

# **2001 Petroleum Hydrocarbons and Organic Chemicals in Ground Water: ® Prevention, Detection, and Remediation Conference and Exposition**

**November 14-16, 2001 ♦ Houston, Texas**

The 2001 Petroleum Hydrocarbons Conference and Exposition was sponsored by the National Ground Water Association and the American Petroleum Institute, and co-sponsored by Texas Natural Resource Conservation Commission (TNRCC), US EPA Region 6, and the US EPA Technology Innovation Office. The Conference and Exposition was comprised of three days of technical presentations which covered the following topic areas:

## **Occurrence and Remediation**

### **Ethanol**

### **How Much NAPL Is Recoverable to the Extent Practicable?**

### **New Developments in Approaches to Corrective Action**

### **Evaluation of MTBE Remediation Options**

### **Remediation**

### **Vapor Pathway**

In addition, more than 60 leading companies in the ground water and petroleum industries participated in the Conference and Exposition in which a variety of equipment and services for preventing, detecting, and remediating ground water contaminated by petroleum hydrocarbons and other organic chemicals were showcased.

This bound volume is a compilation of papers that were presented at the Conference. Materials appearing in the publication are indexed to Ground Water On-Line, the data base of the National Ground Water Information Center.

**Responsibility:** The National Ground Water Association is not responsible for statements and opinions advanced in its meeting or printed publications.

# TABLE OF CONTENTS

## Session 1: Keynote Speaker

Frank Chapelle, Research Hydrologist, U.S. Geological Survey

## Session 2: Occurrence and Remediation

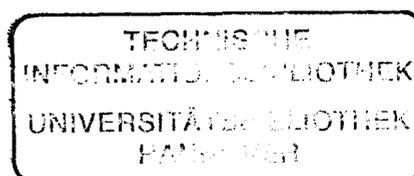

<b>MTBE Occurrence in Drinking Water Wells: Detection, Prevention, and Management</b> James, M. Davidson.....	1
<b>Application of Ground Water Fate and Transport Models to Evaluate Contaminant Mass Flux and Remedial Options for an MTBE Plume on Long Island, New York —</b> Jeff Thuma, Gordon Hinshalwood, Vic Kremesec, and Ravi Kolhatkar.....	3
<b>In Situ Aerobic Treatment of MTBE-Contaminated Groundwater —</b> Douglas Mackay, Ryan Wilson, Murray Einarson, Deepa Gandhi, Krassi Hristova, and Kate Scow .....	15
<b>Evaluation of MTBE Occurrence at Operating Gasoline UST Facilities in Santa Clara County, California Preliminary Findings —</b> George E. Cook Jr., Lane R. Davis, and Cris Tulloch.....	17

## Session 3: Ethanol

<b>Mechanisms Affecting the Infiltration and Redistribution of Ethanol-Blended Gasoline in the Vadose Zone —</b> Susan E. Powers and Cory J. McDowell.....	32
<b>Dissolution Characteristics of Ethanol from NAPL Sources and the Impact on BTX Groundwater Concentrations —</b> William G. Rixey and Xiaohong He .....	41
<b>Effect of Ethanol on BTEX Degradation and Natural Attenuation —</b> Pedro J. Alvarez, Graciela M. Ruiz-Aguilar, Harry Beller, Jose M. Fernandez-Sanchez, Nanh Lovanh, Craig Hunt, and Marcio B. da Silva.....	53
<b>Ethanol in Groundwater at a Pacific Northwest Terminal —</b> Timothy E. Buscheck, Kirk O'Reilly, Gerard Koschal, and Gerald O'Regan.....	55
<b>How Does Ethanol in Gasoline Change Things? —</b> Sanjay Garg, Robbie A. Ettinger, and George E. DeVaul.....	67

## Session 4: Posters

<b>Seeking the Impact of Ethanol in Gasoline on BTEX Plumes in Brazilian Ground Water</b> — Jim Barker, José Luiz Gomes Zoby, and Everton de Oliveria.....	69
<b>Overview of a Flexible Remediation System for the Treatment of Petroleum-Impacted Ground Water and Soils</b> — L.J. “Buddy” Bealer Jr. ....	73
<b>Integration of Forensic Geochemistry and Core Analysis for Subsurface Site Characterization</b> — Michael Mark Brady, Larry A. Kunkel, and Loren W. Slentz .....	79
<b>Air Injected Phytoremediation of Diesel-Contaminated Soils: Modeling and Column Studies</b> — Yoon-Young Chang, Kijune Sung, and M. Yavuz Corapcioglu.....	85
<b>Environmental Fate and Transport of Fuel Oxygenates</b> — Rula A. Deeb, Britt McMillan, and Michael C. Kavanaugh .....	90
<b>Subsurface Fate and Transport of Ethanol and Its Potential Impact on BTEX Bioattenuation</b> — Rula A. Deeb, Hong-Ying Hu, Jonathan Sharp, and Michael Kavanaugh...100	
<b>Use of an Innovative UV/Oxidation Technology for Treatment of Petroleum-Impacted Groundwater</b> — Kostas Dovantzis, Tom Marr, John Weitz, Victor J. Kremesec, Ravindra V. Kolhatkar, and Stephen Ells .....	102
<b>A Case Study of Volumetric Characterization and Remediation of Free-Phase Jet Fuel at an Aerospace Engines Facility in Phoenix, Arizona</b> — Robert J. Frank and Keith D. Bowers.....	104
<b>Advanced Optical Techniques for Petroleum Hydrocarbon Site Characterization</b> — John Haas, Rocky Hull, and Jim Shinn .....	110
<b>Electrochemical Remediation Technologies for Ground Water, Soil, and Sediment</b> — Falk Doering, Niels Doering, Joe L. Iovenitti, Donald G. Hill, and William A. McIlvride.....	112
<b>Factors Effecting Oil-Water Mass Transfer: A Field Study</b> — Jeffrey A. Johnson, Mary Ann Parcher, Una Dowey, and Leslie Young .....	114
<b>Forensic Geochemistry: The Key to Accurate Site Characterization</b> — Victor T. Jones III and Patrick N. Agostino .....	119
<b>Remediation of MTBE and Petroleum Hydrocarbons in Groundwater at a Chevron Fuel Terminal Using Iso-Gen™ In-Situ Dissolved Oxygen Technology</b> — John Lambie, John Orolin, Tim Buscheck, Rusty Benkosky, and Bob Cochran.....	133

<b>Polar Organics in Crude Oil and Their Potential Impacts on Water Quality —</b> Paul D. Lundegard and Jeffrey R. Knott.....	138
<b>Applying State Brownfield Initiatives To Whom It May Concern: Innovative Closure of a Large Industrial Plant —</b> Michael S. Niederreither, Gary J. Buterbaugh, and Jason E. Keeling.....	145
<b>Impacts of Site Demolition and Tank Removal: A Case Study —</b> Mary Ann Parcher, Jeffrey A Johnson, and Una Dowey .....	151
<b>Total Maximum Daily Load Study for Bacteria in Two Texas Bayous —</b> Hanadi S. Rifai, Monica P. Suarez, and Paul Jensen.....	154
<b>The Validity of Raoult’s Law for Naphthalene in Crude Oils —</b> William G. Rixey .....	156
<b>Full-Scale Design of an Oxygen Biosparging System for Bioremediation of Volatile Organic Compounds —</b> Kenneth L. Sperry, Michael Marley, Kara Kelley, Richard Kane, Christian Stanley, and James Kay.....	159
<b>Dual-Phase Extraction in South Texas Using the RSI S.A.V.E. System —</b> Steven C. Vaughn and Jeffrey C. Turner.....	166
<b>Design Considerations for Development of a Decision Support System for Corrective Action Analysis —</b> Venki Uddameri .....	173
 <b>Session 5: How Much NAPL Is Recoverable to the Extent Practicable?</b>	
<b>LNAPL Saturation, Distribution, and Recovery in Fine Grained Soils —</b> Mark Adamski, Victor Kremesec, Ravi Kolhatkar, Chris Pearson, and Beth Rowan.....	178
<b>The Importance of Evaluating Soil Moisture and Capillary Pressure Conditions in the Characterization and Assessment of Free Product —</b> Jeffrey A. Johnson, Raphael Pouvereaux, Una Dowey, and Mary Ann Parcher.....	193
<b>The Use of Humic Acid to Promote the Remediation of a NAPL in Porous Medium —</b> David A. Steffy, Daniel Groghan, Melissa Bandy, and Martin Satola.....	200
<b>Short Duration High Vacuum Dual Phase Extractions Recovery Data Set Review and Conclusions —</b> Victor Kremesec, Barbara Padlo, Yvett Baxter-Drayton, Harold Primack, Rebecca Kulas, Maria Stercho, Jeff Kaestner, and Greg Carpenter .....	215

## **Session 7: Remediation — Strategies for Characterizing Oxygenate**

<b>Overview of MTBE Remediation Options — Rula A. Deeb and Michael C. Kavanaugh.....</b>	<b>222</b>
<b>The Efficacy of Oxygen Release Compound: A Seven-Year Review — Stephen Koenigsberg, Craig Sandfur, Kevin Lopus, and Gunisha Pasrich .....</b>	<b>229</b>
<b>MTBE Remediation at Retail Gas Stations by Bioaugmentation — Gerard E. Spinnler, Joseph P. Salanitro, Paul M. Maner, and Paul C. Johnson .....</b>	<b>244</b>
<b>In Situ and Ex Situ Biodegradation of MTBE and TBA in Contaminated Groundwater — Robert J. Steffan, Paul B. Hatzinger, Yassar Farhan, and Scott R. Drew .....</b>	<b>252</b>

## **Session 8: Remediation**

<b>The Effects of Nitrogen Source and Supply on Bioventing of Gasoline-Contaminated Soil — Kirsten Shewfelt and Richard G. Zytner .....</b>	<b>265</b>
<b>Remediation of Gasoline-Contaminated Ground Water Using Super-Saturated Dissolved Oxygen: Report on Sites in the United States and Brazil — Robert M. Cataldo, Daniel E. Taylor, and Walter S. Mulica.....</b>	<b>273</b>
<b>Methods and Analysis for Implementing Natural Attenuation Protocols — Jason B. Bidgood, John R. Hicks, and Donald H. Kampbell .....</b>	<b>274</b>

## **Session 9: Vapor Pathway**

<b>Development of Simple Screening Criteria for the Groundwater to Indoor Air Exposure Pathway — John A. Connor, Philip C. DeBlanc, Charels J. Newell, and Roger J. Pokluda .....</b>	<b>288</b>
<b>Effects of Diffusion-Coefficient Heterogeneity and Biodegradation on Vapor Transport to Indoor Air at Gasoline-Spill Sites — Matthew A. Lahvis, George E. DeVaul, and Robert A. Ettinger .....</b>	<b>290</b>
