Roller Compacted Concrete Dams

Edited by

L. Berga
Spanish National Committee on Large Dams, SPANCOLD

J.M. Buil
Spanish National Committee on Large Dams, SPANCOLD

C. Jofré
Spanish Institute of Cement and its Applications, IECA

S. Chonggang
Chinese National Committee on Large Dams, CHINCOLD
# Table of Contents

**Preface**  
XV

**Organization**  
XVII

## Lectures

**RCC dams in Spain – present and future**  
*M. Alonso-Franco & C. Jofrè (Spain)*  
3

**RCC dams in China**  
*Ch. Shen (China)*  
5

**30 year’s history of Roller-compacted Concrete dams in Japan**  
*I. Nagayama & S. Jikan (Japan)*  
27

**The state-of-the-art of RCC dams in 2003 – an update of ICOLD Bulletin no. 125**  
*M.R.H. Dunstan (United Kingdom)*  
39

**Some recent innovative methods and techniques in the design and construction of RCC dams**  
*B.A. Forbes (Australia)*  
49

**Materials and RCC quality requirements**  
*F.R. Andriolo (Brazil)*  
61

**RCC use in dam rehabilitation projects**  
*K.D. Hansen (USA)*  
79

**Performance of Roller Compacted Concrete (RCC) dams – an honest assessment**  
*E.K. Schrader (USA)*  
91

**Spanish experiences during impoundment**  
*A. Soriano (Spain)*  
103

## Theme 1: Advantages of RCC dams – the use of RCC in dam rehabilitation

**Cindere dam – 107 m high Roller Compacted Hardfill Dam (RCHD) in Turkey**  
*S. Batmaz (Turkey)*  
121

**Successful large RCC dams – what are the common features?**  
*T.P. Dolen, R. Ibáñez-de-Aldecoa, J.L. Eharz, M.R.H. Dunstan (USA, Spain, United Kingdom)*  
127

**The value engineering study of Marun regulating dam in Iran**  
*K. Emami, D.R. Arab, A. Mardashti, A. Saarang, H. Shirazi, F. Izadjoo, T. Izadpanah & H. Basirzadeh (Iran)*  
139

**El Atance dam (Spain): an example of an “RCC-friendly” design and construction**  
*S. Madrigal, R. Ibáñez-de-Aldecoa & A. Gómez (Spain)*  
147

**The advantages of use RCC for Dona Francisca project**  
*J.M.P. Mussi, D.E. Moser & R.D. Steffen (Brazil)*  
155
Value-Engineering at Olivenhain Dam, USA
M. Pauletto & M.R.H. Dunstan (USA, United Kingdom)

Alternative solutions for the Ibiur Dam – conventional concrete vs. RCC
I. Pildain (Spain)

Saluda Dam mix design program
P.C. Rizzo, E.K. Schrader, L.R. Gaekel & J.P. Osterle (USA)

Reconstruction of the Villarpando Dam in the Dominican Republic using Roller Compacted Concrete
F. Saenz de Ormijana, A. Capote & V. Mohedano (Spain)

Presa Rompepicos – a 109 meters high RCC dam at Corral Des Palmas with final design during construction
E.K. Schrader & J.A. Balli (USA, Mexico)

Theme 2: Experiences and technologies in different countries

Comparison between the execution technologies of Porce II and Beni Haroun dams
F. Abadia & A. Palacio (Spain)

RCC construction – acceptable means and methods
R.P. Bass (USA)

Research and application of key technologies for Roller Compacted Concrete cofferdam in Three Gorges Project
G.J. Cao, Y. Wang & C.J. Zhu (China)

RCC dams design and construction in Morocco – specific aspects
A.F. Chraibi (Morocco)

Lean RCC dams – Laboratory testing methods and Quality Control Procedures during construction
D.G. Camoulos, T.P. Koryalos

Adaptive construction methodology for the Ghatghar Saddle dam, India’s first RCC dam
M.R.H. Dunstan & Ch. Hicks (United Kingdom, USA)

Three RCC dams for Ghatghar project – an Indian experience
V.V. Gaikwad & V.C. Shelke (India)

Trial mix programme for Jahgin Dam – the first major RCC dam in Iran
A.G. Ghafuri, M.E. Omran & M.R.H. Dunstan (Iran, United Kingdom)

New trends of construction methodology and its influence in the research for Brazilian Roller Compacted Concrete (RCC)
N.G. Graça, E.L. Batista, A.C. Albuquerque, M.A.S. Andrade, R.M. Bittencourt & W.P. Andrade (Brazil)

Brazilian experience of Roller Compacted Concrete (RCC)
N.G. Graça, E.L. Batista, R.M. Bittencourt & W.P. Andrade (Brazil)

Modifying construction methods of Zirdan RCC dam
M.R. Hajialikhani (Iran)

Determination of setting times on RCC by means of ultrasonic energy (experience with six projects)
G. Hermida, M. Bollati & J.L. Rivas (Colombia, Spain)

Toker dam, a contractor's perspective on constructing RCC projects in developing countries
C. Hicks, J. Yoon & W. Mesghinna (USA, Korea, Eritrea)

Characteristic of dam-concrete applied to concrete dams constructed by the Water Resources Development Public Corporation (WARDEC) – mix design and quality control
K. Hino, T. Jotatsu & T. Hara (Japan)
Spread and application of RCC damming technology in China
L. Liu & Y. Zhang (China) 301

Experience gained during design and construction of the Jahgin RCC cofferdam
M.E. Omran, M.J. Olapour, R. Peyrovdin & F. Ortega (Iran, Germany) 307

Pedrógão dam: first RCC experience in Portugal
F. Ortega, C. Bastos & P. Alves (Germany, Portugal) 319

Trial mix programme and full-scale trials for Olivenhain RCC dam, USA
M. Pauletto, M.R.H. Dunstan & F. Ortega (USA, United Kingdom, Germany) 329

Development of Roller Compacted Concrete dam in Thailand
W. Pongtepupathum (Thailand) 339

Miel I: RCC dam, Height World Record
H. Santana & E. Castell (Colombia) 345

Design and mix studies with high and low cementitious content RCC for Nordlingaalda dam in Iceland
E. Schrader, U. Kristjansdottir, J. Skulason & S. Sveinbjornsson (USA, Iceland) 355

The development of RCC arch dams
Q.H.W. Shaw (South Africa) 363

Roller Compacted Concrete arch dam of Northwest Cold Area in China – Longshou arch dam
Y. Su (China) 373

The dam of Beni Haroun – Algeria
B. Tuomi, Z. Guemmadi & H. Houari (Algeria) 379

Overview for construction of Roller Compacted Concrete (RCC) dam,
Gezhouba Construction Group Corporation (CGGC)
H. Zhou (China) 385

Experience in compacted concrete dam projects in the Ebro catchment area
(Rialb, Val and Urdalur dams)
M. Zueco, F. Hijós, M.A. Bermúdez, A. Fruns & O. García (Spain) 393

Theme 3: Technological innovations in RCC dams

Distributed fibre optic temperature measurements in RCC dams in Jordan and China
M. Aufleger, M. Conrad, Th. Strobl, A.I.H. Malkawi & Y. Duan (Germany, Jordan) 401

Temperature control and design of joints for RCC arch dams
Z. Bofang (China) 409

Contraembalse de Monción: a hardfill dam constructed in the Dominican Republic
A. Capote del Villar, F. Sáenz de Ormíjana & V. Mohedano (Spain) 417

Repeated joint-grouting of Roller Compacted Concrete arch dam
G. Chen, G. Ji & G. Huang (China) 421

New design method of RCC high arch dam
Q. Chen (China) 427

Design and prototype test of stepped overflow surface at Dachaoshan hydropower station in China
Y. Deng, K. Lin & L. Han (China) 431

The use of pulverized aggregates for concrete production
N.G. Graça, E.L. Batista, R.M. Bittencourt & W.P. Andrade (Brazil) 433

Structural design of Cindere Dam
A.F. Gürdil & S. Batmaz (Turkey) 439
CSG method using muck excavated from the dam foundation

H. Hanada, K. Ooyabu, T. Tamezawa & S. Matsueda (Japan)

Design concept of trapezoid-shaped CSG dam

T. Hirose, T. Fujisawa, H. Kawasaki, M. Kondo, D. Hirayama & T. Sasaki (Japan)

Concept of CSG and its material properties

Design guidelines for Roller Compacted Concrete lift joints

R.A. Kline (USA)

Seismic stability and stress–strain state of a new type of FSH-RCC dams

Y.P. Liapichev (Russia)

Additives in RCC – research and a real case

D.E. Moser, R.D. Steffen & F.R. Andriolo (Brazil)

The construction of temporary structures by CSG method in Tokuyama dam project

M. Oie, Y. Yamaguchi, K. Fujiita & S. Jikan (Japan)

Dynamic properties of CSG

S. Omae, N. Sato & I. Oomoto (Japan)

Synthetic geomembranes in RCC dams: since 1984, a reliable cost effective way to stop leakage

A.M. Scuero & G.L. Vaschetti (Switzerland)

The innovation of construction in the III-stage of RCC cofferdam of the Three Gorges Project

D. Wang, Z. Dai & B. Sha (China)

Suofengying powerstation micro-expansion Roller Compacted Concrete dam

Z. Zheng (China)

The design and application of the alternate climbing formwork to the III-stage RCC cofferdam of the Three Gorges Project

Y. Zou, X. Liu & Z. Dai (China)

Theme 4: Planning and design

Thermal analysis of Roller Compacted Concrete

E. Aquino, S. Botassi, M.A.S. Andrade, M.R. Bittencurt, W.P. Andrade & F.R. Andriolo (Brazil)

Feasibility study of stepped spillways in RCC dams controlled by a Tainter gate

A. Amador, M. Sánchez-Juny, J. Pomares, J. Dolz, F. Abadía & R. Ibáñez-de-alelcoa (Spain)

Special design requirements for high RCC gravity dam

W. Baile, Z. Jianping & Ch. Guanfu (China)

Numerical modelling of thermal stress in RCC dams using 2-D finite element method – case study

J.L. Calmon, J. Murcia, S. Botassi dos Santos, E. Gambale & C.J. da Silva (Brazil, Spain)

A modified 1-D strip model for thermo-mechanical analysis of RCC dams

M. Cervera & M. Goltz (Spain, Germany)

Ralco dam, Chile – features of its design and construction

D. Croquevielle, L. Uribe, R. Muts & B.A. Forbes (Chile, Australia)

The design of Longtan Roller Compacted Concrete gravity dam

S. Feng & F. Xiao (China)

Thermal stress simulation and possible crack analysis of Mianhuatan RCC dam

Z. Guoxin, Z. Bofang & G. Ningxiu (China)
Study of the thermal compensation method for high RCC dam using concrete with MgO
P. Hu, P. Yang & S. Huang (China) 611

The software package for the thermal control of concrete dams and its engineering applications
S. Huang, P. Hu & P. Yang (China) 615

Constitutive modelling of Roller Compacted Concrete
F. Kalantary & P. Sadeghi (Iran) 619

Thermo-mechanical analysis of Roller Compacted Concrete dams
D.A.V. Krüger, E.E. Kavamura, N.F. Carvalho, M.B. Hecke, R.D. Machado & L.A. Lacerda (Brazil) 625

Miel I dam – design of the geotechnical and structural instrumentation program for the world’s highest RCC dam
P.M. Leguizamo (Colombia) 633

Design of Zhouning RCC gravity dam
L. Lin (China) 641

A direct tensile strength for Roller Compacted Concrete (RCC) gravity dams
A.I.H. Malkawi & S. Mutasher (Jordan) 645

Stability analysis of RCC gravity dam blocks on Sloped Banks in Mianhuatan hydropower station
Y.Q. Mao (China) 651

Experimentally obtaining dimensionless abacus for the design of stepped spillways in up to 50 m high dams
A. Martínez & J.A. Bazián de Granda (Spain) 655

Design features for Porce III RCC dam
A. Marulanda & A. Castro (Colombia) 661

Investigation of influence of placement schedule on the thermal stresses of RCC dams, using finite element analysis
J. Noorzaei, H.R. Ghafouri & R. Amini (Malaysia, Iran) 669

An approach to the actual value of the modulus of deformation in concrete dams
G. Ormazabal, A. Aguado & L. Agulló (Spain) 675

Research on prototype observation and feedback analysis of RCC gravity dams
X. Ren, L. Liu, Z. Zhang & Y. Mao (China) 683

DMR, a new geomechanics classification for use in dams foundations, adapted from RMR
M. Romana (Spain) 689

Characterization of the pressure field over a stepped spillway in Roller Compacted Concrete dams
M. Sánchez-Juny & J. Dolz (Spain) 697

Energy loss on stepped spillways
G. Valentín, P.V. Volkart & H.E. Minor (Switzerland) 701

Introduction of the design of the Three Gorges Project RCC cofferdams
Y. Weng, J. Li & Y. Wang (China) 707

Theme 5: Materials

Porosity studies for Roller Compacted Concrete
E.L. Batista, N.G. Graça, L.A. Farias, R.M. Bittencourt, WP. Andrade, H. Carasek & O. Cascudo (Brazil) 713

Research on the optimization of RCC-paste system incorporating high-volume flyash
G. Chen, G. Ji, F. Jiang, L. Pan & R. Jiang (China) 723
Investigations on the modulus of elasticity of young RCC
M. Conrad, M. Aufleger & A.I.H. Malkawi (Germany, Jordan)

Use of wet coal ashes (type F) in RCC dams
F. Delorme, P. Gaudron & R. Valon (France)

RCC design for Dachaoshan hydropower station in China
Y. Deng & K. Lin (China)

Effects on Roller Compacted Concrete of Isfahan slag
A. Fakher & P. Azizi-Moghaddam (Iran)

Influence of mineral and pozzolanic admixtures on Roller Compacted Concrete
L.A. Farias, N.P. Hasparyk, A.S. Lituário, M.A.S. Andrade, R.M. Bittencourt & W.P. Andrade (Brazil)

Effect of air entrainment on the workability and strength of Roller Compacted Concrete for dam construction
R. Gagné, E. Houehanou, R. Lupien, A. Prézeau & F. Robitaille (Canada)

Optimization of the compaction time with the effects of different pozzolans (type and dosage) on the mechanical properties of RCC
M. Gharavy (Iran)

Using PT instead of flyash in the Dachaoshan RCC gravity dam
S. Guo (China)

Laboratory previous tests for Sa Stria dam (Italy) performed using three different mineral admixtures
R. Ibáñez-de-Aldecoa & L. Gutiérrez (Spain)

RCC mix and thermal behaviour of Miel I dam – design stage
J. López, G. Castro & E. Schrader (Colombia, USA)

Reaction between certain Jordanian rock-aggregate and cement in Roller Compacted Concrete (RCC) dams
A.I.H. Malkawi, S. Rabab’ah & A. Abed (Jordan)

A comparative study of mechanical properties of RCC trial mix using two different cementitious materials (fly ash and natural pozzolan)
A.I.H. Malkawi, H. Shaia, S. Mutasher & M. Aridah (Jordan)

Horizontal construction joints parameters
J. Marques Filho, W.P. Andrade, M.A. Traboulsi, V.A. Paulon & D.C. Dalmolin (Brazil)

RCC properties characterization in laboratory test fills
J. Marques Filho, W.P. Andrade, M.A. Traboulsi, V.A. Paulon & D.C. Dalmolin (Brazil)

Discussions regarding the use of materials and the design of RCC dams
F. Ortega & F.R. Andriolo (Germany, Brazil)

Mix design of Roller Compacted Concrete for Ghatghar pumped storage scheme in India
V.N. Pendse, R.L. Damani, S.L. Kshirsagar & C.L. Narkhede (India)

Characterisation of fresh concrete in order to evaluate the joints between layers
A.B. Ribeiro & A. Carrajola (Portugal)

Experimental study on mechanical characteristics of super lean-mix concrete
T. Sasaki, I. Nagayama, T. Kobori & Y. Yamaguchi (Japan)

Mix design and properties of RCC at Mujib dam – high and low cementitious content
E. Schrader, J. López & M.F. Aridah (USA, Jordan)
Studies on the quality of Roller Compacted Concrete with low cement content on Ueno dam
T. Tsukada (Japan) 865

Experience in materials used in compacted concrete dams in the Ebro catchment area
(Rialb, Val and Urdalur dams) 877
M. Zueco, F. Hijós, M.A. Bermúdez, A. Fruns & O. Garcia (Spain)

Theme 6: Construction and quality control – equipment and programming

DMA – a simple device for measuring unit water in RCC mixtures 883
M.A.S. Andrade, M.A. Pimenta, R.M. Bittencourt, A.C. Fonseca, J.T.F. Fontoura & W.P. Andrade (Brazil)

Full-scale trials for RCC 891
M.A.S. Andrade, M.A. Traboulsi, R.M. Bittencourt & W.P. Andrade (Brazil)

Review of some points in the RCC practice for dam construction 897
F.R. Andriolo (Brazil)

Construction methods for the first large RCC dam in Iran 905
A.M. Azari, R. Peyrovadin & F. Ortega (Iran, Germany)

Coring testing program at the Olivenhain dam 913
B.C. Bennett & J.L. Stiady (USA)

Controlling RCC mix workability for Olivenhain dam construction 923
B.C. Bennett, J.L. Stiady & M.P. Rugh (USA)

Quality inspection of the RCC dam at Dachaoshan hydropower station 933
Y. Deng & K. Lin (China)

Benefits of the full-scale trial performed for Beni Haroun dam (Algeria) 935
M.R.H. Dunstan & R. Ibáñez-de-Aldecoa (United Kingdom, Spain)

Quality control in RCC dams using the direct tensile test on jointed cores 943
M.R.H. Dunstan & R. Ibáñez-de-Aldecoa (United Kingdom, Spain)

Physical and mechanical properties of Roller Compacted Concrete in Capanda dam
basing on core samples testing 951
V.E. Fedosov, E.A. Kogan, M.T. de Almeida, F. Fontoura Jose Tomaz & A.F. Fontoura Paulo
(Russia, Angola, Brazil)

RCC quality control applied in the structures of 1st and 2nd construction stages of the HPP Tucuruí
H.R. Gama, O.M. Bandeira & S.S. Lacerda (Brazil) 959

RCC Esparragal small dam construction (Sevilla-Spain) 969
M.E. Grosso & E. Benitez (Spain)

Evaluation of construction quality control and material properties of RCC dam 979
Z. Guan (China)

RCC quality control for Mujib dam 983
J. López, M. Aridah & E. Schrader (Jordan, USA)

Ensuring quality control when building RCC dams 995
A. Marulanda, A. Castro, F.A. Sánchez (Colombia)

Challenges in Ralco dam construction 1005
G. Moreno (Chile)

Quality control RCC of Dona Francisca dam 1013
D.E. Moser, R.D. Steffen, C. Britto & J.M.P. Mussi (Brazil)

Development of a direct tensile strength test procedure for Roller Compacted Concrete characterization 1021
J.L. Olivares, J.F. Navarro & V. Ausín (Spain)
Construction of Beni Haroun dam (Algeria)
M. Sanz (Spain)

Appropriate laboratory compaction methods for different types of Roller Compacted Concrete (RCC)
E. Schrader (USA)

Extensive shear testing for Saluda dam Roller Compacted Concrete
E.K. Schrader & B.C. Rizzo (USA)

Developing database and reporting system softwares for quality control testing
J.L. Stiady & B.C. Bennett (USA)

Dona Francisca Hydroelectric power plant – design and construction of the RCC structures
J.A. Sobrino, A.M. Fernandes, S. de Pauli Basso & R.F. Pereira (Brazil)

Rationalized construction of embedded structures in dam bodies constructed by the RCD method
T. Uesaka, T. Arai, Y. Takada & T. Sasaki (Japan)

Study on properties of RCC for Cofferdam III of the Three Gorges Project
W. Yingchun, L. Jiuzheng, X. Hanjiang, Y. Huanquan & C. Yimin (China)

Safety monitoring design and implementation of RCC cofferdam on the right bank of Three Gorges Project
D. Zhenlong, X. Hanjiang, L. Xiangsheng & Z. Qi (China)

Experience in construction methods as adopted in compacted concrete dams in the Ebro catchment area (Rialb, Val and Urdalur dams)
M. Zueco, F. Hijós, M.A. Bermúdez, A. Frans & O. García (Spain)

Theme 7: Performance of RCC dams – experiences on operation

Construction of Urdalur dam and project to repair the seepage through the drainage system
G. Abad (Spain)

Rolled Compacted Concrete dams: current construction methods, output and permeabilities
J.C. De Cea Azañedo & E. Benítez Pascual (Spain)

Long-term performance of Roller Compacted Concrete at Upper Stillwater dam, Utah, USA
T.P. Dolen (USA)

El Atance dam: microcement injections and sealing wells drilled in full contraction joints
L. García García, S. Madrigal Sánchez & G. Abad Muñoz (Spain)

Waterproofing of Cenza dam
A. Gil (Spain)

Thermal measurement and analysis of large Roller Compacted Concrete dam
H. Koga, H. Katahira & H. Kawano (Japan)

Design, construction and operation of Cenza dam (Spain)
J. Martín, J.F. Sánchez, A. Gil, F. Ortega & M.G. Mañueco (Spain)

Miel I dam, seepage control and behavior during impoundment
A. Marulanda, A. Castro & J. Silva (Colombia)

Behaviour analysis of RCD dam body
M. Nonaka, C. Yamamoto, I. Oomoto & S. Jikan (Japan)

Three years of physicochemical seepage water analysis from Jordão River Dispersion RCC first Brazilian dam: diagnose
K.F. Portella, O. Baron, M.A. Soares, M.M. Elias & A.C. Borges (Brazil)
Seepage and treatment of cracks in Salto Caxias dam
M.A. Soares, P. Levis, R.W. Seara, E.S. Ferreira & J.F. Terres (Brazil)

Capanda – RCC dam – 12 years quality control data
M.A. Tavares, M.A. Origa, J.T.F. Fontoura, E.R. Holanda, W.A. Pacelli & F.R. Andriolo (Brazil)

The first built Roller Compacted Concrete arch dam – Puding Dam
Z. Yang & J. Yang (China)

Experience in compacted concrete dam loading in the Ebro catchment area
(Rialb, Val and Urdalur dams)
M. Zueco, F. Hijós, M.A. Bermúdez, A. Fruns & O. Garcia (Spain)
