Lasers in Manufacturing 2003

Proceedings of the Second International WLT-Conference
Lasers in Manufacturing, LIM 2003
Munich, Germany, June 24.-26., 2003

Edited by R. Poprawe, A. Otto
for the German Scientific Laser Society (WLT)

AT-Fachverlag GmbH, Stuttgart 2003
## CONTENTS

### LASERS IN MANUFACTURING
Laser materials processing – an integral approach

*H. Hügel*

10+ kW tunable ultrafast laser

*M. Kelley*

### HIGH POWER DIODE LASER APPLICATIONS

#### INTRODUCTION
Introduction to high power diode laser technology

*F. Bachmann*

Adapted diode laser modules for materials processing

*A. Knitsch, D. Hoffmann, P. Loosen, R. Poprawe*

### DIODE LASER APPLICATION FOR HARDENING AND SURFACE TREATMENT
Large area surface treatments with 6 kW HPDL

*J. Latokartano, P. Hayhurst, J. Tuominen, P. Vuoristo*

Temperature controlled hardening of single part tools for automotive industry with high power diode laser systems

*P. Hoffmann, R. Dierken*

Homogenised high power diode laser systems for materials processing and illumination

*M. Traub, H.-D. Plum, H.-D. Hoffmann, P. Loosen, R. Poprawe*

An example for modular diode laser systems: Minimizing warpage during transformation hardening of linear guiding rails

*A. Drenker, M. Baumann, N. Pirch, H.-D. Plum, J. Sommer, G. Vitr, S. Kaierle, K. Wissenbach, R. Poprawe*

Production applications for high power diode laser systems – case studies

*J. M. Haake, M. S. Zediker*

### DIODE LASER APPLICATION FOR CLADDING
Laser beam cladding of steel with high power diode lasers

*G. Habedank, C. Theiler, M. Grupp, H. Kohn, G. Sepold, F. Vollertsen*

Laser cladding powered by diode lasers at high processing speed

*K. Partes, C. Theiler, T. Seefeld, F. Vollertsen*

Formation of Hard Surfacing Layers with Diode Lasers

*A. Morikawa, N. Abe, M. Tsukamoto, K. Yoshida*

Surface modification of cold sprayed coating by using direct diode laser

*J. Morimoto, Y. Sasaki, T. Onoda, N. Abe*

### DIODE LASER APPLICATION FOR CUTTING AND JOINING
Welding of Aluminum Alloys with a 4kW Direct Diode Laser

*N. Abe, M. Tsukamoto, A. Morikawa, K. Maeda, K. Namba, J. Morimoto*
Diode laser welding: basic processing parameters and applications
J. Härtl, M. F. Zäh

73

Laser beam brazing of aluminum alloys
F. Klocke, A. Castell-Codesal, P. Senster

Application of new diode laser tools for cutting and welding
C. Benter, B. Seme, D. Petring, R. Poprawe

85

Demonstration device for individually addressed high-power diode laser bars
N. Böning, M. Röhner, K. Boucke, R. Poprawe

93

Robotic Laser Soldering – Mathematical Model and Comparison with Xenon Short-arc Heating Lamp Technology
S. Naveed, R. Woods

97

**DIODE LASER APPLICATION FOR POLYMER WELDING**

Innovative Trends in Laser Beam Welding of Thermoplastics
U.-A. Russek

Welding of steering oil reservoirs using a high power diode laser system
H. Haferkamp, A. von Busse, M. Hustedt, G. Regener

Thermal Modeling of the laser welding of polypropylene
S. Abed, W. Knapp, E. Ghorbel, K. Agrebi, P. Laurens

Welding of infrared transmissive thermoplastic polymers using diode lasers systems
Scott Hartley, Nicole Woosman

Analysis of additional absorbers for laser welding of coloured thermoplastics
S. Abed, W. Knapp, V. Boschat, J. Y. Charmeau, P. Laurens

Pulse widths less than 100 ns at 500 A Current: Challenge to Explore New Applications with High-Power Laser Diode Arrays
M. Bartram, R. W. De Doncker, J. Gottmann, G. Schlaghecken, D. Hoffmann, R. Poprawe

105

113

119

123

129

133

**PROCESS AND PRODUCT DESIGN – MACRO PROCESSING**

**HYBRID TECHNOLOGIES**

Overview of hybrid technology
E. Beyer, B. Brenner, S. Nowotny

Hybrid laser-arc welding for pipeline applications
G. S. Booth

CO₂-Laser GMA hybrid welding – aspects of research and industrial application
G. Sepold, C. Thomy, T. Seefeld, M. Schilf, F. Vollertsen, R. Hoffmann

Applications of the laser-GMA-hybrid-welding process in steel and aluminium vehicle construction
U. Dilthey, F. Reich

Study on the Welding Variables according to Gap Tolerance of Butt Joint in Laser Hybrid Arc Welding of Carbon Steel
H.S. Kim, Y.S. Lee, Y.S. Park, J.K. Kim, J.H. Shin

Some aspects of arc stability in GMA-Laser-Hybrid welding
M. Schilf, C. Thomy, T. Seefeld, F. Vollertsen

139

145

149

157

165

171
Investigations and applications of laser arc hybrid welding with the “integrated nozzle”

D. Petting, C. Fuhrmann, N. Wolf, R. Poprawe

Process-integrated heat treatment of laser beam welded high-strength steel sheets

H. Haferkamp, J. Bunte, O. Meier, A. Bormann, M. Schatz, B. Boese

Plasma-assisted laser cladding – process design and properties

J. Wilden, A. Emmel, M. Dolles

Laser-assisted metal spinning of advanced materials

F. Klocke, T. Wehrmeister

**WELDING**

Introduction to laser welding

F. Dausinger

Double focus technique in laser welding of aluminium tailored blanks

A. Duquenoy, GM. Raynaud, W. Gref

Multi focus technique – methods to enhance welding performance, process quality and flexibility

W. Gref, M. Leimser, A. Ruß, F. Dausinger

Reduction of porosity content generated during Nd:YAG laser welding in aluminium alloys by surface preparation and dual spot arrangement

P. Peyre, A. Haboudou, A.B. Vannes

Ultra-fine keyhole welding with single-mode fiber laser

I. Miyamoto, Osaka University, Japan

High speed welding of metal sheets with thin disk laser

A. Ruß, W. Gref, M. Leimser, F. Dausinger, H. Hügel

Properties of laser joined of aluminium/ steel sheets

M. Kreimeyer, F. Wagner, F. Vollertsen

Laser beam welding of aluminium alloys – scaling laws and identification of parameters determining the quality of the weld

P. Berger, F. Dausinger, H. Hügel

Precise calibration and reliable operation of laser process tools – focus position system

A. Lindskog

**RAPID PROTOTYPING AND SURFACE TECHNOLOGY**

Direct Laser Sintering of Ceramic Materials

F. Klocke, C. Ader

Selective laser curing: a new approach towards ceramic prototypes

A. Otto, F. Niebling

Rapid manufacturing of metal parts and tools using laser melting

C. Over, W. Meiners, K. Wissenbach, J. Hutfless, M. Lindemann

Laser cladding of multi-component wear-resistant coatings

A. Yakovlev, Ph. Bertrand, I. Smurov

Crack formation during forced quenching in laser transformation hardening of SAE 1055 (EN-9) type steel

K. Labuschagne, S. Pityana, J.H. Potgieter

Process design of laser forming for three dimensional thin plates

J. G. Cheng and Y. L. Yao
Nd:YAG Laser assisted aluminium foaming

Y. P. Kathuria

Polishing by laser radiation

E. Willenborg, K. Wissenbach, R. Poprawe

In process monitoring of laser polishing of CVD diamond plates by fibre optic low coherence interferometry

A. A. Andronov, V. V. Ivanov, V. I. Konov, V. V. Kononenko, V. A. Goryunov, V. A. Markelov, M. A. Novikov, A. D. Tertyshnik, S. S. Ustavshikov, P. V. Volkov

FUNDAMENTALS OF LASERS IN MATERIAL PROCESSING

LASER ABLATION FOR MATERIAL DEPOSITION AND MODIFICATION

Thermal and non-thermal aspects of nanosecond pulsed laser ablation

A. V. Gusarov, I. Smurov

Adhesion measurement using laser induced shock wave applied to Aluminium/Copper system

C. Bolis, L. Berthe, M. Boustie, M. Arrigoni, M. Jeandin, S. Barradas

FUNDAMENTALS OF LASER BEAM WELDING, CUTTING, AND ABLATION

Approximate model for laser welding

J. Michel, S. Pfeiffer, W. Schulz, M. Niessen, V. Kostrykin, C. Maier

Vapour flow modelling in deep penetration laser welding

E. H. Amara, R. Fabbro, A. Bendib

Visualisation of the melting pool behaviour during laser transmission welding of polymers

H. Haferkamp, A. von Busse, M. Fargas, J. Bunte

Correlation of Process Monitoring with X-Ray Observation of CO₂ Laser Beam Welding

P. Abels, S. Fujinaga, S. Kaierle, S. Katayama, C. Kratzsch, A. Matsunawa, K. Miyamoto, J. Peteretik, R. Poprawe

Simulation of laser beam cladding by powder injection

D. Lepskil, H. Eichler, S. Scharek, V. Fux, S. Nowotny, E. Beyer

Identification of Dimension in Phase Space for Cutting

W. Schulz, U. Eppelt, H. te Heesen, V. Kostrykin, J. Michel, M. Niessen

Continuous multi-phase modeling of laser ablation with short pulses

A. Ruf, P. Berger, F. Dausinger, H. Hügel

HIGH POWER LASERS AND SYSTEMS FOR MANUFACTURING

SYSTEMS FOR LASER BEAM JOINING

Introduction: High Power Lasers and Systems for Manufacturing

A. Otto

Nd:YAG – Remote welding with robots

E. Beyer, A. Klotzbach, V. Fleischer, L. Morgenthal

Laser beam welding with scanner

M. Grupp, T. Seefeld, F. Vollertsen

Laser Brazing with High Power Solid State Lasers – Systems and Applications in Automotive Industry

P. Hoffmann, P. Kugler, J. Schwab
Innovative solutions for laser plastics welding
S. Hierl, A. Hofmann

Minimizing cost of ownership with use of super-modulation
M. Naeem

Combined Process Tool for Laser Welding with Seam Tracking and Laser Brazing
U. Sandström, T. Salmi

Turnkey laser cells for in-line body-in-white applications
U. Widén

Mobile laser processes – adapting the laser process to mass customization
C. Ulrich, M. F. Zäh

LASERS AND ACCESSORIES

Pulsed high power solid-state laser for high speed precision machining

Industrial grade, modular, scaleable diode pumped Nd:YAG laser series
U.-K. Jarosch, M. Laskowski, F. Maßmann, A. Napiwotzki, B. Smandek,

Compact, high-repetition rate excimer lasers for industrial applications
A. Görtlér, C. Strowitzki

Laser/Optics Process Module
H. Reinisch, T. Weiler, M. Rudert

The importance of switch-off and redundancy concepts for serial production with high power diode lasers in the automotive supplier industry
A. Eltze, C. Ullmann

Flexible hollow-core-waveguides for CO2-lasers – potential and limitations as beam guiding systems for material processing
K. Behler, K.-F. Klein, J. Johannis

SYSTEMS FOR LASER BEAM CUTTING

Precision laser beam cutting of sheet metal segments
E. Pfeiffer, E. Beyer, L. Morgenthal

Prediction of kerf geometry and quality in laser cutting
G. Campana, A. Fortunato, G. Tani, L. Tomesani

Cutting of wood composite materials by laser equipment
J. Haussmann
