(Re)Claiming the Underground Space

Edited by
J. Saveur
Scientific Committee WTC 2003, Gouda, The Netherlands

Volume 1
Table of Contents

Preface XVII
Organisation XIX

Volume 1

Opening address
Some critical and positive comments concerning building underground 3
M. Zwarts

Keynote lectures
Reclaiming the underground space of large cities in Japan 13
T. Konda
Safety in tunnelling and underground construction – an Australian perspective 25
G.S. Ash & N.J. Betts
The “Big Dig” of Boston, Massachusetts: lessons to learn 37
F.P. Salvucci
Engineering the underground 43
T. Marjoram

Underground space use
25 years of experience with sport facilities in rock in Norway 47
J.A. Rygh
Sijtwende, a prime example of multiple use of space in the Netherlands 55
J.G. Langewouters, J. de Jong & R. Knulst
Ombla multipurpose hydropower system 61
Z. Sever
Sestao station, Line 2, Bilbao Metro 67
J. Madinaveitia

Underground space construction
Prague metro one nave driven station 75
O. Hasik, J. Ruzicka, M. Bucek & M. Zelenka
Designing for safety, a new approach to safety in underground and multiple space use constructions 81
W. Snelders
Development and application of the large-section shallow tunnelling methods to large-scale underground space
T. Yasuda, T. Tamura & T. Hashimoto

The A86 underground west loop – safety in the tunnel reserved for light vehicles
X. Baumelou

Atlantic Avenue Station – underpinning and passageway modifications
A. Grigoryan & L.G. Silano

Emergency shafts for the Boortunnel Groene Hart, HSL-Zuid high-speed railway line
R.J. van Beek & A.H.K. Driessen

“Damwandpolder” new building method for lowered infrastructure
W. Hemeloop & H. de Vries

Sustainability of underground space

Performance and reliability based service life design for the Green Heart Tunnel
N. Han, Y. Taibi & A. Kooiman

Durability assessment of a railway tunnel
C. Gehlen & G. Pabsch

Optimisation of decisions in the process of creating and operating tunnels
N.P. Hoj, S. Rostam & C. Edvardsen

Tunnels as a sustainable environmental solution – a case study
M.C.J. Roxo

Rock tunnelling challenges in Manhattan
M. Wone, V. Nasri & M. Ryzhevskiy

Excavating a pyroclastic plateau using deep-well dewatering in the Hakkoda Tunnel, Japan
S. Hattori, Y. Sasaki, A. Ito & A. Kitazawa

Quality control during construction of the Green Heart Tunnel on the basis of service life design
N. Han, Y. Taibi & A. Kooiman

Prevention of alkali–silica reaction at the Green Heart Tunnel project
Y. Taibi, N. Han & A. Kooiman

Aboveground provisions in the landscape
R. Hoogenboom

Safety

Ex post evaluation of the decision making process about the safety level of the Westerschelde tunnel
R.M.L. Nelisse

The characteristics of fires in large-scale tunnels on fire experiments inside the Shimizu No. 3 tunnel on the New Tomei Expressway
K. Takekuni, A. Shimoda & M. Yokota

The automation of the aeraulic response in the case of fire in a tunnel – first concrete answers
E. Casalé

Smoke build-up resulting from hydraulic oil fires in a 5.6 m² tunnel
D.R. Lamont & R. Bettis
How to decide on restrictions to transport of dangerous goods  
I.B. Kroon & N.P. Haj  

Model-based predictive control of road tunnel portal emissions  
A.E. Vardy, E. Mori, M. Yokota & I. Nakahori  

Behavior of drivers during tunnel evacuation  
L.C. Boer  

Fire and temperature protection at the exhaust shaft of the Gotthard-Base-Tunnel  
V. Wetzig & U. Streuli  

The status of road tunnel firesafety in Korea  
M.B. Kim, J.S. Choi, Y.S. Han, B.I. Choi & Y.J. Jang  

Spalling of concrete tunnel linings in fire  
C. Both, G.M. Wolsink & A.J. Breunese  

Safety approach of mass transit metrosystem North/South Metroline, Amsterdam  
A.J.M. Snel  

Upgrading the fire safety of existing tunnels in Europe: a 13 M EUR European research project  
C. Both, A. Haack & D. Lacroix  

The multiple use of sprinkler systems in the Betuweroute tunnels from a civil engineering perspective  
P.A.A. Roelands  

The involvement of the public in planning and evaluating tunnel interventions on transportation networks  
P. Colonna & G. Fioretti  

Fire testing of precast tunnel elements  
D. Bjegovic, I. Stipanovic & M. Carevic  

**Immersed tunnels and submerged floating tunnels (SFT)**  

Understanding immersed and floating tunnels  
L.C.F. Ingerslev  

Immersed tunnels in the High Speed Railway Link in the Netherlands  
J.W.A. Geel & C.J.A. Hakkaart  

The Caland Tunnel – innovative solutions in immersed tunnelling  
M. Smitt  

A method for realignment or repair of immersed tunnels  
W.C. Grantz  

New Tyne Crossing, Newcastle, joint venture of bored and immersed tunnel completes the link  
J.C.W.M. de Wit & T.J. Fay  

Scrading* – a new approach to the foundation of concrete tunnel elements  
H. Smink  

Dutch High Speed Railway Immersed Tunnel Projects  
C.J.A. Hakkaart & W. ’t Hart  

A new concept for a steel shell submerged floating tunnel  
W.C. Grantz
- Presentation in the ITA open session

Metro tunnels under the Vltava River
J.L. Vitek

Immersed concrete tunnels in perspective
W.P.S. Janssen & F.F.M. de Graaf

The elevated immersed tunnel
J. Felch, J. Saveur & W.C. Grantz

Flexible joints between elements for large deformation
O. Kiyomiya

Cut-and-cover tunnelling

Design of cut-and-cover tunnels and stations: current practice
R. Williams, E. Sainsbury, S. Shanmuganathan & G. Chalmers

Crossing of High Speed Railway and A15 motorway viaduct
E.P. van Haastregt & S. van der Linden

Challenging cut-and-cover tunnel in Maastricht city centre
R. van Limbergen

A complex trench under Amsterdam Central Station
P. Bout & H. de Kruijff

Cut-and-cover tunnelling for Tokyo subway under three-level highway junction
I. Fujiki, S. Nagashima, S. Takahashi & A. Kosaka

Souterrain The Hague: re-design construction method and recent experiences with grout layers
J. Kruyt, J. de Jong, M.G.A. van den Elzen & Th.A. Feijen

Souterrain The Hague: scouring in case of sand boils through a jetgrout layer
D.R. Mastbergen, W.G.M. van Kesteren & A.F. van Tol

Souterrain The Hague: imperfections in jetgrout layers
A.F. van Tol & J.B. Sellmeijer

Souterrain The Hague: clogging of groundwater wells above a gel layer during construction of an underground tram station
H.J. Luger, E.E. van der Hoek & A.F. van Tol

Design and construction of RCC Culvert
H. Yamamoto & K. Ono

Steel fiber reinforced underwater concrete slab for the Botlek Railway tunnel in The Netherlands
W.J. Bouwmeester-van den Bos & C. Huisman

The design of an innovative composite wall for a deep excavation under Amsterdam Central Station
B.J. Schat & H. de Kruijff

Deep entrances for the Oude Maas and Dordtsche Kil tunnels
C.J.A. Hakkart & M. Woering

Rock tunnelling

Motorway tunnelling through the karstic rocks and active seismic faults of Kakia Skala
V. Avramea, A. Kalkantzi, I. Sakkas, E. Sarantopoulou & A.I. Sofianos
Uetliberg motorway tunnel (Switzerland)

O. Schnelli, D. Marti, S. Maurhofer, J. Bolliger & M. Voerkel

Continuous conveyor-based tunnel building in a soft-rock mountainous area – Hokuriku
Shinkansen Line’s Asahi Tunnel (West Side) construction works

M. Toyohara, N. Nishi & T. Hayashita

The reinforcement for a precipice of “Nikko Kegon fall” by anchoring from the inside
shaft without surface structure

F. Ito, I. Tuno & T. Saito

New evaluation procedure of the waterproofing systems for the Swiss Alpine base tunnels

P.H. Flüeler, M. Farshad, Ch. Löwe, H. Kramer, H. Böhn & P. Zwicky

Early behaviour of shot-sfrc as initial lining

Y. Yuan, X. Zhou & C.F. Lee

Berg Bock Freeway Tunnel: optimizing the heading technique and the operational safety for
the tunnel built by the shotcrete method

C. Erichsen

Constructing the undersea rock tunnel using various tunnel excavation techniques – construction of
a tunnel for discharging cooling water of a nuclear power plant

T. Yonetani, T. Nakagawa, K. Nagata & S. Fukuyo

Mechanised gallery drivage in coal seams with igneous intrusions

R. Singh

Problems concerning cutting tool performance during TBM work: modelisation
and testing of the rock under the action of the tool

N. Innaurato, C. Oggeri, P.P. Oreste & R. Vinai

Tunnel T8, Egnatia Highway – final design based on rock mass classification and engineering
modeling

B. Kister, J. Stahlmann, N. Loukatos & N.G. Kazilis

Application of hazard zonation technique for tunnel design in soluble rocks

U. Jeong, J.H. Kihm, J.H. Kim, S.J. Ma & Y.S. Yoon

Particular failure mechanisms of weathered granite observed during construction of metro tunnels
by TBM

P. Grasso, S. Xu, M. Del Fedele, G. Russo & E. Chiriotti

Handling of geotechnical information for an underground project in rock

J.B. Spyulkowski

Risk analysis for design and construction aspects of Mala Kapela tunnel

D. Kolic

Evaluation of mountain tunnel excavation method by means of 3D-numerical analysis

M. Shinji, M.J. Junica, K. Nakagawa, H. Takahashi & Y. Murata

Tunnelling in rockfall deposits – dealing with extreme asymmetry

L. Rondi & A. Theiler

Vibration velocity and damage on existing tunnel lining at widening of existing tunnel by blasting

M. Sakurazawa, Y. Fukushima & M. Sugimoto

Tunnelling in an undermined area

M. Bucek, M. Hert & R. Smida

Design and excavation of large-scale tunnels in squeezing rock

T. Kobayashi, J. Sato & F. Kusumoto

The construction and exploitation problems at Sveti Rok tunnel in Croatia

D. Tkalec, P. Sesar & A. Krecak
Shotcrete in underground excavation and influence of various parameters on its adhesion strength
D. Kumar, P.K. Behera & U.K. Singh

Tunneling and countermeasure design in unexpected squeezing rock zone
M. Yamazaki, T. Hironaka, K. Ito & T. Kato

Application of MBC analysis for a large section tunnel in jointed rock masses
T. Mori, K. Hibiya, K. Iwano, S. Morikawa & K. Tabei

The case study on using FRP multi-step grouting for reinforcement of tunnel in fracture zone
J.H. Park, Y.K. Choi, J.D. Lee & G.J. Bae

Shaft and tunnel lining design in brittle rock and very soft ground
N. Bulychev & N. Fotieva

Experience from the Southern Link, Stockholm and the future development in fibre-reinforced shotcrete
T.P. Ellison & B.I. Karlsson
