General Abstract
Table of Contents
Preface
The post-Ramiran Study Tour

General Session
Welcome address to the participants from the Regional Minister of Agriculture
Welcome address to the participants from the Mayor of Gargnano
Welcome address to the participants from the Director of the “Comunità Montana”

Pellizzi G. – The Italian National Research Programme on: “Recycling the wastes of the agro-industrial system”

Tomati U. – Activities carried out as part of the olive mill waste sub-project

Sangiorgi F. – Activities carried out as part of the animal waste sub-project

Junger J.F. – The research activity financed by EU in the field of sustainable management and quality of water

Network activities

First Session: Legislation and codes of good practice

Duchemin J., Marmo L. – Organic waste valorisation and soil protection: European legislation

Bertoncini G. – The approach of Lombardy Region to manure management and environmental protection

Carton O.T., Magette W.L. – A brief review of Irish legislation in relation to its implications for nitrogen and phosphorus use in agriculture

Grignani C., Bassanino M. – A fertilization balance sheet: limits and quality of information required

Lupton S. – Public and private standards on agricultural use of sewage sludge in France

Verlicchi P., Masotti L. – Reuse of drinking water treatment plants sludges in agriculture: problems, perspectives and limitations

Mezzadri M., Da Borso F. – Wastes or By-Products? Environmental legislation and technical development in the olive oil sector in Italy

Olasz Z., Marth P., Ruszkabánya A. – Possibilities of using wastes on arable lands in Hungary

Provolo G., Riva E. – Results of a GIS on manure management plans in Lombardy (Italy)

Second Session: Control of water and air pollution

Magette W.L. – Controlling agricultural losses of pollutants to water and air: challenges for technology transfer

Balsdon S.L., Williams J.R., Southwood N.J., Chadwick D.R., Pain B.F., Chambers B.J. – Ammonia fluxes from solid and liquid manure management systems for beef cattle and pigs
Airoldi G., Balsari P., Gioielli F. - Ammonia emissions from dairy cattle exercise areas pag. 121

Hörnig G., Stollberg U., Fenyesi L., Mátyás L. - Environmentally relevant emissions from modernized fattening pig houses in Hungary pag. 127

Honot S., Michelin J., Génermont S., Vergé C., Franeau C., Burgeois S., Caria G., Ciesielski H., Clergeot D. - Evaluation of soil, air and water impacts of urban compost use in agriculture pag. 133

Menzi H., Kuellings D., Neftel A., Kreuzer M. - Ammonia emissions from liquid and solid manure as influenced by ration composition pag. 141

Ortova O.V., Barbolina I.L., Otabong E., Arkhipenko I.A. - Impact of active sludge and treated water from pig-farm wastewater treatment plant on the quality of groundwater and surface water pag. 147

Valli L., Fabbri C., Bonazzi G. - A national inventory of ammonia and greenhouse gas emissions from agriculture in Italy pag. 133

Webb J., Chadwick D., Ellis S. - Will storing farmyard manure in compact anaerobic heaps be a simple and effective means of reducing ammonia emissions? pag. 161

Third session: Compost, manure, slurry and sludge management and treatment pag. 167

Duarte E.A., Neto I., Queda C.C. - An integrated waste management technology applied to a swine intensive production unit without available farmland pag. 175

Böhm R. - Hygienic problems in recycling organic wastes and organic sludges pag. 181

Matsuda J., Abe Y., Okamoto E., Maeda T. - The effects of dilution on nitrogen decomposition and ammonia emission in slurry during aerobic treatment pag. 193

Piccinini S., Bonazzi G. - State of the art of quality composting in Italy pag. 199

Simoni A., Ciavatta C., Brunetti L. - Management of swine manure in a great potential breeding: analysis of the operating factors pag. 205

Venglovsky J., Sasáková N., Vargová M. - Changes in chemical properties of stored pig slurry solids amended with zeolite pag. 217

Fourth session: Spreading of compost, manure slurry and sludge pag. 223

Huijsmans J.F.M. - Field application aspects of organic material on farm land pag. 225

Bernat C., Casado D., Ferrando C., Paulet S., Pujol M., Soliva M. - Compost, manure and sewage sludge applied to a crop rotation pag. 231

Cordovil C.M.d.S., Cabral F., Coutinho J. - Dynamics of nitrogen in soil from organic residues mineralisation pag. 237

Gendebien A.H., Davis R.D., Brunet H., Orsi C., Marmo L. - Survey of wastes spread on land in the European Union pag. 243

Hansen M.N. - Development of solid manure spreaders with a view to spreading evenness pag. 249

Morari F., Berti A., Borin M., Giardini L. - CROPSYST model in simulating cropping systems with different input levels pag. 257

Williams J.R., Chambers B.J., Ellis S., Misselbrook T.H., Chadwick D.R. - Integration of farm manure nitrogen supply within commercial farming systems pag. 263
Fifth session: Technology transfer
Sanchez M., Steinfeld H., Alvarez L. - The FAO European Networks and the livestock environment and development initiative pag. 269
Amon T., Boxberger J. - Bio gas production from farmyard manure pag. 271
Carlson G., Steineck S. - Demonstration watersheds as a tool for transfer of technology and knowledge to farmers pag. 275
Fang Y., Yang J.S., Kjaer S.S., Gerber P., Ke B.S., Menzi H. - Area-wide integration of specialised livestock and crop production in Jiangsu Province, China pag. 281
Rattanarajcharulkul R., Rucha W., Sommer S., Menzi H. - Area-wide integration of specialised livestock and crop production in Eastern Thailand pag. 287
Salazar F.J., Dumont J.C., Santana M., Pain B.F., Chadwick D., Owen E. - A survey of dairy effluent management in the South of Chile: an effective tool to determine farmers and research requirements pag. 295
Sorensen C.G., Sommer S.G. - An assessment tool applied to the manure management system with the potential to facilitate knowledge transfer to Third World countries pag. 301
Willers H.C., Aarnik A.J.A., Ogink N.W.M., Hamelers, H.V.M. - On-farm processing of urine and solid manure fractions of fattening pigs in the Hercules System pag. 307

Poster Session
Session 1 – Legislation and codes of good practice
Galli E., Rapanà P., Panaitescu E. - GIS on olive mill industry in Italy pag. 319

Session 2 – Control of water and air pollution
Balsari P., Airoldi G., Gioielli F. - Ammonia volatilization: a comparison of measuring techniques pag. 325
Borka G., Menzi H., Neftel A., Langhans W. - Development of an empirical model for ammonia emissions from slurry in cattle houses pag. 329
Brunsch R., Hörning G. - Ammonia and odour emission control by using brown algae with drinking water and feed additive pag. 333
Ceotto E., Spallaci P., Vaccari A. - Simulating water percolation and nitrate leaching with the EPIC model: a case study for 4 soil types manured with pig slurry in lysimeters pag. 337
Fabbri C., Valli., Bonazzi G., Rossetti M. - Laboratory tests on additives to reduce ammonia emissions from pig slurry pag. 341
Génessens S., Flura D. - Ammonia volatilization after land disposal of odd effluents pag. 345
Goossens A., Sharpe R., Magliulo V., Alterio G., Van Cleeumpot O. - Trace gas emissions from a manure fertilized alfalfa field pag. 349
Huijsmans J.F.M., Hol J.M.G., Hendriks M.M.W.B - Effect of application technique and external factors on ammonia volatilisation from manure applied to grassland pag. 353
Juris P., Papajova I., Lauková A., Dubinský P., Rataj O., Sokol J. - Penetration of bacteria, helminth eggs and organic matter from pig slurry through the soil horizon pag. 357
Magliulo V., Peressotti A., Alterio G. - Improved microclimate techniques for monitoring trace gas emissions of animal waste pag. 361
Mantovì P., Fumagalli L., Cortellini L., Beretta G.P. - Monitoring of unsaturated zone nitrate migration in experimental fields in the Emilia-Romagna Region (Northern Italy) pag. 365
Missetbrook T.H., Balsdon S., Pain B.F., Gibbs P.A., Parkinson R.J. - Gaseous emissions from on-farm composting of cattle farm yard manure pag. 369
Motz I., Kutzbach H.D. - Greenhouse gas emissions after slurry incorporation pag. 373
Navarotto P., Bonazzi G., Fabbri C., Guarino M. - New systems of manure removal to reduce gas emissions in existing pig housing pag. 377
Session 3 – Compost, manure, slurry and sludge management and treatment

Garcimartín M.A., Vazquez J., Aree A., Allue E. – The study of a management system of wastes at the Polytechnical University of Madrid

Arkhipchenko I.A., Likhachev Y.M., Orlova O.V., Fedashko M.Y. – Application of microbial communities for intensification of the process of municipal wastes fermentation

Aubert C., Yulipriyanto H., Robin P., Morand P., Bline D., Tricot G. – Effect of various additives on the composting of chicken manure

Bernal M.P., García-Gómez A., Roig A., Paredes C., Cegarra J. – Changes in the composition of the wastes generated by different systems of the olive oil industry

Ciavatta C., Franciosa O., Tognoli V., Gessa C. – Evaluation of the quality of organic matter of compost using spectroscopic techniques (DRIFT and 1H NMR)

da Borso F., Chiumenti, Catalano L., De Nobili M. – Design and management of an olive husk composting pilot plant

García-Gómez A., Bernal M.P., Cegarra J., Roig A. – An alternative use of composts from agroindustrial wastes: as substrates for ornamental plants

Kusá H., Růžek P., Hrazdira J. – Sewage sludges treated by lime and their recycling

Mazza A., Sironi S., Fioretti L., Andreoni V., Botta D. – Limonene biodegradation: a tool for investigating the odors formation in the composting plants

Novák P., Lukešov D., Venglovský J., Šasíková N. – Storage and treatment of farm animal excrement from the hygienic and ecological point of view

Pedrazzi L., Sardi E. – Milking wastewater treatment in a moving bed biofilm reactor

Rossi L., Piccinini S., Valli L. – Humification indices to evaluate quality of organic matter of composts from solid fractions of pig slurry

Vargová M., Venglovský J., Šasíková N. – Microbial decomposition processes in pig slurry solids stored with natural powder zeolite and/or sawdust

Session 4: Spreading of compost, manure, slurry and sludge

Arkhipchenko I.A., Deriks P.L. – Peculiarities of polyfunctional microbial fertilizers from pig and poultry farm wastes

Bassanino M., Grignani C. – Evaluation of the fertilization management at farm level: some case-studies on phosphorous

Bisaglia C., Centenere M. – A field scale comparison between some existing systems and an overflow-discharge screwconveyor prototype for compost application

Borin M., Giupponi C., Berti A., Morari F., Giardini L. – Agronomic and environmental effects of increasing rates of cattle liquid manure on yield of maize in presence and absence of irrigation

Borin M., Morari F., Berti A., Lugato E., Andreoli L., Marini G. – Effects of liquid cattle and swine manure on NO3-N concentrations in leaching water in two crop successions

Cavallo E. – Modified manure spreader for the mechanised distribution of organic substances for mulching tree cultivations

Baldoni G., Mantovì P., Cortellini L., Todeti G. – Effects of a nine-year application of sewage sludge and compost on soil and crops plants

Page 4
Foppa Pedretti E., Riva G., Toscano G. - Agronomic utilisation of wet olive husks: results of a three-year trial

Giardini L., Borin M., Berti A., Morari F., Giupponi C. - Effects of fertilisation in cropping systems with and without liquid cattle manure

Ilieva V. - Optical characteristics of waste water irrigated plants

Parnaudeau V., Herre C., Guillouais S., Paubon S., Justes E., Nicolardot B. - Assessing the N value of sewage sludge in field conditions using a calculation model

Provolo G., Guidetti A. - A decision support system for slurry spreading system at farm level

Salazar F.J., Pain B.F., Chadwick D., Owen E. - Nitrogen losses and uptake in ryegrass & clover sward and maize/rye rotations fertilised with cattle manures with different dry matter contents

Siegenthaler A., Häni H., Stauffer W. - Heavy metal contents in crops resulting from long term excessive waste application

Zoccarato I., Gasco L., Amaral H.Jr. - Use of pig slurry as fertilizer in pond carp production in Northern Italy

Session 5: Technology transfer

Bogun G. - Technology for using organic fertiliser and environment protection

Cavallo E. - Italian law provisions for manufacturing and circulating on the road of manure spreaders and slurry tankers

Martínez Almela D.J. - The possibilities of stockbreeding effluent and excrement: modular alternatives for appreciation and reuse. Available technologies for animal residuals treatment, use and disposal

Landonio S., Mazzetto F., Salvi M. - Development of an automated and modular system for slurry tanks

Provolo G., Tangorra F.M., Bettati T. - A tool to support the design of pipeline slurry transport systems

Foppa Pedretti E., Riva G. - Production and use of wastes from the agricultural and food industry: the Italian case

Venier R., Antignati E. - Utilization of animal wastes in agriculture: an experience in a commercial farm

Record of General discussion

Magette W.L. (editor) – The General Discussion

List of participants

The visit to Villa Bettoni in Bogliaco (Gargnano)
