Field Measurements in Geomechanics

Edited by

Frank Myrvoll
Division for Monitoring and Geophysics
Norwegian Geotechnical Institute
Oslo Norway
Table of Contents

Preface XI
Organisation XIII

Theme 1 Case histories

Comparison of degree of improvement assessed by observational methods using field instrumentation
A Arulrajah & H Nikraz 03

Behaviour and stabilization of a natural slope excavated at the toe
J E Barradas 11

Field study on piled raft foundation of twelve storeyed building at Chennai
V Balakumar & K Ilamparuthi 17

Castrerccio Dam the history and evolution of the dam monitoring system
C M Brutti E Perfetti & A Zattoni 23

Performance of a row of spaced bored piles used to stabilise a Gault Clay slope on the M25
D R Carder R K W Lung & K J Barker 31

Load test program for the Bandra Worli Sea Link Project
C W Felice 39

Correlation of cone resistance with undrained strength of some very soft to hard cohesive clays
B Gebreselassie H G Kempfert & M Rathel 45

Monitoring a preload test on soft ground
A Gens & A Lloret 53

Application of a new integrated multi parametric monitoring system for the analysis of micro movements in the Civil Protection activities An example
F Giuffredi L Zanolimi & L Foglino 61

Geological analysis based on tunnel monitoring in Taiwan High Speed Railway Project
Y Goto R Abe T Fuji & S Omura 67

Observed platform response to monster wave
O E Hansteen H P Jostad & T I Tjelta 73

Electrical resistance tomography system to monitor an acid rock drainage (ARD) waste rock repository
G Heath R Versteeg D Paul R Markiewicz & K Wangerud 87

Geotechnical investigation of the New Baltimore Slide
K M Heinrendt A N Styler & C F Henderson 95

Vibrations from the demolition of a large offshore platform
H Heyerdahl C Madshus K Tronstad & E Lied 103

Vibrations due to driving of large displacement concrete piles in residual granitic soils
C E Ho & C G Tan 111
Comparison of field measurements and predicted performance beneath full scale embankments  

B Indraratna & I Sathananthan  

Load tests on straight and step tapered bored piles in weakly cemented sand  

NF Ismael  

Web based displacement monitoring system using GPS for the maintenance of roadside slopes  

T Iwasaki K Takechi A Takeishi T Masunari Y Takechi & N Shimizu  

Field model tests for a novel suction anchor application  

P Johansson PM Aas & S B Hansen  

Evaluation of initial state of lumpy fill in land reclamation  

M Karthikeyan TS Tan GR Dasari KK Phoon RG Robinson GP Tan CP Tee & PW Lam  

Instrumentation and monitoring of combined piled rafts (CPRF) state-of-the-art report  

R Katzenbach & Ch Moormann  

STATNAMIC load testing on a bored pile for a bridge foundation and monitoring of load distribution of the piles during construction of the bridge  

P Kittiyodom T Matsumoto & H Matsui  

Tunnel deformation during excavation – a kinematic approach based on geodetic observations  

VA Kontogianni & SC Stiros  

Full-scale testing of the reinforced soil Segmental Retaining Wall  

SH Lee TH Koh SK Hwang JW Lee & JM Kim  

Comparison of conventional and Osterberg cell pile load tests  

C F Leung & R F Shen  

Behaviour of a diaphragm wall in dense gravels  

M Long & B Dhouwt  

Puttesund Bridge – instrumentation for strengthening and lifting  

I Markey  

Prediction of tunnel behavior in time dependent soft rock using displacement measurements of borehole  

H Mashimo & H Shiroma  

The construction of a high geosynthetic reinforced soil structure  

N Meyer F Bussert & H Obermeyer  

Geotechnical long term monitoring impact of groundwater lowering on adjacent high rise buildings  

Ch Moormann  

Monitoring program for an unlined headrace tunnel in unfavourable ground conditions  

F Myrvoll SB Hansen JA Rotti & A Halvorsen  

Pile raft soil interaction in piled-raft foundations design  

NZ Gotman  

An attempt to explain the complex behaviour of a simple cylindrical arch dam  

C Oosthuizen RH Goldie & CJ Dorfling  

Geodetic surveying & TRIVEC monitoring system at Katse dam value added or waste?  

C Oosthuizen PA Naude CJ Pretorius VF Mota & FPJ Muller  

Total and pore pressure cells method in the madness  

C Oosthuizen PA Naude & LC Hattingh  

Observational construction procedure of pipe roofing based on back analysis  

T Otani R Sasaki M Maeda S Torii M Shinji & S Sakurai
Estimation of overconsolidation ratio from piezocone tests in Singapore marine clays

KK Phoon HE Low & TS Tan 287

Influences on the performance of piles observed by means of field measurements on combined pile raft foundations

O Reul 293

Behaviour of a large diameter bored pile in a sandstone

P Rocha Filho 299

Radioactive waste disposal in geological salt formations – current concepts, possible improvements and status of underground field testing

T Rothfuchs & W Brewitz 307

A comparison between predicted and observed behavior of Alavian dam Iran

J Sadrekarimi MA Kia & A Sadrekarimi 313

An evaluation technique for slope stability based on displacements measured at the slope surface

S Sakurai K Adachi A Takeishi & T Iwasaki 321

Determining the mass modulus of soft rocks in the Middle East

P Scott 329

Deep basement construction in central London – how field measurement reflected prediction

P Scott 335

Large scale field measurements on geocontainers during the dumping process

R R Schryver A Bezuwen A JM Peters & E Berendsen 341

Stabilisation of endangered clay slopes by unconventional pore pressure release technique

R Schulze & H J Kohler 347

Investigation of surface settlement induced by underground metro excavation in Tehran

N Shariatmadari & M Rezania 355

Stress measurement in Carboniferous massif in eastern Czech part of Upper Silesian Basin and numerical model

L Stas A Kolcun J Simkovicova & K Soucek 361

Geotechnical instrumentation of an earth buttress soil nailed slope

S A Tan WL Cheang PH Ooi & K Y Yong 369

Measurements of ground deformation around an advancing NATM tunnel heading

JP van der Berg & CRI Clayton 377

Repository concepts for nuclear waste disposal in clay formations

J Verstrucht P Blumling & T Merceron 387

Monitoring of complex rock slope instabilities – correction and analysis of inclinometer/extensometer surveys and integration with surface displacement data

H Willenberg K F Evans E Eberhardt & S Loew 393

Observational construction using the TBM excavation control system

T Yamamoto S Shurasagi Y Mito S Yamamoto & K Aoki 401

Theme 2 Measurement technology

Displacement measurement by image processing in a field test on dike failure

H GB Allersma 411

Dam crest measurements using differential GPS as a part of an integrated monitoring programme for small concrete dams

C Bernstone 419
New multilevel groundwater monitoring systems for use in heterogeneous rock and soils
N Brownlie R Epps H Edmonds D Harris & HR Fisch

Behavior of closed vibrating wire piezometers corrected for temperature and barometric effects used to monitor water level in overflow weirs
E Brylawski

Permanent real time microseismic monitoring of abandoned mines for public safety
S Couffin P Bigarre M Bennani & J P Josien

A case study of vibrating-wire sensors that have vibrated continuously for 27 years
E DiBiagio

New developments in TDR cable surveillance of potential instability
CH Dowding ML Dussud & KM O Connor

Long-term instrument performance – experience from a large scale test in rock salt
J Droste & T Rothfuchs

In situ monitoring of hydrocarbon biodegradation in frozen arctic soil
B Engene & A G Rike

Long term performance of vibrating wire gages based on field and laboratory testing
AI Feldman GJ Buechel H L Ellis & MS Kucker

Controlled boring process (CBP) – a new approach to deformation reduced tunneling in urban areas
C Frenzel & U Rehm

A method for piles monitoring using long gage fibre optic sensors
B Ghsw D Inaudi S Vurpillot & C Nan

Performance of pore pressure transducers in soft clay and peat
G Greeuw RR Schryver & AJM Peters

Evaluation of rock mass elastic constants by using earthmover load
S Kawasaki K Kaneko Y Obara N Nakamura & R Tsukayama

The use of Differential Monitoring Stability (DMS) for remote monitoring of excavation and landslide movements
M Lovisolo S Ghirotto C Scardia & M Battagho

SOILWATCH – a ground and groundwater environmental monitoring system
T Løken

Monitoring a harbor structure during reinforcement using a GPS based monitoring system
L Manetti & B Ghsw

GPS based continuous displacement monitoring system
T Masunari K Tanaka H Okubo H Okawa K Takechi T Iwasaki & N Shimizu

Piezometers in fully grouted boreholes
PE Mikkelsen & GE Green

Advances in inclinometer data analysis
PE Mikkelsen

Vision metrology applied for configuration and displacement measurement
S Mura M Imai Y Ohnishi S Hattori & K Akimoto

A new study on the reliability and quality assurance of inclinometer measurements
Ch Moormann
A study on new soil investigation method using seismic waves generated by dynamic penetration tests
Y Murata H Saito M Takemori T Takahara & N Sugawara

In-situ shear box and root pull out apparatus for measuring the reinforcing effects of vegetation
JE Norris & JR Greenwood

A simple 3 Dimensional crack width-tilt gauge out of Africa
C Oosthuizen PA Naude & CJ Dorfling

Development of an improved load cell for construction work
G Price IF Wardle & P Rocha Filho

Grouted rockbolts instrumentation using Fabry-Perot sensor – preliminary investigation
M Qurion & C Kamichats

Low cost extensometer to measure strains in geogrids
M Robinson F Saidin & R D Holtz

Geotechnical tools in the abyss a useful experience for innovative instruments
JF Rolin J Meunier & P Jegou

Slope failure monitoring during embankment excavation
J Rosenfield

Development and implementation of the downhole freestanding shear device
OA Safaqah M F Riemer & C Grizzle

The measurement of stress in concrete
B Sellers

Displacement monitoring using GPS and its interpretation method for the assessment of slope stability
N Shimizu & H Matsuda

Displacement measurement on tunnel face by using photo survey and its estimation by 3D numerical analysis
M Shinji S Morimoto M I Junca K Nakagawa & T Endo

The problematic management of the displacement monitoring system of a landslide
L Simeoni & L Mongiovi

Investigation of permeability and evaporation of rock mass around a tunnel
T Tam T Koyama M Mnami & T Maejima

A deep gallery excavation in clay monitoring our modelling skills
J Verstricht W Bastaens F Berner & XL Li

Penang Bridge deformation monitoring using Real Time Kinematic GPS
a first experience in Malaysia
WA Wan Aziz & D Mimi

Development of a Retrievable Subsurface Accelerometer
D H Whang PJ Fox T Nolan III & P Nolan

A new in situ thermal experiment in the argillaceous rock of Mont Terr laboratory using Optical Fiber Bragg Grating sensors
Y Wileveau V Dewynter Marty S Rougeault & P Ferdinand

The DI B experiment instrumentation to perform an in situ diffusion experiment
A Yllera JM Barcala A Hernandez & PL Martin

A new geotextile strain gage
J Aasen & RD Holtz
Theme 3  Planning  administration and quality assurance

King's Cross Station Redevelopment  London  design of the monitoring system  731
M Beth S Macklin & Z Nichols

A relevant geotechnical and structural monitoring project  the experience of
the new Milan-Bologna High Speed Railway Line  739
R Di Bianco E Pressi G Maggi & G Pezzetti

Planning  administration and quality assurance of instrumentation projects – an overview  747
J Dunnichff

Components of structural monitoring process and selection of monitoring system  755
B Glisin & D Inaudi

Eliminating lightning damage for field data acquisition systems  763
J M Klebba

Amsterdam Noord/Zuidhijn  one of the largest settlement monitoring projects in Europe  769
FJ Kaalberg S Braakman & DK Cook

Use of the Internet for quality assurance of construction projects  775
A JM Peters & WO Molendyjk

Quality assurance in the supply and procurement of instrumentation components and systems  781
G Pezzetti D Bruzzi & G Sørum

Repository concepts for nuclear waste disposal in crystalline rock  789
G R Simmons P Blumling F Huertas T Merceron J P Salo & C Svermr

An approach to long term preclosure and postclosure monitoring for a nuclear
fuel waste repository  799
PM Thompson & G R Simmons

Author index  811
