7th International
LS-DYNA Users Conference

Co-sponsored by
Livermore Software Technology Corporation (LSTC)
and
Engineering Technology Associates, Inc. (ETA)

May 19-21, 2002
Dearborn, Michigan
# Table of Contents

**Welcome Remarks**  
Arthur Tang (ETA)

**Introduction of Keynote Speakers**  
John O. Hallquist (LSTC)

## Session 1 - Keynote Presentations

- **Vehicle Crash Analysis Using Shell Element Type 16**  
  Tsuyoshi Yasuki  
  Project General Manager  
  CAE Research, Development and Application  
  Toyota Motor Corporation  
  1-1

- **Recent Developments in Finite Element and Mesh Free Methods**  
  Ted Belytschko  
  Walter P. Murphy Professor and Chair  
  Northwestern University  
  1-1

## Session 2 – Common Session (1)

*Chairman - R.J. Yang (Ford Motor Company)*

- **The Future of CAE Software How to Achieve Process Automation**  
  Brian Huf, Ford Motor Company  
  2-1

- **Characterization of Water Impact Splashdown Event of Space Shuttle Solid Rocket Booster Using LS-DYNA**  
  Matthew E. Melis, NASA Glenn Research Center  
  2-15

- **Recent Developments in LS-DYNA for Civil Engineering**  
  Brian Walker, Arup  
  2-25

## Session 3 - Crash/Safety (1)

*Chairman - Majeed Bhatti (General Motors Corporation)*

- **Multidisiplinary Design Optimization of Automotive Crashworthiness And NVH Using LS-OPT**  
  K.J. Craig, University of Pretoria  
  3-1

- **Modular Strategy to Build Full Vehicle Finite Element Model**  
  Subrato Dhar, General Motors Corporation  
  3-19

- **Development of a Finite Element Model of the Human Body**  
  Fuminori Oshita, The Japan Research Institute, Ltd.  
  3-37

- **eta/VPG: A Virtual Crash and Safety Environment for FMVSS and ECE Standards**  
  Akbar Farahani, Engineering Technology Associates, Inc.  
  3-49

- **Interpretation of Deformation Pattern in Automotive Rails in Frontal Impact**  
  Joseph Hassan, DaimlerChrysler Corporation  
  3-59

- **Improving Crash Analysis Through the Estimation of Residual Strains Brought About by Forming Metal**  
  William Broene, Brown Corporation of America  
  3-77
Table of Contents

7th International LS-DYNA Users Conference

Session 4 - Methods Development
Chairman - David Lu (Ford Motor Company)

Modeling Suspension Damper Modules Using LS-DYNA .......................... 4-1
Jason J. Tao, Delphi Automotive Systems

Multi-body Dynamic Simulation of Acti-Valve ........................................... 4-9
Cunjiang Cheng, Marquette University

Automotive Door Sealing System Analysis ............................................. 4-15
Rosa Zhao, General Motors Corporation

Analyzing Elastomer Automotive Body Seals Using LS-DYNA ..................... 4-21
Linhuo Shi, TG North America Corporation

Energy Absorbing Wheel Tethers for Racecars .................................... 4-31
Brian A. Coon, University of Nebraska-Lincoln

Session 5 - Simulation Technology (1)
Chairman - C. Y. Sa (General Motors Corporation)

USGA Rule 4-1e Optimization of a Golf Driver Head Using LS-DYNA
and Altair HyperStudy ................................................................. 5-1
Tom Mase, Michigan State University

Economically Improving Crash Worthiness of a Large Propane Tanker ........... 5-9
Phillip H. Burnside, PPG Industries

Optimum Design of a Steel Bar Breaking System in a Sled Test Facility
Using LS-OPT ................................................................................... 5-23
In-Yong Jo, Kostech, Inc.

Application of LS-DYNA in Numerical Analysis of Vehicle Trajectories ........ 5-33
Jerry W. Wekezer, Florida State University

Finite Element Analysis of Sliding Contact Between a Circular Asperity
and an Elastic Surface in Plane Strain Condition .................................... 5-41
S. Subutay Akarca, University of Windsor

Session 6 - Penetration and Explosive Modeling
Chairman - Sungoh Hong (Hyundai Motor Company)

3D Numerical Simulations of Penetration of Oil-Well Perforator Into
Concrete Targets ................................................................................... 6-1
Qiankun Jin, Beijing Engineering Software Technology Co., Ltd.

Numerical Simulation of Light Armoured Vehicle Occupant Vulnerability to
Anti-Vehicle Mine Blast ....................................................................... 6-7
Kevin Williams, DREV - Defence R&D Canada - Valcartier

Ballistic Impact Modeling of Composite Materials ................................... 6-15
Chian-Fong Yen, Materials Sciences Corporation

Ship Structures Subject to High Explosive Detonation ............................. 6-27
Mark Z. Vulitsky, John J. McMullen Assoc., Inc
Validation of a Loading Model for Simulating Blast Mine Effects on Armoured Vehicles
Kevin Williams, DREV - Defence R&D Canada - Valcartier 6-35

Session 7 - Crash/Safety (2)
Chairman - Fred Zweng (DaimlerChrysler Corporation)

Honeycomb Modeling for Side Impact Moving Deformable Barrier (MDB) 7-1
Moisey B. Shkolnikov

Shape Optimization of Crashworthy Structures 7-15
Dave J. Eby, Applied Computational Design Associates, Inc.

Finite Element Simulations and Testing of Washington State Precast Concrete Barrier 7-23
Akram Abu-Odeh, Texas A&M University

Punch Test Simulations of Offset Deformable Barrier Honeycomb Materials 7-25
Robert R. Mayer, General Motors Corporation

An Application of LS-DYNA for the New FMVSS 208 Front Impact Tests 7-45
Charlotte Jamte, Arup

Session 8 - Material Technology (1)
Chairman - Y.C. Deng (General Motors Corporation)

An LS-DYNA User Defined Material Model for Loosely Woven Fabric With Non-Orthogonal Varying Weft and Wart Angle 8-1
Marlin Brueggert, IMMI

Computational Micro-Mechanical Model of Flexible Woven Fabric for Finite Element Impact Simulation 8-15
Ala Tabiei, University of Cincinnati

Dynamic Pulsebuckling Analysis of FRP Composite Laminated Beams Using LS-DYNA 8-41
Zheng Zhang, Dalhousie University

Incorporation of Material Model into LS-DYNA Implicit to Model the Shear Behavior of Uncured Woven-Fabric Composite Materials 8-49
Jennifer L. Gorczyca, University of Massachusetts – Lowell

Material & Geometrically Nonlinear Woven Composite Micro-mechanical Model with Failure for Finite Element Simulations 8-57
Ala Tabiei, University of Cincinnati

Session 9 - Simulation Technology (2)
Chairman - Kevin Thompson (DaimlerChrysler Corporation)

Frank Xu, Lear Corporation

Simulation and Validation of FMVSS 207/210 using LS-DYNA 9-9
Vikas Patwardhan, Lear Corporation
### Table of Contents

#### 7th International LS-DYNA Users Conference

**Reduction in Time to Market of Automotive Seating System using LS-DYNA** ...... 9-17  
*Hurshkumar G. Donde, Infosys Technologies Ltd.*

**Quasi-Static Finite Element Analysis (FEA) of an Automobile Seat Latch Using LS-DYNA** ................................................................. 9-31  
*Song Chen, Fisher Dynamics Engineering*

**Study on Optimal Design of Automotive Body Structure Crashworthiness** ........ 9-41  
*Hailang Wang, Shanghai Jiao Tong University*

#### Session 10 - Fluid/Structure

*Chairman - Mohammad Usman (Visteon Corporation)*

**Simulation of Airbag Deployment Using a Coupled Fluid-Structure Approach** ...... 10-1  
*Per-Olof Marklund, Linköping University*

**New LS-DYNA Fluids Solvers** .............................................................. 10-9  
*Grant O. Cook, LSTC*

**Developments in the Application of LS-DYNA to Fluid Structure Interaction (FSI) Problems in Recovery System Design and Analysis** ....................... 10-17  
*Anthony P. Taylor, Irvin Aerospace, Inc.*

**ALE and Fluid/Structure Interaction Capabilities in LS-DYNA** .................... 10-27

#### Session 11 - Crash/Safety (3)

*Chairman - Karen Karnago (DaimlerChrysler Corporation)*

**Parametric Study on Improvement of G4(1S) Strong Post Guardrail System** ...... 11-1  
*Jin Wu, University of Cincinnati*

**Crashworthiness: Numerical Simulation of Vehicle-Steel Pole Crash** .............. 11-29  
*Madgy Samaan, Ryerson University*

**PAB Deployment Simulation for PAB with Curved Retainer** .......................... 11-35  
*Linhuo Shi, TG North America Corporation*

**A Moose Crash Dummy for LS-DYNA** .................................................... 11-41  
*Larsgunnar Nilsson, ERAB*

**Parametric Finite Element Model of a Sports Utility Vehicle: Development and Validation** ................................................................. 11-43  
*Gustavo A. Aramayo, Oak Ridge National Laboratory*

#### Session 12 - Code Technology

*Chairman - Charles Wawa (General Motors Corporation)*

**Modal Methods For Transient Dynamic Analysis in LS-DYNA** ....................... 12-1  
*Bradley N. Maker, LSTC*

**An Updated Toolbox for Validation and Uncertainty Quantification of Nonlinear Finite Element Models** ..................................................... 12-13  
*Keng C. Yap, ACTA Inc.*

**Processing of Equality Constraints for Implicit in LS-DYNA v. 970** ............... 12-23  
*C. Cleve Ashcraft, LSTC*
Development of a Coupled Finite Element and Meshfree Method in LS-DYNA .... 12-29  
Cheng-Tang Wu, LSTC

Development of the DYNA3D Simulation Code With Automated 3-D Fracture Procedure for Brick Elements ................................................................. 12-41  
Aila Tabiei, University of Cincinnati

Session 13 - Simulation Technology (3)  
Chairman - Jonghyun Yim (Daewoo Motor Company)

Use of Stochastic Analysis for FMVSS210 Simulation Readiness for Correlation to Hardware Testing ........................................................ 13-1  
Amit Sharma, General Motors Corporation

Response Surface and Sensitivity-Based Optimization in LS-OPT: A Benchmark Study ................................................................. 13-9  
Nielen Slander, LSTC

Experimental and Numerical Compressive Testing of Aluminum Foam Filled Mild Steel Tubular Hat Sections .................................................... 13-19  
William Altenhof, University of Windsor

Developing FE-Tire Model Library for Durability and Crash Simulations .......... 13-29  
Masaki Shiraishi, Sumitomo Rubber Industries, LTD.

Stochastic Analysis and Optimization of Full Vehicle System for Offset Crush ..... 13-37  
Hassan El-Hor, DaimlerChrysler Corporation

Session 14 - Drop & Impact Simulation  
Chairman – W.P. Wu (JCI)

Optimum Design of a Cellular Phone Using LS-OPT Considering the Phone Drop Test ................................................................. 14-1  
Jung Woo Kim, Kostech Inc.

Drop Analysis of the Skid Landing Gear of the Light Helicopter .................... 14-11  
Alexander V. Konyukhov, Kazan State University

Aircraft Engine Blade-Out Dynamics .......................................................... 14-17  
Kelly S. Carney, NASA Glenn Research Center

Non-Penetrating Impact Simulation of Stitched Resin Film Infused Composites ... 14-27  
A. M. Floyd, The University of British Columbia

Evaluation of the Dropping of a Propeller Shaft During Installation on the USS Cole a DDG 51 Class Destroyer .................................................. 14-39  
LT. Phillip Burnside, United States Naval Reserve

Session 15 - Metal Forming Technology  
Chairman - Li Zhang (DaimlerChrysler Corporation)

Nielen Slander, LSTC

Enhanced Failure Prediction in Sheet Metal Forming Simulations Through Coupling of LS-DYNA and Algorithm CRACH ........................................... 15-11  
Gernot Oberhofer, MATFEM
# Table of Contents

**7th International LS-DYNA Users Conference**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>

</table>
Session 18 - Computing Technology
Chairman - Alex Akkerman (FORD Motor Company)

Performance Evaluation on the ALE Formulation in MPP LS-DYNA ................. 18-1
Yih-Yih Lin, HP

Numerical Differences Observed Due to Different Binaries of LS-DYNA
and Due to the Use of Various Compiler Options .................................................. 18-5
Guangye Li, IBM

Performance Analysis and Tuning of LS-DYNA for Intel Processor-Based
Clusters ...................................................................................................................... 18-7
George Chaltas, Intel Corporation

Dan Fraser, Sun Microsystems, Inc.

High Performance Computing with Microsoft Windows: Meeting the
Computational Requirements of Engineering Applications ................................. 18-29
David A. Lifka, Cornell University

Session 19 - Common Session (2) “Computing Infrastructure”
Chairman - John Shen (DaimlerChrysler Corporation)

COMPAQ
SGI
MICROSOFT
INTEL
SUN
IBM
HP
NEC

Session 20 – “LS-DYNA Development”
Chairman – Karl Schweizerhof, DynaMore

Dr. John O. Hallquist, LSTC
