THE 4th INTERNATIONAL CONFERENCE FOR
CONVEYING AND HANDLING OF
PARTICULATE SOLIDS

PROCEEDINGS

Volume 1

Editors:
H. Kalman and J. Gyenis

Intercontinental Hotel, Budapest, Hungary
May 27-30, 2003
Volume 1

CHAPTER 1 – MEMORIAL

• A REVIEW OF THE RESEARCH WORK OF PROFESSOR PREDRAG MARJANOVIĆ
  D. Mills
  Independent Consultant, UK................................................................. 1.1

• SUNIL DE SILVA - A SCIENTIST DEVOTED TO POWDER TECHNOLOGY
  G.G. Enstad
  Tel-Tek Dept. POSTEC, NORWAY...................................................... 1.17

CHAPTER 2 – SOLIDS PROCESSING AND PRODUCTION

• CRYSTALLISATION OF COCOA BUTTER PARTICLES WITH A NEW SUPERCRITICAL PROCESS
  J.-J. Letourneau¹, S. Vigneau¹, P. Gonus² and J. Fages¹
  1. École des Mines d’Albi, FRANCE
  2. Nestlé Product Technology Centre York, UK........................................ 2.1

• HIGH-ENERGY COMMINUTION OF MATERIALS IN A MECHANOCHEMICAL REACTOR WITH
  FLUIDIZED BED OF FERROMAGNETIC GRINDING MEDIUM
  Z. Najzarek¹, W. Polechoński² and W. Krajewski¹³
  1. Opole Technical University, POLAND
  2. Inst. of Environmental Engineering PAS, POLAND
  3. Institute of Chemical Engineering PAS, POLAND.................................. 2.7

• FORMATION OF FINE PARTICLES BY SALTING-OUT PRECIPITATION
  J. Tóth, A. Kardos-Fodor and S. Halász-Péterfi
  University of Kaposvár, HUNGARY ..................................................... 2.13

• ENERGY-SAVING SYNTHESIS OF THE ANHYDROUS CONDENSED PHOSPHATES
  N.M. Antraptseva¹, M.F. Povhan¹, I.G. Ponomaryeva¹, A.I. Burja²
  1. National Agrarian University, UKRAINE
  2. State Agrarian University, UKRAINE.................................................. 2.19

• SYNTHESIS OF A NEW SOLID SOLUTION OF HYDRATED MAGNESIUM-MANGANESE
  DIPHOSPHATES
  N.M. Antraptseva and A.A. Klyugvante
  National Agrarian University, UKRAINE.............................................. 2.25

• ABOUT CONDITIONS OF PRECIPITATION OF THE FINE-CRYSTALLINE ZINC AND
  MANGANESE DIPHOSPHATES
  N.M. Antraptseva and N.V. Tkachova
  National Agrarian University, UKRAINE.............................................. 2.29

• DIGITAL CONTROL ALGORITHM OF THE CHEMICAL ENGINEERING PLANT FOR PRODUCTION
  OF ANHYDROUS HYDROGEN FLUORIDE
  B.M. Kerbel, V.P. Pishchulin and S.N. Kladiev
  Seversk State Technological Institute, RUSSIA.................................... 2.35
• OPTIMIZATION OF ANHYDROUS HYDROGEN FLUORIDE PRODUCTION BY THERMAL DECOMPOSITION
  B.M. Kerbel¹, V.P. Pishulin¹, Y.N. Dementiev² and S.N. Kladiev¹
  1. Seversk State Technological Institute, RUSSIA
  2. Tomsk Polytechnic University, RUSSIA................................................................. 2.38

• SOLID TRANSPORT IN A PILOT-SCALE ROTARY KILN: PRELIMINARY RESULTS – STATIONARY AND DYNAMIC RESULTS
  N. Descoins¹, J.-L. Dirion¹ and T. Howes²
  1. Ecole des Mines d’Albi-Carmaux, FRANCE
  2. The University of Queensland, AUSTRALIA.......................................................... 2.45

• CONVERTING BIOMASS TO SOLID FUEL
  L. Fenyvesi and P. Pecznik
  Hungarian Institute of Agricultural Engineering, HUNGARY........................................ 2.51

• THE IMPORTANCE OF BULK MATERIAL MANAGEMENT IN HUNGARIAN AGRICULTURAL PRODUCTION
  I. Németh
  Ministry of Agriculture and Regional Development, HUNGARY.................................. 2.57

• IMPLEMENTATION OF INTELLIGENT BULK SOLIDS HANDLING IN NORWEGIAN ALUMINIUM INDUSTRY - SOME MILESTONES AND RESULTS
  A. Dyrøy¹ and M. Karlsen²
  1. Tel-Tek Dept. POSTEC, NORWAY
  2. Hydro Aluminium Árdal Technology Centre, NORWAY........................................... 2.63

• FOOD POWDER HANDLING AND PROCESSING: RESEARCH CHALLENGES AND OPPORTUNITIES
  J.J. Fitzpatrick
  University College, IRELAND...................................................................................... 2.69

• PARTICLE PROPERTIES – A MISSING LINK FOR PREDICTIVE MODELS IN POWDER PROCESSING
  W. Peukert, L. Vogel and M. Götzinger
  Technische Universität München, GERMANY............................................................. 2.75

• COATING OF FINE PARTICLES USING SUPERCritical FLUID TECHNOLOGY
  H. Kröber and U. Teipel
  Fraunhofer Institut für Chemische Technologie, GERMANY........................................ 2.81

• PROCESS OF THE EXTRUSION IN THE UNIT OF SPECIAL DESIGN
  R. Fekete, M. Peciar and Š. Gužela
  Slovak University of Technology in Bratislava, SLOVAK REPUBLIC................................ 2.87

• COAGULATION OF INDUSTRIAL AND RADIONUCLIDES EFFLUENTS BY UTILIZING ENVIRONMENTALLY FRIENDLY IRON(VI) ION
  V.K. Sharma
  Florida Institute of Technology, USA........................................................................... 2.93

• STUDY ON DIELECTRIC POWDER AND ITS SINTERED LAYER FOR PDP
  Y-K Lee, S-H Park, Ji-K Yoo, J-C Shin, E-H Yoo and M-H Park
  LG Electronics Inc., KOREA......................................................................................... 2.99
THE INFLUENCE OF PHYSICO-CHEMISTRY ON THE RETENTION OF CHROMIUM IONS DURING NANOFLTRATION
M. Taleb-Ahmed¹, S. Taha², R. Maachi¹ and G. Dorange²
1. USTHB / DGP / LGR, Alger, ALGERIE
2. ENSCR, Laboratoire de Chimie des Eaux et de l'Environnement, FRANCE.................................2.105

PLASMA SPHEROIDIZATION OF CERAMIC PARTICLES
Z. Károly and J. Szépvölgyi
Chemical Research Center, HAS, HUNGARY.........................................................2.111

WEAR OF BULK SOLIDS HANDLING PLANTS BY HARD PARTICLES – LOSS PREVENTION OR DAMAGE CONTAINMENT?
M.S.A. Bradley
University of Greenwich, UK.................................................................2.115

INVESTIGATION OF INFLUENCE OF RAW MEAL SPECIFIC SURFACE ON THE PHASE-FORMATION PROCESS OF THE HEAT-RESISTANT ZIRCONIUM-CONTAINING CEMENT CLINKER
V. Taranenková and G. Shabanova
National Technical University “Kharkov Polytechnic Institute”, UKRAINE.................................2.123

INFLUENCE OF THE PARTICLE DIAMETER AND DENSITY IN THE GAS VELOCITY IN JET SPOUTED BEDS
M.J. San José, S. Alvarez, A.O. de Salazar, M. Olazar and J. Bilbao
Universidad del País Vasco, SPAIN..........................................................2.130

CHAPTER 3 – CRYSTALIZATION AND SIZE ENLARGEMENT

PARTICULATE DESIGN FOR DRUG DELIVERY SYSTEM BY SPHERICAL CRYSTALLIZATION PROCESS
Y. Kawashima
Gifu Pharmaceutical University, JAPAN..........................................................3.1

REMOVAL OF CALCIUM IONS FROM WATER BY ELECTROCHEMICAL CRYSTALLIZATION OF CALCIUM CARBONATE ON CARBON BASED ELECTRODES
J. Rinat, E. Korin and A. Bettelheim
Ben-Gurion University of the Negev, ISRAEL....................................................3.8

INFLUENCE OF ULTRASOUND ON COOLING CRYSTALLISATION IN VISCOSOUS MEDIUM
M. Hassoun, A. Vilela, F. Espitalier and R. David
Ecole des Mines d’Albi-Carmaux, France.......................................................3.14

THE ENERGY OF BED PROCESSING DURING DRUM GRANULATION
T. Gluba
Technical University of Łódź, POLAND.........................................................3.20

THE EFFECT OF THE WETTING DROPLETS SIZE ON THE VALUE OF TORQUE DURING THE DRUM GRANULATION
A. Heim, T. Gluba and A. Obraniak
Technical University of Łódź, POLAND.........................................................3.26

CONTROL OF AGGREGATION IN PRODUCTION AND HANDLING OF NANOPARTICLES
W. Peukert, H-C. Schwarzer and F. Stenger
Technical University Munich, GERMANY.....................................................3.32
• PREDICTING THE PERFORMANCE OF GRANULATION BINDERS THROUGH MICRO-MECHANISTIC OBSERVATIONS
  S.J.R. Simons¹, D. Rossetti¹, P. Pagliai¹, R. Ward² and S. Fitzpatrick²
  1. University College London, UK
  2. Merck Sharp & Dohme, UK.............................................................3.38

• TOWARDS A FUNDAMENTAL UNDERSTANDING OF THE MECHANICS OF CRYSTAL AGGLOMERATION: A MICROSCOPIC AND MOLECULAR APPROACH
  University College London, UK.............................................................3.44

• AGGLOMERATION PHENOMENA IN CONVEYING AND HANDLING OF PARTICULATE SOLIDS
  W. Pietsch
  COMPACTCONSULT, Inc., USA.............................................................3.51

• MODELLING EFFECTS OF PROCESSING PARAMETERS ON GRANULE POROSITY IN HIGH-SHEAR GRANULATION
  R. Maxim¹, J. Fu¹, M. Pickles², A. Salman¹, M. Hounslow¹
  University of Sheffield, UK
  Unilever R&D Port Sunlight, UK.............................................................3.57

CHAPTER 4 – CHARACTERIZATION

• PARTICLE CHARACTERISATION
  P. Massacci
  University of Roma “La Sapienza”, ITALY.............................................4.1

• A CHARACTERISATION OF COHESIVE (C) AND FREE FLOWING (A) POWDERS
  K. Smolders¹ and J. Baeyens²
  1. De Nayer instituut, BELGIUM
  2. Katholieke Universiteit Leuven, BELGIUM........................................4.8

• CHARACTERIZATION OF TRANSPARENT PARTICLES BY LASER LIGHT DIFFRACTION SPECTROMETRY
  U. Teipel
  Fraunhofer Institut fur Chemische Technologie, GERMANY....................4.14

• COMPRESSIBILITY AND FLOW PROPERTIES OF A COHESIVE LIMESTONE POWDER IN A MEDIUM PRESSURE RANGE
  L. Grossmann¹, J. Tomas¹ and B. Csőke²
  1. Otto-von-Guericke-University, GERMANY
  2. University of Miskolc, HUNGARY.................................................4.20

• INFLUENCE OF SURFACE COATING AND VARYING AIR HUMIDITY ON THE FLOW AND WETTING PROPERTIES OF FINE POWDERS
  S. Thümmler, D. Höhne, M. Schumann and K. Husemann
  Freiberg University of Mining & Technology, GERMANY..........................4.26
A FIRST LOOK ON ABRASION IN GRANULAR SHEAR FLOWS
K. Hutter¹, S.S. Hsiau², A. Teufel², J. Smid², L.S. Lu², W.L. Yang², C.H. Tai², C.C. Chen², W.D. Tu² and C.H. Liu²
¹. Darmstadt University of Technology, GERMANY
². National Central University, ROC
3. Vienna University of Technology, AUSTRIA
4. Czech Technical University in Prague, CZECH REPUBLIC

THE INFLUENCE OF AIR COUNTER-FLOW THROUGH POWDER MATERIALS ON THE MEASUREMENT OF UNCONFINED YIELD STRENGTH
K. Johanson¹ and D. Barletta²
¹. University of Florida, USA
². University of Salerno, ITALY

DENSIFICATION OF POWDERS DUE TO VIBRATIONS AND SHOCKS
R. Linemann, J. Runge, M. Sommerfeld and U. Weißgüttel
Martin-Luther-University of Halle-Wittenberg, GERMANY

BULK MECHANICAL PROPERTIES AS INFLUENCED BY PARTICLE SHAPE, MOISTURE AND SPHAGNUM PEAT USING THE CUBICAL TRIAXIAL TESTER
B. Mittal, H. Yi, V.M. Puri, A.S. McNitt and C.F. Mancino
Penn State University, USA

DETERMINING CONTACT ANGLES OF POWDERS BY LIQUID PENETRATION
U. Teipel and I. Mikonsaari
Fraunhofer Institut für Chemische Technologie, GERMANY

THE EFFECT OF COMPRESSION AND PRECONSOLIDATION ON THE THERMAL CONDUCTIVITY (ETC) OF PARTICULATE BEDS
G. Weidenfeld, Y. Weiss and H. Kalman
Ben-Gurion University of the Negev, ISRAEL

RATIO OF NORMAL AND TANGENTIAL DETACHMENT FORCES BETWEEN PARTICLES AND SURFACES
B. Weigl and K. Sommer
Technical University Munich, GERMANY

FRACTAL DIMENSIONS MEASURED FROM SINGLE PARTICLE'S CONTOUR IMAGES (REMOVAL OF OUT-OF-FOCUS ERRORS)
T. Satou, K. Ehara and Y. Nomura
National Institute of Advanced Industrial Science and Technology, JAPAN

WHAT IS ALUMINA? OR HOW DIVERSE CAN ONE POWDER BE...
S. Ose and A. Dyrøy
Tel-Tek Dept POSTEC, NORWAY

STRENGTH CHARACTERISTICS OF FODDER PELLETS
J. Csermely, Gy. Komka, M. Herdovics and Z. Bellus
Hungarian Institute of Agricultural Engineering, HUNGARY

THE USE OF ACOUSTIC CHEMOMETRICS IN POWDER TECHNOLOGY
S. Ose¹ and M. Haistensen²
¹. Tel-Tek Dept POSTEC, NORWAY
². Telemark University College, NORWAY
• CHARACTERISING THE CHARGEABILITY AND CHARGE DISTRIBUTION OF POWDERS IN VARIOUS PROCESSES
S. Ose
Tel-Tek Dept POSTEC, NORWAY ................................................................. 4.98

• EFFECT OF MOISTURE CONTENT ON THE FLOW PROPERTIES OF PARTICULATE SOLIDS
S.S. Hsiau1, J. Smid2, C.H. Tai1 and C.H. Liu1
1. National Central University, ROC
2. Czech Technical University in Prague, CZECH REPUBLIC .......................... 4.101

• COMPARISON OF CAKE STRENGTH FAILURE MEASUREMENTS OBTAINED FOR SUGAR
R.J. Berry1, M.S.A. Bradley1, A.R. Reed1, I. Bridle1, H. Abou-Chakra2, U. Tuzun2 and M.C. Leaper3
1. The University of Greenwich, UK
2. University of Surrey, UK
3. University of Nottingham, UK ................................................................. 4.110

• BREAKAGE OF SODIUM BENZOATE GRANULES UNDER REPEATED IMPACT CONDITIONS
R. Pitchumani1, S. Arce Strien1, G.M.H. Meesters1 S.H. Schaafsma2 and B. Scarlett3
1. Delft University of Technology, THE NETHERLANDS
2. DSM Research, Centre for Particle Technology, THE NETHERLANDS
3. University of Florida, USA ................................................................. 4.116

• A NEW METHOD FOR PREDICTING PACKING PROPERTIES OF PARTICLES OF ANY SHAPE
X. Jia and R.A. Williams
University of Leeds, UK ........................................................................ 4.122

• CHARACTERIZATION OF PACKED POWDER BEDS BY THERMAL CONDUCTIVITY: EFFECTS OF MECHANICAL LOAD AND GAS PRESSURE ON THERMAL RESISTANCES OF PARTICLES' CONTACT POINTS
M. Shapiro1, V. Dudko1, V. Royzen1, Yu. Krichevets1, S. Lekhtmakher1, V. Grozubinsky1, M. Shapira2 and M. Brill1
1. Technion – Israel Institute of Technology, ISRAEL
2. Nuclear Research Center - Soreq, ISRAEL .................................................. 4.129

• MEASUREMENT OF MOISTURE INDUCED CAKING USING A RAPID CONDITIONING METHOD
J.L. Davis, M.S. Simes and J. Varadarajan
Procter & Gamble Co., USA .................................................................. 4.135

• A NEW EXPERIMENTAL SETUP FOR THE CHARACTERIZATION OF BULK MECHANICAL PROPERTIES OF AERATED PARTICULATE SYSTEMS
A.I. Abdel-Hadi and N.D. Cristescu
University of Florida, USA .................................................................... 4.142

• CHANGING IN PARTICLE SIZE OF CORN SILAGE ACCORDING TO SET PERFORMANCE OF GONELLA D.S.E. 5-190 UNLOADING CUTTER
J. Bak, I. Pazsiczki and A. Csatár
Hungarian Institute of Agricultural Engineering, HUNGARY .......................... 4.148

• TO HANDLE BULK SOLIDS YOU MUST KNOW THE STATE OF THE PARTICLES
B. Scarlett
University of Florida, USA .................................................................... 4.152
CHAPTER 5 – SHEAR TESTERS

• METHODS FOR IMPROVING THE ACCURACY OF SHEAR CELL TEST PROCEDURES, SECONDARY POWDER BEHAVIOURAL EFFECTS IN ANNULAR SHEAR CELLS
  A.H. Birks, R.J. Berry and M.S.A. Bradley
  The University of Greenwich, UK .................................................................................. 5.1

• A FLOWABILITY TESTER FOR BULK SOLIDS FLOW MEASUREMENTS
  S.J. Wiche, A.W. Roberts and B. McBride
  The University of Newcastle, AUSTRALIA ...................................................................... 5.7

• SOME CONSIDERATIONS TO THE REPEATABILITY OF SHEAR TEST RESULTS
  D. Höhne, S. Thümmler and K. Husemann
  Freiberg University of Mining & Technology, GERMANY ........................................ 5.13

• HOW TO AVOID COMMON SHEAR TESTING MISTAKES
  D.A. Ploof and J.W. Carson
  Jenike & Johanson Inc., USA ....................................................................................... 5.19

• STRESS HOMOGENEITY IN POWDER SPECIMENS TESTED IN THE JENIKE SHEAR CELL: MYTH OR FACT?
  E. Bilgili, J. Yepes, L. Stephenson, K. Johanson and B. Scarlett
  University of Florida, USA ............................................................................................ 5.25

• TOWARDS MORE RELIABILITY IN POWDER TESTING
  D. Schulze
  University of Applied Sciences (FH) Braunschweig/Wolfenbüttel, GERMANY .......... 5.31

• COMPARISON OF THREE ANALYSIS PROCEDURES ON DIFFERENT SHEAR CELL DATA USING THE BCR LIMESTONE, PART 1: THE ANALYSES OF JENIKE SHEAR CELL DATA
  A.H. Birks, R.J. Berry and M.S.A. Bradley
  The University of Greenwich, UK .................................................................................. 5.37

• COMPARISON OF TWO ANALYSIS PROCEDURES ON DIFFERENT SHEAR CELL DATA USING BCR LIMESTONE, PART 2: THE ANALYSES OF DATA FROM THREE ANNULAR SHEAR CELLS, EACH WITH A TROUGH OF A DIFFERENT METAL
  R.J. Berry, A.H. Birks and M.S.A. Bradley
  The University of Greenwich, UK .................................................................................. 5.43

• COMPARISON OF TWO ANALYSIS PROCEDURES ON DIFFERENT SHEAR CELL DATA USING BCR LIMESTONE, PART 3: COMPARISONS AND DISCUSSIONS OF FAILURE LOCI PARAMETERS, ALL FAILURE FUNCTIONS AND FUTURE DEVELOPMENT
  R.J. Berry, A.H. Birks and M.S.A. Bradley
  The University of Greenwich, UK .................................................................................. 5.49

• ON APPLICABILITY OF DIRECT SHEAR TEST FOR STRENGTH ESTIMATION OF CEREAL GRAIN
  M. Molenda and J. Horabik
  Polish Academy of Sciences, POLAND ......................................................................... 5.55

• STRENGTH CHARACTERISTICS OF FOOD POWDERS
  J. Horabik and M. Molenda
  Polish Academy of Sciences, POLAND ......................................................................... 5.61

vii
• COMPARISON OF A CYLINDRICAL AND CUBICAL BIAXIAL POWDER TESTER
  M. Verwijs, A.I. Abdel-Hadi, N.D. Cristescu and B. Scarlett
  University of Florida, USA.................................................................5.67

• INFLUENCE OF TESTER GEOMETRY, SPEED AND PROCEDURE ON RESULTS FROM A
  RING SHEAR TEST
  R. Schmitt and H. Feise
  BASF Aktiengesellschaft, GERMANY..................................................5.73

• EFFECT OF BOUNDARY CONDITIONS IN SHEAR TESTERS ON PROPERTIES OF BULK SOLIDS
  J. Tejchman
  Gdańsk University of Technology, POLAND.........................................5.78

CHAPTER 6 – STORAGE

• IMPROVEMENTS IN SILO DESIGN FOR MOIST AND COHESIVE BULK SOLIDS BY USING A SILO
  CENTRIFUGE
  M. Großtück and J. Schwedes
  Technical University of Braunschweig, GERMANY..................................6.1

• FLOW PROPERTIES FOR MASS-FLOW HOPPER GEOMETRY DETERMINATIONS. WHAT RANGE OF
  SHEAR TESTING IS REQUIRED?
  P. Arnold
  University of Wollongong, AUSTRALIA..................................................6.7

• THE DANGERS OF RELYING ON WALL FRICTION VALUES IN CODES
  J.W. Carson¹, H. Purutyan¹ and J.M. Rotter²
  1. Jenike & Johanson, Inc., USA
  2. The University of Edinburgh, SCOTLAND.........................................6.12

• MEASUREMENT OF FILLING AND DISCHARGING LOADS IN A FULL SCALE HOPPER
  S. Ding¹, G.G. Enstad¹, M. Wojcik² and F.O. von Hafenbrädl¹
  1. POSTEC dept. of Tel-Tek, NORWAY
  2. Telemark University College, NORWAY............................................6.19

• SOLIDS TESTING FOR PRODUCT DESIGN VERSUS TESTING FOR SILO DESIGN
  T.A. Bell
  DuPont Central Research and Development, USA....................................6.25

• THE REASONABLE AND ECONOMICAL SILO STORAGE FOR GRANULATED UREA
  X. Hui
  No.7 Yinghuayuan Dongjie, CHINA.....................................................6.32

• DISCHARGE AND FLUIDIZATION BEHAVIOUR OF A COHESIVE MAGNESIUM CARBONATE
  POWDER WITH AN AERATED HOPPER
  G. Donsi, G. Ferrari, M. Poletto and P. Russo
  University of Salerno, ITALY..........................................................6.40

• INVESTIGATION OF FLOW PROFILE AND STRESS DISTRIBUTION IN SILOS DURING DISCHARGE
  M. Ostendorf and J. Schwedes
  Technical University of Braunschweig, GERMANY..................................6.46
• PARTICLE VELOCITY FIELD AND GAS PRESSURE MEASUREMENTS IN A TWO-DIMENSIONAL WEDGE SHAPED HOPPER
  D. Barletta, G. Donsi, G. Ferrari and M. Poletto
  University of Salerno, ITALY ...................................................... 6.52

• EFFECTS OF GRAIN PROPERTIES ON LOADS IN SMOOTH WALL MODEL SILO
  M. Molenda¹, J. Horabik¹, S.A. Thompson² and I.J. Ross³
  1. Polish Academy of Sciences, POLAND
  2. University of Georgia, USA
  3. University of Kentucky, USA ............................................... 6.58

• SILO DISCHARGE: NUMERICAL INVESTIGATION OF BULK SOLIDS BEHAVIOUR
  B. Althapp, J.-U. Böhnsen & H. Antes
  Technical University of Braunschweig, GERMANY .......................... 6.64

• EXPERIMENTAL AND THEORETICAL STUDIES OF RESONANCE EFFECTS DURING SILO FLOW
  M. Niedostatkiewicz and J. Tejchman
  Gdansk University of Technology, POLAND .................................. 6.71

• THE WIRELESS TECHNIQUE OF EXAMINATION OF SILO WALL STRUCTURES DURING OPERATION
  A. Lapko and J. Kollataj
  Bialystok Technical University, POLAND ..................................... 6.77

• THE STATIC EFFECTS OF PATCH ACTIONS ON THE WALLS OF REINFORCED CONCRETE CYLINDRICAL SILO BATTERY
  A. Lapko and J.A. Prusiel
  Bialystok Technical University, POLAND ..................................... 6.83

• BUCKLING OF CYLINDRICAL SILOS CONTAINING BULK SOLIDS
  J. Tejchman
  Gdansk University of Technology, POLAND .................................. 6.89

• THE METHOD OF SOLVING PROBLEMS CONNECTED WITH PERENNIAL SILO EXPLOITATION AND GROWING REQUIREMENTS AND CONCRETE STANDARDS
  M. Kamiński, M. Maj, J. Mrozowicz and B. Podolski
  Technical University in Wroclaw, POLAND .................................. 6.95

• THE STATISTICAL ESTIMATION OF LOADS COINCIDENCE FACTOR FOR SILO FOR HOT MATERIALS
  M. Maj
  Technical University in Wroclaw, POLAND .................................. 6.101

• A METHOD OF MEASURE BULK SOLIDS PRESSURE AGAINST SILO WALL IN MODELS AND FULL SCALE SILOS
  M. Kamiński and M. Maj
  Technical University in Wroclaw, POLAND .................................. 6.107
CHAPTER 7 – FLUIDIZATION

• A MODEL FOR THE HYDRODYNAMICS OF SWIRLING FLUIDIZED BEDS
  G. Vikram¹, V.R. Raghavan¹ and H. Martin²
  1. Indian Institute of Technology Madras, INDIA
  2. Universitaet Karlsruhe, GERMANY
  .................................................................................................................. 7.1

• PHOTOCATALYTIC DEGRADATION OF TCE (TRICHLOROETHYLENE) OVER TiO₂/SILICA GEL PHOTOCATALYST
  T.H. Lim and S.D. Kim
  Korea Advanced Institute of Science and Technology DaeJeon, KOREA
  .................................................................................................................. 7.7

• DEFLUIDIZATION MODELLING OF PYROLYSIS OF PLASTICS IN A CONICAL SPOUTED BED REACTOR
  Universidad del País Vasco, SPAIN
  .................................................................................................................. 7.14

CHAPTER 8 – SIZE REDUCTION

• WHAT HAPPENS WHEN YOU HIT PARTICLES
  J. Dodds, A. Chamayou and O. Lecoq
  Ecole des Mines d’Albi-Carmaux, FRANCE
  .................................................................................................................. 8.1

• WET FINE GRINDING
  J. Schwedes
  Technical University of Braunschweig, GERMANY
  .................................................................................................................. 8.7

• COMMINUTION OF PARTICULATE MATERIAL BY ULTRASONICS
  I. Mikonsaari and U. Teipel
  Fraunhofer Institut für Chemische Technologie, GERMANY
  .................................................................................................................. 8.17

• ON POSSIBLE INSTABILITY OF THROUGHPUTS IN COMPLEX MILLING CIRCUIT
  V. Mizonov¹, V. Zhukov¹, A. Korobkin¹, A. Ogurtsov¹ and H. Berthiaux²
  1. Ivanovo State Power Engineering University, RUSSIA
  2. Ecole des Mines d’Albi-Carmaux, FRANCE
  .................................................................................................................. 8.23

• ATTRITION AND EROSION IN PARTICLE TRANSPORT LOOPS
  C. Vandewalle, J. Baeyens and P. Van Rompay
  Katholieke Universiteit Leuven, BELGIUM
  .................................................................................................................. 8.27

• THE PROCESS OF YEAST CELL DISINTEGRATION IN A BEAD MILL
  M. Solecki
  Technical University of Lodz, POLAND
  .................................................................................................................. 8.33

• USING STATISTICAL MOMENTS TO DESCRIBE GRINDING IN A BALL MILL FOR INDUSTRIAL-SCALE PROCESS
  A. Heim, T.P. Olejnik and A. Pawlak
  Technical University of Lodz, POLAND
  .................................................................................................................. 8.39
• EFFECT OF DIFFERENT TYPES OF IMPACT SURFACE ON COAL DEGRADATION
  R.K. Sahoo, D.M. Weedon and D. Roach
  Central Queensland University, AUSTRALIA ......................................................... 8.45

• ATTRITION OF POLYMERIC BULK SOLIDS IN PNEUMATIC CONveyING: DETERMINATION OF
  PROCESS AND MATERIAL FUNCTIONS
  L. Frye and W. Peukert
  Technische Universität München, GERMANY ............................................................ 8.51

• MECHANICAL PRODUCTION AND STABILIZATION OF SUB-MICRON PARTICLES IN A
  STIRRED MEDIA MILL
  S. Mende and J. Schwedes
  Technical University of Braunschweig, GERMANY .................................................. 8.57

• CEMENT CLinker GRINDING ACTIVATOR ADDS
  T. Sverak¹, F. Saito², N. Stevulova³ and D. Beno⁴
  1. Brno University of Technology, CZECH REPUBLIC
  2. Tohoku University, JAPAN
  3. Technical University of Kosice, SLOVAKIA
  4. Herstellung Technischer Kunststoffe, GERMANY .................................................. 8.63

• OPTIMISING DESIGN OF THE CONTINUOUS GRINDING MILL-CLASSIFIER SYSTEMS
  P.B. Kis¹, Cs. Mihálykó², B.G. Lakatos²
  1. College of Dunadíváros, HUNGARY
  2. University of Veszprém, HUNGARY ................................................................. 8.69

• ALTERNATIVES TO HGI FOR COALS
  E. Grant¹, H. Kalman¹, C. Havkin² and U. Mimran²
  1. Ben-Gurion University of the Negev, ISRAEL
  2. The National Coal Supply Corp. Ltd., ISRAEL .................................................... 8.75

• FORMATION OF PIGMENT NANOPARTICLES IN A STIRRED MEDIA MILL: EXPERIMENTATION
  AND POPULATION BALANCE MODELING
  E. Bilgili, R. Hamey, O. Zhupanska, and B. Scarlett
  University of Florida, USA ......................................................................................... 8.82

• BREAKAGE FUNCTION FOR PARTICLE IMPACT TESTS
  E. Petukhov, M. Levy and H. Kalman
  Ben-Gurion University of the Negev, ISRAEL .......................................................... 8.88
