## 1 Geotechnical Engineering

### 1.1 Keynote lectures

- Centrifuge and full scale models of geotextile reinforced walls and three case studies of such walls in Turkey  
  *E. Guler*  
  3

- Behavior of foundations on arid climate soil deposits  
  *N.F. Ismael*  
  11

- Experimental study: Influence of moisture on tensile strength in granular soil  
  *S. Sture & T.-H. Kim*  
  21

- Three-dimensional finite element analysis of underground structures  
  *Th. Zimmermann, A. Truly, S. Commend & A. Bisetti*  
  27

- Geotechnical characterization in offshore conditions  
  *W.F. Van Impe*  
  39

- Measures to reduce rock fall hazards: case history in Mena  
  *Y. El-Mossallamy & H. Zein Al Abideen*  
  71

- Collapse behaviour of red soils  
  *S.M. Rao*  
  79

### 1.2 Engineering properties of soils and rocks

- Properties and anisotropy of Riyadh limestone rock  
  *H. Alawaji*  
  89

- Effects of cyclic loading and stress/strain level on the elastic properties of limestone  
  *N.A. Al-Shaye*  
  95

- A prototype triaxial permeameter for the filtration of a soil/geotextile system  
  *A. Abdul Aziz*  
  101

- Prediction of fractured rock permeability in Pasir Impun, Bandung, Indonesia  
  *S. Notosiswoyo, Suyono & L.E. Widodo*  
  109
Engineering properties of Red Sea coastal plain soils
Y.E.-A. Mohamedzein & A.M. El Sharief

Prediction of compressibility of some Sudanese soils using cone penetration test method
A.K.M. Zein & M.M. El Tahir

1.3 Foundation engineering

Stiffness and damping constants of piles in layered soil
F. Aboul-Ella & A. Elhabashy

Behavior of a model steel pipe pile pushed in dry dense sand
O.M. Alansari & H.M. Mekkiyah

A general algorithm for computations of shallow foundation settlements
M.A. Al-Shamrani

Computed and observed micropiles capacity (case studies)
M.A. Bentlayef, H.O. Tumi & O.M. Edali

System reliability assessment of cantilever retaining walls
M.M. El-Meligy

Winkler coefficient for beams using elastic continuum approach
B.M. El-Garhy & M.M. Osman

Geotechnical parametric study of vibrex piles
P.A. Naushahi & Habib-ur-Rehman

Behavior of reinforced concrete stability piles during a full scale loading test
A.M. Yousef, S. El-Gayyar & A. El Nimr

1.4 Soil reinforcement

Settlement of shallow square foundation with structural skirts resting on sand
M.Y. Al-Aghbari

Mathematical models relating creep characteristics of geosynthetics under different conditions
H.F. El-Mudhaf, M. El-Shabrawy, A.S. Gaballah & Sh.M. El-Badawy

Strength properties of flexible geogrids under UV fluorescent exposure
C. Hsieh & C.-K. Lin

Laboratory pull-out tests of geogrid strip reinforcement
A.A. Senoon

1.5 Soil improvement and stabilization

Evaluation of improvement techniques for strip foundations on expansive clay soils in Sudan
A.M. El Sharief & I.M. Saeed

Improvement of the bearing of soil by using lime – rice husk ash
A.S. Muntohar

Use of olive wastewater ‘marginie’ for the stabilization of earthen dikes in the arid zones of Tunisia
M. Ouessar & L. Raboudi

1.6 Problematic soils

Anisotropy factor for swelling rocks
M.N.J. Al-Awad

Settlement prediction of sabkha formations using rectangular hyperbolic method
M.A. Al-Shamrani

Effect of percentage of fines on sand liquefaction in arid regions
A. El Nimr, A. Dif & A. Ibrahim
Localization of lateral heterogeneity using shallow refraction seismic technique
H.H. Seisa & M.A. Omran

1.7 Dams and embankments
Assessment of sediment yield from recharge dams in arid environments
A. Al-Rujeibi, T. Cheema, A. Al-Harthy & I. Ahmad
Analysis of new model for embankment on soft clay simulating the construction
A.K. Mohamed
Rock foundation effect on non-linear response of the concrete gravity dams subjected to earthquake
B. Navayineya & I. Shooshpasha

1.8 Ground water
The characteristics of non-uniform flow over fixed bedforms
J. Taghavi
The effect of dam on ground water quality of Wadi Hawasina (Khabourah) catchment
S. Alkhanbashi, I. El-Hussain & T. Cheema
Hydrogeologic evaluation of central Najd area, Sultanate of Oman
M. Amerjeed, T. Cheema, I. El-Hussain & T. Al-Hosni

2 Geoenvironmental Engineering

2.1 Keynote lectures
Time domain reflectometry: operation principles and its potential application for determination of subsurface concentrations of pollutants
A.M.O. Mohamed
Solid waste management: new trends in landfill design
M.A. Warith & W.S. Braz

2.2 Landfilling
Hazardous waste landfill design and construction practices in Turkey
C.B. Avci, E. Guler & E. Cetin
Landfill sites in the basement terrains of arid regions (a case study from Sharm El-Sheikh area, south Sinai, Egypt)
E.H. Shendi & M.H. Geriesh

2.3 Barrier system
Capillary barrier system development for water conservation in arid lands: I. Experimental evaluation
A.M.O. Mohamed & I. Shooshpasha
Capillary barrier system development for water conservation in arid lands: II. Determination of coupled heat and moisture diffusivity parameters
I. Shooshpasha & A.M.O. Mohamed
Characteristics of shredded tires as landfill filter media
M.A. Warith, G. Abdel Aziz & W.S. Braz

2.4 Soil pollution
Pollutant migration experiments in unsaturated multilayered soil
A.K. Abdel-lah, M. Hashem, A.A.R. Mohamed & K. Watanabe
