Proceedings of the 2\textsuperscript{nd} International Specialty Conference on

THE CONCEPTUAL APPROACH TO STRUCTURAL DESIGN

1 – 2 July, 2003 – Milan, Italy

Venue:
PIRELLI & C REAL ESTATE Headquarters
Milano-Bicocca, Italy

EDITORS:
Prof F Mola, Politecnico di Milano, Italy
Er John S Y Tan, CI-Premier Conference, Singapore

With the support of:
"Pirelli – Project Management Group"

Sponsors:
- Politecnico di Milano, Italy
- Collegio degli Ingegneri e degli Architetti di Milano, Italy
- Int'l Assn of Shell & Spatial Structures - IASS
- Structural Engineering Institute SEI, USA
- Continental Automated Buildings Association, USA

Conference Secretariat:
CI-Premier Conference Organisation, Singapore
TABLE OF CONTENTS

• Preface iii
• Message iv
• Table of Contents v

Volume 1 (page 1 to page 458)
Volume 2 (page 459 to page 898)

Keynote Papers

The influence of formwork technology on conceptual design of structures [abstract only] 1
C Carini and R Meroni

Conceptual design: a breath of inspiration or an indispensable process of rigorous, conscientious and deep search of the optimal solution 3
H Corres Peiretti*, J R Martin and A P Caldentey

Modern concepts for precast concrete buildings 15
K Elliott*

Conceptual design of efficient floor structures 31
G C Giuliani*

The use of high-strength rebars for high rise reinforced concrete buildings in Japan 41
H Imai* and J J Castro

What can structures do for human joy [abstract only] 49
M Kawaguchi*

Use of high strength concrete in tall building structures 51
A K H Kwan* and Y K Cheung

Updown construction of tall buildings 67
S L Lee* and S Swaddiwudhipong

Conceptual design of bridge structures: some examples 101
A Samartin* and J A Llombart

Concrete surface as exterior and interior finish [abstract only] 115
M Sugawara

Special Session

Architectural and structural design approach in the new quarter of Milano Bicocca

Structure and architecture: two aspects of the same problem [abstract only] 117
V Gregotti

Conceptual approach to structural design : some experiences in Pirelli-Bicocca Design 119
A Vintani
Special Session
Architectural aspects and structural of upgraded historical buildings

The architectural heritage of Dodecanese (Greece) built during 1912-1943
N Avramidou*

Reconstitution of the structural integrity and design premises of a concrete dam
T Cavalli* and P H Tsingos

Structural safety and maintenance conditions of the highway church by Giovanni Michelucci
S Chiostrini* and L Galano

Experimental analyses of two methods for estimating in-situ tensile force in tie-rods
L Facchini*, L Galano and A Vignoli

No-invasive geo-electrical methods as diagnostic tools to quick explore shallow sites of archaeological and civil engineering interests
G Finzi-Contini*

A conservative strengthening intervention on Palazzo Landi in Piacenza masonry vaults
G. Giacomini

Technical Papers

Some iron railway bridges of the 19th century in Italy: historical considerations and recent investigations
D Abruzzese, M Ferraioli, P Malangone* and A Zambrano

Structural behaviour of concrete beams reinforced with NEFMAC reinforcement
M M Aburawi* and A M Al-Rifai

Future of structural engineering
A K Aggarwal*

A Rational use of FRP rebar in design of reinforced concrete flexural structures
M A Aiello* and L Ombres

A methodology for the structural analysis of concrete members reinforced with FRP rebar
M A Aiello* and L Ombres

The use of a nonlinear optimisation techniques for the design of a new light weight rail track system treated as a multilayer beams on elastic foundations
H Al-Nageim*

Structural conception and construction methods in the design of a segmental prestressed concrete bridge
M Arici and M F Granata

Stability of physically and geometrically non-linear spatial composite rod systems
O D Astafiev* and I A Fedotova

Application of the quality assurance systems in the rehabilitation of the architectural heritage
N Avramidou*

Load path method in the conceptual design of R C structures
N L Baglivi, F Palmisano*

Behaviour of masonry walls subject to shear stresses and reinforced with FRCM
A Barbieri, G Mantegazza and A Gatti

Numerical analysis of prestressed concrete frames
R A Barbieri*, F P S L Gastal and A Campos Filho

Complete calculation of lame plinth at constant height
B Bartolozzi and F Bartolozzi*
Technical Papers

Skew reinforcement design in reinforced concrete two dimensional elements
G Bertagnoli, V I Carbone, L Giordano and G Mancini*

HISTRIDE-An integrated software environment for dynamic structural calibration
L Bolognini and A Frigerio*

Special fibre reinforced cementitious matrix (CRCM) for the strengthening of reinforced concrete beams
M Calda, A Trimboli and G Mantegazza*

Seismic behaviour of exterior beam-column joints using mechanical anchorages
J J Castro*, H Imai and M Kikai

Shear strength in high performance reinforced concrete beams
S Cattaneo and G Rosati

Structural design for long span and high rise structures – structural design as a teaching subject
A Cauvin and G Stagnitto

Original aspects related to the structural design of the Arcimboldi theatre in Milan
G C Cerra, F Mola, G Parodi*, P Spinelli and A Vintani

Project for a P.C. exhibition pavilion
M Chersich, M Mandelli Contegni and S Valloni

Structural application of grc for precast floor
D Cian and B Della Bella*

Conceptual design of cable-stayed bridges
M De Miranda*

Widening of a historic multiple-arch concrete viaduct by integrated new fly-overs
B De Pauw and P Van Bogaert*

Performance based design of cable stayed bridges
S Di Bernardo*

A new concept in utilizing of continuous carbon fibre as reinforcing material for concrete structures
R Djamaluddin*, S Hino, K Yamaguchi and T Ohta

Learning structural design in an architecture class
B Dytoc*

Nonlinear behaviour of stepped shear walls
E A El-Shamy and Thanwat A Sakr

Behaviour of retrofitted RC beams with rectangular openings
M B H Emara and T A El-Sayed*

IZMIR – Karsiyaka tunnels and the problems encountered during the excavation
M E Ertem, C Tatar and H Kose

A conceptual design for a power cavern
A Fava* and L Zanelotti

Non metallic (MCP) fibre reinforced concrete: experimental results and slabs on grade
design aspects
F Focacci* and G Mantegazza

Viscoelastic geo-structure seismological evolutions affecting Umbria and Molise areas for long periods
G Finzi-Contini*
