Tailings and Mine Waste ‘02
# Table of contents

**Preface**  
IX  

**Organizing Committee**  
XI  

### Rocky Mountain Regional Hazardous Substance Research Center

Remediation of mine waste sites through the Rocky Mountain Regional Hazardous Substance Research Center (RMRHSRC)  
*C.D. Shackelford, S.L. Woods & D.L. Macalady*  
3

Mining and the environment: The issues that steer the Region 8 Hazardous Substance Research Center  
*T.R. Wildeman & C.D. Shackelford*  
9

Redox transformations, complexation and soil/sediment interactions of inorganic forms of As and Se in aquatic environments: Effects of natural organic matter  
*D.L. Macalady, D. Ahmann, J. Westall, J. Garbarino & J. Meyer*  
13

Fate and transport of metals and sediment in surface waters  
*P.Y. Julien, B.P. Bledsoe & C.H. Watson*  
17

Metal removal capabilities of passive bioreactor systems: Effects of organic matter and microbial population dynamics  
21

Evaluating recovery of stream ecosystems from mining pollution: Integrating biochemical, population, community and ecosystem indicators  
*W.H. Clements & J. Ranville*  
23

### Site characterization

Abandoned quarries surveying  
*G. Bonifazi, L. Cutaia, P. Massacci & I. Roselli*  
27

The effectiveness of single and multiple open standpipe piezometers in monitoring of the pore pressure regime in tailings dams  
*G.J.R. le Roux*  
35

Monitoring of soil, air, water, and noise at the Lega Dembi Gold Mine  
*Y. Binega*  
39

Variations in composition on SA gold tailings dams  
*N.J. Vermeulen, E. Rust & C.R.I. Clayton*  
45
Preliminary ecological risk assessment for the Elizabeth Mine site, South Strafford, Vermont
   I. Linkov, S. Foster, E. Hathaway & R. Sugatt
   53
Impact of acid rock drainage in a discrete catchment area of the former uranium mining site of Ronneburg (Germany)
   J.W. Geletneky, G. Büchel & M. Paul
   67
Hydrochemical investigation at the uranium tailings “Schneckenstein” (Germany)
   T. Naamoun
   75

**Design, operation, and disposal**

Tailings beach slope forecasting – copper tailings
   M. Pinto & S. Barrera
   87
Quebrada Honda tailing storage facility conception, design, construction, and operation, Southern Peru Copper Corporation, Tacna, Peru
   A.H. Gipson, Jr. & H. Walqui Fernandez
   93
Retrofitting an HDPE-lined raise over an unlined tailing facility
   A.H. Gipson, H.P. Vos, W.J. Cole & S.R. Aiken
   101

**Geotechnical considerations**

Advanced laboratory compression tests and piezocone measurements for evaluation of time-dependent consolidation of fine tailings
   U. Barnekow, M. Paul & A.T. Jakubick
   113
Prediction of the desiccation and sedimentation behavior of a typical platinum tailings
   J.C.J. Boshojf
   121

**Paste technology**

Planning, design and implementation strategy for thickened tailings and pastes
   F. Sofra & D.V. Boger
   129
Effects of settlement and drainage on strength development within mine paste backfill
   T. Belem, M. Benzaazoua, B. Bussière & A.M. Dagenais
   139
Use of copper mine tailings as paste backfill material in mining operations – Approach to minimise land occupation?
   S. Moellerherm & P.N. Martens
   149
Pumping paste with a modified centrifugal pump
   A. Sellgren & L. Whitlock
   155

**Liners, covers, and barriers**

Construction and instrumentation of waste rock test covers at Whistle Mine, Ontario, Canada
   B.K. Ayres, M. O’Kane, D. Christensen & L. Lanteigne
   163
Field investigation to support the closure design of the Yankee Heap
   P.E. Kowalewski, S. Boyce & R. Buffington
   173

**Surface water quality**

Turnover in pit lakes: I. Observations of three pit lakes in Utah, USA
   D. Castendyk & P. Jewell
   181
Turnover in pit lakes: II. Water column stability and anoxia
   P. Jewell & D. Castendyk
   189
### Groundwater and geochemistry

- Long term persistence of cyanide species in mine waste environments
  - B. Yarar

- Stabilization / solidification of pyritic mill tailings by induced cementation
  - J. Ouellet, F. Hassani, S. Somot, S. Shnorhokian & M. Hossein

- The removal of arsenic from groundwater using permeable reactive materials
  - J. Bain, L. Spink, D. Blowes & D. Smyth

- Estimation of the mobility of heavy metals in tailing sediments
  - T. Naamoun

- Uranium tailings of “Schneckenstein” (Germany) reservoir of contaminants
  - T. Naamoun

### Remediation and reclamation

- Abandoned mine site waste repositories, site selection, design and costs
  - K.L. Ford & M. Walker

- In situ bioremediation of uranium and other metals in groundwater
  - W. Lutze, W. Gong & H.E. Nuttall

- In situ treatment of metals in mine workings and materials
  - J.M. Harrington

- Response of plants to oil sand tailings
  - M.J. Silva, M.A. Naeth, D.S. Chanasyk, K.W. Biggar & D.C. Sego

- Column leaching test to evaluate the beneficial use of alkaline industrial wastes to mitigate acid mine drainage
  - I. Doye & J. Duchesne

- Spatial surface flux boundary model for tailings impoundments
  - M.E. Rykaart, D.G. Fredlund & G.W. Wilson

### Radioactivity and risk

- The benefits of the risk assessment to the mining industry
  - T. Alexieva

- Mobility tracing of radionuclides in the uranium tailings “Schneckenstein” (Germany)
  - T. Naamoun, D. Degering & D. Hebert

- Radioactive tailings issues in Kyrgyzstan and Kazakhstan

### Reprocessing, utilization, and treatment

- A brief discussion of the behavior of a loose iron tailing material under undrained triaxial loading
  - S. Tibana, T.M.P. de Campos & G.P. Bernardes

### New technologies and approaches

- Solar radiation on surfaces of tailings dams – effects of slope and orientation
  - G.E. Blight

- Stabilization of uranium in pitwaters using phosphate and coal tailings

- The tailings pond at the Milltown Dam, Montana, can be cleaned
  - G. Ter-Stepanian
Consolidation of clay slurries amended with shredded waste plastic
N. Lozano & L.L. Martinez

The use of the powder marble by-product in the raw material for brick ceramic
G.C. Xavier, F. Saboya Jr. & J. Alexandre

Researches concerning the Purolite assimilation for use within the uranium separation-concentration Resin In Pulp process
E. Panturu, Gh. Filip, St. Petrescu, D. Georgescu, F. Aurelian & R. Radulescu

Cu(II) separation and recovery from mining aqueous systems by flotation (DAF) using alkylhydroxamic collectors
L. Stoica, C. Constantin & O. Micu

Case histories

Pozo Azul tailings impoundment: Design modifications made to utilize a difficult site
M.L. Fuller, R.L. Byrd, J. Tagliapietra & K.D. Ball

Performance of the Kennecott Utah Copper tailings embankment, Magna, Utah
J. Pilz & D. Stauffer

Performance of vertical wick drains at the Atlas Moab Uranium Mill tailings facility after 1 year
M.E. Henderson, J. Purdy & T. Delaney

Steep Rock Iron Mines: Dredging and draining of Steep Rock Lake and some of the effects after 45 years
V.A. Sowa

Community consultation in the rehabilitation of the South Alligator Valley Uranium Mines
P.W. Waggit

Remediation of streamside tailings along Silver Bow Creek near Butte, Montana
W.H. Bucher, G. Fischer, B. Grant, A. Shewman, L. Cawlfield, J.E. Chavez & T. Reilly

A rapid response to cleanup – Gilt Edge Superfund Site, South Dakota
M.J. Gobla

A “no action” alternative that worked
R.B. Meade

Mercury spill response, clean-up, and assessment, Choropampa, Peru
K.J. Esposito, T.A. Shepherd, M.C. Meyer & N.R. Cotts

Physical and geochemical characterization of mine rock piles at the Questa mine, New Mexico: An overview
S. Shaw, C. Wels, A. Robertson & G. Lorinczi

Assessment of store-and-release cover for Questa tailings facility, New Mexico
C. Wels, S. Fortin & S. Loudon

Factors influencing net infiltration into mine rock piles at Questa mine New Mexico
C. Wels, S. Loudon & S. Fortin

ARD production and water vapor transport at the Questa mine
R. Lefebvre, A. Lamontagne, C. Wels & A. MacG. Robertson

Selection of a water balance cover over a barrier cap – a case study of the reclamation of the Mineral Hill Mine dry tailings facility
R.J. Frechette & F.W. Bergstrom

Hard rock mine closure under modern rules – TVX Mineral Hill Mine case study
F.W. Bergstrom & R.J. Frechette

Evaluation of alternative designs for a water-balance cover over tailings at the Mineral Hill Mine, Montana, using the EDYS model
T. McLendon, W.M. Childress, C.L. Coldren, R.J. Frechette & F.W. Bergstrom
