DEEP FOUNDATIONS
ON BORED AND AUGER PILES

Edited by
W.F. Van Impe
Laboratory of Soil Mechanics, Ghent University, Belgium
President ISSMGE
Table of contents

Preface ix

Introductory lecture
Screw piling: Still a challenging discussion topic?
*Van Impe, W.F.*

**Theme lecture 1: Mexican experiences with bored piles**
Enduring subsoil changes with large bored piles in Mexico City
*Springall, G.*

**Theme lecture 2: Auger and bored pile monitoring and testing**
Auger and bored pile construction monitoring and testing
*Bustamante, M.*

**Theme lecture 3: Research needs and professional practice in bored and auger piles**
Deep foundations - Can further research assist practice?
*Poulos, H.G.*

**Theme lecture 4: Design practice of bored piles in group and in piled raft concepts**
Design of piled raft foundations: Practice and development
*Mandolini, A.*

**Theme lecture 5: Soil parameters relevant to bored pile design from laboratory and in situ tests**
Soil parameters relevant to bored pile design from laboratory and in situ tests
*Jamiolkowski, M.*

**Theme lecture 6: Experiences with bored piles under seismic loading**
Performance and practice on bored piles subjected to earthquake
*Matsui, T., Oda, K., Tokida, K. & Yasuda, F.*
### Discussion session 1:
**Installation parameter influence; international standards and Eurocode 7 for bored and screw piles**

- Assessment of model factors and reliability index for ULS design of pile foundations  
  *Bauduin, C.*
- Comparative performances of Continuous Flight Auger and Driven Cast in Place piles in sands  
  *Evers, G.*, *Hass, G.*, *Frossard, A.*, *Bustamante, M.*, *Borel, S.* & *Skinner, H.*
- Influence of residual stresses for non displacement cast in situ piles  
  *Falconio, G.* & *Mandolini, A.*
- Analysis of bearing capacity and settlement of CFA piles  
  *Kłosiński, B.* & *Rychlewski, P.*
- The bearing capacity of piles  
  *Mets, M.*
- Contact behaviour at the interface between bored piles and subsoil  
  *Moormann, Ch.*
- Development of the screw steel pipe pile with toe wing, “Tsubasa Pile”  
  *Mori, G.*
- Installation effort as an indicator of displacement screw pile capacity  
  *NeSmith, W.M.*

### Discussion session 2:
**Screw and bored piles under axial, lateral and earthquake loading; design versus performance**

- Investigation of the large lateral displacements behaviour of tubular piles in sand - Full scale and centrifuge modelling  
  *Bouafia, A.* & *Lachenani, A.*
- Calculation of load-settlement curve based on CPT test results  
  *Gwizdala, K.* & *Steczniewski, M.*
- Compacted grout bored micropiles in clay  
  *Lutenegger, A.J.*
- Design of axially loaded bored single piles  
  *Masopust, J.*
- Investigation of lateral load resistance of laterally loaded pile in sandy soil  
  *Rahman, M.*, *Alim, A.* & *Chowdhury, A.S.*
- Particle based modeling of CFA and soil displacement piles  
  *Schmitt, A.* & *Katzenbach, R.*

### Discussion session 3:
**Professional practice and quality control in bored and auger piling; design philosophy**

- Bored precast piles equipped with grouted bulb in the toe region  
  *Karkee, M.B.* & *Yamato, S.*
- Bored sockets in weathered basalt  
  *Maertens, L.*
- Structural design issues for bored piles  
  *O’Neill, M.W.*, *Tabsh, S.W.*, *Sarhan, H.A.* & *Nam, M.S.*
Recent developments on Continuous Flight Auger (CFA) pile: Technology, equipment and applications
Pagliacci, F., Bertero, A., Siepi, M. & Zuffi, P.
A study of the screwed pile - The results of installation and loading tests and analysis of penetration mechanisms
Saeki, E. & Ohki, H.
Behaviour of polymer-based slurry for deep-seated bored piles in multi-layered soil of Bangkok
Thasnanipan, N., Aye, Z.Z. & Boonyarak, T.
Bearing capacity of bored pile packed with iron and steel slag using precast concrete pile
Yabuuchi, S., Nishiwaki, A., Kobayashi, K., Hirao, K. & Yoshikawa, N.

Discussion session 4:
Bored and auger pile testing
Influence of pile installation and of pile test procedure on the test load results of Atlas pile - A case study
Ayfan, E.F., Van Impe, W.F. & Imbo, R.
Experimental evidence for the validation of load-settlement predictions
Caputo, V.
Behaviour of a CFA pile in a lateric clay
Décourt, L.
Bi-directional static load testing - State of the art
England, M.
Static and cyclic tests on bored piles for the foundation of a tunnel and slab tracks
Kempfert, H.-G., Raithel, M. & Quick, H.
A full-scale test on large diameter bored piles for the construction of the HST-tunnel in Antwerp (Belgium)
Maertens, J., Theys, F. & Maekelberg, W.
A contribution to the analysis of Osterberg's cell load test
Russo, G., Recinto, B., Viggiani, C. & de Sanctis, L.
Case history of a designed, installed, load and integrity tested ACIP piles project
Stephan, G.A. & Saxena, D.S.

Discussion session 5:
Case studies including also piled raft design
Box-shaped foundations of bored and auger piles (or diaphragm walls)
Brandl, H.
Centrifuge modelling to investigate the performance of piled rafts
Conte, G., Mandolini, A. & Randolph, M.F.
Evaluation of deep bored foundation behavior on a tropical residual soil via instrumented loading tests
Cunha, R.P., Pereira, J.H.F. & Camapum de Carvalho, J.
A case study of rock socketed piles: Design, control and construction of bored piles for a bridge foundation in southeast Brazil
de Mello, L.G., Bilfinger, W., Mendes, A.S. & Sá Fontes, R.
On the ultimate vertical load of piled rafts on soft clay soils
de Sanctis, L. & Mandolini, A.
Piled raft foundation of a railway bridge in tertiary clay
El-Mossallamy, Y., Schmidt, H., Gündling, E. & Löschner, J.
Comparative behavior of ACIP and driven piles in Gulf coastal clays
Kim, M-G., O’Neill, M.W., Roberts, T. & Yin, S.

Effect of groundwater-drawdown on deep foundations
Moormann, Ch. & Katzenbach, R.

Small-scale model tests with Combined Pile-Raft Foundations
Turek, J. & Katzenbach, R.
