Bilicki .................................................................................. 1847

Enhancement of Shock Wave and Mass Transfer behind a Wave in Saturated Porous Medium
V.E. Nakoryakov and V.E. Dontsov .................................................. 1853

Structure of Shock-Trains in Constant Area Ducts
K. Matsuo, Y. Miyazato, J.K. Kwon and M. Masuda ................................................................. 1859

The Pressure Wave with Complete Vapor Condensation in Flow Boiling
V.V. Kuznetsov and O.V. Vitovsky ................................................................. 1865

Experimental Study of Thermo-Fluid Dynamic Phenomena in Superfluid Helium by using Superfluid Shock Tube Facility
H. Nagai, Y. Ueta, H.S. Yang, M. Murakami and K. Yanaka ................................................................. 1871

Turbulence and Boundary Layers

Improvement of a Stalled-Diffuser Performance by a Turbulent Wake
O. Mochizuki, H. Ishikawa and M. Kiya ................................................................. 1879

Flow around a Circular Cylinder with Non-Isothermal Blowing
L. Mathelin, F. Bataille and A. Lallemand ................................................................. 1885

Heat Transfer from a Line Source Located in the Periodic Laminar Near Wake of a Circular Cylinder
G. Godard and P. Paranthoën ................................................................. 1891

On the Transition from Laminar to Turbulent Regime in Vertical Upward Two-Phase Slug Flow
A.M.F.R. Pinto, M.N. Coelho Pinheiro, S. Nogueira and J.B.L.M. Campos ................................................................. 1897

Scintillometric Measurements of Atmospheric Turbulent Heat and Momentum Fluxes and Their Application to Atmospheric Stability Evaluation
V.J. Daoo, N.S. Panchal, F. Sunny and V. Venkat Raj ................................................................. 1903

Eduction of Multi-Scale Turbulent Structures in the Near-Wake of a Cylinder Using Wavelet Multi-Resolution Technique
H. Li and Y. Zhou ................................................................. 1909

Comparison of Local Heat Transfer by Ammonia Absorption Measurements and Different Turbulence Models in a Square Duct with Longitudinal Vortex Generator Roughness
S. Wang, J. Bergmann and M. Fiebig ................................................................. 1915

Turbulent Heat Transfer in a Separated and Reattached Flow on a Blunt Flat Plate
T. Ota and T. Kon ................................................................. 1921

Study on Relationship between Shear Stress Distribution and Bursting Motion in a Turbulent Boundary Layer by Using Micro Shear Stress Imager
Y. Iwadare, N. Miyagi, M. Kinura and H. Shoji ................................................................. 1927

An Experimental Study of Turbulent Backward-Facing Step Flow under Two-Frequency Forcing
S. Jin, H. Choi, S. Kim, J.Y. Yoo and S. Kim ................................................................. 1933
Liquid Films

Thermal Performances of a Falling Film Graphite Evaporator
S. Bessenet, V. Renaudin, M. Daroux, J.M. Hornut, and P. LeGoff 1941

Experiments in Laminar Film Flow Along a Corrugated Wall
M. Vlachogiannis and V. Bontozoglou 1947

On Freely-Falling Liquid Film Along a Vertical Flat Plate
C. Bertani and M. De Salve 1953

Local and Instantaneous Distribution of Heat Transfer Rates through Wavy Films
F. Al-Sibai, A. Leefken and U. Renz 1959

Measurement of Falling Films Thickness by Capacitive Sensors
W. Ambrosini, N. Forgione, F. Oriolo and A. Kammerer 1965

Flow Dynamics and Heat Transfer in Intensively Evaporating Wavy Liquid Film
A.N. Pavlenko, V.V. Le, A.F. Serov and A.D. Nazarov 1973

Conditions for the Change of the Droplet Structure into the Water Film on a Heated Wall
Surface Overflown by a Stream of Air
Z. Zapalowicz 1979

Heat Transfer and Breakdown of Subcooled Falling Liquid Film on a Middle Size Heater

Characteristics of Liquid Film in a Vertical Pipe with the Presence of Gas Flow
S. Alekseenko, A. Cherdantsev, S. Kharlamov and D. Markovich 1991

Methodic of Measurements and Experimental Results of Local Heat Transfer at Liquid Film Flow on the Horizontal Finned Tubes
V. Rifert, V. Sidorenko, V. Usenko and I. Zolotukhin 1997

Falling Liquid Film of the Surface Active Agents Solutions
L. Broniarz-Press and D. Dulska 2001

Thermocapillary Convection in a Falling Thin Liquid Film Locally Heated

The Long Waves on a Liquid Film Falling over a Vertical Cylinder
O.Y. Tsvelodub, and A.A. Bocharov 2013

Unstable and Unsteady Flows

Experimental Investigation of Annular Diffuser in Consideration of Efficiency and Unsteady Flow
P. Kraus, J. Messner and H. Stetter 2021

Effects of Pulsation on External Flow Heat Transfer around a Rod
Y. Ishino, T. Abe, S. Yamaguchi and N. Ohiwa 2027

Dynamics and Quasi-Periodicity in Axially Forced Taylor-Couette Flow
M. Sinha, I.G. Kevrekidis and A.J. Smits 2033

Experimental Investigation of Propagating Flow Instabilities Generated by Super Vibratory Agitation
A. Jianu, M. Brede, P. Claude, A. Leder and H.J. Speck 2039

Self-Oscillation of Cavitating Flow Around an Elliptic Cylinder
T. Mori, T. Takahashi, T. Kaga and T. Ota 2047

The Spatial Amplification of Disturbances in the Kármán Boundary-Layer
Y.K. Hwang and Y.Y. Lee 2053

The Spatial Amplification of Disturbances in Vertical Natural Convection Flows of Water Near Density Extremum
Y.K. Hwang 2059

Transition in a Laminar Spot
A. Matsumoto 2065
Experimental Study of Transient Evaporation of Superfluid Helium Induced by Incidence of Second Sound Thermal Pulse onto Free Surface
M. Murakami, T. Furukawa, M. Maki and J. Fujiyama ........................................ 2071

Pressure Transient in Compressible Bubbly Flows in the Petroleum Industry
D. Kim, S. Correra, A. Di Lullo, N. Mancini and F. Podenzani .......................... 2077

PART 12

Thermodynamics and Heat and Mass Transfer

Freezing, Melting and Solidification

Heat Transfer and Phase Transformations in Laser Annealing of Thin Si Films
C.P. Grigoropoulos, S. Moon and M. Lee .......................................................... 2085

Evaluation of Analytical Model on Power Balance of Skull Melting Set-up
S.W. Hong, B.T. Mín, H.D. Kim and J.K. Choi ............................................. 2095

An Investigation of the Phase Change Process with Natural Convection in the New PCMS Encapsulated in a Rectangular Cavity
R. Domanski, K. Nagano, M. Rebow and T. Mochida ................................... 2101

Experimental Study on the Thermal Performance with Frosting to Predict Frost Growth on a Flat Plate
N. Shimomura, M. Kumada, R. Chu and T. Mizuno ...................................... 2107

Convective Melting of Ice near 4°C
G.R. Vieira, S.L. Braga and D. Gobin ......................................................... 2113

General Studies

Rayleigh-Bénard Phenomena, Bifurcations, Exergy Degradation and System Evolution
G. Bisio and C. Pisoni ................................................................................. 2121

Experimental Measurements of Radiative Heat Flux in Complex Geometries and Comparison with Numerical Modelling
J.S. Almeida, W. Malalasekera and E.H. James ..................................... 2129

Prediction of Stagnation Region Heat Transfer Using a Neural Network
B. Seyedan, A.N. Oo, C.Y. Ching and M. Shoukri .................................. 2135

Non-Newtonian Laminar Heat Transfer in Stirred Tank Bioreactors
Y. Kawase, M. Hoshino and T. Takahashi ................................................ 2143

Non-Linearity: Fundamentals and Applications in Different Processes
G. Bisio, L. Tagliafico and A. Bisio .............................................................. 2149

Heat Transfer in a Spherical Cavity during Variation of Dynamics Conditions
V.I. Terekhov, S.V. Kalinina and Yu.M. Mshvidobadze .............................. 2155

Heat Transfer During Foam Flow Across Bank of Tubes
J. Gyllys, M. Jakubcionis and S. Sinkunas ................................................. 2161

Experimental Research on Heat Transfer Phenomena through Fuel Oil in Railway Wagon Tanks
I. Ionel, C. Ungureanu, D. Lelea, P.D. Oprisa-Stanescu ............................ 2167

Novel Method Thermodynamic Analysis of Energy Intensive Systems
V. Nikulshin, C. Wu and V. Nikulshina ...................................................... 2175

Heat Transfer to Kerosene at Supercritical Pressure in a Round Tube with a Large Heat Flux at the Wall
Z. Hu, T. Chen and Y. Luo ..................................................................... 2181
Heat Recovery

Characteristics of a Thermal Storage Tank on an Under-Water Ice-Harvesting System
E.P. Kim, J.I. Yoon, I.S. Choi, J.D. Kim and B.B. Saha ................................................. 2187

Experimental and Numerical Analysis of a Thermal Storage Tanks
R. De Césaro Oliveski, A. Krenzinger, H.A. Vielmo and C.W.M. Prieb. .......................... 2193

A New Technique for Enhancing Thermal Conductivity of Thermal Energy Storage Materials
J. Fukai, Y. Morozumi, Y. Hamada, W. Otsu and O. Miyatake ........................................ 2199

Experimental Study on the Self-Operative Heat Transportation by Utilizing the Accumulated
High-Pressure Vapor
K. Kadoguchi, M. Yamazaki and M. Watanabe ................................................................. 2205

Solar Desalination with Recovery of Heat of Condensation
B. Bouchekima, B. Gros, R. Ouahes and M. Diboun ......................................................... 2211

Mass Transfer

Experiment Investigation of the Humidifying and Desulfuration of Flue Gas in a Boiler
of Power Plant

Application of a Simplified Heat and Mass Transfer Model to the Measurement of the
Transfer Factor of Moist Insulating Materials
P. Baggio, C. Bonacina, M. Campanale, L. Moro and S. Zorzi ........................................ 2225

Experimental Determination of Adsorption Capacity and Optimisation of Performance
of a Rotary Desiccant Dehumidifier for Hot Humid Climates
F. Toribio, P.H. Nguyen and M. Dupont .......................................................... 2233

Experimental Investigation and Theoretical Modeling of Heat and Mass Transfer in Absorbers
for Cleaning Exhaust Flue Gases from Sulfur Dioxide
I.V. Derevich .......................................................... 2237

Energy and Mass Transfer Phenomena in Natural Draft Cooling Towers
B. Širok, B. Blagojevič, M. Novak, M. Hocevar and F. Jere ............................................. 2243

Dust Trapping and Absorption of Sulphur-Containing Components on the Film During a
Steam-Gas Mixture Condensation
L.V. Romanova, I.V. Iakimova and A.V. Bratseva ....................................................... 2249

Heat and Mass Transfer in Rotating Air-Water Flow
I. Borisov, A. Khalatov and N. Syred .................................................................................. 2255

Heat and Mass Transfer During the Degassing of Polymers
I. Gestring and D. Mewes ......................................................... 2261

Modeling and Experiments of the \( \text{NH}_3/\text{H}_2\text{O} \) Bubble Absorption Using a Non-Equilibrium
Phenomenological Theory of the Mass and Heat Transfer
M.D. Staicovici ......................................................... 2267

Refrigeration and Cooling

Performance Evaluation of a Cascade System Using R-22/R-23

Experimental Investigation of the Mixing between Hot and Cold Gas in Two Cooling Processes
F. Bataille, J. Bellettre and A. Lallemand ......................................................... 2285

The Effect of Diameter on the Heat and Mass Transfer Characteristics in a Vertical Absorber
J.K. Kim, J.H. Seo and K.N. Cho .......................................................... 2291

Multiple Expansion Vapour Compression Refrigeration Cycle
J. Gryzgoridis and J.A. Browne .................................................. 2297
Heat and Mass Transfer Characteristics of a Helical Absorber Using LiBr+LiI+LiNO₃+LiCl Solutions
J.I. Yoon, H.S. Lee, C.G. Moon, E.P. Kim, J.D. Kim and B.B. Saha ........................................ 2303

Characterization of Semi-Crystalline Polymers during Cooling Processes
G.C. Alfonso, M. Cartesegna and L. Tagliafico ................................................................. 2309

The Applicability of the EHD Technique for Dehumidification

Experimental Results and Evaluation of Linear Compressor
S. Kawahara, T. Akazawa, S. Kawano, H. Hasegawa, M. Ueda and Y. Asaiada ........................... 2321

Coupled Heat Transfer through Building Components with Air Cavities
P. Stefanizzi .............................................................................................................................. 2329

Near Critical Heat Transfer in CO₂ Process Cycle
R. Eggers and U. Sievers ........................................................................................................ 2335

PART 13

Fluid-Dynamics

General Studies

Visualisation of Three-Dimensional, Transonic Cavity Flows
N. Taborda, D. Bray and K. Knowles .......................................................... 2343

Investigation of Airfoil Ground Effects Using a Moving Belt System
Y.J. Kim and J.H. Cho ....................................................................................................... 2349

Hydrodynamics of Aeration and Suspending in a Mixer
P. Wesolowski ..................................................................................................................... 2355

Some Functions of Wing Apparatus in Insects
S. Sudo, K. Tsuyuki and T. Ikohagi .................................................................................... 2361

Pump Design CAD Based on the PDE Numerical Grid Generation Techniques
C. Li, J. Su and X. Cheng ....................................................................................................... 2367

Rotating Flows

The Effect of Diffuser Inlet Flow Angle on Diffuser Rotating Stall
J.H. Kim and K.R. Cho ........................................................................................................ 2375

Flow between Two Coaxial Rotating Cylinders with a Highly Water-Repellent Wall
K. Watanabe, S. Ogata, S. Isozaki and T. Takayama ............................................................ 2381

Thermal Modelling of a Rotating Cavity Rig to Simulate the Internal Air System of a Gas Turbine H.P. Compressor
A. Alexiou, C.A. Long, A.B. Turner and C. J. Barnes ......................................................... 2387

Vortex Flows

Effect of Embedded Vortices on Film Cooling Performance on a Flat Plate
J.S. Lee, H.G. Jung and S.B. Kang ......................................................................................... 2395

Flow Structures of Swirling Wakes behind Circular Discs
R.F. Huang and F.C. Tsai ...................................................................................................... 2401

Experimental Investigation of the Confined Vortex Flow in a One Channel Vortex Enhanced Heat Exchanger
F. Dupont, N. Daviot, C. Gabillet and P. Bot ....................................................................... 2407
Anomalous Taylor Vortex Flows in a Short Annulus
H. Kawai and H. Takahashi ................................................................. 2413

Vortical Structures behind Three Side-by-Side Cylinders
X.W. Wang, Y. Zhou and H. Li ............................................................... 2417

Criterion for the Necklace Vortex Excitation in Criss-Cross Circular Cylinder System
I. Kumagai, T. Matsumoto, T. Takahashi and M. Shirakashi ......................... 2423

Experimental Study of Interference Drag For Multi-Element Objects
A. Sakellaridis and A. Lazaridis .......................................................... 2429

Comparison of Rotating Flows with Vortex Breakdown in Cylindrical and Quadratic Containers
J.N. Sorensen V. Okulov, I. Naumov and E. Varlamova ................................ 2435

Influence of the Dissymmetry in Rotating Fluids on the Vortex Core Precession and Spectral Characteristics of the Flows
I. Naumov, V. Meledin, and V. Okulov ................................................ 2441

Studies on Junction Flow in Swirling Flow Exhaust Pipe System
L. Cao, Y. Liu, H. Liu and S. Shuai ...................................................... 2447

Author Index ......................................................................................... A1
