## ICS'98 Workshop on Artificial Intelligence

### Table of Contents

**Session BS1: Neural Networks**

1. Simple Structural Information to Optimize Neural Network Architectures
   Ryotaro Kamimura
   Information Science Laboratory, Tokai University, Japan
   1

2. Automatic Design of Neural Networks Based on Genetic Algorithms
   Ching-Han Chen
   Department of Electrical Engineering, I-Shou University, R.O.C.
   8

3. A Memory-Based Sigma-Pi-Sigma Neural Network (SPSNN)
   Chien-Kuo Li, and Jung-Hung Hung
   Dept. of Information Management, Shih Chien University, R.O.C.
   14

4. Global Convergence of Hopfield Networks in Partial Simultaneous Update Mode
   Donq-Liang Lee
   Dept. of Electronic Engineering, Ta-Hwa Institute of Technology, R.O.C.
   20

5. A Method to Learn Weights from Incomplete Data
   Xudong Luo, Honghua Dai and Chengqi Zhang
   School of Mathematical and Computer Sciences, The University of New England, Australia
   25

6. A Hybrid Paradigm for Weight Initialization in Supervised Feedforward Neural Network Learning
   Leandro Nunes de Castro, and Fernando José Von Zuben
   Dept. of Computer Engineering and Industrial Automation (DCA)
   School of Electrical and Computer Engineering (FECE), State University of Campinas, Brazil
   30

7. Improving Generalization Performance in CNN Classifier Using A MLP-Based Technique
   Mostafa Mahmoud Syiam
   Dept. of Electrical and Computer Engineering, Faculty of Engineering, Applied Science University, Jordan
   38

**Session BS2: Neural Network Applications**

1. GA-Tabu Design Neural Network Controller
   Kuan-Shiu Chiu, and Andrew Hunter
   School of Computing and Information Systems, University of Sunderland, UK
   46
2. Fractal Image Compression and Decompression by Neural Network Approaches ........................................54
   S.J.Lee, K.T.Sun, and P.Y.Wu
   Institute of Information Education, National Tainan Teachers College, R.O.C.

3. Chinese Textual Classification Based on Multilayer Feed Forward with Back Propagation Neural Network ........................................62
   Tyne Liang and Shyang-Tay Tseng
   Department of Computer and Information Science, National Chiao-Tung University, R.O.C.

4. A Genetic and Neural Network Approach to Significant Indicators Selection ........................................68
   Anthony J.T. Lee, Y.S. Chen, and J.Z. Chen
   Dept. of Information Management, National Taiwan University, R.O.C.

5. Document Clustering Using Probabilistic Networks ........................................76
   Shih-Yao Yang and Von-Wun Soo
   Dept. of Computer Science, National Tsing-Hua University, R.O.C.

6. A Neural-Fuzzy Congestion Controller for ATM Networks ........................................84
   Chun-Liang Hou and Shie-Jue Lee
   Department of Electrical Engineering, National Sun Yat-Sen University, R.O.C.

7. Application of Back Propagation Neural Network to The Analysis of Aircraft Wing Loading ........................................92
   Mo-Chung Lee, M. S. Young, Bon Hung, R. P. Ma, and Chii-Maw Uang,
   Dept. of Electrical Engineering, National Cheng Kung University, R.O.C.

Session BS3: Reasoning & Knowledge-Based Systems

1. Interval Algebra for Spatio-Temporal Relation Reasoning ........................................101
   Timothy K. Shih, Anthony Y. Chang, Ken C. Wang and Wen C. Pai
   Department of Computer Science and Information Engineering, Tamkang University, R.O.C.

2. A Multiscale Study of Spatiotemporal Data Mining-Case Study: Precipitation Pattern Analysis ........................................109
   Sheng-Tun Li
   Dept. of Information Management, National Kaohsiung First University of Technology and Science, R.O.C.

3. Inheritance Hierarchies and Partial Ordering ........................................116
   Hung-Tsow Chen
   Dept. of Computer Science and Information Engineering, National Cheng Kung University, R.O.C.

4. An Intelligent Human-Computer Interface for Medical Diagnosis Systems ........................................124
Chien-Chang Hsu, and Cheng-Seen Ho  
Department of Electronic Engineering, National Taiwan University of Science and Technology, R.O.C.

5. How to Handle Unknown Inputs ..........................130
Mercedes Fernandez Redondo and Carlos Hernández Espinosa  
Dept. of Computers, Jaume-I University, Spain

6. A Dependency-Based Constraint Relaxation Scheme for Over-Constrained Problems ...134  
Chia-Lin Hsieh, Jackie Archibald  
School of Computing and Information Systems, University of Sunderland, U.K.

7. The Influence of The Leakage on The Dynamic Behaviour of A Hydraulic System  
and Its Use by The Fault Prediction from An Expert System .........................142  
A. Chatzinikolaou  
Automation System S.A., Athens, Greece

Session BS4: Agents & Machine Learning

1. Cooperating Software Agents under Uncertainly Situations .........................147  
Kimitaka Uno and Akira Namatame  
Dept. of Computer Science, National Defense Academy, Japan

2. A Multi-Agent Approach to Managing Adaptive Service Systems - Preliminary Explorations .................................................................153  
Jyi-Shane Liu  
Dept. of Computer Science, National Chengchi University, R.O.C.

3. Negotiation Strategies in Distributed Meeting Scheduling Using Mobile Agents ........159  
Huang Ho Shu An and Von-Wun Soo  
Dept. of Computer Science, National Tsing-Hua University, R.O.C.

4. An Agent-Based Intelligent Interface for Mobile Robot Control ..........................167  
Alan Liu, Yih-Wen Lee, and Jia-Houng Shyu  
Dept. of Electrical Engineering, National Chung Cheng University, R.O.C.

5. An Efficient Implementation of Conceptual Structures ................................175  
Woo Jeong Bae, In Cheol Park, and Yong-Seok Lee  
Dept. of Computer Science, Chonbuk National University, Korea

6. Genetic Algorithm Based Dispatching Rules for FMS Scheduling .......................182  
Ming-Shing Hsieh, Yong-Huai Huang, and Din-Chang Tseng  
Institute of Computer Science and Information Engineering, National Central University, R.O.C.

7. Cooperative-Based Learning Classifier System: A Man-Machine Model  
Approach .........................................................................................189
Session BS5: Document & Language Processing

1. A Portuguese-Chinese Corpus-Based Machine Translation System ........................................ 197
   Chi Man Pun and Yi Ping Li
   Faculty of Science and Technology, University of Macau, Macau

2. Guarded Parsing of Chinese Sentence without Word Segmentation ..................................... 205
   Chi-Hong Leung, Kwok-Ping Chan, Zhi-Hong Zuo, and Ge-Yang Liu
   Dept. of Computer Science and Information Systems, The University of Hong Kong, Hong Kong

3. An Incremental Acquisition of Terms Using Automatic Selected Seeds and Extended Variation Rules ................................................................. 210
   Hanmin Jung, Young-Kil Kim, Sung-Kwon Choi, and Sangkyu Park
   Dept. of Natural Language Processing, Electronics and Telecommunications Research Institute, Korea

4. Abstract Generation for Newspaper Articles .......................................................................... 215
   Kenichi Naitou and Susantha Herath
   Graduate School of Computer Science and Engineering, The University of Aizu, Japan

5. Bring Intelligence to Object-Embedded Documents Using PrologScript Language .............. 220
   Tai-Wen Yue and Su-Chen Chiang
   Dept. of Computer Science and Engineering, Tatung Institute of Technology, R.O.C.

6. Robust Multi-Keyword Spotting of Telephone Speech Using Stochastic Matching ............. 228
   Chung-Hsien Wu, Yeou-Jiunn Chen, and Yu-Chun Hung
   Dept. of Computer Science and Information Engineering, National Cheng Kung University, R.O.C.

7. Simple Feature Selection Methods that Make a Difference: An Application to Text Categorization ......................................................................................... 234
   Ayse Pinar Saygin
   Dept. of Computer Engineering and Information Science, Bilkent University, Turkey
